The Work of the Past Week the Most Important of the Summer.

ANOTHER GOOD M'DONALD WELL.

The Wheeling Gas Company's Well on the Cook Lot Still Burning.

SCIENTISTS AND THE WHEELING WELL

An important week to oil producers has fust closed. Every day has been replete with surprises to the trade and something new has occurred. The drill is continually bringing to light some fresh discovery, and none predict what may happen in the next seven days. The production has been largely increased, and in consequence the market has a drooping front. Prices have not dropped with a thud since they went to 50 cents, but the gradual tendency is down-

The wells which have been drilled during the week in the McCurdy-McDonaid field were big ones. There was one exception and that was Mosier & Co.'s dry hole at McDonald, a couple of hundred feet south-west of the Butler lot well. Little, if any, attention is being paid to the pools outside of the two named above. They are still the loadstone, and will continue as such for at least 90 days longer. By thet time it is estimated, judging from the active work being done now, that the territory will be pretty well drilled over and the limits defined. It is believed that the southwestern end of the streak has now been found, but this is the verdict from only one well, Mellon & Co.'s

sand, but they failed to get even a showing for it. Instead of the Gordon sand they found only a shale or stray. In the Jumbo well of the Royal Gas Company at the blaughter house below McDonald it is claimed that no fifth sand was found, but this is a fair well in the Gordon sand. The this is a fair well in the Gordon sand. The daily production of the field now is considerably over 19,000 barrels, and nearly every operator is confident that before the end of September it will reach at least 25,000, or possibly 30,000 barrels. The maximum at Wildwood was only a little better than 18,000 barrels a day, and at present it is scarcely better than 4,000. McDonaid will, without doubt, prove the biggest white sand products over one need.

The Long Rich Streak

The wells which were completed last week have either opened a rich streak six miles long, or else their owners were lucky chough to locate them just over nice little tanks in the sand. The Fisher Oil Com-pany's well on the McMichael in southwest McCurdy, which has a big tract of undrilled land around it, reached the streak, and Saturday was making 65 barrels an hour and is partially shut in. The Forest Oil Company's well, on the Wright, 4,000 feet southwest of the Mc-Michael, is two weeks old and is making 35 barreis an hour. Three miles southwest of the Wright the Matthews well, which is over a month old, is putting out 75 barrels an hour. Half a mile southwest of the Matthews is the Baldwin well of Guffey, Murphy & Co. which is putting 25 barrels an hour into the tanks. uing in the same direction about a mile, the Miller and the Mevey wells are struck. The Miller No. 2, of Gartland & Hays, ich reached the pay in the fifth las Thursday night, is producing more oil than any well in the field. It is doing at least 125 barrels an hour, and Guckert, Steel & Eghert's No. 1 on the Mevey farm 700 feet south of it, is a week old and is good for 90 barrels an hour.

What They Rely Upon.

These are the wells upon which operators have their hopes of a big field. A hundred more wells will be drilled within the next three months, and it is thought hardly probable that the pools which these wells show to exist will full to connect. The Guffey, Gailey & Russell well, on the Albert Wettengel farm, half a mile northeast of the Mathews well of Guffey, Jennings & Co., came in last week and s also showing for at least 30 barrels an our, and still more firmly clinches the be lief in a long pool. Several wells, notably Greenlee & Frost, on the Miller at Oakdale, and the Forest Oil Company, on the Her ron at Noblestown, have defined the east vein limits of the belt, but distance to the western edge is as yet an uncertainty. Considering all of these circumstances the outlook for better prices is not rosy. There will be no let up in drilling. however, for as an ob-server of the creature has said: "If an oil operator knew that by drilling a big well he rould send the market to 20 cents a barrel, he would go on and drill." The majority of the leases are taken in such a way that a well must be put down or the lease forfeited.

The Cook Well Still Burning. The fire was still burning at the Cook lot well yesterday. The preparations for smothering it out by steam are about com-plete, and it is believed that this will be acimplished to-day. They have the pipes for carrying off the oil almost to the lead pipe from which the oil is now flowing. The work of getting it into the flames was done Saturday by men sheltered behind doors covered with asbes-

tos. The well never ceases entirely to flow. The loss to the owners, the Wheeling Gas Company, will amount to about \$12,000 if s put out to-day. A large crowd of visitors from Pittsburg were among the apectators around the well to-day, and many exclamations were heard from those who had never witnessed such a sight.

Another Good Well.

