## NO REDUCTIONS MADE.

Pig Iron Market Is Quiet, but Prices Hold Up Strongly.

POOR OUTLOOK IN STEEL RAILS.

The Prespects Are That 1891 Will Be a Poor Year in-This Line.

# STATE OF FOREIGN METAL MARKETS

(SPECIAL TELEGRAM TO THE DISPATCH.) NEW YORK, July 2 .- The Iron Age report

the condition of the iron and steel markets of the country as follows:

American pig—The market is still very quiet and Northern furmacemen generally hold prices well. Even small concessions are not made for very desimble orders by makers of standard brands of foundry iron. Northern brands are quoted at \$16 75@18 00 for No. 1, \$16 00@16 50 for No. 2, and \$14 00@ 14 50 for gray forge. Southern iron sells at

Spiegeleisen and Ferro Manganese-Some eisen. An Eastern steel mill has purchased a round lot of foreign, and another works has taken 600 to 700 tons of domestic, all at

a round let of foreign, and another works has taken 600 to 700 tons of domestic, all at private terms. German 20 per cents can be haid down at \$27 50, while English commands more. Ferro manganese is quoted at \$64 00@ \$4 50 for 80 per cents.

Billets and Rods—The Eastern billet market is firmer, in sympathy with the West, where billets cannot now be purchased at less than \$25 50. Rods are quiet in the East, and may be quoted at \$38 at tidewater.

Steel rails—Instructive conclusions may be drawn from the figures of railroad mileage built during the first haif of this year, compiled by the Railroad Gozette. Our cotumporary estimates that the mileage completed during the first six months was 1,610 miles, against 2,035 miles during the corresponding period last year. Estimating requirements at 90 gross tons per mile, the consumption for new track was, roughly, 184,000 gross tons during the first half of 1890. It is estimated that the slipments of standard rails during the first six months this year have been 450,000 gross tons. Last year the figure for the mills in the association was 718,205 gross tons, or adding the Allegheny, 775,000 tons. Deducting the requirements for new track from the shipments, we obtain a fair ide of the amounts taken for renewals. those tons. Deducting the requirements for ew track from the shipments, we obtain a fir idea of the amounts taken for renewals, ast year during the first six months they ere, therefore, approximately 585,000 tons, his year, during the same period, they live only been 300,000 tons.

This gives numerical expression to a fact energily known and appreciated—the fact tearrally known and appreciated—the fact tear track repairs have been kept down to be lowest possible point by the railroads broughout the land. Current repairs for the enormous mileage of this country are stimated to call for between 900,000 and 600,000 gross tons as a minimum. In other tords, the poverty of the railroads, or their nailroads, to keep net earnings at a respect words, the poverty of the raifroads, or their anxiety to keep net earnings at a respectable figure, have caused them to withhold necessary orders for rails to the extent of from 150,000 to 200,000 gross tons in six months. This business is, of course, only deforred. The burning question in the rail trade is whether it will come out wholly or in part during the next few months or whether it is to hold over for another year. The indications thus far, it must be frankly neknowledged, are that the mills will not be called upon to roll more than a fraction of this delayed tonnage this year. It is even very doubtful whether the second half will get its fair quota of renewal work, which would be 450,000 to 500,000 tons.

Nor is the outlook for new mileage very brilliant. Indeed, it is a question whether the second half will carry the total for the year to 5,000 miles which would call for 3,400 miles in the next six months. It is true that the great Western mills were idle during the first part of this year and therefore they are

he great Western mills were idle during the list part of this year, and therefore they are first part of this year, and therefore they are now rushed in making deliveries, so that the shipments of the first six months are probably below the average. But orders have been coming in very slowly during the last month, and inquiries are on a moderate scale. While it is probable that the second half will be considerably better than the first, the outlook is not favorable for even as good a mil year in 1891 as was 1890, which was decidedly not above the average. During the current week no sales of any consequence were made by Eastern mills, which continue firm at \$20.75631 @at tidewater.

Rail fastenings.—The majority of makers are asking \$2.0662 10 for spiker, but the price is shaded by middlemen who may, however, at any time withdraw their quotations. We anote fish plates 1.70@1.80c, and bolts 2.65@2.80c.

