his city, at least, were the affairs of a club so muddled up as are the affairs of the local club. This is no exaggeration, and when it is stated that both Manager Hanion and W. H. McGunnigle were at the Exposi in Park yesterday claiming the right to manage the team, the statement will readily ted. This mix up and discreditable condition of affairs are the result of the imeriousness of one man, J. Palmer O'Neil, resident of the club. But yesterday was President of the clab. But yesterday was tided over quietly by Mr. McGunnigle with-

frawing from the scene until to-day. The story of what has led up to the unasily told. For some time past there has been a desire on the part of two or three people to get rid of Hanlon by book or by rook. Another party wanted Hanlon to be reated fairly. But as a kind of compromise it was agreed to engage W. H. McGunnigle as manager of the club and he was brought on here. When he arrived it was found that his terms, and as a result all negotiations erween him and the directors were de chared at at ead.

The donors were the members of the hagie Club, Allegueay, and result reflected credit to them. The gift was a magnificent one. The attendance was 1,75, a rather poor Saturday crowd, but this evidently resulted from the treatile now coince on among the officials of this now voing on among the officials of The game was one of the bright and quick kind, and the two pitchers were the prominent performers. Muliane and King pitched in splendid form, but King scanewint weakened in the tenth inning, and that ended the proceedings. The visitors did not come near getting a hit off King's desivery until the seventh inning and the hit was a very scratchy one. In the first inning the home players had two men on bases, but could not

reached. The first two men retired in short order and two strikes were called on Smith, the third man up. He made a single to right and Harrington followed with another to centar, but Smith stopped at second. Then the real excitement commenced when Mulane walked to the plate. Latham, of course, was yelling for dear life, and, as the fates would have it. Tony banged the ball far into lett field, scoring Smith and thereby ending the game. The score:

The Bookies Get Away With Lots of Money at Morris Park.

GENERAL SPORTING NEWS OF THE DAY DETROIT, July 25.-This was the closing day

ing Club. The weather and track were all right to-day, but not more than 6 000 persons witnessed the afternoon's sport. The driver of St. Elmo, the favorite in the first race, fell off his sulky in the heat just at the first turn and the horse ran the mile out, and probably lost the race then and there. This race was marked by a rank decision of the judges in the third heat that lost Diamond the race. Diamond had fully half a length to the good as he went under the wire, but the judges claim to have seen Aline a head in front. So sure was the latter's driver that he was beaten that he had gone to the

stand to have his number removed, SUMMARIES. First race, 2:19 class, trotting, purse \$2,000 Barney Frank Oxam Time, 2:28%, 2:19%, 2:15%, 2:16%, 2:18% Budd Doble sent Nancy Hanks a mile to beat her record of 2:14. She went to the quarter in 33%, to the half in 1:06% three-quarters in 1:35%, and under the wire in 2:14.

BOOKIES IN LUCK.

They Get Most of the Money at the Morris Park Tracks. MORRIS PARK, July 25 .- Fully 8,000 persons nade the journey to this course to-day, and and they were treated to some racing above he common. The ground was in a very peculiar state, the track proper being quite heavy and holding, while the six furlong chute was dusty. Under these circumstances it was rather difficult to pick win ners, and when the day's racing was over the bookmakers had most of the money, only two favorites having won. San Juan, a strongly backed second choice, sold only a point behind Kildeer for the Stevens stakes. Raceland, second choice to Clarendon, galloped away with the Passale stakes, while Airplant, at 8 to 1, won the sapling stakes. The first race was an easy thing for Beansy, an outsider in the betting; and Riot, third choice to Esquiman and Adventurer, captured the sixth race. The two favorites which were successful were Arab in the fifth race and Roquefort in the last race, both owned by George Forbes. First race, one mile—Beamy first, Westchester second, Kingmaker third, Time, 1:44.
Second race, six furlongs—Raceland first, Nellie Biv second, Charendon third, Time, 1:12.
Third race, six furlongs—Airplant first, Fremont second, Patrimony third. Time, 1:25.

