OFFICE OF PITTSBURG DISPATCE, } MONDAY, July 27.

There were 130 carloads of cattle on sale at the East Liberty yards this morning, against 145 cars last Monday, and 112 the previous Monday. There were few good beeves and no primes on sale to-day. The proportion of good cattle to the total number was similar this week than for some time past. and this is putting it strong enough. Stockmen are unanimous in deploring the fact that farmers do not keep their lean kine at home until they are in better condition for home until they are in better condition for market. With good grazing and prospect for cheap corn if would seem to be the wise policy for Western farmers to withhold their mitpostock from markets at this time when all stock under prime can only be sold at a sacrifice. Shippers complain of commission men for not doing an impossible thing, mamely, sell common and low grade stock at paying prices when markets are flooded with these inferior grades. shorts. The late cables all came in strong and higher. Liverpool reported an advance of 19.622d, and Paris an advance of 10 centimes, and corn taking a jump at about the same time. December wheat sold up to 91% c, or 3% c above the opening, and closed firm at 91% C. New York was a good buyer all day, but Pardridge was the largest individual buyer, though Bryant and Logan were act-ive in that direction. Corn was the leader of all the other pits and opened decidedly higher, soon grew ex-cited and advanced about 3c from the first sales and was very nervous. Receipts were 80 cars less than expected, and stocks every-where light; cold and backward weather in the country, with the Eastern demand sharp and New York higher. The local shorts were making frantic efforts to cover from the very start, and with little disposition to sell, prices had to be bid up in order to get the property. September started at 35% S6c, and went right on up with but slight set-backs until it sold to 35%. It then sold off to 55% c, but when the visible supply was posted showing a decrease the market grew strong and excited again, bulging to 55% c, closing at 65% at which price it was firm. A Hint to Land Owners.

One of the best things that can be said of Pittsburg is that it is a city of homes. What this implies of happiness and prosperity need not be pointed out in detail. It accounts in a large degree for the conservatism of the people and the immunity from busi ness disasters, which have become proverbial. Property owners should cultivate this home-Property owners should cultivate this home-building spirit as much as possible by keep-ing prices within the reach of men of small means, who, with proper encouragement, will continue to be the principal buyers. Judiciously handled, real estate will be a controlling interest in this community for many years, until all the vacant spaces shall be built up, and every hillside and hilltop be covered with comfortable homes. This is what Pittsburg is coming to.

Look Out for It.

Within the past week a dangerous coun-terfeit 50-cent piece has been sprung upon the guileless public of New England. The piece is a beauty, and shows great care and skill in its make-up. It is one of the series of 1887 and has the clear ring of the genuine

article. The main point of difference, how-ever, lies in the thickness, which is a triffe more than in the genuine article. The figure on one side is rather obscure, but is, at the same time, nearly perfect, although there is a slight depression in the shield. Business News and Gossip.

Among street reports was one to the effect that the Recompensa and Californin gold mines, lying between two of the properties of the Luster Mining Company had been sold lately to English capitalists for \$320.000, of which \$150,000 had been deposited. It is understood, according to the same report, that negotiations are pending for the sale of one or more of the Luster properties to the same syndicate. A broker who is usually well posted in Luster matters said regard-ing the foregoing: "It may all be true, but a few shares of Luster can still be had at ruling quotations; and while insiders have undoubtedly been buying at even a good deal higher figures than the present, it was probably a case of misguided judgment. So-called insiders have been known to make mistakes before." There is a good time for local corporations to lift the stock market out of the rut by giving out statements of their condition. Investors presumably know something of financial condition and prospects, they are in the dark. The Drygoods Market. NEW YOEK, July 27.—The drygoods market opened without material change from the position of things last week. Transactions on the spot were moderate as usual on Mon-days, but orders by mail were fair with in-crease in some instances and indications of more inportant operations to follow, particu-larly in plain cotton goods, which have been taken this season with more than the usual conservatism, though the weekly and monthly footings have compared well with former seasons and have kept stock from accumulating. Agents still have many orders to fill, and are forwarding goods on that account as fast as possible. The local jobbing trade has not developed any activthat account as fast as possible. The local jobbing trade has not developed any activ-ity as yet on the spot, though there are some good orders by mail. The market continues steady in tone.
