THE WEEK IN TRADE. Improvement Not Meteoric, but the Trend Steadily Forward.

Limits Within Which Wooden Buildings

Are Under the Municipal Ban. AN APARTMENTHOUSE FOR THE EAST END

The forward march of events met with no interruption during the week. Locally there were one or two uncanny occurrences, which caused a ripple of excitement in business circles, but they had been discounted and did no harm. The monetary situation was clearer and more favorable. Considerable gold was received from Europe. Orders for iron came in liberally. Wheat exports were the largest on record. Railroad earnings increased. Real estate was active and building operations almost up to high-water mark. But better than all, confidence was strengthened. This was a distinct gain and cannot fall to exercise a refreshing influence upon every industrial and commercial interest.

The agricultural situation has dominated the business and financial interests so com-pletely of late that the condition of leading manufacturing industries has been almost lost sight of for the time being. Predictions have been freely made that the large grain crops and the rapid movement and export thereof must soon react favorably upon the agricultural communities, and in turn show an improved demand for manufactured articles, and so produce renewed and widespread activity in almost every line of business. Pittsburg has nothing to complain of and much to expect. of and much to expect.

W. C. Beringer & Co. are about closing the sale of a piece of vacant property to one of the local railroads. The deal involves about \$30,000. Transportation companies are so crowded with business that they find it necessary to increase their facilities for handling it. This speaks well for Pittsburg.

The fire limits of the city of Pittsburg, as defined by city ordinance and act of Assembly, comprise all of the First, Second, Third, Fourth, Fifth, Sixth, Seventh, Eighth, Ninth, Eleventh, Fourteenth, Pifteenth, Sixteenth and parts of the Tenth and Twelfth wards.

Architects are busy with small buildings, but have very little of special importance on hand. Half a dozen plans for an important public institution have been completed and a selection will be made this week. Mr. J. W. Offerman has made designs for a fourstory flat, or apartment house, at the corner of Center avenue and Devillier street, for Mr. George Zeremy, the undertaker. It will have all conveniences, including an elevator, and will be furnished this season. The cost will be \$10,000 or more. He has also made plans for a fine dwelling at Ingram for Mrs. Batten.

Here is an illustration of the way in which real estate is "going to sticks." An owner Wylle avenue, whose property is worth, on a fair basis, about \$3,000, fell into the notion that everybody wanted it, and put the price up to \$8,000. After holding it for some time he yesterday accepted the price first named. This is a big drop, of course, but it should be attributed to extravagant ideas. He got all his property was worth. Reasonable values are as firm as the hills.

RESULTS OF THE WEEK'S OPERATIONS ON THE LOCAL BOARD.

A Fair Amount of Trading at a Generally Higher Range of Values-Conditions and Influences Indicate an Active Campaign Near at Hand.

The past week was an eventless one in speculative circles, Trading was of fair proportions, footing up 1,575 shares, but new features were conspicuously absent. Conditions and influences affecting the market were favorable. The impulse was up-ward, and nearly everything on the active list finished the week either higher or with better backing. The only sale yesterday was that of 20 shares of Pleasant Valley at

Closing prices for the week, as compared with those of the previous Saturday, show the following changes: Arsenal Bank gained 1; Allegheny Gas Company, ½; Central Traction, ½; Pittsburg Traction, 1½; Pleasant Valley, ½; New York and Cleveland Gas Coal, ½; Luster, ½; Switch and Signal, ½. Pittsburg Gas Company lost ½; Philadelphia Gas, ½; Wheeling Gas, 1; Citizens' Traction, ½; Electric, ½; Underground Cable, ½.

The results of the week's operations are encouraging, and although business cut no great figure it was sufficient to show that there is money for investment in such stocks as are handled on the Pittsburg Exchange. NEW YORK MARKETS CLOSED WITH PRICES HIGHER.

