SPRING LAMBS AND PORKERS STEADY

OFFICE OF PUTTSBURG DISPATCH, MONDAY, June 22. There were 120 carloads of cattle on sale at the East Liberty yards this morning, against 76 loads on last Monday and 50 loads the previous Monday. The number on sale was larger to-day than any day this year, and

though statistics are not at hand, the as-sertion is ventured that there were more mitle on sale to-day than there have been at ny one time for a year past. While offerour local trade, buyers were comparatively few. Not above a dozen carloads of to-day's few. Not above a dozen carloads of to-day's supplies were from Chicago. Ohio, Indiana and Pennsylvania furnished the bulk of the offerings. A month ago Chicago was the chief source of supply for the East Liberty vards. Last week and this comparatively little is coming from that source. As to quality of beeves on this week's market, there were no heavy primes and very few light prime cattle. Butchers whose trade calls for the best beeves generally ofder their stock direct from Chicago.

Wheat Generally Strong, but Dispa Teiling of Bad Weather Prevent a Large Business and Have a Bullish Tendency-Corn Firm but Beaction Follows. CHICAGO-Wheat was generally stron to-day, especially around the opening. Cables were about steady. There were disatches telling of bad weather from variou oints in winter wheat belt where the har vest is now in progress, but the weather map indicated much more clear weather in ose sections than during the latter part o

last week. Private advices from Kansas, Nebraska, Central Ohio and parts of Indiana were received, telling of deterioration in the condition of the crop. These were bullish in

their effect, but apparently the chief factor leading to an advance in prices at the opening was the fearful manipulation in July. Only a few days remain until July will be-

ing was the fearful manipulation in July. Only a few days remain until July will be-come the current month, and the shorts have become nervous over the action of prices in that future during the past few days. They found that prices were being put up and down with very little trade pass-ing. They started in to cover at the outaet to day, and the result, after an early fall, was a decided advance. July opened at 95/6/95/c against 91%c as the closing price on Saturday and dropped to 95c, but the selling crowd was soon rid of its holdings and the demand continued urgent, especially for July, a quick reaction set in, carrying the price to 96/c. Logan & Co. White & Co. and Kennett & Hopkins were good buyers in the early trading. Indi-cations that the decrease in the visible sup-ply would be larger than expected; the fact that New York stocks had decreased 650,000 bushels and that the clearances from that port Saturday footed up 325,000 bushels of wheat, 400 barrels and 7,500 sacks of flour were all strong factors. Later when the most urgent buyers had secured what they wanted and had withdrawn and reports of clearing weather and liberal estimate for to-morrow, July closed at 94%c. Corn was firm early in sympathy with wheat they is sharp buyer in wheat to 55%c. Shorts showed a good deal of nervous-ness for a time, long property came out freely and wheat breaking about the same time corn followed. Liberal estimates for to-morrow also helped to create weakness, and when once started the break was easy to 54%c.

to morrow also helped to create weakness and when once started the break was easy to 51%c. A little reaction followed the early short sellers making an effort to cover and secure profits, when July sold to 55%c, but reacted to 54%c again. Near the close there was another rally and the close was 55%c. Oats were fairly active, the feature being the strength in July. There was good buying by shorts and this gave the market its strength. The opening was at 35c, a decline of %c since Saturday, advanced to 35%c, receded to 34%c, rallied to 35%c and closed at 35c. Hog products were quiet and the changes in prices limited to lower damage. There was weakness on account of the large re-ceipts of hogs, but the early strength in grains prevented a break. The close was generally lower than Saturday. The leading futures ranged as follows, as corrected by John M. Oakley & Co. 45 Sixth street, members of Chicago Board of Trade:

Kennedy, of the firm of J. B. Larkin & Co., purchased from Mr. J. K. Lemon Soxill feet, with buildings, at a price which neither party to the transaction would make known. The purchase adjoins the site recently bought by Mr. Kennedy for Bishop Phelan, and it is thought to be in the same interest and for school purposes. Mr. Ken-nedy would not say anything about the mat-ter yesterday, except to admit that he had bought the Lemon property, and that the deed had passed on Saturday. From another and entirely reliable source it was learned that the Government has a So-day option on the property code west

t was learned that the Government has a 30-day option on the property corner of West and North Diamond streets, and immedi-ately opposite the recent purchases of Bishop Phelan. The President of a prominent bank in Allegheny, with property interests on North Diamond street, in speaking of the recent sales on that thoroughfare and the selection of a site for the new postoffice, said: "Bishop Phelan now owns about 135

feet on North Diamond street, and I think his investment a very profitable one, as I feel satisfied that the opposite corner is the one upon , which the new public building will stand." In answer to a leading question, the gentleman said further: "Yes, we have given the Government an option on our interest, and we consider the matter about settled." Bishop Phelan could not be seen yesterday, and Mr. Kennedy would not

seen yesterday, and Mr. Kennedy would not undertake to speak for him or say what dis-position would be made of the property. The original purchase was for school pur-poses. Whether the action of the Govern-ment would or would not change the Bishop's plans Mr. Kennedy could not an-swer, nor would he say whether further purchases were contemplated. The erection of two beautiful and costly public buildings on North Diamond street was not thought possible six months ago. In a Walting Position.

