PITTSBURGH, SUNDAY, AUGUST 16, 1891.

TIN PLATE PROTECTED.

That falsehood as a political weapon is a sign of weakness, is undergoing demonstration every day. Each statement of the Democrats, based upon their opposition to the McKinley law, has been fraught with disaster to the party.

It has transpired that not only do eight or nine American firms contemplate putting tin in tin plate, but the tin plate industry as a whole is being organized.

The direct to be derived by Pittsburgh will be shared by the machinery will be manufactured here.

PRIVATE AND PUBLIC OWNERSHIP. The dogma that "one of the properties that should always be owned by the village, town or city is the water works"

It is a striking illustration of the virulence with which the anti-Irish feeling rages among the irreconcilables of the Tory and Liberal-Unionist parties that Mr. Tilden would not have been in disguise.

That the case cited does not prove the thesis is further demonstrated by the statement that "a rival company is clamoring for a franchise to supply more, better and cheaper water."

other private enterprise. The true remedy, therefore, is to abolish the monopoly and let the business forces have full play.

The rule that municipalities should own water works is a good one, but for a very different reason than that quoted above. The real reason is that there are many purposes for which water supply has such public value that it is well for a municipality to supply it at the public cost.

Its powers from the Irish people, is utterly foreign. Mr. Balfour's plan, in the main, is a consideration shows that this hardly makes a respectable skeleton for local self-government.

It appears that "Little Vermont" is ashamed of her small appropriation of \$5,000 for a State exhibit at the World's Fair, and will increase it at a special session of the Legislature.

GENERAL BUTLER refuses to place any credence in the report that he is dead. The news faked who sent the report may be better informed than the general; but the doubtful old Ben's characteristics are such that the person who attempts to argue out the question will get the worst of it.

The question of Senator Brier's residence in Ohio is somewhat dogmatically declared by the Philadelphia Record to have been raised at the time of his election, but the "news" is exploded.

THE WORDING of a local item in THE DISPATCH of yesterday was unfortunately such as to permit of a misapprehension, with the intention of referring to the secretary of architects preparing plans, reference was made to "unaccountable secrecy," and the matter being kept quiet among a few persons, in such manner as to prevent the hints at a local scandal and unskillful management on the part of the building committee of the Board of Trustees.

THE PROPOSITIONS for dress reform came the Philadelphia Times to raise the bugaboo of business revision. It thinks that if all the demand for the present articles of feminine wear were cut off it would furnish Sir Henry Maine's prediction of a sudden and complete change in feminine fashions would work more distress than a general war.

BEYOND the fact that a change so complete as to reverse the conditions of textile industries would be a more overwhelming triumph for dress reform than its most sanguine advocates dream of, the apprehension of the public is that the reform would be a more overwhelming triumph for dress reform than its most sanguine advocates dream of.

THE EXCITEMENT and rapid advance in the wheat market is principally illustrated by the effect of speculative methods in adding to the suddenness and violence of fluctuations from natural causes.

A KANSAS paper calls on Mrs. Lease to stop and think. Stopping is evidently not one of her characteristics, and as to thinking that is entirely opposed to her style of oratory.

THE DEBT now hampering Italy is two billion dollars. A great share of this has been piled up by extravagant expenditures during twenty years of peace.

THE FETTER that North Dakota divorce suits do not generally come high, but that a member of the Astor family has invested \$12,500 in one, noted by a New York contemporary, makes it seem especially hard that after the divorce has been granted, the husband should be a failure to deliver the goods.

THE NEW YORK STAFF—A short time ago the city authorities on complaint of the elevated road, a broad straw hat, the maintenance of fruit and boot-black stands in the vicinity of the elevated stations. No attention was paid to the order of removal in the first place.

There is something remarkable in all this. Not in the contempt of a certain class of New York population for the law, but in the extreme tolerance of the New York public by individuals and corporations upon the public rights. And such enroachments are not only tolerated but positively encouraged.

THE ANTHRACITE coal barons have decreed a strike. A great share of this has been piled up by extravagant expenditures during twenty years of peace.

THE FACT that George Jones refused an offer of \$50,000 from the Times with the knowledge that it was intended to stop its attacks on Tammany, proves his titles that "noblesse oblige" an honest man.

IF an alien of five days' sojourn would fence in the entire walk on any street in New York, he would be fined \$100.

FORESTS IN ALASKA.

Almost Impenetrable Jungles of Trees and Underbrush. Unfortunately, as far as I saw them, are of little value, says a writer in the Philadelphia Ledger.

One reason for the dense covering of the land with trees is the favorable conditions for seed germination and the apparent security of seedling trees. The warm temperature given off by the sea of Japan, which comes up southwesterly to break against the coast, is the cause of the dense covering of the land with trees.

THE GROWTH of horse racing in the last ten years is illustrated by the fact that in 1880 the money added to prizes by the racing associations amounted to \$190,000.
