Heavy Run of Cattle at East Liberty and the Markets Slow At

LOWER PRICES THAN LAST WEEK.

Light, Tidy Butcher Beeves Suffer Least From the Decline.

SHEEP ARE ADVANCED AND HOGS LOWER

OFFICE OF PITTSBURG DISPATCE, MONDAY, Sept. 7. At the East Liberty yards markets opened this morning with 127 leads of eattle on sale, against 73 loads last Monday and 78 loads the week before. In to-day's offerings there were 36 to 40 loads from Chicago. There were no strictly prime heavy beeves on sale. The bulk of the offerings consisted of medium and low grade stock. Buyers were present in fair force, but made the most of their opportunity and forced sellers to concede from 15c to 25c per cwt on prices of last week. Light, tidy butcher beeves suffered least from the decline in prices. Markets opened slow, and prospects were that common stock would go begging finat common stock would go begging for buyers at a greater reduction than 25c per cwt. The best beeves on sale did not bring much, if any, above \$5.50 in carlead lots. A load of 1,450-5 steers from Ohlo, close to prime, was sold at \$5.50. Fresh cows were in liberal supply, and all excepting the choleest were slow. Good stock was scarce choicest were slow. Good stock was scarce in this line, and, with a few exceptions, the top of the market was \$35 00 per head. The run of calves was a fair average, and last week's prices were maintained. The top of markets for vealers was 614c per fb.

Not So Many of These.

Sheep and lambs were in light supply. There were about 8 loads on sale at the opening of the markets, and the demand was active at an advance of 15 to 25c per cwt, on nctive at an advance of 15 to 25c per cwt. on sheep, and a still greater advance on lambs. Some dealers reported an advance of 1/c per lb. on lambs. The top of market for sheep was 5c per lb. and for lambs 5/c per lb. There were on sale about 28 carloaus of hogs, and markets opened slow at a decline of 1/c per lb. from last Monday's prices. Best selected Philadelphas sold at \$5.55, and the proportion of this quality on the market was small. There does not seem to be any longer a market for prime beeves at the Liberty yards. The butchers whose trade demands this grade of cattle bring their stuff directly from Chicago.

Ailegheny Stock Yards, At the Herr's Island stock yards offerings of cattle were larger numerically than usual, and with reports of a large run at East Liberty, markets were dull at a shade lower prices than were obtained last week. lower prices than were obtained last week. Best heavy Chicago beeves were quoted at \$8.25 to \$6.50, medium weights at \$5.00 to \$6.00, light weights at \$4.50 to \$5.25, common grades at \$1.00 to \$4.00, and buils, dry cows and heliers at \$2.50 to \$4.00, and buils, dry cows and heliers at \$2.50 to \$4.00 per head. THE DRIFT OF TRADE

Labor Day Closes the Banks and Exchange, but Otherwise

Financial and Speculative Conditions Strong and Growing Stronger.

NO FEARS OF A MONETARY STRINGENCY

Yesterday was a large holiday in deference to labor, but so many people were at work, the stores and shops were so well patronized, and the streets so thronged that the character of the day was not obvious to the observer. The Exchange and banks were closed, but in other respects Labor Day was much like other days. Stock brokers did little, and had nothing to say. There was some inquiry for Philadelphia Gas and Luster at close to Saturday's figures. It was reported that the Airbrake Company would soon reduce the hours of labor and wages.

Will Build Next Spring. Colonade row, on Federal street, Allegheny, will not be torn down this year. Next spring it will disappear and be succeeded by a six or eight story business house. The outcome of this improvement will be closely watched. It is predicted that it will wake up owners on that part of the street and pioneer the way for a general overhauling of the antiquated structures which have long survived their usefulness. This will be a distinct gain to the Northside.

Indications of Easy Money. The improvement in mercantile and manufacturing lines points to a larger use of money from this time forward, and there is some apprehension of a hardening of inter-est rates. As a foil to this, it is pointed out that the return of gold from Europe and of currency from the West after the crops are moved will counterbalance the absorption of funds by the expansion of legitimate trade and maintain the market in an easy condition. The latter view is the more reacondition. The latter view is the more reasonable of the two. Not for many years has the supply of funds been so easy at the opening of the fall season. There are no complaints of scarcity from any source. No worthy interest has suffered for necessary assistance. The condition of the Pittsburg banks was never better. All the financial bearings tend in the direction of promise. The strong position of the market will be reinforced by the return of the gold exported to Europe, which will contribute to its ease and efficiency. From these considerations there would seem to be no reason to apprehend a stringency, without which an advance in rates would be an anomaly in business.

Preliminary work on the McKee building, at the corner of Wood and Diamond streets,

is well under way. It will cover the lot and be two stories high. As stated some time ago, it will be occupied by the Edison Electric Company on a five years' lease at an annual rental of \$7,000. The company has been represented in this city for several years, but proposes to extend the field of its operations. It will display a full line of electrical goods, but the report that it will compete for city lighting has no foundation in fact—at present. What it may do is further along.

In regard to local stocks, it is clear to even ordinary observation that the public is on the bull side. The realizing of profits has reached a point to leave the market free to move forward. It is as certain as anything can be, that there will be no general movement backward. Stocks, as a general thing, are in strong hands, which of itself is suf are in strong hands, which of itself is suf-ficient to insure a strong market. But bet-ter than all, perhaps, is the fact that nearly all the weak spots developed early in the season have been fixed up, and no longer act as a dragnet on other unimpeachable securities. This has strengthened public confidence, and won back a great many in-vestors who had become disgusted and left the market.