Mc DONALD-The well of Boscher & Co. on the U. P. Church lot, which was shut down for a couple of days on account of the shortage of water, was started up Friday night, and early Saturday morning the fit h sand was reached, when the well started to flow at the rate of 30 barrels an hour. It is located about 300 feet southwest of the Butler lot well and is almost on a line be-tween the latter and the burning Cook lot Finnegan, Downing & Co. are down 1.000 feet in their well on the Rodgers lot. They are 1,100 feet in their Mongot No. 2, 200 feet in Elliott No. 1, 300 feet at their Robb No. 3. They have a rig up for No. 2 on the Elliott and No. 3 on the Fayall, and are building a rig for No. 4 on the latter tarm. The Royal Gas Company's No. 1 on the Mary Robb farm is making about 30

The Mannington Field. MANNINGTON, W. VA .- Snoderly No. 2 received the 6½ casing Thursday. Strait No. 1 was plugged and casing pulled this week. Hamilton No. 6, Flaggy Meadow Oil Company, will put in last casing next week. Two more rigs have been erected by the Flaggy Meadow Oil Company on the Fleming farm. South Penn Company's Morgan No. 2 will make as good a producer as yet found on Flaggy Meadow run. South Penn's B. F. Blackshere No. 5 has succeeded in drilling past tools, and will put in last easing in a few days. The Burts gasser, on the Mike farm, is not so large a gasser as reported. She is now showing oil, and a tank has been erected.

The Deep Well at Wheeling, Oil men as well as scientists will be interested in the following observations and figures in relation to the deep wells of the world. It is an abstract from a paper read by Prof. William Hallock, of the United States Geological Survey, before the American Scientific Congress. It excited great the interior of the earth bas always attracted much attention. The most important factor in the solution of this riddle is the determination or estimation of the temperature there existing. The British association has for years seized every opportunity to obtain data

DEVELOPMENTS IN OIL. as to the rate at which the temperature increases as the earth crust is penetrated. creases as the earth crust is penetrated. The most recent and reliable contributions on this subject are by E. Dunker, of Halle, Germany, and were obtained from a 4,170 foot well at Sperenberg, not far from Berlin, and a 5,740 foot well at Schladabach, near

Leipzig.

These wells are both full of water, the circulation of which vitiates results or renders elaborate apparatus indispensable, and the thermometers must be protected from

the pressure.

The Wheeling deep well sunk by the Wheeling Development Company and by them generously dedicated to science, is 4,500 reet deep, 4% inches diameter and dry; cased only to 1,570 feet. The strata there are nearly in situ, undistorted and dipping only 50 feet to the mile. More satstactory geological conditions can scarcely e imagined.

Being dry, ordinary United States Signal Service maximum thermometers were used and no especial precaution needed to be taken to prevent circulation of the air. The thermometers were lowered and raised, and

	TAR	LE I.	
1591 1592 1745 1885 2125 2236 2375 2436	Temp'ure. Fahr 08.770 70.15 70.25 71.70 72.80 76.35 77.40 70.20	Depth. Feet. 3125 3232 3375 3482 3625 3730 3875 2980 4125	93,60
2740 2875		4375 4462	

These observations when plotted show a slow increase for the upper half of the un-cased portion, about 1° Fh. for 86 to 90 feet, whereas the lower part shows a more rapid whereas the lower part shows a more rapid increase, about 10° Fh. for 60 feet. The whole series giving a well defined and regular curve, with a deflection at 2,900 to 3,000 feet where an oil sand occurs. Practically all the rest of the uncased well is in shale. The increase in the rate at which the temperature rises as the botton is an. the McCarry at Primrose, a mile a 3,000 feet where an oil sand occurs. Practically all the rest of the uncased well is in shale. The increase in the rate at which the temperature rises as the bottom is approached can only be temporary, or we should have an inconceivable or improbable state of temperature at comparatively slight

depths.

* The two distinct series of observations combined in table I nowhere disagree more than no 3 Fh., and hence are very reliable and accurate.

Table II gives comparison of the results

TAI	118. BLE IL			
Name of Well and Location.	Feet for	Tetal Depth.	Temp. at	Temp. at Bottom.
				246

Speronberg, near Berlin. 50.2 ft 4,170 ft 475.8 1150.6 Schladabach, near Lelpzig. 53.0 ft 5,740 ft 510.9 1350.5 Wheeling Development Co. 4500 ft 510.2 1100.3 Top and greatest depths 74.3 ft 4,500 ft 510.2 1100.3 Mean of lower 3,000 feet. 73.4 ft 1,36 ft

Inasmuch as the bottom of the well is some 3,700 feet below sea level, it seemed worth while to attempt barometer readings in it. The instruments used proved illadapted to the work, and the results were unsatisfactor;.
Samples of air were taken at the bottom,

but could not be analyzed in time for us. A series of observations in a coal mins near the well gave a very probable value of the temperature of the top invariable stratum 510.3 Fh. From the mean annual temperature of Marietta and Steubenville it might be taken at 52°.2 Fh.

