OFFICE OF PITTSBURG DISPATCH, THURSDAY, Sept. 17. COUNTRY PRODUCE-(Jobbing prices)-Peaches and grapes have the precedence in fruit lines. Receipts of peaches to-day were the largest for the week. There were about eight carloads on sale. Fancy stock is in good demand at outside quotations. Grapes are in supply beyond demand and prices are through consignments; no cattle shipped to New York to-day.

Hois-Receipts, 2,500 head: shipments, 2,800 head:market active: Philadelphins, \$5 0065 70; best Yorkers and mixed, \$5 25@5 50; grassers and stubblers, \$4 50@5 00; pigs. \$3 50@4 50; 7 cars of hogs shipped to New York to-day SHEEF -Bocelpts, 600 head: shipments, 700 head; market very dull at yesterday's prices a shade lower. In tropical fruit lines lemons and oranges are scarce and firm, and bananas steady. Vegetables of all kinds are dull and slow. The top price of potatoes is 50c per bushel, and only the very choicest stock commands this price. Supply of creamery butter has caught up to demand, and markets in this line are quiet. The advance of last week appears to have been premature, and prospects pow are that the advance will be lost. Prices have reached such a height that butterine is coming to the front, and the consumption of the genuine article has materially lessened of late. Strictly fresh eggs are very firm at quotations.

BUITER—Creamery, Elgin, 24:4622c; Ohlo brands, and oranges are scarce and firm, and bananas BUTTER—Creamery, Elgin, 28-4622c; Ohio brands, 26-27c; common country butter, 16-37c; choice country rolls, 26-22c.

Sugar markets are very firm, and all signs oint to an advance in prices. Refineries while jobbers here are still selling at old rates, they could not do so if stock was laid down at present prices. Rio coffees are dull at the late decline, and Javas are still firm. Canned goods of all kinds are dull. With such an abundance of fresh fruits as we are now having, the canned article is naturally slow.

MARKETS RATHER NERVOUS.

Closing Price-A Downward Movemen in Corn-Oats Quiet-Provisions Steady. CHICAGO-The wheat market was nerv-

ous to-day. It was generally strong, though,

with quick turns up and down, but keeping above vesterday's closing figure. At the

start a few nervous shorts began to buy on the strength of the fact that British consols

were reported a point lower. This, they argued, was an indication that the danger of war had not entirely passed on the other side of the water. The result was that the

market, which opened rather easy, at once more took on a strong and advancing tone, but there was an absence of any decidedly bul-lish news, and as soon as this little buying

spurt was over the market weakened. Self-ing was free on the advance, and as it con-tinued after the demand was appeared the price went off about as rapidly as it had

Steel Rails—More interest is shown in the market by buyers, but the transactions are still confined to small lots. According to the report of the association, the orders of the unils aggregated in September 1,804,796 gross ions, standard sections, as compared with 80,755 gross ions, standard sections, as compared with 80,755 gross ions on August 1. The deliveries have been 400,021 tons up to September 1, against 384,000 on August 1, and 454,422 tons on July 1. The unils, therefore, have only two months work on hand, even at the slow rate at which they have been ganning lately. At the meeting last week a committee of two, representing the Eastern and the Western mills, was appointed to consider and report upon the question of the allet. he supply is moderate.

peared to be in huyers favor, as some holders manifested anxiety to realize. Stocks here are still moderate and chiefly in strong hands. Copper has been quieter the past week, and prices for merchant bars receied slow. This was due chiefly to holding back on the part of the buyers. Supplies are still sparingly offered. Consumers act as though inclined to resist an advance, but the quantity of copper in hands is believed to be moderate, and there is little disposition to realize on the part of the chief holders. Tin plate has been quiet, with business confined chiefly to small orders for San Franciscoand the continent. Considering the smallness of demand the market keeps surprisingly firm. During this period of comparative steadiness a dispatch from New York was handed around, saying that a cable dispatch received there quoted prices lower at Paris on a rumor that the French Minister of Finance was dead. Curlously enough this was followed by a heavy run of buying orders from New York. They were supplemented with similar orders from St. Louis, and a New York telegram advised that foreigners were buying freely there. BOAT BUILDING IN THE OLDEN TIME Harvey B. Chess, of Chess, Cook & Co., yesterday took out a permit for two cement

two-story and attic dwellings on Aiken avenue, Twentieth ward. These will be a departure in the building line, and perhaps the pioneers of many others. The exterior walls are to be of cement applied to ex-panded metal. The lathing will be at-tached to ordinary wooden studding. The interiors will be plaster done on the same material. Mr. Walter Chess is erecting a house of the same material in the Twentysecond ward. They will be fire-proof. The three houses will cost \$21,000.

