Commission people report a steadily grow-ing interest in the market and the increased inquiry is seen in its widening and the ex-tension of the transactions to a large num-ber of stocks which have lain dormant for months. The business of to-day and yester-day was more widely distributed than that of any day for the last year, the number of stocks dealt in reaching about 155. Another encournging sign for the market is the comstocks dealt in reaching about 1.5. Another encouraging sign for the market is the com-parative insignificance of the dealings in the unlisted department. The incubus of the manipulation of those properties being removed from the market gives legitimate securities a chance to reach their proper level

level. The effects of the frosts in the West were of no material consequence, and the de-clines in prices went no farther than frac-tions, although a few stocks here and there yielded readily because of special pressure or other circumstances. The Industrials were more active and all were helped by special circumstances. Sugar being strong in the reported deal with the opposition re-fineries; Lead, because of the lack of opposi-tion to the reorganization scheme at the meeting, and Cordage continued its reaction from its inte depression. There were fre-quent changes of tomper during the day. The market finally closed only fairly active and heavy to weak. The trading reached 26,50.