Drilling is temporarily stopped, but we hope to go 5,500 to 6,000 feet. Anton Reymann, of the Development Company, has generously guaranteed half the expenses, and we are waiting for a lucky man to furnish the other \$3,000 and enable the Wheeling well to be lifted from the second to the first place among the deep wells of the world.

Personal.

E. H. Jennings, of the Kanawha Oil Company, is away on a vacation. He will spend the greater part of it at Chautauqua. H. M. Wilson, of Bradford, the well-known boiler and engine dealer, is in Pitts-hurz looking after his interests in the burg looking after his interests in the

Mayor J. M. Lambing came down from Corry Saturday to place a few of his Ajax brand of engines in the new fields. R. A. Dempsey, an ex-Mayor of Brad-ford, came to Pittsburg last week, and Saturday afternoon was standing in front of his place of business on Fourth avenue, when another ex-Mayor, James Broder, who is now located in Pittsburg, approached. They shook hands, asked after each other's health, chatted, acted like ordinary people for a short time, when P. M. Shannon, the oil producer, came along, stopped and joined a group. He made the third man in the party who had been at the head of municipal affairs in Bradford, when it was wild and woolly, and in its glory as an oil town when every place was "wide open" and run all night; when mud on the main streets was axle deep and horses were drowned in mud holes where danger signals were not displayed.

The Market Features.

About 50 000 harrels of oil changed hands on the local board during the week. Small though this be when compared with old times, it is sufficient to show that this new deal has been productive of good results, and has thrown a glamor of expectancy over the market which makes the future look

In spite of bearish field news and a decline In spite of bearish field news and a decline in refined at New York, the price held pretty close to the top figure. The highest point teuched for regular oil was 66, on Monday: the lowest was 63 on Friday. Saturday's range was: Cash opened at 63½, highest 64½, lowest 63½, highest 64½, lowest 63½, highest 65½, lowest 63½, close 64½. September opened at 63½, highest 65½, lowest 63½, close 64½. Refined closed lower in New York and higher at Antwerp. Yesterday's quotations were: New York 6.65c; London, 55½; Antwerp, 16½; Daily average runs were 75,334; daily average shipments, 78,559, Each of these items increased about 1,000 barrels during the week.

these items increased about 1,0°0 barrels during the week.
CLEVELAND Aug. 22.—Petroleum steady; S. W. 110°, 6½c; 74° gasoline, 7c; 86° gasoline, 10c; 63° naphtha, 6½c.
BRADFORD, Aug. 22.—National Transit certificates opened at 63½c; closed, 64½c; highest, 65c; lowest, 63½c; clearances, 76,000 barrels.
New York, Aug. 22.—The petroleum market opened strong at 1½c advance; the fluctuations were narrow and trading light during the day, and the market closed steady. Pennsylvania oil spot sales none, September option sales, 15,000 barrels, closing at 64½c. Lima oil, no sales. Total sales, 18,000 barrels.

ONE WAY OF LIVING.

A Man in Jail Charged With Getting Board Under False Pretense.

Barney Rogan has been arrested on an information made by Miss Emma Soudan, June 29, for obtaining board under false pretenses. She alleges Rogan came to her house to board, claiming he would pay her at the end of two weeks. He staved for two weeks and then told her he would not be paid for two weeks longer. Mr. Rogan

be paid for two weeks longer. Mr. Rogan had his dinner bucket packed every morning. Miss Soudar suspected the man was not working. She followed him and found he left his dinner bucket in a saloon. He brought it home empty in the evening. She fore he could be arrested, he was arrested for disorderly conduct and given 30 days, and until yesterda, he could not be located.

He was going along Pennsylvanta avenue when Constable Gallagher took him in charge and took him to Alderman Donovan's office. He was committed to jail in default of \$300 bail, and Constable Gallagher rocked gher proceeded to walk him up to the jail. As they were going up New Grant street Rogan tried to get away, and they had quite a lively time for awhile. During the struggle Constable Gallagher received a black even but he landed his was a tor near the lowest point of the finish was at or near the lowest point of the smeet. The only sales yesterday were 10 shares of Luster at 12% and 30 at 12.

