was just what I needed. As

PAULDING, O., Aug. 27.-Senator John Sherman opened the financial end of the Ohio Republican campaign here to-day in a masterful speech on the money question. There was a very large audience present to hear him. In his speech he said:

I am much gratified that I am called upon to open my part in the political canvass in Ohio in the county of Paulding. But, fellow-citizens, I do not come here to talk about your local affairs, or even about Ohio, but of estions that affect every citizen of the United States of America. It has been said by many persons of both political parties hat this is to be a campaign of education. I believe it ought to be so, for the leading

I believe it ought to be so, for the leading questions involved are purely business questions affecting material interests common alike to men of all parties.

Upon two great measures of public policy the Republican and Democratic parties have made a formal and distinct issue, and these are to be submitted to the people of Onio in November, and your decision will have a marked effect upon public opinion throughout the Luited States. One is whether the holder of sliver bullion may deposit it in the Treasury of the United States and demand and receive for it \$1 of coined money for every 371 grains of fine sliver deposited. The market value of so much silver bullion is now about 77 cents, varying, however, from day to day like other commodifies, sometimes more and sometimes less.

The other question is whether the policy.

other question is whether the policy The other question is whether the policy of taxing imported goods by the Government of the United States embodied in our existing tariff law known as the McKinley tariff is a wise pubsic policy or whether it should be superseded by what is called a tariff for revenue only as embodied in what is known as the Mills bull, which passed the House of Representatives in 1888 and was rejected by the Senate.

A DIVIDED OUESTION.

Now, I propose on this occasion to confine sion of the money question as the most pressing, not that the tariff question is not equally important, but for the reason that I can only

do one thing at a time, and the money question is a newer one, is now before us, upon which Republicans and Democrats alike are somewhat divided.

Under the present law the United States is now purchasing monthly more than the entire product of sliver bullion in the United States and all this bullion is represented in tire product of silver bullion in the United States, and all this bullion is represented in our currency by either silver coin or legal-tender treasury notes of the United States. We expended under this act in the purchase of silver bullion prior to August 1 of this year \$55.191.781, and issued that amount of Treasury notes, which are now in circulation. We thus provided an increase of currency equal to or greater than the increase of business and population of the United States. Under it we purchase silver bullion at its market price and hold it in the Treasury as security for and redemption of the Treasury as notes at the parity of greenbacks and gold.

notes at the parity of greenbacks and gold. This is now the declared policy of the United States. Under it we will have a constantly states. Under it we will have a constantly moreasing volume of currency absolutely safe, and any profit derived from the purchase of silver builton and coining it will nure to the benefit of the people of the Inited States. The tendency of this policy, it is admitted, has been and will be to graduily advance the value of silver builton to its legal ratio with gold, and when this is eached both gold and silver would be coined at the mint on egual terms and conlittons.

SILVER MEN'S DEMANDS. Nearly all the silver produced in the

United States is by rich corporations in a few new states and its production at market price is far more profitable than any crop of the farmer, and yet it is the demand of the producer of silver bullion that the United tates should pay him 25 per cent more than its market value that lies at the foundation of the difference between the Republican

and Democratic parties.

By the act of 1890 Congress suspended the coimage of silver dollars unless needed for irchiation. To provide a market for our liver and for an increase of currency it directed the purchase of 450,000,000 ounces of time silver each month, making 34,000,000 ounces a year, at its market value and upon the security of this to issue legal tender treasury notes for the full amount of the cost of the silver, thus giving a staple market for all and more than the sliver pro-duced in the United States, and, at the same

time, furnishing to the people an increase of circulating money greater than the in-crease of our population. This increased purchase of silver was felt This increased purchase of silver was felt by conservative men to have gone to the ex-treme extent in favor of the producers of silver. I yielded with reluctance to the amount provided for, but it seemed to be the most expedient measure to stop a coinage alrendy in excess of popular demand and to furnish a good paper currency more favored by the neonic.

A BENEFICIAL MEASURE.

I now believe the measure will work out the most beneficial results. It will tend to advance silver to its old parity with gold. It has already advanced the value of our vast store of silver in the Treasury. It has given great activity to the production of silver. It has furnished an increase of circulation. It has maintained the gold standard while utilizing and benefiting silver to the utmost extent short of demonetizing gold. It is the key to our exatted, almost pre-eminent, standing in commercial credit and national honor among the nations of the world. It treats both silver and gold, like all other key to our exalted, almost pre-eminent, standing in commercial credit and national homor among the nations of the world. It treats both silver and gold, like all other commodities or productions, as subject to the universal rule of being worth what they will bring in the markets of the world. This the Republican doctrine now proclaimed

is the Republican doctrine now proclaimed in our Ohio platform.