The Best Prices of the Day Buied at the Close-The Buyers Greatly Outnumbered

Steady. NEW YORK, Sept. 19 .- The stock market today was extremely active at the opening, showing a marked decrease on that point from the heavy trading of yesterday, and while displaying considerable irregularity was in the main decidedly strong and the result of the two hours seen to-day result of the two hours seen to-day is to leave most of the list fractionally higher than last evening and some are materially so. The importation of gold was the chief item of news with a tendency to affect values, but there was little said about it and it may be doubted whether it had any material influence in making the gains of the day.

it and it may be doubted whether it had any material influence in making the gains of the day.

The opening was strong and very active, and white most of the list were fractionally higher than last evening. Burlington at 39 was up 1½ per cent. It was natural that after such a gain there should be some reaction in the stock and being joined by Reading affected the rest of the list to a limited extent. Realizations were the chief factor in such declines as were seen, but the demand for stocks was still very urgent and the buyers outnumbored the sellers and the course of prices was soon again turned in the direction of higher figures. In the upward movement the Grangers had first place, but there were a few other leading shares which commanded attention on account of their strength, among which Lake Shore and Northern Pacific preferred were most prominent. Among the specialties Distillers was conspicuous because of the sharp loss of 3 per cent in the early trading, but this was afterward entirely made up, while Buffalo, Rochester and Pittsburg was very strong on light trading. The bank statement shows only a nominal loss in the reserves while exhibiting a material increase in the deposits and a heavy expansion of loans, and was considered good.

The traders again went in to cover their shorts in the final dealings, and the market developed marked strength, finally closing active and strong at the best prices of the day. The final changes of note comprise advances in St. Paul 1½, Northern Pacific precerted 1½. Buffalo, Rochester and Pittsburg and Sugar each 1½, Lake Shore I per cent.

The Paul says: Most significant, perhaps, of all the incidents of the weak in its beer.

preserved 14. Buffalo, Rochester and Pittaburg and Sugar each 15. Lake Shore I percent.

The Post says: Most significant, perhaps, of all the incidents of the week in its bearing upon finances, both here and in Europe, is the breaking down of the last obstacle placed by the Bank of England in the way of our import of gold. This morning's cables brought news of heavy engagements of the precious metal in London, the total engagements in that city publicly announced now footing up \$1,250,000, with probably as much more contracted for but not yet made public. According to the dispatches most of this gold is American coin, the drop in exchange yesterday being sufficient to meet the premium imposed by the English bank. It is not easy to conjecture where the movement will stop, for the heavy purchases of our securities by London has, during the present week, upset most previous calculations. It is interesting to recall now the predictions of wiscacres three months ago that the Englishmen would prevent gold imports from that city by selling American securities to settle the trade debt.

At New York yesterday money on call was easy, with no loans, closing offered at 34 per cent. Sterling exchange quiet and steady at \$4.80% for 60-day bills and \$4.83% for demand.

The total sales of stocks to-day were \$37.671

Bullish Predictions Justified.

John M. Oakley's correspondents wired:

"We were somewhat bullish in our express ion yesterday, but we think the record of to-day's market will justify even our most positive statements of late. A brief analysis of it may be thus summed up; Quotations from London came strong and our market opened exceedingly firm with a bullish feeling still largely predominating, and many stocks have to-day scored the highest prices yet made: Lake Shore, for instance, touched 1223; St. Paul, 754; Northern Pacific preferred,

yet made: Lake Shore, for instance, touched 122½; St.Paul, 75½; Northern Pacific preferred, 75%, and Misouri Pacific 73%. These prices naturally seem high when compared with the low figures made in the spring, but it also must be borne in mind that the prices then touched were many of them forced below figures which would consistently represent their intrinsic value.