Banking operations during the week were up to the high-water mat vof the epair in all lines, and the close witnessed a distinct improvement on the opening. Exclanges through the clearing House were nearly \$100,000 greater than those of the provement on the opening. Exclanges through the opening. Exclanges through the close witnessed a distinct improvement on the opening. Exclanges through the opening. Exclanges through the fonse of the provement on the opening. Exclanges through the opening. Exclanges throu interest among the distinguished scientists who heard it. Prof. Hallock said: "The a lively time for awhile. During the strug-question as to the conditions which exist in gle Constable Gallagher received a black eye, but he landed his man safely in jail, where he will be held for a hearing

Word now to advertise for a situation in THE DISPATCH.

St. Louis.—Wool—Receipts, 16,004 hs; shipments, 13,000 hs; market quiet and unchanged.

TRADE QUIETS DOWN

After the Bull Movement in Cereals, and the Week Closes

Not Much in the Hide and Leather Line to Comfort Sellers. THE GENERAL OUTLOOK IMPROVING

OFFICE OF PITTSBURG DISPATCH, SATURDAY, Aug. 22. The leading feature of the week in trade circles has been the subsidence of the bull movement in cereal lines. Under the influence of unfavorable European crop reports, an upward movement started which

sent wheat and rye far above the legitimate line. The consequent reaction has come, och and wheat has fallen 10c below its highest Jan point, and rye has declined almost as much. The short crops of wheat and rye in Eastern Europe will certainly redound to the prosperity of this country, as a market will thus be opened for our own great surplus at remunerative prices. The occupation of remunerative prices. The occupation of the grambler among our farming population is gone for this season.

With a crop of cereals beyond all previous records, the shortage in Europe now insures a good price for our cereals. The surplus of wheat is estimated all the way from 200,000,000 to 300,000,000 bushels, and will be needed to make up for the shortage in the lands beyond the sens. It is too early to make predictions as to the corn crop, but the present outlook is good, and all signs point to full average returns in this line.

Hides and Calfskins.

Hides and Calfskins,

The fige market has not improved in the week past. Trade shows very little life, and the buyer has the field. The following, from the Boston Herald, expresses the situation here as well as at the Hub: Holders are asking 6c for green salted buff hides at low freight points, but they cannot sell them at that figure. The tanners offer

sell them at that figure. The tanners offer 5½c for the same points, but at such offers they do not appear to get the hides. It is suggested that there might be some business done on the basis of 5½c for buffs at near freight points, but to this the holders of hides will not agree. Seconds and Bsare in about the same position as buff hides, sellers and buyers being from ½@½c apart in their ideas of values. Buff nides at high freight points are off-red on the basis of 5½c, but buyers offer 5½c, but do not yet get the hides. New England hides hold their position; from the fact that the few hides that the tunners must have they pick up in this class of stock, and the supply being limited at the best, the position is easy to sustain. The market is at 5@5½c for steers and 4½c for cows. Foreign hides are very quiet. There is little change that can be noted in quotable prices, Montevideo and Buenos Ayres selections being quoted at 12½c. Some 10,000 kips, al' that there were on the market, appear to have been sold to a Salem tanner at private terms."

Hide and Harness Leather Figures. Following are prices paid by Allegheny

b	tanners for stock delivered heret

Tallow, prime 5
Trade in harzess leather & active and while prices are far from satisfactory, the products of our home tanneries are taken about as fastas they are ready for market. Margins are very close and there are rumors that there is some cutting even on the extremely low rates. Buyes are evidently acting on the theory that prices must advance the coming fail.

Following are the prices of harness leather, as established by the Allegbeny tanners:

No 1 trace, 37c B B: B trace, 35c B B: No. 1 exter heavy, 100 lbs and over, 35c B B: B extr.: heavy, 35c B B: No. 2 extra heavy, 25c B B: No. 1 heavy, 130 to 100 lbs 31c B B: B heavy, 32; B B: No. 2 heavy, 27c B B: black line, 28c B B. Trade Outlook Improving.

The Chicago Tribune contains a number of interviews with prominent merchants of that city, from which we quote: Lyman J. that city, from which we quote: Lyman J. Gage, President of the First National Bank, had this to say of the situation and octiook: "There is no doubtbut that the farmers will realize much larger crops than usual this year. The heavy yield will be more universally distributed than it has been for many years. The effect cannot be otherwise than to put the farmer in a financial condition which will stand in perfect contrast to that of the past. That is to say, he will control exchangeable values for the needs of his farm and family. He can liquidate, if not wipe out, the burden of debt which has so severely oppressed him. The effect on general business must be good. Everybody ought to rejoice with the farmer at this bit of cheerful sunshine that has fallen to his lot. I should say that not much money has gone West to move the wheat crop yet. It is not marked, at least. The local banks throughout the West have enough cash on hand to take the initiative. When the big crop begins to move in the Northwest then look out for a large movement of currency. Money will be plentiful."

