# THE HEAVENLY MUSIC.

Rev. Dr. Talmage Preaches About Organs, Harps and Songs.

HE OBJECTS TO CHOIR FIGHTS.

The Tabernacle Congregation Will Continue to Do Its Own Singing.

AN INTERESTING SERMON IN BROOKLYN

ISPECIAL TELEGRAM TO THE DISPATCE.1

BROOKLYN, N. Y., Sept. 20.-The mag-nificent organ of the New Brooklyn Tabernacle was dedicated to-day. The services were veritable musical festivals. While the regular musical programme at gregational singing, offertories and interades being rendered with marvellous vol-

gregational singing, othertories and inter-indes being rendered with marvellous vol-ume and expression. Er. Talmage's sermon, which was appropriate to the occasion, was on the text, Genesis IV :21: "His brother's imme was Jubal: he was the father of all such as hundle the harp and organ." Lamech had two boys, the one a herds-man and the other a musician. Jubal, the vonger son, was the first organ builder. The wondrons instrument which has so mach to do with the worship of the ages. Eart what improvement has been made the and is arging, and the great musti-inter of great multi-not stop. Tou know that in a great multi-rate of churches, the choir are expected to be officient are expected to be stlent. In such a church in Syracuse, an old elder persisted in singing, and so the choir are oxpected to be officient are officient and figure multice to go and ask the squire if he would not stop. Tou know that in a great multi-rate of churches, the choir are expected to be apple are expected to be stlent, and if you utter your voice you are interfering. There they stand, the four, with open glass dangling at their side, singing "Rockof Ages I chilt what may own day. I do not wonder that when the first full organ would stardine of our own day. I do not wonder that when the first full organ the start de data ar given in 730 such to do with the worship of the ages, int what improvement has been made inder the hands of organ builders such as lernhard, Sebastian Bach, and George logarth and Joseph Booth and Thomas toblota, clear on down to George and Ed-card Jardine of our own day. I do not conder that when the first full organ hat we read of as given in 757 w an Emperor of the East to king of France, sounded forth its full randeura woman tell into a delirium from chich her reasen was never restored. The majesty of a great organ skillfully played is inest too much for human culturance, but in the instrument has done in the and all eternity to celebrate. Last a half done. It has now come so pletion that this morning I preach dedicatory of this mighty throne sound. It greets the eye as well as behold this mountain of anthems ! st of hosannahs? Its history is pe-

nere has been much discussion as to be music was born. I think that at the nning, when the morning stars sang to-er, and all the suns of God shouted for t the earth heard the echo. The I on which the angels stood to celebrate relation was the birthplace of song. In-ate nature is full of tood's stringed and ruments. Silence itself-perfect only a musical rest in God's great the source of the summary of the local sectors in the summary of warship. Wind among the locares, shumaning in the summary air, the shumaning in the summary air, the shumaning is everlasting pealm, the bobo-on the edge of the forest, the quait ling up from the grass, are music.

#### EVEN THE INSAME MAKE MUSIC.

in Blackwell's Island I heard, coming om a window of the lunatic asylum, a very vect song. It was sung by one who had ther reason, and I have come to believe teven the doranged and disordered eleents of nature would make music to our we only had acuteness enough to if we only had acuteness enough to it. I suppose that even the sounds in ure that are discordant and repulsive celarmony in God's ear. You know that may come somear to an orchestra that sounds are painful instead of pleasur-uand I think we stand so near devasat-storm and frightful whirlwind, we can-hear that which makes to God's ear and ear of the spirits above us, a music as plete as it is tremendous. propose this morning, in setting apart organ for sacred use, to speak about cel music first showing you its import-e, and then stating some of the obstacles be advancement. I draw the first argent of sacred music

ent for the importance of sacred musi-om the fact that God commanded it ch Paul he tells us to admonish one psalu's and hymns and spiritual through David he cries out "Sing Il ve kincdoms of the earth Good, full ye kingdoms of the earth-there are hundreds of other passages I is hame proving that it is as much a s duty to sing as it is his duty to pray. Inv another argument for the impor-sof this exercise, from the impressive-