Manufactured from and steel—A fair amount of work is coming up and the mills are moderately well employed. Bridge makers are still quoting very low figures, the withdrawal of one concern from the market, with a full order book, being followed also by the appearance of other needy sollers. The closing down by the struggle with the Amalgamated Association of two Eastern mills is not likely to affect the market materially, orders in hand being shifted to others. We quote angles, 1.95@2.10c; tees, 2.45@2.75c; and beams and channels, 3.1c on dock. Steel plates are 2.92.13c for tank, 2.3@2.5c for shell, and 2.3%2.7c for flange, on dock. Bars are 1.761.5c on dock.

1.76.1.5c on dock.
Old rails—For old iron rails in small lots,
£20.5c is being offered by consumers. The
market is lifeless.

FOREIGN METAL MARKETS.

ovens in blast. There is understood to be a little discussion going on between the large and small operators. The latter claim to have an adequate demand for the operation of their works six days, while the big fellows claim they should join them in laying idle one or two days each week, as the case may be. The little fellows are persistent, and have refused to yield. There are over 13,000 active ovens in the district. The total number will be increased by 360 ovens of Oliver Brothers, which are building.

Shipments hast week averaged about 951 cars per day. The total decrease was 1,092 cars. This was the distribution: To points west of Pittsburg, 3,094 cars; to Pittsburg and river tipples, 1,764 cars: to points east of Pittsburg, 350 cars; total, 5,708 cars. This is the record of the previous week: To points west of Pittsburg, 2,220 cars; to pints east of Pittsburg, 851 cars; total, 6,300. Prices are as follows: Furnace coke, \$1,90; foundry, \$2,30; crushed, \$2,65.

### WILD FLUCTUATIONS.

All Cereals and Provisions Go Up and Down Together-A Very Bullish Opening, Succeeded by an Equally Bearish Close-The Scramble of Shorts.

CHICAGO-Wheat opened nervous and nigher. The buoyancy developed at the close yesterday, and disquieting rumors as 14 50 for gray forge. Southern iron sells at \$16 25@17 25 for No. 1, \$15 50@16 25 for No. 2. \$15 75@16 50 for No. 1 soft, and \$14 60@14 50 for gray forge. Spicereleisen and Ferro Manganese—Some July sold as high as 34 cents, and December at 90%, or from 11% to 13% cents above the highest figures made yesterday. Shorts were on the run and frantic in their

efforts to cover. The big bears responded promptly to all calls for margins and kept efforts to cover. The big bears responded promptly to all calls for margins and kept right on selling. After a time bear news be gan to come in. The Cincinnati Price Current's summary of the crop situation said harvest operations were progressing favorably, and that all indications as to the big yield were maintained, while spring wheat prospects were all that could be desired. This was followed by the announcement of the failure of Alexander & Co., of London, large cargo dealers, who were said to have gone down owing to their heavy losses in long wheat. All this created a marked depression, and the confidence of the bulls soon evaporated. Shorts had covered pretty gengrally, longs who had taken on wheat on the late depression began to unload, and the weakness soon developed into a regular slump, and July went off to 91½c, while December broke to 89½c.

Fresh excitement sprang up after the noon hour. Late Liverpool cables reported higher prices there, and continental caples were sensitional, Berlin showing an advance of 1½c per bushel in July and 3½ cents in September and October, with Paris 20@30 centimes up. The little shorts were stampeded. July was put up to 91½c and December to 12c. There was a reaction near the close, which was at 33½@30c for July and 91½c for December.

Corn was excited and higher at the start. Shorts showed a good deal of nervousness.

which was at reaction near the close, which was at \$34,6034c for July and \$14c for December.

Corn was excited and higher at the start. Shorts showed a good deal of nervousness, especially in July, and were anxious buyers, while there was little for sale. In the early scramble July sold as high as 50% cents, and not much to the head at that. The feeling seemed to prevail that the bulls held the winning cards, and the shorts hastened to make the best terms possible. There did not appear to be leaders in the bull movement, but everybody seemed to be short more or less and frantic to cover. Little was offered for sale. September sold up on the early excitement to 513,60313c and split. Then came the tumble in wheat, and the most nervous shorts having bought what they wanted prices started down. This brought out the corn, and for a time it was a race to see who could sell the most in a given time, and July finally got to 55½c and september to 50½c. There was an active demand for cash corn, which sold to 603c, or nearly 9 cents premium on September and 3½c over seller for the month. The close was steady at 56% for July and 51½c for September.