Our Democratic friends differ from us in this particular. They are in favor of allowing any holder of silver bultion, foreign or domestic, any old silverware or melted teapet, any part of the vast accumulated hoard of silver in India, China, So ass America and other countries of the world, estimated by statisticians to be \$5.820,57,348, to present it to the treasury of the United States and demand 31 of our money, or our promises to mand \$1 of our money, or our promises to buy money, for \$71 grains of silver, or any multiple of that sum, though this amount of silver is now worth only 71 cents, and has for a period of years been as low as 77

If with free silver we receive only the at with tree silver we receive only the quantity of silver we are required to purchase by existing law, the United States would pay over \$12,000,000 a year more than if purchased at the market value, and this vast sum would be paid annually as a bounty to the producers of silver builton.

THE WORST EVIL But this is not the worst of it. Free coinage means that we shall purchase, not mere-ly four and a half million ounces a month, that all the silver that is offered, come from where it may, if presented in quantities of 100 onness at a time. We are to give to the holder either coin or Treasury notes, at his option at the rate of \$1 for every 871 grains, now worth in the market 77 cents.

Who can estimate the untold hoards of sil-

Who can estimate the untold hoards of silver that will come into the Trasury if this yealty is adopted. All of this will be represented by our Transury notes—an increase of the national debt. It is a public bid of ments an onnce more than the market price for all the silver affect and all that can be hereafter produced, made at a time when silver is declining in value, and when many of the commercial nations are seeking to convert their silver into gold. The Latin nations, including France, have been trying to maintain the value of silver, but the Latin Union is now dissolved, and each of these antions are now seeking for gold to replace wheir silver. wheir silver.

But it is said if we adopt the silver stand-

But it is said if we adopt the silver standard we will get more money for our labor and productions. This does not follow, but even if it be true the purchasing power of our money will be diminished. All experience proves that labor and the productions of the farm are the last to advance in price. Even if, after a long struggle, wares and wheat should advance as silver falls, what benefit does the farmer or laborer get. None wintever. He will get more dollars with less purchasing power. Silver dollars worth 77 cents in gold will buy no more food and ciothing than 77 cents of our money now.

WHERE THE BURDEN FALLS. The capitalist and speculator can protect bemselves from loss by stipulating for gold payments. This is almost universally done other securities running for a long time.

The owner of land and other property can advance his price as the sliver talls. The paper.

SHERMAN ON FINANCE

The Money Question Forcibly Presented to a Large Audience.

The Money Question Forcibly Presented to a Large Audience.

POSITIONS OF THE TWO PARTIES.

A Strong Appeal to Ohio Veters to Stand by Honest Money.

SCHEMES OF SILVER BARONS EXPOSED

PARTLENAGE OF Aug. 27—Senator John

Whole burden of this policy falls upon those who depend upon their daily labor for their daily bread and for the benefit of those who hope, by cheapening money, to pay their debts with money less valuable than the money they agreed to pay. The people of the United States are requested in this way to participate in a fraud I cannot believe, if they understand it they will do it.

But it is said we want more money to transact the business of the country. Do we get more money by demonetizing one half of all we have, for the gold now in circulation? It is now the basis of all the great transactions of foreign and domestic commence. With gold at a premium it will sink out of sight and be bought and sold like any other commodity, as it was during the war after the suspension of specie payments. We will again have gold for the capitalists and silver for the people. The fluctuations will be daily marked by the premium on gold.

Now both are on the same footing. You

Now both are on the same looting. You receive your pay in the highest standard of value known among men. Every dollar of paper money, whether it be a bank note or a paper money, whether it be a bank note or a greenback or a silver certificate or a treasury note, is backed by the Government of the United States with ample silver and gold to make good its promise, for when we now issue treasury notes for silver bullion we take care to get silver enough to be equal at its market value in gold. The gold and silver and notes in which you are now paid will travel anywhere in the world and everywhere be received at par.

THE DEMOCRATIC PLAN. Now let us examine the position taken in this canvass by the Democratic party in Ohio on this silver question. I have already read their platform. I know it is distastefu to the great body of the intelligent and conservative Democrats of Ohio. It was op-posed by two-fifths of the members of their onvention. It was adopted only as a politi convention. It was adopted only as a political expedient to catch votes for this election. It is at war with all the traditions and principles of the old Democratic party. It is opposed by the leading Democratic organs of the commercial cities, North and South, East and West. Governor Campbell, your candidate for Governor, shrinks from it as from a pestilence. He tries to abandon it, and says in two weeks it will not be heard of in the canvass.

and says in two weeks it will not be heard of in the canyass.

