SPECIAL TELEGRAM TO THE DISPATCH.] ATLANTIC CITY, July 4 .- When good Ameri

cans die it is asserted that their sculs go to Paris. When the Fourth of July comes around each year, all good Philadelphians who can get away go down to Atlantic City. Some Pittsburgers take the same trip, but it is from the Qunker City that the great swarm of seashore pleasure seekers on the national holiday comes. In that city the custom is as ancient and as traditional as the equally generally observed habit of washing the nt door-steps every morning.

In some years nearly 100,000 visitors have oured into this tight little island on the 3d and 4th of July, and when the influx of guests has fallen far short of this figure it has been has fallen far short of this figure it has been on account of unfavorable weather. And what makes the enormous patronage the more wonderfall is that no attempt is made by the local authorities to increase the at-tractiveness of the place by making any spe-cial programme of ceremonies for the cele-bration of the day, nothing being offered the visitors but that which they can enjoy on almost any other day during the season. This year for instance, the day was marked by but one distinguishing feature, a superb exhibition of fireworks at the Base-hall park. Apart from this] the pleasure seeking guests found no extra preparations for their entertainment, but as the ordinary amusement field of Atlantic (ity contains almost every device under the sun there was no lack of material for diver-sion.

## Something New in Amusements.

There is one new amusement which bids fair to become immensely popular, and which has been besieged by thousands since it was put in operation the other day. It is called the Observation Roundabout, and is novel and unique contrivance, invented a novel and unique contrivance, invented by the creator of the clothesilne stretcher. It consists of two immense wheels, each shout 40 feet in diameter, securely fastened by horizontal iron rods. To these rods are attacked 16 swinging conches, which main-nain an equilibrium, or always remain per-pendicular, as the wheels revolve, carrying the passengers to an elevation of 50 feet above the bench and then descending to its platform below. Its capacity is 32 passengers and the wheels revolve slowly, making but four revolutions a min-ter. It is run by steam, an endless chain connecting it with an engine. Senshore vis-itors are continually craving after a new sensation, and this they find in 'round-shouting,' and as there is a fortune in every scheme that catches the fancy of the crowd the inventor of the Roundabout seems to be in for a good thing. Two opigrams were coined during the week that are worthy of preservation. An En-glishman whose polynomary apparatus had become clinkered with Loudon fog arrived at the Rossmore a few weeks ago to have his system repaired. Thanks to the invigorat-ing qualities of Atiantic City air and food he succeeded adminably, but true to the prin-ciples of his country would not be denied the boon of kicking. When he came to settle his bill he remarked that 'I' was a bloomin' ealthy climate. don't you know, but it came denced high." A guest of that hotel had been instructed by her physician to spend most of her time out of doors. "The air is filled with ozone and it will strengthen your lungs," he said. His advice was fol-iowed and a wonderful improvement re-sulted. AT THE SUMMER CITY. Chautauqua's Coming Attractions-A Spler

did Season Assured.

[SPECIAL TELEGRAM TO THE DISPATCH.] CHAUTAUQUA, N. Y., July 4 .- This beautiful "summer city" on the northern shore of Chautasqua Lake is again beginning to teem with life, for the assembly season of '91 is at hand. The youth, beauty and chivalry of the land are arriving by every boat and timin, and the "children of a larger growth" are not behind in putting in an appearance. Hence it is that Chautauqua has already be

come a place of study, sunshine and song. Many of the cottages have opened their hos pitable doors, and the booths and shops ar being put in order for coining ducats by the bundreds, for all indications point to the biggest senson ever held here. Secretary Duncan tells me that the gate receipts for the first few days were one-third larger than last year.

The first few days were one-third larger than hast year. It is guite interesting to watch the boats unload their passengers at the dock, for one can get some sort of an idea of the class of visitors who come to Chautauqua. First to get off is the summer girl, fresh from school or seminary, who has to all appearance just escaped from a genus tutelary, and is more than anxious torry her culture and coquerry on the masculine heart. Next is the college student, who has passed through the year's examinations with more or lass successes and purposes to recreate at Chautauqua by promenading, posing, and proposing. Then there is the earnest school teacher on study bent, the young widow on pleasure bent, the spinster who would renew her youth in this spot so near to nature's heart. Of course, pass and mammas come by the score, too, to see Chautauqua and watch with parental care the progress in study as well as the pleasure pursuits of their hopeful offspring. In short, all scores and conditions of men and women come here, so that Chautauqua is a bright-hearted, the field can jaded, the prite and witty-all contribute to make the place a human kaleidoscope – both plo-turesque and suggestive.