The fluctuations in oats were governed by tember.
The fluctuations in oats were governed by

The fluctuations in oats were governed by those in wheat and corn.

Provisions opened strong and higher, influenced by grain, but later on large stocks, more hogs than estimated and the break in corn and wheat all produced a decline. September fork sold early at \$10.50 to \$10.55, broke to \$10.55 and on the final bulge in grains rallied to \$10.5734, closing at \$10.55. Lard and ribs followed the same general course.

unchanged. New York, July 2.—Business in drygoods tends to increased quiet as the holiday approaches. Agents made the following prices of prints: Del marine fancies, 6c; steel river fancies, 6c; del marine pournings, 6c; harvey fancies, 4½c; harmony shirtings, 3½c; charter oak fancies, 4c; gloucester fancies, 5½c; gloucester indigo blues, 5½c; and Hartel fancies, 6c; Hartel chocolate, 4½c, and Hartel fancies, 4½c. The general market was steady to firm.

[SPECIAL TELEGRAM TO THE DISPATCH.] New York, July 2.—Bar silver in London 46% d per ounce; New York dealers' price for silver \$1 01% per ounce.

Turpentine Markets. New York—Rosin easy and quiet. Turper tine dull and weak. Sr. Louis-Wool receipts, 196,258 pounds Steady and unchanged.

Syrup of Figs. Produced from the laxative and nutritious juice of California figs, combined with the medicinal virtues of plants known to be most beneficial to the human system, acts gently, on the kidneys, liver and bowels, effectually cleansing the system, dispelling colds and headaches, and curing habitual constination.

Another Capitalist Shows His Faith in Realty by His Works.

SOUTHSIDE VALUES LOOKING UP.

Remarkable Real Estate Tangle Reported - From Washington County.

THE FEATURES OF LOCAL SPECULATION.

A prominent coal operator showed his faith in Pittsburg real estate yesterday by planking down \$5,000 for a little over two stress in the "". acres in the Twenty-fifth ward, upon which he will build a fine residence next year. This is not his first deal in suburban land, and it is not likely to be his last, his idea being that it is the best investment within reach. In speaking of this transaction a broker said:
"Our capitalists are changing over from
other things to real estate very fast. Having
emerged from their, customary haunts long enough to note the marvelous growth of the city and the substantial character of its improvements, they have acquired a sudden fondness for lands and houses which will bear fruit in the near future. I could name at least a dozen of these men, but I have no authority to give their names to the public." Southside Values Looking Up.

The benefits of rapid transit are already being experienced on the Southside. Said a prominent business man yesterday: "It is only about two weeks since the pokey horse cars were withdrawn and the electric substituted. The change has been beneficial to all branches of trade. Property owners are considerably stronger in their views. A less adjoining my store was on the market considerably stronger in their views. A piece adjoining my store was on the market a month ago at about \$100 a foot front. It could not be bought now for less than \$125, and the owner is not anxious to sell at that. This is a fair illustration of the prevailing sentiment. I look for a large number of handsome improvements on Carson street within the next year or two. There is already talk of tearing down some of the old buildings and putting modern ones in their places. If we could only abate the smoke nuisance we would be supremely happy."

A Progressive Place. A Progressive Place.

Beltzhoover borough is not often heard of, but that does not chill the energies of its citizens. They are wide awake and full of enterprise and push. It is, in fact, one of the liveliest places on the Southside. Lots are selling very fast and buildings going up in all directions. At the present rate of growth the surrounding hills will soon be covered with mandsome homes.

A real estate tangle, involving unusual complications, is reported from Willow Grove, Washington county. A man bought some land, and it was deeded to him as "Pierre Brugnier." Then he bought more, and in that deed the name was "Pierre Bruand in that deed the name was "Fierre Bri-gais." Then he sold off a piece, and in that deed his name is "Pierre Beurgener." To cap the climax, some of the property is 60 feet away from where it ought to be. A local real estate agent is at present wrestling with the puzzle, but it is likely the law will be re-sorted to to settle who is who. Business News and Gossip.