After 11:30 a slight reaction occurred upon the appearance of the bank statement, which showed a decrease of \$955,000 in the reserve, but this decrease was to be expected. The banks are having a gradually increasing demand from the commercial community, and as general business improves it is to be expected that the demand will increase. It may lead to higher rates for money, but there will be enough to go around and we have no fears of any serious disturbance in the money market. The slight concession which followed the announcement or the reserve decrease was quickly followed by a sharp recovery, and the closing prices were the highest of the week as well as of the current movement. As prices advance it may be expected that we shall have reactions; it is natural that they should occur; it will be better for the stock market if we have them, but they will, in our judgment, afford an excellent opportunity for still further purchases of good stocks, as all the conditions throughout the country point to still higher prices.

"The week terminates one of the most sucstocks, as all the conditions throughout the country point to still higher prices.

"The week terminates one of the most successful yet experienced in the present bull campaign. Several of the foreign exchange houses have to-day received advices that an additional amount of gold will be forwarded to them from Europe and we believe these shipments must continue to be made as the payments for our cereals will be large, to say nothing of our stocks and bonds that have been and are being repurchased by foreign buyers."

Only One Cloud. Henry Clews & Co. furnish the following: The stock market shows renewed activity and strength. The bears, however, are not alone in the opinion that the advance in prices during the last few weeks should almost suffice for the time being. Among almost suffice for the time being. Among the ranks of the bulls there are two classes who incline to the same view; first, the conservatives, who think that present prices are well up to the present intrinsic value of stocks and doubt the expediency of forcing up values to a pointat which the investment demand would be checked and at which foreign holders, under the pressure of an American drain of gold, might sell out upon New York; and a second class are those who have unloaded large lines of "long" stock and are actuated by the purely speculative purpose of being able to buy in again at a lower range of prices. The former of these two classes is simply quiescent; the latter have been using their influence, directly and indirectly, to depress prices.

"For the rest, the market may be said to consist of the sanguine and demonstrative class of buils, who are always optimistic, over-estimating invorable factors and underestimating unfavorable ones, and who act upon prospects rather than existing facts. When there is a large outside interest in the market—which is the case at present—this class of operators prove an important element for they all act in the same directlors.

market—which is the case at present—this class of operators prove an important element, for they all act in the same direction so long as they are able to maintain their markins, and it is therefore difficult to break the force of their support. At present, the forces of the market are divided into these unqualified bulls, on the original bears on the other. The result of such a contest under present conditions cannot be much other than a succession of slight finetuations, with little gain for either the one party or the other.

"Perhaps the sole fact that can be regarded as seriously suggestive of distrust is the grave condition of European politics arising from Russia's coercion of Turkey in relation to the passage of the Dardanelles. That may prove to be a very grave question for the great powers; but to the United States it could only bring important advantages in an increased demand for our investments and, in the event of war, for our food products. Nor is the negotiation of Russia's loan in Paris calculated to appreciably affect American investments in Europe, as the loan will have to be taken almost exclusively by French citizens, who hold but few of our securities."

fore Activity in the Money Market-New York Bank Statement. There was a distinct improvement in the local monetary situation during the week. Bank clearings, which are a reliable guide to the condition of general trade, were \$1,500,000 in round numbers in excess of those of the previous week, and about \$1,000,000 better than in 1889. There was a louder call for funds, denoting industrial and commercial expansion, and a more buoyant feeling all around. The result of the week's operations was materially beneficial to the activi-ties of the city. The Clearing House report for the day and week reinforces these re-marks. It follows: Saturday's exchanges ..

With Some Decidedly Weak Spots Was the Run of the Day at Chicago-The Bears Got the Better of the Argument-Pork and Ribs Have a Drop.

CEICAGO-While the wheat market ruled fregular to-day and developed some very weak spots, the general tone was one of strength, and most of the day prices were above yesterday's close. Cables were rather firm at the start and domestic markets were steady. December opened at 98% 193%, holding for a considerable time at 99c. Then S. V. White & Co. put a big line on the markets. ket and New York and St. Louis sent selling orders and prices began to weaken. The heavy receipts at Minneapolis and Duluth, 1,140 carloads, furnished additional ammuni-

heavy receipts at Minneapolis and Duluth, 1,40 carloads, furnished additional ammunition for the bearsand the market soon became demoralized, December selling off 40 %c, but with only a light business. A lower Liverpool cable coming in about that time proved a weakening factor. On the break there was a season of active buying, White & Co. taking back most of the property they had sold; and other buvers coming, December reacted sharply to 9%c. From this there was another decline to 8%c. This was followed in turn by a slight reaction. During the last hour the market continued nervous. After declining to 9%c, there was a rally to 99c, a break to 9%c and an advance to 9%c, with the close at 19%c.