A Tempting Programme Arranged.

The assembly programme this year will be exceedingly tempting. In view of the ap-proach of the World's Fair and the Columby proach of the World's Fair and the Colum-bian anniversary, the management deemed it highly advisable to give considerable prominence to the study of American his-tory and American institutions. Accord-lingly, a series of very entertaining and in-structive lectures have been arranged, covering all the different phases of Amer-lean historical research. These courses will be delivered by Prof. John Fisk, of Harvard University, the peer of any professor in wielding the pen. Prof. H. B. Adams, of Johns Hopkins University. Prof. Franctis N. Thorpe and Prof. J. B. McMaster, both of the University of Pennsylvania, and Prof. Fred. Starr, of the American Museum of Natural History. Then there are illustrated lectures provided, and these deal with American scenery, giving the audience an opportunity to travel with their eyes, in the same way that Mark Twain ascended Mt. Blanc by the telescope, without the fatigue of the Journey nor the danger from accident. Among the lecturers in this course I note the mames of Prof. H. H. Bagan, Dr. A. H. Gillett and Dr. Charles S. Wells. Mr. F. W. Raymond, Sec-retary Tracy's private secretary, is down for two illustrated lectures on the "Old and New Navy of the United States," the intent being to stir up an interest among the people here to the needs of a good naval marine, both for war as well as for the "piping times of peace." Among the miscellaneous lectures I note bian anniversary, the management deemed

here to the needs of a good havai havais both for war as well as for the "piping times of peace." Among the miscellaneous lectures I note the name of Dr. Edward McGlynn, of New York, who will try to convert Chautauquans to his way of a bolishing poverty. The ex-priest is an orator, if nothing more, and his peculiar earnestness and forcefulness will be something new to this section. Hon, J. J. McClaren, of Toronto, will tell on the platform of the amplitheater what his views are on the annexation of Canada, and try to convince Chautauquans that Canada and the United States have many things in com-mon, and that they should be one country and under one flag. General Lew Wallace's mother is on the programme for a lecture on "Political Equality," and it will be somewhat enter-taining, to say the least, to hear a woman's side on this question. One of the most prosaic and perhaps the least poetic part of Chautauquan is the sale of tickets, and yet a study of these sales day by day gives some very curious informa-tion. First, the increased revoune shows that Chautauqua is becoming a colony mather of the and subartic parts of the subartic parts of the subarts of

under hypothetical conditions of this kind. The actual circumstances alone would con-trol his conduct, I think. Enough for the day is the evil thereof, and I think it is emough for me to say at this time that I am not a candidate, that I dont want the nomi-mation, and that I have no desire to be State Treasurer. I appreciate, nevertheless, the compliment that is implied in the frequent mention of my name for the place." Mr. and Mrs. J. R. McGurry, of Pittsburg, are solourning at the Stockton. They ar-rived Thursday and will remain for a couple of weeks. Messra. James L. Spangier and Henry 7 Kendall, of Bellafonte. Mr. H. C. [CORRESPONDENCE OF THE DISPATCH.] CAFE MAY, July 4.-Great changes have been made in the plans of the President this been made in the plans of the President this week. When he arrived here he brought with him most of the official papers which he will need to act upon during the next six weeks. Many other things will command his attention, but they will be sent from the departments at Washington as they are brought up. The various Cabinet officers will next fromment things to the Presidential