I do not intend that it shall escape discussion. I know and you know that if the Democratic party succeeds this fall in Ohio, the free coinage of silver will become the fixed policy of that party. It will be on your back as firmly as the old man of the sea on Sinbad the sallor. President Cleveland, in a formal letter, points out clearly the inevitable results of this policy. He says:

"The revival of business enterprise and prosperity so ardently desired and apparently so near would be hopelessly postponed. Gold would be withdrawn to its hoarding places, and an unprecedented contraction in the actual volume of our currency would speedily take place. Saddest of all, in every workshop, mill, factory, store, and on every railroad and farm, the wages of labor, already depressed, would suffer still further depression by a scaling down of the purchasing power of every so-called dollar paid into the hand of toil. From these impending calamities it is surely a most patriotic and grateful duty of the representatives of the people to deliver them."

ONLY A BARGAIN. While he was President, with a Democratic House of Representatives in Congress, no such measure was proposed. President Harrison is known to entertain the same opinions. Yet, now, under strange leadership, this scheme to change the standard of

value is pressed into our State canvass. I believe it is the result of a bargain between what is called "the National Executive Committee," composed of representa-tives of the great silver mining corporation tives of the great silver mining corporationof the United States, with some of the leaders
of the Democratic party, by which a portion
of the profits of these corporations is to be
invested in the Ohio canvass to defeat the
Bepublica- party, and especially "to down
John Shermau" on the issue of the free
coinage of silver. As for myself, it is a matter of little importance. I have had some
experience in such contests before. I am
very willing to abide by the judgment of the
people of Ohio.
But what I do care for is that the State of

very willing to abide by the judgment of the people of Ohio.

But what I do care for is that the State of Ohio shall not in any way be responsible for the adoption of the policy proposed by this combination, or for the evils that will surely flow from it. They invoke in its support a new party, calling itself the People's party, which is represented mainly by the disciples of the old greenback, fiat money craze, some of whom do their planting in law offices, and whose crops, if they have any, are thisties and ragweeds. They recently met at Springfield, and, after eliminating from their convention a large proportion of their number by their wild delusions and opinions, they announced their platform.

And what is it? Some of their creed is the repetition of mere dogmas or axisms to which all parties agree. Some of it appears to me a near approach to lunacy. They demand an issue of full legal-tender Treasury notes in sufficient volume to conduct the business of the country on a cash basis, and to loan this money to the people at a rate of interest not to exceed 2 per cent.

est not to exceed 2 per cent

PEOPLE'S PARTY DEMANDS. They demand the free and unlimited coinage of silver, Government ownership of all means of transportation and communica tion, and that the whole liquor traffic shall be conducted by the Government at cost by salaried officers of the United States, I do not attribute to our Democratic friends any sympathy with these wild notions, but they are committed by their platform to the fountain-head of all these vagaries, the free coinage of silver. On this question I appeal

to the wage-workers, farmers and business to the wage-workers, farmers and business men of Ohio.

They have not planted their lands with mortgages except to enable them to improve or increase their farms, and they are ready and willing to pay as they agreed. But few of them are fortunate enough to own stock in mining corporations in the silver belt. What they want is fair wages for a good day's work and a home market for their productions. Business men want a their productions. Business men want a stable standard of value for their wares and

A CLOSING APPEAL

I appeal to the conservative men of Ohio of both parties to repeat now the service they rendered the people of the United States in 1875 by the election of Governor Hays, in checking the wave of inflation that then threatened the country. You can ren-der even a greater service now in the elec-tion of Governor McKinley, in defeating the free coinage of silver and strengthening the hands of President Harrison and the Republican Senate in maintaining American industries, a full dollar for all labor and productions, the untarnished credit of the American people and the advancing growth and prosperity of our great Republic.

I have endeavored, in a feeble way, to promote these objects of national policy, and now that I am growing old I have no other wish or ambition than to inspire the young men of Ohio to take up the great work of the generation that is passing away, and to do in their time as much as or more than the soldiers and citizens of the last 49 years have been able to do to advance and elevate our Government to the highest standard and example of honor, courage and industry known among men. hands of President Harrison and the Repub

known among men. FOR SLEEPLESSNESS Use Horsford's Acid Phosphate. Dr. C. R. Dake, Belleville, Ill., says: "I have found it, and it alone, to be capable of producing a sweet and natural sleep in cases of insomnia from overwork of the brain,

which so often occurs in active profe and business men." EXCURSION TO CHICAGO.

Saturday, August 29, Via Pittsburg and Western Railway. Tickets will be sold for Chicago Express, leaving Allegheny at 2 P. THE COOK WELL FIRE OUT.