Bank paper requiring immediate attention should be looked after to-day, as to-morrow will be a close legal holiday.

Work was resumed yesterday on a number of buildings in the Wilkinsburg district.

A leading broker remarked yesterday 'This is a good time to go 'long' on any good stock. Abundance of money and good crops must elevate the standard of value. I look for a general advance about the middle of John Hess has just completed five four-roomed houses in Tylerdale, Washington

ounty. There is trouble with the electric cars in Washington, Pa. The Daily Reporter of that place says: "The test of cars on Maiden street made yesterday afternoon showed a lack of power sufficient to move three cars The Electric Railway Company has frequently tried to carry three cars but always failed. The test made yesterday was with the cars close to the power house; as the power was insufficient there, it is insufficient all along the line."

It is stated that John D. Rockefeller will lead they of the stock market for a year to fight shy of the stock market for a year to come. His health is poor. There seems to be considerable long Read-

There seems to be considerable long Reading stock waiting for a market.

The Cigarette Trust is increasing its capital stock \$10,000,000.

Lots are selling briskly at Kensington, Glenmawr, Aspinwall and Elwood, and a good demand is springing up at Blaine, Where do all the lot buyers come from? No matter. They are here and their money talks for them.

July actilements are proceeding so smoothly as to show the debtor class, as a rule, has the money to meet all claims

Interest on the bonds of II local corporations, including the New York and Cleveland Gas Conl Company, H. C. Frick Coke Company, Pleasant Valley Railway and Duquesne Traction Company, will be paid this month by the Fidelity Title and Trust Company.

if any.

E. D. Wingenroth sold two lots at the corner of Poketo avenue and Eola street, being Nos. 96 and 97 in his plan of Nadine Park, to Julius O. Franke, for \$625.

Black & Baird sold to John Faherty far J. Walter Hay lot No. 27 in his Hay wood plan, having a frontage of 24 feet on Clarissa street by a depth of 145 feet to an alley, for \$600 cash.

Reed B. Coyle & Co. sold for J. S. Craig lot No. 9 in his plan at Marion station, Twenty-third ward, being 25 feet on Monongahola street by 80 feet in depth, for \$450.

John K. Ewing & Co. sold through S. A. Dickie & Co., for Jane C. Ewing, to James E. Rugg, a lot 50x150 on Frankstown avenue, Brushton, Pennsylvania Railroad, for \$1,000 cash.

The Burrell Improvement Company, sold

Brushton, Pennsylvania Railroad, for \$1,000 cash.

The Burrell Improvement Company sold the following lots at Kensington on Wednesday: To Henry Ommert, lot \$2, block 2, for \$837 50; Jacob Bertram, of Millvale borough, lot 174, block 4, for \$276 25; W. F. Noel, of Creighton, lot 182, block 4, for \$276 25; John Orf, of Creighton lot 187 in block 6, for \$276 25; Joseph Redfern, of Wilmerding, lots 131 and 122 in block 7, for \$250 (0); lots 197, 198 and 109, block 5, 175 and 176 in block 3, 160, block 6, 21 and 29, block 5 and 140 in block 7, for \$4005 25, to a gentleman in Braddock who requests his name withheld.

## HOME SECURITIES.

JUST ENOUGH BUSINESS DOING TO KEEP THE MACHINE IN MOTION.

Only Fractional Changes in Values-Electric and Pleasant Valley Move Up a Peg -Mr. Westinghouse Still Confident-A Champion of Natural Gas Talks. A Champion of Natural Gas Talks.

The unexpected might have happened on 'Change yesterday, but it didn't. Business might have been brisk, but it wasn't. Still, there was enough to make a market, which is about all that could be expected so near a long holiday. Total sales were 193 shares, furnished by Electric, Pleasant Valley and Philadelphia Gas.

Price changes were unimportant. The natural gassers were slightly weaker. In

natural gassers were slightly weaker. In the street railway group, Pleasant Valley was fractionally stronger and the rest prac-

tically unchanged. It was claimed the Man-chester Company would have no trouble with the minority stock outstanding. In fact it was asserted that it was now upon

with the minority stock outstanding. In fact it was asserted that it was now upon record as asserting to the reorganization plan. Litigation may follow, but it is hardly probable. The unlisted tractions occupied their usual place in the quotations.