Hammond and Morrissey. There must have been some misundertanding between the backers of Tom Hamnond and P. Morrissey yesterday as they mond and P. Morrissey yesterday as they failed to meet and both parties claim to have been here. To come to business the backer of Hammond left a forfeit of \$20 to match his man to concede Morrissey 3 yards in 100 yards for \$500 a side. A second deposit of \$50 can be made on August 7, at this office. If Morrissey will cover the forfeit and forward a copy of signed articles to T. Pace, at Brownsville, Pa., the match can be made.

General Sporting Notes. MULLANE probably never pitched a better game and he did yesterday. HAMILTON is having a lively chase with Tiernan for first honors in batting in the National League. MULLANE pitched well yesterday, fielded well and made the hit that won the game. Good for Tony. MR. The Cashier Sent to the Telephone While His Young Assistant Jumps Into'a Carriage With the Money-Assisted by Two Boy Confederates.

(SPECIAL TELEGRAM TO THE DISPATCH.) AKRON, O., July 25 .- One of the boldest robberies that has occurred in Akron for many years was committed to-day by Otto Schoenduve, a trusted employe of the Werner Printing and Lithographing Company, of this city. A little after 12 o'clock George C. Berry, the cashier of the institu-tion, went to the bank and drew \$4,000 for the weekly payroll. As was his custom, he took with him Otto Scoenduve, a young fel-low who has been acting as an assistant at the office in the cashier's room.

the office in the cashier's room. Schoenduve acted rather suspiciously, but nothing was thought of it until after they returned to the office. Mr. Berry was filling the envelopes with the money, when Schoenduve; called to him from the telephone closet, to come and answer a call. "Watch the money, Otto," Berry said as he went to the 'phone. He came back in a

minute, but saw at once that the gold and the youth had disappeared. A hurried examination of the premises showed no trace of the thief, but an employe who was looking out of the window saw Schoenduve hastily enter a two-horse carriage with two young men, and drive rapidly toward the northeast. The other men in the carriage were Frank Young and Fred Roberts, chums of Schoenduve, and hitherto highly respectable young men. officers from this city have been searching in all directions and in all neighboring towns, but up to midnight nothing had been heard of the men. ELECTRICITY CURES.

Why It Is for the Interest of the Profession

The wonderful remedial effect of elec-

In the great centers of civilization

throughout the world this difficulty has

been overcome, in part, by the establish-ment of central electrical and medical insti-

tutes, with the machinery and appliances necessary for the proper treatment of dis-

necessary for the proper treatment of dis-eases which electricity has demonstrated its power to cure or alleviate. These institutes are placed in charge of physicians, thorough-ly trained in general practice but who have made special study of the power of electric-ity upon the human form and who best know how, when and where to apply it. These institutes have been of the greatest aid to the profession in the larger cities, as the wider practitioners at once avail them-selves of these opportunities and thousands and thousands of patients in these cities now realize the advantages of electricity as a medical agent.

These institutes, or "central plants," met with such success and were so beneficial that

they have gradually been extended, and

some time ago one of the best in the world

The physicians and surgeons in charge of

the Electropathic Institute, at 507 Penn avenue, in this city, have been selected for their

success in general practice and electrical specialty with great care for yet another

reason. Frequently physicians in practice in a city are so skillful as to be louth to al-

low any of their patients to pass from under

low any of their patients to pass from under their immediate control, even when they are morally certain that electricity is the medicine the case demands. In numbers of such cases the patient applies directly to the Electropathic Institute, with a full confi-dence that his case will be diagnosed as thoroughly and correctly, and his internal treatment administered as intelligently and scientifically as from any physicion in the city, while all the benealt of all the ages, of wonderful inventions and large expendi-ture of moneys in electrical development will be his also.

The cases above cited are only a few out of many that could be given. Full particulars regarding them may be seen at the offices of the Pittsburg Electropathic Institute by anyone desiring to consult them.

Ignorance of Its Power.

