### THE-WHALEBACKS CAN BE BUILT HERE

Each day the prospects of Pittsburg as a great commercial center grow more rosy. e successful trip of the whaleback barge is but another reason for pushing the Erie Ship Canal, and there is no place where those boats can be constructed as cheaply as in Pittsburg. Regarding the practicability of building whaleback barges for lake and ocean navigation in this city Mr. T. P. Roberts, of the Lake Eric and Ohio River Ship Canal Commission, remarked vester-

"Without doubt the position THE DIS-PATCH has taken in its advocacy of the ship cannl project and vessel building in this city is entirely warranted by the facts. The report of the Canal Commission, which some way was pigeon-holed in Harrising, after a resolution authorizing the ting of 3,000 copies had passed both nches of the Legislature, referred to the fact that for two miles above Davis the fact that for two miles above Davis
Island dam there was, when that structure
all the liabilities of said partnership.

The property of 14 or 16 feet or more, august a death of 14 or 16 feet or mor was raised, a depth of 14 or 16 feet or more, the locality below McKee's Bocks on left bank was designated as affording ale area for great ship yards, etc. The ge which recently made the financially cossful trip from Duluth to Liverpool THREE DOLLARS per share, payable on described to six feet nine inches and the locality below McKee's Bocks on the left bank was designated as affording mple area for great ship yards, etc. The had to be lightened to six feet nine inches draft to pass the locks of the Lachine Canal and the rapids of the St. Lawrence. With the Lake Erie and the Ohio River Caual pened, as designed by the commission, a ge of treble the capacity of the "Mentore" could leave this city loaded, carrying say 3,000 tons, to any port on the lakes. LARGER ST. LAWRENCE CANALS.

It will not be long either until the Cana dian Government will have the St. Lawrence canals enlarged to the capacity of the Welmrio. I am surprised that the Welland nal the grandest regular ship canal in merica, is not more frequently visited by sburgers, and yet its course is within Niagara Falls. Visitors will there be able to see large steamers locked down a total descent of 330 feet by a series of 25 locks from Lake Erie to Lake Ontario. The Pennsylvania ship canal would have precisely the same number of locks lifting up from Lake Erie to the summit of Crawford county, and 25 more locks down to Pittaburg. One day's time is lost in locking through the Welland, and it can easily be shown that not more than two days' time e shown that not more than two days' time fill be required on the ship canal for lock ge and sailing time from Pittsburg to the and sailing time from Pittsburg to the so. These are the facts, and regarding practicability of construction nothing id be more simple. No modern canal lect with which I am acquainted meets in so few natural difficulties in con-cetion as the Lake Eric and Ohio river aid, and yet many of our people seem to a more interest in the Panama or Isth-of Corinth canals, where the difficulties in almost insurpountable, than they do A GREATER NEED AT HOME.

here is not now a total traffic of 3 000,000 ons per annum, nor is there more than that to be expected between the Pacific and Atntic Oceans, while Pittsburg and the furore, and ship back as many tons of taking certainly, including building lumber, cement, bricks, glass and tre, etc., a total business of 9,000,000 to coof tone ready for the canal, with an able growth in prospect.
report of the Canal Commission disd very thoroughly the questions in-d in the delay to lake steamers by their

the canal in coming to Pittaburg—and demonstrated that ore, lumber and amers would find more profit at the we year in coming here than they Those who think differently have stigrted the matter very thoroughg the facts regarding the use of count by large steamers, and reached the clusion mentioned above. Begarding gas on the canal, no calculations are re-red to urve their entire adaptability in Pitasburg trade with the lakes. AN ENTIRE REVOLUTION PREDICTED.

individually I think the advent of the de-back barge threatens an entire revocule products. The very largest class of charges could be built in Pittsburg and to New Orienns as often as we have coul orises, and these rises are not so infre-tas to make their construction here a greater, depth on the Obio from arg-in 1889, 125 days, though the aver-Pittsburg—in 1889, 129 days, though the average is somewhat less than even the last named year. Probably 190 days per year could be relied on, and only in exceptional varieties. Any one rise would, of course, perulit entire fleets of them to be taken out. Pittsburg ought to be able to supply the Atlantic ocean with such barges. I think that even barges designed to be towed, either on the lakes or the ocean, should be provided with auxiliary engines of power sufficient to carry them into port in case of necessity, and for moving themselves through canals a about harbors, wharves, etc. A style of cagine casely managed and of small coal consumption, capable of moving the barges four to six miles an hour, would deduct but little from their carrying capacity and add but