An Important Meeting.

The next important local corporation meeting will be that of the Union Switch meeting will be that of the Union Switch and Signal Company on the 18th inst. At this meeting the stockholders will take action on the proposition to confirm the sale of the Garrison alley property to the Westinghouse Electric Company, and to transfer the mortgage lien from this property to the property of the Switch and Signal Company at Swissvale. Of the \$350,000 bonds issued by the latter company and \$54,000 sold to speculiators. Interest amounting to about \$100,000 on the holdings of the Airbaake Company has not been paid. The notification of the sale of the property and the removal of the lien will enable the Switch and Signal Company to meet the obligation and place itself on a better financial footing generally.

A Boom on the Way.

Some peculiar theories have been advanced in regard to seasons of activity in realty. Basing his calculations on the history of real estate transactions all over the country, one broker of a philosophical turn of mind attempts to show that "booms" of seasons of activity have a tendency to move from west to east. According to his theory the movement of last year in Chicago was but a transfer of the activity of a few years ago among the towns along the Pacific coast and more recently in Kannas City, St. Paul.

Flour, Feed and Grain. There was but one sale on call at the Grain Exchange, namely, a car of No. 2 yellow shell corn, 73c, ten days. Receipts, as bul-letined, 42 cars, of which 35 cars were by Pittsburg, Ft. Wayne and Chicago Railroad, as follows: 8 cars of oats, 9 of hay, 12 of flour, 1 of wheat, 2 of rye, 1 of feed, 1 of straw, 1 of barley. By Pittsburg, Cincinnati and 8t. Louis, 1 car of wheat, 1 of oats, 1 of bay. St. Louis, I car of wheat, I of oats, I of hay. By Pittsburg and Western, 3 cars of hay, I of oats. This being a legal holiday, there were no reports from Chicago or New York. Labor Day seems to have been observed by the closing up of grain exchanges at the leading centers of trade. The Pittsburg Exchange could have closed without serious detriment to trade. Corn and rye are firm, with a tendency to higher prices. Hay, oats, mill feed and straw are quiet, with a drift toward lower prices. toward lower prices. Following quotations are for carload lots on track. Dealers charge an advance on these prices

-The Moon Field Coming to the Front

With New Producers. Although there were new wells drilled into the fifth sand yesterday, there were number of wells which enlarged the average daily production. There are a score of wells in the field which, with a little agitafore the week is gone. Eggs are steady and unchanged.

When such wells are struck they are looked When such wells are struck they are looked.

When such wells are struck they are looked. When such wells are struck they are looked upon as big ones, but their aggregate pro-duction is seldom greater than that of aver-age wells. Many of these, however, are big producers, and give the owners the most singuine hopes of immortal riches.

In the Great Fonthwest. In the southwest field several wells were drilled to the lower depths yesterday. Among these were Guffey, Murphy & Co.'s well an the Baldwin farm, which increased from to to 125 barrels a day. This enormous increase was produced by a few runs of the drill and in a tew moments everyone who had the least idea of this well knew that it was one of the best in the country. It was isolated from everything else and was known far and wide as a well which if good would prove a bonanza to its owners. Such things will always be, and no one can stop them. If the owner persists in pushing his case, in nine cases out of ten the opposition will succumb to his advances, and it is much the same way in the oil business. If a producer can be shown that he will not get a well of at least 100 barrels capacity in a field where the wells average at least 500 barrels a day, he will call a halt, and may in all probability ask for a more secluded nook in which to vent his love. In such cases the lover is never blamed, but the one who plans the clandestine meetings is looked upon as a near relation of Mephistopheles. There is not one of the producers who would not indignantly deny that we were in league with the ruler of the lower regions. When, however, we engage in the oil business we are in the hands of persons who are unutterably opposed to us. For instance the well of the Woodland Oil Company, a mile northwest of Oakdale, was drilled deeper yesterday and rapidly increased from 40 to 100 barrels an hour. It was reported last night to be flowing at the latter figure and this alone was enough to attract the attention of other residents in the neighborhood. It is one of the greatest wells in the southwestern oil district, and was looked upon as dry. It is without doubt a marvel in the field.

In the Moon Field. In the southwest field several wells were

In the Moon Field. Moon-Boden & Co.'s well, on the Springer, is good for 100 barrels a day, and George Gillnor & Co.'s well, on the Sam Stevenson farm, is showing for at least 125 barrels a

Going too far-This man on the Fourth of July wanted to see the procession, but climbed to the top of the Boston State House; he said, "I was afraid somebody might step on my corns." This was carrying the thing to extremes. Sometimes this is the case with persons in search of health. Because there are counterfeits of Johann Hoff's Malt Extract on the market, should they give up in de-

spair, and suffer? In cases of dyspepsia, stomach diseases, hemorrhoids, general debility, and for mothers while nursing, it has

no equal. The medical fraternity in Europe and America indorse it.

Write to Eisner & Mendelson Co., 6 Barclay Street, New York, for descriptive pamphlets, and remember when buying that you get Johann Hoff's Malt Extract-the only genuine.