Bradstreet's reported the clearances of wheat and flour from both coasts at 7,300,000 bushels during the week, and over 50,600,000 bushels for 12 weeks. The charters of vessels from here, including those made yesterday afternoon, were about 600,000 bushels. The most bearish frem of news was the decline in the price of farmers' deliveries in England, which showed a drop of about 14e during the week. The explanation cabled was that the quality of wheat offered was very poor, being new and damp, owing to the late wet weather. The final conclusion reached in regard to the Russian wheat export prohibition scare is that the exportation of wheat over the frontier to Persia has been prohibited. The business to-day was mostly in the hands of the professional.

Corn was decidedly weak and lower, influenced by the fine weather for the crop, which is now believed to be practically safe and a crop of 2,600,000,000 bushels assured. Under these circumstances the selling was urgent, and, with no one disposed to extend any support, the drop was easy.

October started at 51@552c, against 52%c at the close yesterday, and sold down to 50%c.

Here he received special instructions in the treatment of diseases of the kidneys and bladder, and devoting much time to the study of chemical and microscopical analysis of urine. After completing his second course under Dr. Miller he became surrical assistant to H. F. Bigger, A. M., M. D. Professor of Diseases of Women in the C. H. H. College, and a well-known surgeon of national reputation. A stay of over a year with Prof. Bigger gave Dr. Shafer abundant opportunities to study the private methods of this well-known physician and surgeon. His daily experience at the operating table in the wards and private departments of the hospital afforded advantages seldom enjoyed by a physician. It is almost needless to say that much of Dr. Shafer's success is due to his large hospital experience and thorough knowledge of homeopathic medicine.

His office is supplied with the latest appliances for the successful treatment of disease, among which may be mentioned his battery, which is the most complete electrical apparatus in the city. Hereafter patients will receive electrical treatment free of charge.

Perhaps no one could be more grateful to a physician than Miss Kittle Hanrahan, residing on Lincoln avenue, Butler, Pa. In speaking of her case she said: "When I began treatment with Dr. Shafer I had not seen a well day for four years, and during that time I took treatment from eight doctors, but all falled to avrest my disease or give me relief. At first I noticed a gradual loss of strength. Soon my head began to trouble me, which, later on, was a constant ache from morning till night. Backache became an annoying fusture, and at times I was so weak across my kidneys that I could not walk. I soon began to have pain in my liver, appetite islied, tongue became coated and had a horrid taste in my mouth. I always felt tired and weak in the morning, and often felt a disagreeable sensation in my stomach, and was greatly annoyed by a constant rumbiling of gas. As my disease grew worse I experienced a creeping sensation up my back, along the spine and had flushes of heat all over my body. At last I was scarcely able to walk, my nervous system became shattered and I would take sinking spells and not be able to move a muscle or speak a word. I would get these spells regularly each month and scarcely recover from the prostration of one attack before I would get another. The strong allopatnic medicine destroyed my gtomach so that scarcely any food could be remined, and every dose I took made me worse. I made up my mind that the doctors should experiment on me no longer and stopped all treatment. While my sister was in Pittsburg she called on Dr. Shafer for an opinion of my case. He assured her that I could be cured. At her earnest request I consented to give him a trial. Imagine my surprise when I noticed improvement the first week. This continued and to-day I enjoy the best of heatth. His medicine was pleasant to take and did not discuib my stomach. I have already sent one patient to Dr. Shafer, and will send more, for I know that to him I owe my life. "Kirris Haxn
