theory if farmers were not already fully aware of the necessities which force them to market their products. Another theory starts from the assumption that the Alliance leaders are not rich enough to stand the expense of sending out the circulars...

THE PROBABILITIES. The probability is that while some speculator may have been foolish enough to help the scheme, those in it are simply trying to gain reputation.

CO-OPERATION AND COMMUNISM. The enthusiastic exploitation by a Kansas reformer of his scheme for "co-operative county farming," in which "all farming land will be worked under elected managers," moves the Chicago Tribune to reply that, practically, this plan has been tried and proved to be a failure by the communities.

THE EMPLOY BOILER THEORY. The explosion of a boiler yesterday and the burning down of two or three factories in Millvale produced the usual dispute about the cause. The boiler was new, and consequently people leap to the conclusion that it was permitted to get empty, and water being turned on, the explosion resulted.

THE IDEA THAT EXPLOSIONS RESULT ONLY FROM EMPTY BOILERS is old and serves in popular opinion as an alibi to occur, if not more so, from the presence of too much superheated water as from too little.

Constitutional Convention in Senatorial districts has already produced some difficulties under the antiquated apportionment system. If doggedly come to pass on these nominations the conferees plan will be demonstrating its unfitness in a peculiarly supererogatory manner.

THE BISHOP'S ASHES. Mrs. Blavatsky's ashes are to be distributed among three cities. But while this suggests, it does not rival, Homer. There has yet been no rush of cities to claim the honor of being counted among the three.

THE POPE IN MARBLE. A Splendid Statue of Leo XIII. To Be Unveiled in Washington September 28. (FROM A STAFF CORRESPONDENT.)

WASHINGTON, Aug. 3.—Joseph F. DeLoeb, a wealthy man of New York City, has just been honored with the title of Count by Pope Leo XIII. as a reward for his presentation to two statues of His Holiness, one to the city of Perugia, the birthplace of the Pope, and the other to the new Catholic university of Luchino, one of the five foundations of the Archbishop of New York.

CURIOUS CONDENSATIONS. —Of the 12 largest cities in the world three are in Japan.

—The population of Paris is stated to be 2,920,000, or 10,000 less than it was five years ago.

—A society has been formed in Berlin for the breeding of rabbits to serve as an article of food.

—The French make paper umbrellas, rendered wholly waterproof by gelatinous bladders of potassium.

—Zola receives about \$4,000 for each novel, irrespective of the \$1,000 he receives for the first instalment for serial publication.

—The male locusts have the power of emitting loud chirping sounds, the means of effecting which varies in different families.

—It is quite a fixed belief among the Russian peasantry that throwing the dead body of a drunkard into the river is sure to bring rain.

—The Russian Hebrew must serve in the army, but can never be more than a private. He must pay taxes, but can never be a tax collector.

—King Humbert of Italy understands agriculture thoroughly, and manages his large estates in Piedmont with the skill of a practical expert in farming.

—The people of London, according to the latest water supply report, use 72,000 gallons of water per day, which is 30.47 gallons per head for all purposes.

—The water with which Alexandria, Victoria, Alberta, Edmonton, and Lethbridge is supplied is brought to the city from the River Jordan by Prince George of Wales.

—The most precious life in the world is that of Viscount Dudley, who has just been killed in a motor car. He was worth \$2,000,000 and cannot get his life insured for more than \$250,000.

—On a late and great English railway (London and Great Northern) take up at one station and leave at another as a table napkins made of starched tissue paper.