The presence of some buying orders—one for a 100-share lot—was sufficient to put Electric up a fraction. The widely entertained opinion that the reorganization plan will be adopted at the next meeting, and the report that the works at Wilmerding were affording employment for 500 men, were the inspiring factors. Mr. Westinghouse, who has been in the city for some time overseeing his numerous interests, said the reorganization plan was moving along all right, and he was confident it would be a success.

A friend of natural gas said: "Bears on the stock are instifiable in alleging decreased earnings. They are always down at this season of the year. But they have no authority for saying that the supply of gas is nearing extinction. If it is nobody knows it. The companies have skilled men to watch that end of the business, and they are unable to discover any deficiency. The fact is, as I have been reliably informed, there is a better supply of gas now than there has been for nearly two years, and, with a number of good wells in reserve and considerably new territory to draw from, there is every probability of a full supply next fall and winter."

The financial situation was more assuring, although the improvement was nor reflected by any of the stock boards. New York was dull and featureless. London was a little stronger. The Bank of England reduced its discount rate from 3 to 2½ per cent. The New York bank statement will be issued to-day, and it is expected that it will be even more favorable than that of last week.

Sales of local stocks on call yesterday were:

THE FUTURE FINANCIAL SITUATION IS HOPEFUL.

ndustrials Have the Largest Share of What Little Activity Remains-North American the Only Feature Among Railroad

Stocks-Tennessee Coal Loses the Most. NEW YORK, July 2.- The Bank of England this morning further reduced its minimum rate of discount of 2½ per cent, but the action, even in the absence of news of an unfavor able character, failed to stimulate trading in the stock market here for either domes foreign operators, and it seems to have again fallen into its old rut of extreme dullness. The opening to-day was slightly lower on account of some selling which was apparently for foreign account, but the stocks with an international market were equally as dull as the remainder, and the downward movement made no further progress Throughout the day the Industrials attracted most attention, the uncertainties over the dividends on Sugar and Chicago Gas weakening these stocks a little, and manipulation of distillers advanced it 1 per cent, but immediately let it off more than it had gained.

Among the railroad stocks St Paul Atchi-

manipulation of distillers advanced it per cent, but immediately let it off more than it had gained.

Among the railroad stocks, St. Paul, Atchison and Louisville led in the dealings, but in neither of them were the fluctuations of any importance, and only in North American was there any movement whatever in the stocks which called for comment. The approach of the boliday, of course, aided in making the market narrow to-day, but the situation promises an early and decided improvement, especially in the way of earnings. The announcement that the 1½ per cents will be extended at 2 per cent insures a large increase in the national bank circulation, which will come in time to prevent any stringency in money during the movement of the crops.

The Industrials and North American with Tennessee Coal were the only stocks recording movements of importance, and only in the last named was the final change for the day for a material amount. The market displayed a drooping tendency among the leading shares toward the close, but the close was generally steady and decidedly dull at close to first prices. The final changes, owing to the opening losses, are generally small losses, and Tennessee Coal is down 1½ per cent.

Railroad bonds were a little more animated, and the sales of all issues reached \$27,000, while no special activity was to be seen in any one bond. The tone of the dealings closely followed the share list, and most changes are in the direction of lower figures.

The following table shows the prices of active

vate detective for the railroad, without any cause or provocation, but affecting to believe him a thief, assaulted Brown. He struck him several times with a revolver, fracturing his jawbone and knocking out three of his teeth. His jaw was so badly injured that several pieces of the bone had to be removed, and now he cannot eat properly. He claims that the company is responsible for the acts of its employes.

John Stuble and wife yesterday entered suit against John Nelson and B. F. Lawn, executors of Mary Schmeltz. It is stated that the plaintiff, own coal land in the Twenty-third ward. Mary Schmeltz, it is alleged, well knowing that it belonged to the plaintiffs, sold the coal to Nelson in January, 1890. He, also knowing that the coal was owned by the plaintiffs, has been mining the coal up to April 1, 1891. The suit is now brought to recover damages for the coal taken out, treble the amount of the value of the coal being sued for under the law covering such cases.