voice. Angels will not laugh if you should lose your place in the musical scale, or come in at the close a bar behind.
 Another obstacle that has been in the way of the advancement of this holy art has been in the way of the advancement of this holy art has been in the way of the advancement of this holy art has been in the way of the advancement of this holy art has been in the way of the advancement of this holy art has been in the way of the advancement of this holy art has been in the way of the advancement of this holy art has been in the way of the advancement of the holy art has been in the way of the advancement of this holy art has been in the way of the advancement of this excercise conducted by musical instruments. In the same church there are those who do not like is a question whether the music shall be conducted by a precentor or by a drilled chor. Then there are those who would like in the church to have the organ played in a dul, like in the church to have the organ played in a dul, like in the church to have the organ played in a dul, like in the way while there are others who would have the tere are others who would have the tere are others. Then there are those who ado not like in the church to have the organ played in a dul, like in the church to have the organ played in a dul, like in the church to solve in matyreles of sound, rolling and tossing in marvelenes convolutions, we when, in pyrotechnie display, after you think a plece is exhausted, it breaks ont in wheels, rockets, blue lights and serpenting demonstrations. Some would have the organ played in a dupot in a

n wheels, rockets, blue lights and scripentine lemonstrations. Some would have the or-an played in almost innudble sweetness, ind others would have it full of statecato assages that make the audience jump, with reat eyes and buir on end, as though by a rision of the Witch of Endor. And he who ries to please all will fail in everything.

ALL SHOULD HELP TO SING. Another obstacle in the advancement of

the Tabernacle is always attractive, that of to-day was exceptionally beautiful, the Con-this part of the service could be conducted by delegation. Churches have said: "Oh what an easy time we shall have. This min-advance. The supply of peaches is not so fail

Heavy steer hides are in active dema prices quoted. Buffs and calfskins at slow. Sellers are more anxious than b

the Local Board.

ber:

Giovanni." Now, in this church, we have resolved upon The plan of conducting the music by organ read of as given in 757 Emperor of the East to f France, sounded forth its fall a communified linto a delirium from more sound as never restored. The fagreat organ skillfully played is omneh for human endurance, but the instrument has done in the ment of divine service it will take of the instrument has done in the reat of divine service it will take a we dedicated this church to the a we dedicated this morning I preach had done. It has now come so defion that this morning I preach had it done. It has now come so the distance of the service it will take so we dedicated this morning I preach had it done. It has now come so defion that this morning I preach had it is montain of anthems ! to f hosannabs? Its history is pe-as been much discussion as to sie was horn. I think that at the dail the sum of God shouted for

church on the Sabbath day, and heard the choir sing, and you said: "That is splendid music?" The next Sabbath, you were in that church, and there was no choir at all. The leader was mad, or his asistants were mad, or they were all und together. When Cromwell's army went into battle, he stood at the head of them one day, and gave out the long-meter doxology to the tune of the "Old Hundredth," and that great host, company by company, regiment by host, company by company, regiment by regiment, battalion by battalion, joined in the doxology:

Praise God from whom all blessings flow, Praise Him, all creatures here below: Praise Him aboy, ye heavenly host, Praise Father, Soa and Holy Ghost,

Praise Pather, Soa and Holy Ghost. And while they sang they marched, and while they marched they fought, and while they fought they got the victory. O men and women of Jesus Christ, let us go into all our conflicts singing the praises of God, and then, instead of falling back, as we of en do, from defeat to defeat, we will be marching on team rightar to victory. Glory to the Father and to the Son and to the Holy Ghost, as it was in the beginning, is now and ever shall be, world without end. Amen.

# LIVE STOCK MARKETS.

BANKERS AND BROKERS.

MANHOOD RESTORED. "SANATIVO," the Wonderful Spanish

of this exercise, from the impressive-of this exercise. You know something it securiar music has achieved. You it has made its impression on govern-, thom haws, upon literature, upon generations. One inspiring national worth 35,000 men as a standing army, comes a time in the battle when one is worth 1,000 muskets. I have to tell iat no mation or church can afford to ely economize in music. There was a biolder dying in New Orleans, and a minister came in to give him the on minister came in to give him the olations of the Gospel. The man turned on his pillow and said: "Don't talk to hout religion." Then the Scotch minster began to sing a familiar hymn of Scot-and, that was composed by David Dicken on, beginning with the words:

## (b), mother, dear Jerusalem, When shall 1 come to thee?

THE NOLDIER REMEMBERED HIS MOTHER He sang it to the tune of "Dundee," and

erybody in Scotland knows that; and as in to sing the dying soldier turned ver on his pillow, and said to the minister: nere did you learn that?" "Why," re Sed the minister, "my mother tanglet me int." "So did mine," said the dying Scotch adder: and the very foundation of his heart as apturated, and then and there he yielded