Good News From the West. Erskine M. Phelps, a member of one of the leading shoe jobbing and manufacturing firms of Chicago, had this to say:

"We have noticed a very appreciable and gratifying advance in trade already. Let-ters from agents day after day inform us that the Western farmers are buying more goods and of better grade than they have in years. For a number of years back the crops have been indifferent and the prices low. That naturally aused a depression in trade, but this year things are brighter than for a number of years. I expect a season of great prosperity. We are bound to have it. The immense crop We are bound to have it. The immense crop and the high prices are a golden boon to the poor farmers, and their gain will also be ours. In former years collections were hard, but even now they are easier. It is a great year. Money will be pienty, tarmers will soon wear patent leather shoes and fancy garments, and drive tallyho coaches."

HOME SECURITIES AND FUNDS.

With Few Exceptions Closing Prices Were the Lowest of the Week.

Those who expected a bulge in stocks last week were disappointed—not that conditions were unfavorable, but buyers failed to come out in sufficient force to make much of an impression. They seemed to be hanging back for some

thing to happen that will smash things and enable them to buy on a panic basis. Nothing of this kind is likely to occur. There is some local trouble, but is so restricted as to have scarcely any effect in financial circles. Total sales for the week were 532 shares ngainst 1,970 the previous week. The most active stocks were Duquesno Traction, Centra! Traction, Luster and Philadelphia Gas. tral Traction, Luster and Philadelphia Gas.
Final prices as compared with these of the
previous Saturday show the following
changes: Wheeling Gas gained 3%, Central
Traction %. Luster lost 3%, Pleasant Valley,
36 Switch %, Airbrake %. There was no
cunage in Philadelphia Gas, but the undercurrent was weaker. In most cases the
finish was at or near the lowest point of the
week.

PARIS, August 23.—Great satisfaction is expressed at Queen Victoria's graciousness to Admiral Gervais. The Liberte says: "The reception of the French fleet by the English people, Queen and authorities surpasses in point of cordiality and kindness all the promises of the programme."

Several foreign writers insinuate a feeling of constraint on the part of England, as ing of constraint on the part of England, as if the task of receiving the French visitors was a forced one. If that were so it would be an act of homage to French preponder-

THE HOME MARKETS.

Heavy Receipts of Peaches Force Prices Down Lower.

CHOICE DAIRY PRODUCTS FIRM.

Corn Strong, Wheat and Flour Steady, Oats and Rye Weaker.

GROCERIES SHOW NO NEW FEATURES

OFFICE OF PITTSBURG DISPATCH, SATURDAY, Aug. 22. COUNTRY PRODUCE-(Jobbing Prices)-Markets here have been overstocked with peaches all the past week. The estimate of receipts for the week varies from 75 to 100 carloads. With a daily average of '12 to 15 carloads of peaches received in this market, the tendency of prices has been steadily downward. Tropical fruits are exceedingly dull, by reason of the immense receipts of domestic fruit. Choice dairy products are firmly held at the advance already noted. Supply of good creamery butter is scarcely up to demand, and the advance of 3c. per per pound since the beginning of the week is more than maintained. Vegetables of all kinds are slow and dull with the one exception of potatoes, which have improved quality and advanced in price the past

INHERENTLY STRONG.

STOCKS HOLD THEIR OWN IN THE FACE OF BEARISH NEWS.

Even an Unfavorable Bank Statement Falls to Have Any Great Effect-A Good Upward Movement in Shares Early in the Day Neutralized Later.

New York, Aug. 22.—The stock market to-lay again showed its inherent strength, and a the face of unfavorable advices from the corn belt and an unfavorable bank statenent and persistent hammering by the ad-ocates of lower prices, held its own, and finally closed with a majority of the list fractionally higher than last evening. The fractionary higher than has evening. The market opened under pressure to sell for the foreign account, but first prices were irregu-larly changed from last night's figures, with o material difference in any one stock.

Notwithstanding the pressure from the Notwithstanding the pressure from the traders and the selling of foreign houses, prices immediately developed strength, and, with Northern Pacific preferred and Union Pactific leading, fractional gains were made all along the line of railroad shares, the improvement in the two stocks mentioned being ½ per cent. Cordage, however, showed again some of its peculiar strength, and rose 1½ per cent. News of frost in the corn belt, however, then gave the traders and sold-out bulls their opportunity to make a demonstration against values, and, while no special activity was developed, prices slowly yielded, and before the close nearly all of the early improvement had been neutralized.
