IRON TRADE REVIEW.

A Fair Week's Business for the Dullest Season in the Whole Year.

A LULL TILL IT COOLS OFF.

Consumers Well Supplied With Raw Material and Furnaces Are Well Sold Up.

WHAT THE SALES FOR THE WEEK SHOW.

Condition of the Iron Market at All the Centers North and South.

OFFICE OF PITTSBUBG DISPATCE, FRIDAY, July 24.

RAW IRON AND STEEL-The market since our last shows signs of weakness as regards certain articles. The volume of business is fair, however, considering we are within me week of the end of July, generally the fallest month of the 12. While a large number of mills have signed the scale a few are not satisfied and are holding back, and at some noints a strike has been inaugurated.

ception remains to be seen. It is friends.

The Shenange and Mahoning Valley furnaces are selling a good deal of iron, prices being fully up with Pittsburg. The manufacturers of these districts are real live business men. Southern iron does not seem to be wanted. We have learned of no transactions for some time. It is evident purchasers can do better elsewhere.

Retter Times Ahead.

The outlook for the fall and winter months is encouraging. In one sense we have a pretty sure thing. Crops are beyond expectations, and, what is of equal importance, there is an immediate market for all we have to spare. This means cash to the marking, cash to everybody. The only difficulties in financing. It seems plain, in market is bound up in the future of the money market. While there is no special auxiety or distrust, it is a fact that money is working closer at all Western centers, at least, than at any time since last winter.

Lake ores are going forward rapidly. The special activity in this line is due more to long suspension of shipments in the past than to improvement in the condition of trade. Very few furnaces are accumulating standard grades of iron. In the South, No. 2 foundry have accumulated to some extent. The definished iron to absorb all the current production, so that very little inneeds of contract of the mand for charcoal from is still very light, and buyers can cover wants at below average cost of production.

Pig iron production, s mounting rapidly to the high figures and summer; of course it is last spring and summer; of course it is at natural that a little weakness is shown are and there in the prices of certain grades

The Changes Since Last Week.

The situation compared with last week: essemer pig not so much fancied, prices a tade weaker; consumers evidently well upplied. Gray forge weaker, 10 to 15 cents supplied. Gray forge weaker, 10 to 15 cents per ton lower. Steel slabs and billets, prices 12670 cents lower for August and September. Muck har steady at last week's figures. Skelp fron, marrow and white grooved, unchanged: sheared fron declined 5 cents. From manganese, Pittsburg prices for domestic maintained: New York delivery a shade lower. Steel wire rods unchanged. Seems naterial dull, prices weaker. Scrap material dull, prices weaker.

The Latest — Notwithstanding dullness trade for the week shows up well. For Besterner the demand has been light, consumsemeratic demand has been ngm, consum-ers having laid in a good supply earlier in the month; prices unchanged. Gray forge steady at a slight decline. Blooms and bil-lets show only a slight falling off in demand. Muck Bar steady. Old steel rails, long lengths in demand at fair prices. CONE. SMELTED LAKE AND NATIVE ORE.

The Usual Midsummer Dullness Reigns

Supreme Over the Chicago Market. SPECIAL TELLGRAM TO THE DISPATCH.] CHICAGO, July 21 .- Rogers, Brown and Merwin say: There is little of special interest going on in the Chicago pig iron market at present. Small orders are numerous here, lets of medium size being placed, but the volume of business going is light. This is lower basis and continue to run.

a lower basis and continue to run.

Lake Superior charcoals are quiet and there is little buying being done in this direction. One feature of the outlook is worthy of note, a more hopeful feeling seems to be gaining ground among consumers in all departments. It is generally conceded that the large crops, which are now virtually assured, will cause a general revival of business all around as seen as the same are harvested and monetary proceedings get into circulation.

The Enforced Economy of the Southern Iron Market Still Continues.

ISPECIAL TELEGRAM TO THE DISPATCH ! BIRNINGRAM, ALA., July 54.—The local fron market should have been stereotyped four months ago and allowed to stand. The current belief among iron men here is that it will not have to be changed until October. All culculations are based on a continuous of the present bottom prices until late in the fall. Iron men say the enforced economy of the present stringe ey has demonstrated that furnaces which mine their own coal and ore can make from profitably at an average price of \$10 and those who buy all their maces in the district belong to the latter

class, while a considerable number buy their ore, and others their coke.

Prices vary greatly according to the size of the sale and the need of the furnace to force sates. The De Bardeleben Company denied the recently reported sale of 40,000 tons at \$10, but there is the best authority for saying if the figures were too high, still the company has let a large quantity go at that figure. The furnaces are working as usual, 20 in blast and six idle, and while making no effort to force production, are giving no indications of a disposition to shut down. There is no great accumulation of stocks, though the movement in iron toward the market continues to require nursing in the shape of cutting below the quotations as given out.