We approved and then and there he yielded insuel to Christ In addition to the inspiring music of our own day we have a glorious inheritance of clurk h psalmody which has come down fm-grant with the devotions of other genera-tions-tunes ho more worn out thinh they were when our great grandfathers climbed up on them from the clurch pew to glory. Dear old scals, how they used to sing? When they were cheerful, our grandfathers and grandmothers need to sing "Colchester." When they were very meditative, then the board meeting house rang with "sonth street" and "St. Edmond's." Were they strack through with great tenderness, they sang "Woodstock." Were they wrapped in visions of the glory of the to Corist wrapped in visions of the giory of the ch, they sang "Zion." Were they overin the love and glory of Christ, they And in those days there were n tunes untried to certain hypins, and have lived in peace a great while, th have lived in pensor a great while, these old people, and we have no right to di-et them. "W-at God hat: Joined to-er let no man put asunder." But how -bearted we must be if all this sacred to of the past, and all the sacred nusic e present does not start us beavenward, using church is always a triumphant wit if a congregation is silent during mercies, or partially silent, it is the si-our death. If, when the hymn is given and her her and her and her and ut you hear the faint hum of here and here a father and mother in Israel, while ast majority are silent, that minister of st who is presiding needs to have a very Interval who is presiding needs to have a very rang constitution if he does not get the fills. He needs not only the game of God, it narries like windebone. It is annucing as some people who have voice enough to schurge all their outies in the world, when ey come into the house of God have no side to discharge this duty. I really be-we that if the Church of Christ could rise arout sing as it ought to sing, that where e have a hundred scale brought into the andread solution of Christ there would be a thouroom of Christ there would be a thou-

en impressed into the service of superstion. 1 nm far from believing that music what auways to be positively religious. Be-need art has opened places where music has yn ser alarized, and lawfully so. The rate in risen, the musical club, the orches-a, the concert, by the gratification of pure ste, and the production of harmless annasc-ent and the improvement of talent, have the improvement of takint, have inst forces in the advancement of the second second second second in the kingdom of nature yee ad fifting of the wind as well as the pesilin of the thunder. But is no every observer has noticed overy observer has noticed which God intended for the of the car, and the voice, and d the baart, has offen been imto the service of talse religions. ligions have depended more upon the pulpit proclamation of their dog-

other obstacle has been an inordinate of criticism. The vast majority of ple stuging in church, never want any-y cise to hear them sing. Everybody is be y else to hear them sing. Everyhody is walling for somebody else to do his duty. If we all same, liken the incompacies that are evident when only a few sing would not be heared at all; they would be drowned out. God only asks you to do as well is you can, and then, if you get the wrong pitch, of keep wrong those, he will forgive any defi-cipuey of the ear and innertection of the By Telegraph.

prices and correspondingly good demand for labor are any criterion upon which to base an opinion. Makers and dealers in leather and footwear are firmly convinced that the consumptive demand for those goods will be unprecedently large, and with-out the usual "between seasons" and slack-By Telegraph. Chicago - The Evening Journal reports: Cattle lower; to day's sales: Natives, \$3 00% 4 40; Texans, \$2 20%2 65; cows, \$1 40%2 50; Hogs lower; rough and common, \$4 55%4 40; mixed and packers, \$4 40%4 90; prime heavy and butchers' weights, \$5 10%5 40; prime light, \$4 90%5 55; second class, \$4 40%4 60; pigs and grassers, \$2 50%4 25; Sheep quiet and steady; matives, \$4 25%5 00; Westerns, \$5 55% 4 25; prime Texans, \$3 30%4 10; lambs, \$3 25% 4 75. ing down after the ball is once fairly set in motion; that an era of prosperity is pre-dicted, such as has seidom, if ever, been witnessed in the hide and leather trades and their collateral branches. Harness leather has met with good sale in oak and hemlock, and an advance of one cent has been readily obtained, with the tendency still upward. The prospective re-quirements from farmers, as soon as their crops are gurnered and returns come in, will maturally be harness that have done double duty in the cultivating and harvest-ing of the immense crops, will be replaced by new, and harness mainfacturers are pre-paring for an active fall and winter demand, ing down after the ball is once fairly set in motion: that an era of prosperity is set

## A MILE A MINUTE.

wheel.