A real estate operator, who understands the market as well as any other man in the city, and who has just returned from a three months' trip extending from Pittsburg to the far Northwest and as far east as Que bec, remarked yesterday: "It is all nonsense to say that business is stagmant. I am aware there is no rush, but the aggregate of sales of city and suburban property is astonish-ing. I am prepared to show that there is more doing than there was in the cor-responding time last year. In one district more doing than there was in the cor-responding time last year. In one district alone—Highland Fark—transactions within the last 60 days foot up nearly \$150,000. All of these sales have not been reported for good reasons, but will be in a short time. I am interested in two or three of them. The same is true of other districts. The inquiry for property comes from all classes of people. The rich want it for fine mansions and business stands, and the less opulent for modest homes. There is more in this than the casual observer is likely to dis-cover. It is a reflection of the sound con-dition and wonderful prosperity of the city."

"Old Times" writes to this column as follows: "The recent article in THE DISPATCH on the decadence of boat building in Pittson the decadence of boat building in Pitts-burg brings to my recollection the time when it was the principal industry. My father was in the business from 1858 to 1874, during which time 654 steamboats were built in the Pittsburg district. During the same period about 600 barges were constructed, period about 600 barges were constructed, besides a great many keel and flatboats. For nearly 70 years Pittsburg was prominent for steamboat building. Now it is practically a vanished industry. Railroad competition and neglect of the rivers have des royed it. If the Government would do its duty to about one-third of the population of the country by improving the Ohio river and keeping it in navigable condition, boat-building would speedily revive. Boats can be constructed cheaper here than at any other city in the Ohio Valley, on account of the cheapness of fron and other materials entering into their composition."

The European war scare over the "seizure" of a port on the island of Mytelene by the of a port on the island of Mytelene by the British has subsided. This, with the return of gold from Europe, has strengthened the business situation in this country, and reinforced public confidence. Conditions are bullish, and there are no reactionary symptoms. Pittsburg has her sails spread to the favoring breeze and is bowling along at a good rate of speed. Nothing short of a universal calamity can put Pittsburg on her back.

PLENTY OF CASH.

Good Reasons for Expecting an Easy Mar-

ket All Year. Experienced financiers have no fears of tight money this year. On this subject the

President of the Exchange National Bank, New York, is reported as saying:

"Talking about tight money and expecting it to make its appearance tend to create the very evil itself. But though a good many people who have persuaded themselves that

such conditions will result from the enormous crops and the heavy demands the

West and South will make for money, they are, I think, going to be disappointed. The

conditions this year are totally different from what they were last autumn or in 1889.

Contral Traction and Electric went off slightly.

The best features were Luster and Liberty National Bank, each of which added a good fraction to its credit. The bank is said to be doing a land office business, and insiders say the mining company is making money, but they refuse to give figures.

The rest of the list observed its customary attitude of immobility, though there appeared to be a stronger undercurrent, which may develop into activity later on.

Red Cloud mining stock appeared on the list, as ordered, and started off with a bid of 2½, offered at 3½. It was backed by well-known names, and may become a prime factor in the market, provided always the promoters adhere to their promise to furnish frequent and full information. Sales:

A Complete Rout for the Bears—Atchison and Reading the Two Largest Features—Bonds Active Also.

New York, Sept. 17.—The stock market was more active to-day than on any other day of this year, and at the same time again demonstrated its inherent strength by the utter rout of the forces engaged in the attempt to bring about a reaction in prices. The movement was the more significant as the final defeat of the bears was brought about by heavy buying orders. placed in the market at the right time, which are believed to be for the larger interests affected by the prices of securities, and to that extent there was infused more confidence into by the prices of securities, and to that extent there was infused more confidence into
the smaller operators on the bull side.

The pullish feeling was very marked at
the opening, but at the close it was rampant, and those who talk lower prices are
to-night in a large minority. The foreigners were moderate buyers in the early trading, responding to higher figures from the
other side, and there was an urgent demand
for the long account from domestic operatois.

gan into healthy action, purifies and enriches the blood, and through it cleaners and renews the whole system. All Blood, Skin, and Scaip Diseases, from a common blotch or eruption to the worst Scrofula, are cured by it. For Tetter, Saltrheum, Eczema, Erysipelas, Boils, Carbuncles, Sore Eyes, Golfre or Thick Neck, and Enlarged Glands, Tumors, and Swellings, it's an unequaled remedy.

Don't think it's like the sarsaparillas. They claim to be good for the blood in March, April, and May. "Golden Medical Discovery" works equally well at all seasons. And it not only claims to do good—it' guarantees it. If it dosen't benefit or cure, in every case, you have your money back.

You pay only for the good you get.

Invalid mothers, especially nursing mothers, can avoid that debilitating, languid feeling, and look well and hearty instead of peaked and thin, if they will only use the genuine Johann Hoff's Malt Extract. The effect is most excellent, as not only the breast of the mother, but also the milk organs are strengthened. This extract causes the secretion of milk to increase, so that even feeble women need entertain no apprehensions that milk will be lacking for the child. The entire nutrition of the body is