Quotations f, o. b. at furnace are as follows: No. 1 foundry, \$12 25; No. 2, \$11 50; No. 3, \$10 50; gray forge, \$9.75. Considerable interest is being manifested in efforts to improve the value of the coke in this district. Large sums have been expended on machinery to be used in manipulating the coal.

The export of coal from the Gulf ports

pended on machinery to be used in manipulating the coal.

The export of coal from the Gulf ports continues to engage the attention of the mine operators, and the business at Pensacola is now well established and growing in magnitude. The East Tennessee, Virginia and Georgia line have at last completed their through line direct from Mobile to the Cahaba coal fields, but the business of export by that route has as yet attained no dimensions of consequence.

BOUND UP IN FINANCE.

The Iron Market Now Seems to Depend En-

tirely on the Money Market. ISPECIAL TELEGRAM TO THE DISPATCH.1 CINCINNATI, July 24.—Rogers, Brown & Co. say: The iron market continues to drag in nearly all branches. The question is raised whether the present output is excessive. This is met by the answer from past experi-ence that, singularly enough, prices usually ber of leading from men are leaving town to take a well carned rest, so that to a certain extent the market will be deserted by take a well earthed rest, so that to a certain ception remains to be seen. It is friends.

NOTHING CHEERING AHEAD.

The Limited Demand for Iron at Philadel phia Still Continues.

ISPECIAL TELEGRAM TO THE DISPATCH? PHILADELPHIA, July 24.—There is nothing in the iron market on which to base either the hope or claim that an early improvement may be looked for. The demand is limited in extent, but further large increases in output will probably be attended with a corresponding increase in the demand. We quote as follows: Standard Pennyslvania No. 1x, \$17 75@18 00; do No. 2x, \$16 50@17 00; medium Pennsylvania, No. 1x, \$17 25@17 50; do No. 2x, \$16 00 @ 16 25. A little more business is noted in Bessemer more business is noted in Bessemer pig, but prices are irregular and unsatisfactory, sales having been made at \$15 23@15 50 at furnace for standard qualities. Low phosphorus bessemer is nominally \$18 00@18 50 at furnace. The local output of structural material is somewhat restricted on account of the labor difficulties, which has tended to harden prices slightly, although no quotable change has been made from last week, which were as follows: Angles 2.05@2.0c; sheared plates 2.7@2.10c; tees, 2.5@2.6c, beams and channels, etilizer iron or steel, 3.1c. beams and channels, either iron or steel, 3.1c.
The demand for steel rails is only for small
lots, with prices firm at \$30 f. o. b. cars at

There is little or nothing doing in muck There is attie or nothing doing in muck hars, and so irregular are prices that a satis-factory range can hardly be named. Prices of bar iron are fairly steady. Some plate mills are pretty well supplied with orders. There is little inquiry, especially for large quantities. We quote: Tank plates, 262.10c for iron, 2.05/2.15c for steel; refined, 2.205/2.30c for iron, 2.160/2.20c for steel; sheet, 2.306/2.40; for iron, 2.406/2.50c for steel; flange, 3.206/3.30c for iron, 2.506/2.75c for steel. Old rails are in slight demand, with \$21.506/2.20 quoted for iron and \$17.506/18.00, delivered, for steel. Scrap iron continues unchanged, and a few sales are reported at these figures: No. 1 railroad scrap, \$20.506/21.50; No. 2 light, \$15.00 (Mi 60); best machinery scrap, \$14.000/15.00; old car wheels, \$16.000/17.00.

noticed an along the line. Some cheap job-lot iron is influential in keeping the price of standard irons down, but as inquiries continue to be more numerous, it would ap-pear that the stock of this class of iron is being rapidly reduced, and that better prices will be realized in a short while. STILL ANOTHER TOWN BUDDING.

Stock Trading Almost Featureless, But Values Kept Well in Hand.

Liggett Bros. report a good inquiry for and fair movement in all classes of property. Bu iness is as good, if not better, than at the same time last year. They closed the sale yesterday of a property on the corner of Pacific avenue and Corday alley, belonging to W. A. Lincoln, lot 72x132, with a two-story brick house of 10 rooms, to Thomas J. Haw-kins, of Hawkins Bros., for \$9,000. Mr. Haw-

kins will occupy it as a residence. Still They Come. Another new town is in the field, and although in the paper stage, is getting a good send-off. It is called Hammond, and is situated about one mile from Mt. Pleasant. C. J. Beeckman said yesterday that 60 lots had been sold there in only the last few days. The promoters are bidding pretty high for manufacturing concerns, and have secured two-a Pittsburg bottle factory, which will break ground for their plant next Monday, and the Brudenwold lamp shade works of Beaver Falls, whose buildings are under way. They will occupy four acres.