#### That Is the Speed a Hartford Man's Unicycle Is Expected to Attain,

HARTFORD, CT., Sept. 20.-[Special.]-H. W. Loomis has invented a unicycle, with which he expects to make a mile a minute. THE ADVANCEMENT OF SACRED MUSIC. He is superintendent of the new department But I must now speak of some of the ob- of the Southington Cutlery Company. His cles in the way of the advancement of model is now being made by one of the Saturday's exchanges ..... sacred music; and the first is that it has | largest bicycle manufacturers in the country, which pronounces his plans thoroughly practicable. In general appearance the machine is similar to those of the same class already familiar in theory. The idea large outer wheel is nine feet in diameter, and the inner circumference connected with

spokes to them is eight feet in diameter. The driving wheel is three feet in diameter, and rides the big one a little beyond the center or point of contact with the earth, so that it is constantly climbing on the big

#### Closing Bond Quotations.

wheel. The plan is that of a man walking inside of a big hoop, his weight, when thrown forward, revolving the whole. This fric-tion revolves the big wheel at every evo-lution of the small one, and gives the in-creased speed and power. One wheel surface is concave and the other convex, with one surface of rubber. The operator rides a saddle inside the big wheel, over and somewhat near the driving wheel. **FOR NERVOUS DEBALITY Les Horsford's Acid Phosphate.** Dr. A. M. Bilby, Mitchell, Dak,, says: "I

by new, and narness manufacturers are pre-paring for an active fall and winter demand, as are also harness tanners in the purchase of hides. Collar leather and skirting in russet, black and the desired shades are also meeting with improved demand at firm prices. HOME SECURITIES AND CASH. The Result of the Week's Operations on

The past week was an eventless one in speculative circles. Trading was of fair proportions, footing up 1.575 shares, but new features were conspicuously absent.

 Brrns. Stort elear, September, 37 70. Lard
 Brrns. Jourde easy and closed firm; Western stream, 57 70. Lard
 Casnues-Star, 611 Weight, Sci stearine, per set, Casnues-Star, 6116125.
 Casnues-Star, 6 Conditions and influences affecting the market were favorable. The impulse was up ward, and nearly everything on the active list finished the week either higher or with better backing. The only sale yesterday was that of 20 shares of Pleasant Valley at Closing prices for the week, as compared Closing prices for the week, as compared with those of the previous Saturday, show the following changes: Arsenal Bank gained 1; Allegheny Gas Company, ½; Cen-tral Traction, ½; Pittsburg Traction, 1½; Pleasant Valley, ¾; New York and Cleve-land Gas Coal, ¾; Luster, ¾; Switch and Signal, ¾; Pittsburg Gas, Company lost ¾; Philadeiphia Gas, ½; Wheeling Gas, 1; Citi-zens' Traction, ¾; Electric, ½; Underground Cable, ¾; The results of the week's operations are encouraging, and although business cut no

The results of the week's operations are encouraging, and although business cut no great figure it was sufficient to show that there is money for investment in such stocks as are hardled on the Pittsburg Ex-change. Shrewd operators in stocks and bonds feel confident that the new-born booms at all points to the eastward must in-evitably give an impetus to business here. There was a distinct improvement in the local monetary situation during the week. Bank clearings, which are a reliable guide to the condition of general trade, were \$1500,600 in round numbers in excess of those of the previous week, and about \$1,000,000 better than in 1889. There was a louder call for funds, denoting industrial and commer-cial expansion, and a more buoyant feeling all around. The result of the week's opera-tions was materially beneficial to the activi-ties of the city. The Clearing House report for the day and week reinforces these re-marks. It follows: in fair demand; Pennsylvania firsts, 21c. BALTIMORE—Wheat—No. 2 red steady; spot and September, \$1 024@1 024@1 024@1 024 steamer No. 2 red. 254@054@1 024 steamer No. 2 red. 254@054@. ture at Masontown, seven miles south of Uniontown, is filled up 1,300 feet with oil from the Big Injun sand. It was five days in putting this much oil in the hole. They are working it for a mystery and are drill-ing it to the Gantz sand. Farmers are ask-ing from \$50 to \$100 an acre bonus for leases in the vicinity. The country about it is very rough and mountainous. It is sup-posed to be a northeast spur of the Mt. Morris pool. Saturday's Oll Markets. The market was strong and fairly active Saturday. Very little was said about cash oil, the only quotation on it being a bid of 60c, October being more desirable. This option opened at 62c, highest, 61c; lowest, 54c; closed at 61c. This was the highest point touched during the week. The lowest was 55c, showing a range of 7 cents. The gain for the week was about 5c.
