The bill proposed to impose a per capita tax of \$3 upon all unnaturalized male citizens of the State who own no real estate or other taxable property valued for taxable purposes at or above \$200 and situated in the county in which he may reside or is employed. The Governor says of this and other provisions of the bill;

This discrimination would, in all prob This discrimination would, in all proba-bility, be found by the courts to be a viola-tion of the constitutional principle that taxes shall be uniform upon the same class of subjects within the territorial limits of the authority levying the tax, and shall be levied and collected under general laws. If this tax is to be levied and collected under the general law of the commonwealth it is very much to be doubted whether that is a "authorit" law which exampts. ery numer to be doubted whether that is a uniform" law which exempts from a per apila tax a subject who owns land in one ounty and imposes it upon the same class of persons whose real estate may be situated county and imposes it upon the same class of persons whose real estate may be situated in another county. Such a classification is not tolerable; but the method which is pro-vided for the collection of this tax is highly objectionable and wholly impracticable. All employers of labor must make inquiry into the nativity of their male couployes, and must accertain whother or not they have been natu-ralized if over the age of 21 years. They must make monthly reports to the poor authori-ties of their districts and deduct from the wages of such employees, on each monthly pay day, the sum of 25 cents, thus making at once an assessor and tax collector out of once an assessor and tax collector out of every corporation, firm or individual in th every corporation, firm or individual in the Commonwealth employing, perchance, a foreign born workman who is not natural-ized. It is practically a delegation of the Commonwealth's tax-levying and tax-col-lecting power to a host of privates persons, and in default of their performing this duty they are to be subjected to a pensity of double the amount of the tax imposed upon the manunalized annihova which employ double the amount of the tax imposed upor the unnaturalized employes, which penalty the bill vaguely prescribes "shall be collect ed as other taxes are collected." Inasinucl as 'other taxes' are collected in many dif-ferent ways, the uncertainty of this pro-vision would render it wholly nugatory, so that even if the bill were based on sound principles, either of public policy or of po-litical economy, its provisions are so im-practicable as to render any attempt to en-force it futile.

## A Singular Chapter of Accidents Which Happened to an Allegheny Family.

It has often been said that misfortunes never come singly. An unfortunate illustration of the axiom is furnished by a series of accidents which have overtaken the family of Mr. Martin Gannon, of Allegheny. J. H. Kelley, his son-in-law, while driving in Johnstown two weeks ago was thrown from his buggy, sustaining a dislocation of the shoulder and several severe injuries.

Mr. Kelley recovered to return home in time to be a witness of serious injury sustained by his father-in-law, who jumped from a moving train in the Ft. Wayne yards and broke his arm, besides cutting his head. On top of these mishaps news was received of the fire on the City of Rich-mond, on board of which were Mrs. Gannon and her two daughters. Mrs. Gannon is so prostrated by the shock received on the shit that she has not been informed of the accidents to her relatives.

It belongs to the same category as cut glass, lustre chandeliers, the ormolu drawing room mirror, Louis Quinze furniture, tinsel and spangles and gaudy gewgaws in general. This is not a mere matter of opinion; if people will look it straight in the face, they will see at once it is a matter of will see at once it is a matter fact. Nobody would endure diamonds they were not so costly. Nobody does endure them when they are paste and pinch-beck. It is the knowledge that they mean so much money expended which renders them fashionable and endurable at all. Precisely similar bits of shining glass, with

facets just as clear cut and lustre just as brilliant, when made of good honest paste, are universally scouted as in the most atrocious style possible. "But the diamond," everybody says,

so much purer, so much brighter, so much learer, so much more luminous! Its sheen is finer than any imitation, its lucidity deeper, more transparent, more scintillat-ing!" You think so? Well, as matter of fact, that is not true; and every expert will tell you so. The truth is, only such experts can discern by mere inspection the difference between a gem of the first water and a good paste facsimile. As a mere æsthetic question, the one is worth, to 99 out of 100 of us, every bit as much as