family and spend the Sabbath at a cool re-treat. Quite a number of Pittsburgers are regis-tered at both the Ferncliff Hotel and the Ohio Pyle House, and a great many more are expected. Among the late arrivals at Fern-cliff are: Mr. Joseph Volk, wile and child, of Pittsburg; Miss Hinebaugh, of Oakland, Md.; Lieutenant Switzer, of Harkleysburg; Mr. W. F. Dorn and Mr. J. S. Laughrey, of Dawson, Pa. Many Pittsburgers take ad-vantage of the Sunday excursions to spend a day in the cool depths of the mountains vis-iting the different points of interest-the Falls, Lover's Leap, Fulton Iron Spring, Cu-cumber Falls, etc. Among those noticed here last Sunday were: J. McDermott and wife, M. Mead and wife, C. Rush and daughter, John Smith and Charles Wood, of Pittsburg: Samuel Wood, of Connellsville, and James McClure, A. B. O'Neil and wife, and Messrs. The various Cabinet officers will pay frequent visits to the Presidental cottage, and discuss affairs which are usually discussed in Cabinet meetings. Secretary Tracy and Attorney General Miller were to remain at the Cape over the Fourth. Lieutenant Parker, of the navy, came with the President also to remain over the Fourth. His wire and Mrs. Dinmick, who are sister and niece of Mrs. Harrison, came down to the Cape from Washington Wednesday evening, and will remain at the Presidental cottage as the guest of Mrs. Harrison for a month. They, with Mrs. General Williams and Miss Warfield, will make four lady guests at the summer White Honse. The prospects are that there will be a great many visitors during the senson. Secretary Hal-ford will arrive next week, and establish his office here for the next six weeks, and will have telegraphic communication direct with each of the departments at Washing-ton. Reception to the President. A large concourse of citizens greeted the President when he arrived. The depot was crowded with people who were pouring in to spend the Fourth. The President was met by the ladies at the cottage and given a hearty greeting. Little Ben McKee was on hand also, and came in for a large share of his grandfather's attention. Mr. George W. Boyd, the popular Assistant General Passen-ger Agent of the Pennsylvania Railroad, was also with the party, as he generally is on occasions of this kind. He, with his family, is stopping at Congress Hall, his usual summer home. He is a great friend of the Harrisons, having known them in his native city, Indianapolis, where it was B. Harrison, attorney-at-law, and plain decorge W. Boyd. Mr. and Mrs. Boyd dined at the cottage this week, and Mrs. Harrison with Mrs. Williams and Miss Warfield called on Mrs. Boyd at Congress Hall. During the week an article of wearing ap-parel has been purchased by Mrs. Harrison which had to be made to order. It was a pair of little gum boots for that famous Mc-Kee youngster. The boots were ordered of Mr. E. Johnson, who sent to a Philadelphia wholesale house for them. The size was so small that the wholesaler had to send to a factory in New Brunswick, N. The Yale adherents openly avowed that the Princeton men were afraid of defeat; the Princeton partisans just as openly avowed that to be the case with the Yale men. The ball game and pretty dresses that were to have been worn there, sad to relate, will not materialize and the overbearing de-ficit still stands, gaunt and grim, a ghostly reminder of the gay festival. tion. First, the increased revenue shows that Chautauqua is becoming a colony rather than a pleasure resort. In other words, many who come to scoff and see sights remain to pray and promenade. From ensual visitors they emerge into full-fledged citizens; and this is easily demon-strated by the new cottages that have been built within the past year. The "circus ole-ment," so called, is fast disappearing from the crowd that comes to Chautauqua. The major portion of the people who step off the bonts are students and teachers bent on, hard study and work. hard study and work.

Creeds Meet on the Platform.

There is also another healthy "sign of the times" at Chautauqua in these days of And-over controversies and Union College theological fights. Chautauqua is becoming cos-mopolitan as regards preaching. The list of sermons to be delivered this year embraces the prominent ministers of all denominations. Among these are Dr. R. S. McArthur

It is the first building erected here of enduring materials. Dr. T. L. Flood's cottage in the north of the grounds fronting on the lake is the pioneer journalist's home here. Many newspaper men come to Chautauquan each year, and it will not be strange if the example set by the editor of the Chautauquan is followed by other "knights of the pen." The Chautauquan Lake Railway has built a station at Chautauqua, and the time-card shows frequent train service between here and Mayville, as well as Jamestown and in-termediate points. Thene wire department is a good feature. There are two companies with 30 members, who are residents of Chautauqua, as well as property owners. Fire drills are beld fre-quently, and as a consequence Chautauqua

The Methodists are preparing for camp meetings and are pondering the question whether or not religion shall be free this summer. At Tarentum last year the teach-ings of the Bible-the text book of the com-munity-were ignored in great shape. It says something about religion being ob-tained without money and without price; but on the Sabbath it could not be obtained there that way, nor could it be obtained for money or for price. The gates were relent-lessly closed. But while the Tarentum campers looked up their religion so securely during the summer months they were not so successful in look-ing up their cottages during the winter and as a consequence new furniture will be found in most of them this year, for a campmeet-ing ground is not the treasmer vault where theires do not break in nor steal.