That the Public Be Kept in Comparative

For Ohio: Generally Pair, are well known to the profession, but the general public have but a slight knowledge of them. The immense cost of this electrical machinery—for to be of service electricity must be properly and scientifically applied—has been one of the greatest factors in debarring sufferers from a knowledge of its wonderful results, as well as from participating in its beneficial influence. The best paid practitioner in the profession cannot afford to invest thousands of dollars in machinery and appliances for the purpose of giving his patients treatment by this great agent. While the physician and surgeon follows with intense interest the wonderful development of electricity in the alleviation and cure of disease, and bitterly regrets his inability to give his patients the benefit of these discoveries, it is not to his interest to explain or extol to his patrons the benefit they could derive from a remedy which he is too poor to employ. The Statements of Two Ladies Treated at the Electropathic Institute,

some time ago one of the best in the world was established in this city. It is located at 507 Penn avenue, and in charge of puryleians and surgeons who have been thoroughly tested for their fitness, not only in the general practice of medicine, but especially for their experience and intelligence in the application of electricity in the cure of disease. Gentlemen of the highest order of intelligence, graduates of the best medical colleges of the world, patient students and practitioners in medical and surgical electricity for years, they are entirely and competently equipped with the latest and most costly machinery—numbering not one but a hundred different appliances, and costing immense sums of money—to treat the large number of diseases which electricity cures, and aids to cure. AT 507 PENN AVENUE. Two Instances Among the Many That Might Be Cited.

"For more than five years I suffered as I did not think it possible for a human being

o suffer and live." The speaker was Mrs. Mary J. Confer, who lives at 113 Lacock street, Allegheny.
"I was first stricken with rheumatism, and to anyone who has suffered from this disease I need not describe its tortures. The constant pains shooting from one muscle or joint to another, or the constant heavy, dull ache, from sunrise to sunrise, without a moment's intermission, equal the stories told of the racks of olden times. To this was added, after I had suffered for some years, the pangs and excruciating twinges of neu

ralgia.
"My life was one of misery, and mere EXISTENCE A TORTURE. "The constant pain I suffered finally resulted in complete nervous prostration. I was so nervous and irritable that I could hardly get along with myself. Insomnia, or sleepless-ness, was added to my other ills, and I was ness, was added to my other ills, and I was in a state bordering upon frenzy.

"During all this time I doctored constantly. I tried everything. I doctored with the best physicians in Pittsburg and wasted quantities of money, all to no avail. While at times I was helped, temporarily, my case constantly grew, in the main,

WORSE AND WORSE.

WORSE AND WORSE. "My attention was called to the Pittsburg Electropathic Institute, at 307 Penn avenue, and almost as a toriora hope I determined to try a course of electricity. I applied to the physicians in charge, and after diagnosing my case they placed me under treatment. "To make a long story a short one, after a regular course of treatment I am utterly and entirely cured. My pains and aches have all left me—I sleep well, live well and am happy. I cannot too highly commend the Institute, or the physicians in charge of it, to those who suffer as I did."

PARALYSIS CURED. Bed-Bidden and Suffering Untold Angulsh paralysis, neuralgia, scrofula and cataran, also diseases of the Eye and Ear. for Years, Yet Mrs. John Fields I Finally Relieved by the Physicians of the Electropathic Institute.

"It has been over five years since I was first stricken with this malady, paralysis, and what I suffered in that time can scarcely be described." The speaker was Mrs. John Fields, residing at 37 Beaver avenue, Allein charge of their special department.

SUffering 17.00.
NERVOUS DISHASES, BREUMATISM,

Mrs. John Fields, 30 Beaver Avenue, Allegheny "I had been feeling very well all day, when "I had been feeling very well all day, when suddenly, without warning, I received the stroke which made me perfectly helpless. I could not raise my arm nor make any movement without assistance. My whole body felt as cold as ice. For 14 months I lay down stairs, my relatives fearing to move me. During that time a number of physicians were at different periods in constant attendance, and while at times I would seem to rally, there was never any perceptible permanent change for the better. Often times I wished at the close of the day that before morning came a merciful Providence would

END MY SUFFERINGS.

"My husband had spent vast sums of money in trying different cures, but to no avail. To tell all the pains and anguish, both of body and mind, that I suffered during these years would be impossible. I concluded to try, as a last resort, the efficacy of the electrical treatment as applied by the physicians of the Electropathic Institute, 507 Penn avenue.

"The first treatment I received benefited me so much that I was able to lift my arm above my head. I gradually improved until now I can walk around, assist in house-keeping and do numerous duties that I never dreumt would be my good fortune to do again before I died.

"I unhesitatingly recommend these physicians and their methods, and feel sure that they will affect a permanent cure where relief is at all possible."
