given of the floating rumors affecting the standing and prospect of these properties. The Boston *Traveller*, of Tuesday, says: "Up to the close of business yesterday 79,342 shares of the Westinghouse Electric Com-pany's stock had been deposited with the Mercantile Trust Company, of New York, under the plan of reorganization. Mr. West-inghouse is in Boston to-day, and expressed himself as well pleased with the progress that is making toward a reorganization, and also with the favorable business outlook for the company."

Leading brokers think that a big bull Leading brokers think that a big bull movement in stocks will begin within the next 30 or 40 days, at the latest, if nothing occurs in the mean time to seriously damage the crops on this side, and its real start will be on the appearance of the Government crop report at the beginning of July, al-though they expect to see the coming rise discounted a little in advance. They argue that there will be a market in Europe for all our surplus crops, and that our credit has been so strengthened there by the gold we have shipped, without disturbing our own market, that a large foreign demand for our securities is sure to follow. There seems to be good foundation for the report of a big deal in local stocks—one that will lay the Kountz deal in the shade. A gentleman supposed to be on the inside ad-mitted this much yesterday, but added that it wouldn't be ripe for perhaps three months.