In a Waiting Position.

Reviewing the stock market, the Boston Traveller says: "The general conditions are all so favorable that very few people care to venture on the short side of the market, and at the same time the outlook is not yet quite clear enough to induce any extensive outside investments. The markets, altogether re now in a waiting position and environed are now in a waiting position and environed by a feeling of hopefulness that promises well for the immediate future. The bulls are well content to wait, and they can grace-fully accept the prevailing duliness, so long as the future prospect is favorable and prices do not go off materially. The foreign exchange market continues strong and some more gold may go out next week, but if it does, it will, in view of the fact that it will go to meet exchange requirements rather than to satisfy foreign liquidation, have very little effect on values here, especially as our present monetary conditions are so easy." Airbrake continued its upward movement, finishing at 96% bid. The rest of the list was about on a level with Saturday's windup. The continued postponements of the meet-ings of the Westinghouse Electric Company, if it have the right at all, does not proceed with its plan of reorganization. If 90,000 shares have been subscribed, as alleged, why wait for the improbable-namely, the turning in of all the shares! If the plan be a feasible one, and to the best interests of all con-cerned, why not go ahead and let the lag-gards bring up the tail of the procession? There are more ways of killing a cat than choking it on hot butter. If the Plant Bridge be such an obstacle as represented to the West End Rallway in its efforts to adopt the electric system, what is to prevent it from coming up the South Side and crossing the Smithfield street bridge? will be taken this week, depends in a large measure on the market for commercial bills. The ecohange market is bare of such paper, except for July futures, and meantime the remittances of July interest and dividend payments are swelling the volume of trans-actions on the other side of the market. The London Economia, an excellent authority on the gold question, fur-nishes in its issue latest on hand an interest-ing confirmation of the belief, much disputed here, that some of the enormous amount of gold taken from the United States the last month or two must be returned when the export of American cereals begins. The Economist regards such a shipment earlier in the season as a logical certainty. The bank, however, is, in its view, sufficiently strong to bear the strain, and it lets out a very im-portant state secret in its intimation that the Bank of France has already contracted to resell to American bankers, if required, several million sterling of the gold recently

to resell to American bankers, if required, several million sterling of the gold recently obtained here at the same price as was paid for it. This is highly reassuring news, be-cause the current doubt over our ability to recover our gold has been chiefly based on the obstinacy with which London is ex-pected to hold on to its own stock, but even London will presently be able to forecast the future with more assurance. Early next month the Russian Government will call for something over £2,00,000 of the gold now held in the Bank of England vaults, and this will precically close Russin's ac-count with London. It is not likely that the account will be reopened. THE FUTURE MARKET HINGING UPON THE CROP SITUATION.

Trading Has Lost None of Its Strictly Professional Character - Industrial Stock Completely Subside-Government Bonds Dull-State Bonds Stay Steady.

NEW YORK, June 22 .- The immediate future

of the stock market is now supposed to hinge directly up the crop situation and the movements of gold. The trading has lost none of its strictly professional character and fluctuations were never more barren of feature. Still more interest was displayed none of fis strictly professional character and fluctuations were never more barren of feature. Still more interest was displayed in silver, and it was not only decidedly active, but very strong during the forencon, retiring later in the day over a cent. Reports from official sources that there is coming a scarcity of the metal, while no explanation of where the supply goes to had consider-able influence with the proceedings of the silver men assembled here for deliberation on the subject. One of the most prominent things in the market to-day was the almost complete subsidence of the Industrial stocks, even Chicago Gas being comparatively dull, while their movements were confined to the same narrow limits as those in railroad shares. The opening' under the influence of the unfavorable crop rumors, was made at fractionally lower prices, and further small fractions were lopped off from time to time under the hammering of the trading element, though the losses during the forenoon were insignificant in the extreme, and intense duliness marked the trading except in sil-ver, which rose to 103%, but later fell back again. The announcement of a further taking of gold for export encourfiged further efforts on the part of the bear-ish professionals, and more decided pressure was brought to bear. North American was selected to be the special object of the attk. The selling forced its price off to 11½ against 14½ Saturday, and the whole list of active shares sympathized, though no other heavy decline was seen. The extreme losses, however, manged up to 1½ per cent, with the frangers, Goulds and specialties leading the down 3%. New England, St. Paul and Chicago Gas each 1½. Wheeling and Lake Erie preferred and Missouri Pacific each 1 per cent, while silver is up 1½. Maifroad bonds 'were dull and entirely fractional losses, and North American is down 3%. New England, St. Paul and Chicago Gas each 1½. Wheeling and Lake Erie preferred and Missouri Pacific each 1 per cent, while silver is up 1½. Maifroad bonds 'were dull an