Joseph L. Kane, Edward Farrell and

ngs closely followed the share list, and most changes are in the direction of lower digures.  The following table shows the prices of active tocks on the New York Stock Exchange resteray. SIX BIG DAMAGE SUITS.

A Great Day for Displeased People to Try to Get Even-Much Money Demanded-An Even Half Dozen Attempts to Col-

W. W. Brown yesterday entered suit against the Allegheny Valley Railroad Company for \$5,000 damages. Brown states that he has been a peddler of vegetables for 35 years, the last 13 years in Pittsburg. April 3, he states, he went to the Allegheny Valley Railroad freight depot to get a shipment consigned to him. Charles Calleghers, and

For the First Time in Many Days A Better Mercantile Demand for the Grain Takes an Upward Turn.

CORN, OATS AND WHEAT ADVANCED

Scarcity of Strictly Fresh Eggs and Prices Are Higher.

THE FIRST HOME-GROWN POTATOES

Sinews of War.

There was some improvement in the demand for money yesterday from the mercantile community, but the brokers were not in it to any extent. Their time is coming. The good feature noted indicates confidence in the immediate enlargement of the volume of general trade as a result of the settlement of labor troubles.

Short loans were made at 5½66 per cent, and long ones at 7. The supply of funds was reported equal to all demands. There was enough currency for general purposes, but additional payrolls from this time on will keep it down to the point of scarcity. This is always the case here when all the industries are in motion. Exchanges through the Clearing House were \$2,603,248 35, and balances, \$628,737 66.

At New York yesterday money on call was easy, ranging from 2 to 4 per cent, last loan 2½, closed offered at 2½; prime mercantile paper, 5½67; sterling exchange quiet and weak at \$4 85½ for 60-day bills and \$4 87½ for demand. OFFICE OF PRITSBURG DISPATCH, 7 THURSDAY, July 2. COUNTRY PRODUCE (Jobbing Prices)—Strictly resh eggs are very scarce in this market, and prices are advanced, as our quotations will disclose. Prices are relatively higher in Pittsburg than at other trade centers, and prospects are for better supplies before the week is out. Choice creamery butter is firm and common grades are dull. Ohio cheese is in excessive supply and markets are weak. New York style of cheese is fairly steady. Quality of Tennessee potatoes coming to our Closing Bond Quotations.

Grain, Flour and Feed.

Sales on call at the Grain Exchange today: One car sample shell corn, 55c, spet: 200 bags of bran, \$15 50; 1 car 2 white oats, 44%c, t Court, yesterday handed down decisions he suits of William Anderson against the 10 days. Receipts as bulletined, 20 cars, of which 17 cars were by Pittsburg, Ft. Wayne wooden mantels. In the suit against Saint a decision was given in favor of the plaintiff. In the case against the Pittsburg Lumber Company the decision was in favor of the defendants because they were not aware they were infringing a pittent.

Not Allowed to Give Security.

Judge Reed, in the United States District Court, yesterday handed down a decision in the case of Pope & Sons against Sackworth et al, refusing a motion of the defendants for leave to give security of the value of goods attached.

Numerous Ordinanees Recommended by the Survey Committee.

The Survey Committee.

The Survey Committee of Councils met yesterday afternoon and affirmatively recommended the following ordinanees: Relocating Brereton street; changing the grade of Walter street from Washington to Climax street; establishing the grade of Beltzhover avenue from Washington to the city line.

Ordinances for vacating Bellefield avenue from Boundary street to the Linden Land Company's property and vacating portion of the Morningside road were laid over for further consideration, there being at present a strong feeling among Councilmen against the vacation of any streets unless the necessity therefor is shown.

By Pittsburg, Cincinnational Survey of casts, 1 of corn. By Pittsburg, Cincinnational Survey of the value of content of the first o and Chicago Railway, as follows: 8 cars of corn, 3 of hay, 1 of bran, 1 of flour, 1 of mid-

the vacation of any streets unless the necessity therefor is shown.

AS A DRINK IN FEVERS

Use Horsford's Acid Phosphate.

Dr. Chas. H. S. Davis, Meriden, Conn., says: "I have used it as an accessory in cases of melancholia and nervous debility, and as a pleasant and cooling drink in fevers, and have been very much pleased with it."
