ELECTRICITY. Its Wonderful Power as an Agent for the Cure of Disease

FROM SCIENTIFIC MEN

Of Unquestionable Qualifications, Skill and Experience.

OPPORTUNITY FOR PITTSBURG PEOPLE To Avail Themselves of the New Therap Agent In the Hands of Thor-

oughly Skillful Men. SOME PLAIN STATEMENTS OF FACT

In introducing the physicians of THE ELECTROPATHIC INSTITUTE to the public of Pittsburg, no wild promises or high-sounding words will be used. With an intelligent and discriminating people, such as we have to deal with, the simple, straightforward statement of facts will amply serve to show the benefits which the sick and diseased of this region are to receive from the location of these gentlemen here.

In the first place, the physicians of THE ELECTROPATHIC INSTITUTE are regularly trained, regularly educated doctors, graduates of the best medical colleges in the country, who have since their graduation-devoted themselves entirely to those new and modern discoveries in medicine and surgery which have developed the wonder-

ful curative powers of electricity.

They are scientific men of scientific training and association, recognized in the pro-fession as electrical scientists, who have done valuable service in perfecting and dis-covering electrical methods and appliances. They propose to do sufficient advertising to demonstrate to, the profession and the pub-lic of Pittsburg the value and power of these comparatively ing and association, recognized in the pro-

To make money out of that genuine and wonderful department of Therapeutics, of the real efficacy and applications of which they are as ignorant as a child might be of the mechanism of the Corliss engine.

For the present we will simply state that through the physicians of the Electropathic Institute, the profession and the public are to have the benefits of the scientific application of the new thempeutical agent. These gentlemen recognize its limitations and are not placing it before the public as a cure all. Its wonderful power within the limits in which they have by practical test and experience as well as by scientific deduction established its value, will be set forth—no more.

That they have cured by electricity time and again—diseases over which the power of electricity, as a curative agent, has been abundantly and unquestionably established in their own practice and under their own observation.

Their theories and methods they hold in common with such men as Wagner, Lumbroso and Matteini, with Corning and Reynolds, Cogney of London and Gartner, of Vienna, with these and other scientists of the modern school they find electricity potent as an agent in maladies of the skin and mucus membranes, in diseases of the nerves and the blood. It comes in its new power as a revelation to the dermatologist, the rhinologist, the laryngolist and the gynecologist. Its wonderful effects UPON THE NUTRITION IN CASES OF CONSUMPTION and wasted vitality, its marvelous power for STIMULATING NERVE AND MUSCLE, for reaching the tissues and fluids of the body, RELIEVING PAIN, DESTROYING GERMS AND MODIFYING MORBID PROCESSES, these are not the conclusions of theory, but the demonstrations of their own practice and experience.