NOVEL METHOD EMPLOYED TO EX TINGUISH THE FLAMES.

Sand at McDonald-Small Well on the Ed McDonald Farm-Big Well Re ported at Wildwood

The fire in the Cook lot well of the Wheeling Gas Company at McDonald was extinguished early yesterday morning. The credit for the work is due mainly to Glenn T. Braden, General Superintendent of the National Transit Company. The flow from the well had been slowly decreasing, and for the last two days the flames were not nearly so fierce as when the well took fire. One suggestion

nearly so fierce as when the well first took fire. One suggestion had been tried and proved a railure. It was hn effort to drop a bell-shaped elbow attached to a lead pipe over the mouth of the hole. When this was found to be defective Mr. Braden went to Oil City and had a cross-shaped joint made. Gates were attached to the horizontal pipes, and also to the upper end of the vertical piece. The pipe below the arms tapered from 5 to 3 inches at the mouth. When everything was ready the casing head was twisted off and the tapering joint was dropped into the mouth of the well. The gates on the arms were closed but the gate at the top of the vertical pipe was left open. Through this the oil and flames rushed. Then the arms of the cross were connected with pipes leading to the receiving tanks. The flames were now under control and a single twist closed the gate at the top of the vertical pipe and the fire was out. The well had been burning just about 146 hours or two hours over six days. Averaging its production during that time at 100 barrels an hour, and the price of oil at 65 cents a barrel the loss to the owners in that time has been about \$9,500. The rig, four tanks and 700 barrels of oil, which were burned last Friday morning, would increase this amount \$2,000, and besides this loss the cost of putting out the fire has been heavy. When the flames were extinguished the well made 70 barrels an hour, but kept increasing steadily, and last evening was doing 85 barrels an hour.

The Wells in Detail.

McDonald-Ireland & Hughes' well on the Harris lot, 300 feet north of the Butler lot well reached the fifth sand yesterday and is showing for a 400 or 500 barrel well. The Royal Gas Company's No. 4 Ed. McDonald, 700 feet south of their No. 1 on the same farm, has got the fifth sand. It will make a farm, has got the fifth sand. It will make a small pumper. It is about half a mile due west of the Cook lot well. The same company has started No. 9, on the Ed. McDonald farm. It is across the railroad from the Cook lot well. Their No. 2 Mary Robb is spudding and they are rigging up at No. 3 on the same farm. They have just started to drill their Nos. 6, 7 and 8 on the Sauters farm. One of the most important wells in the field is the one which W. P. Rend is drilling at the Laurel Hill mines just east of the railroad, and half a mile northeast of McDonald station. It is 1,500 feet east of any other drilling well in the field. Brady & Co. are on top of the Gordon sand on the Scott lot. Christy & Co. are in the Gordon on the Richards. Wallace & Co. on the Smith lot are in the Gordon with a fair showing, and Kelly & Co. on the Davis lot are in the Gordon sand. The People's Natural Gas Company on the Johns lot are in the Gordon sand. Kelly & Co. are on top of the fifth sand on the Davis lot. Brown & Davis are on top of the Shaffer & Co. started to drill to the fifth sand in their well on the Fanny Johnson lot, near the station, yesterday afternoon. They expected to reach the nay late last night. sand in their well on the Fanny Johnson lot, near the station, yesterday afternoon. They expected to reach the pay late last night. The Royal Gas Company's well on the Mary Robb farm is doing 80 barrels an hour. Guffey, Murphy & Co.'s well on the Elliott farm is making 200 barrels from the Gordon and. Jennings, Moyer & Co. will get the fifth this week in their well on the Sauters to near the station. The wells which have just reached the Gordon have shut down, and the boilers are being moved back.

That Primrose Well. PRIMROSE-Mellon, Wilson & Spark's well on the McCarty farm is reliably reported as a good well presumably from the Gordon sand. It made 75 barrels yesterday afternoon, but does not flow regularly. The owners are in doubt as to exactly what sand they are in, and are not positive whether the oil comes from the Gordon or afifth

A Good Well Reported. Wildwood—There was a report in circulation last night that Lydecker & Co. had an 800-barrel well on the Perner farm in the southwest portion of this field. The rumor could not be substantiated, and it was generally discredited on account of the light wells which have been drilled in that vicinity.

ARCHER'S FORKS-The Victor Oil Com-pany's well on the Hurlin farm is good for at least 50 barrels a day. It is located in Washington county, O., a mile and a half southwest of the wells at Archer's Forks.

Yesterday's Local Features. Business was very light. Cash oil opened at 64½c, highest 64½c, lowest 63½c, close 63½c. September opened at 64½c, highest 64½c, lowest and close 63½c.