The feature of the stock market yesterday as the sale, at the last call, of 200 shares of Duquesne Traction stock at 15. The significance of this transaction is not in the price, but in the fact that it shows confidence in the outcome of the street rail-ways, upon the success of which the material growth of the city so largely depends.

Philadelphia Gas held the improvement of Thursday and added something to it. The reaction from a point not warranted by the condition of the company is both reasonable and natural. The stock has too much inherent strength to be allowed to remain a plaything for the bears.

THE SUNDAY DINNER.

All Garden Stuff Lower Than at Any Tim This Season. The opportunities for securing low price ruits and vegetables of the very best qual-

ity have not been as good for years as they will be to-day. Our markets have been glutted with garden stuff of all kinds for the past few days, and prices are daily drifting downward.
Tomatoes, cabbage, potatoes, melons, and all kinds of fruit, both d

metons, and all kinds of fruit, both domestic and foreign, have touched their lowest point this week. The market basket should grown to-day with all the needful supplies of the best quality, at rates satisfying to everybody. Home grown fruits and vegetables are coming in so freely of late that Southern products have little show.

With the great excess of domestic fruits, fruits from the tropics are dull and slow. Lemons are the exception to the rule, being in better demand, at higher prices than prevailed last week. The hot weather is no doubt responsible for higher priced lemons. Among the new products on the stalls the

Among the new products on the stalls the past week are home grown egg plants and roasting ears. The latter which showed up for the first time last week are now in full supply at much reduced rates.

A Good Time for Consumers, but Not So Good for Producers.

FARM AND GARDEN PRODUCTS LOW.

Lemons More Active, but Other Tropical Fruits Are Still Slow.

THE CEREAL SITUATION IS UNCHANGED

OFFICE OF PITTSBURG DISPATCH, FRIDAY, July 24. COUNTRY PRODUCE (Jobbing Prices)-To the consumer of fruits and vegetables mar-kets are entirely satisfactory, but producers find little comforting in the situation. All the week markets have been glutted, and prices have been daily declining. We note no further reductions to-day, as bottom was clear out of markets yesterday, and gardenclear out of markets yesterday, and gardeners were then unloading their products at whatever they would bring. Onto cheese is firm and a shade higher. Jobbers report that Pittsburg markets have of late been relatively lower than at other trade centers, both East and West, in Ohio cheese lines. Sharp competition, it is claimed, has been the death of trade. A leading Jobber reports that within the past week cheese has wholesaled here ½c per pound cheaper than it can

saled here %c per pound cheaper than it can now be bought at the Western Reserve fac-tories. In tropical fruit lines we note a bet-ter demand and firmer prices for lemons. APPLES—30660c a bushed, \$100@2 00 a barred.

Tachickens,

Trade in this department moves along in he same old ruts. Soft white sugars, which have been scarce of late, are now in fair supply. Yellow sugars, however, are still scarce. Canned fruits are a drug for reasons obvious to all, namely, the great abundance of fresh

fruits.

element quickly fell into line, and for a time the market had a very weak appearance, and December, which had sold early as high as 85%c, broke to 87%c. St. Louis and the Northwest sold a good deal on the down turn. New York buying orders came in wisconsin and the far Northwest, turned the tide, and there was a rally to 88%c. Free realizing broke the price to 88%c, but there was another rally to 88%c. The receipts here were about 30 cars above the estimate, and St. Louis and Toledo also had heavy receipts.

The maket was quiet and steady in the afternoon, fluctuating between \$3%c and \$8%c, and closing at \$3%c, the opening figure.

Corn was rather unsettled, having a very weak spot after the opening, but then turning quite strong and holding most of the advance. The local receipts were about 50 cars below the estimate, and the opening was rather firm, September selling 54@54%c; then on the weakness in wheat and provisions, and free selling, there was a decline to 53%c. Cold, unfavorable weather reported from the West, and wheat and oats developing some strength, September sold up to 54%c. During the last hour the trade was quiet, with fluctuations between 54%c and 54%c, closing at the latter figure. Cash corn was in active demand, No. 2 selling at 60@60%c, and No. 2 yellow up to 63c.

Oats were again quite unsettled for July. The first sale was at 3%c, but long property being offered freely, and 56 cars of new oats being inspected, nearly all being No. 2 oats, broke to 33%c: reacted to 35%c, and then became steady around 35@25%c, but closed at 35%c.

Hog products were weak and lower. Live hogs at the yards were 5@10c off, and there was free selling of pork, and the mark for September pork went from \$11.50 to \$11.75. At this point the shorts stopped the downward movement by covering, and carried the price to the opening figure at the close. The changes from yesterday's last prices were insignificant at the close.
