Prominent Amateur Athletes All Ready to Contest in the Local Sports This Afternoon.

IMPORTANT BASEBALL MEETINGS.

Doernberger Defeats G. A. Born Quite Handily in the Great Calf Pressing Contest.

RESULTS OF LEADING TURF EVEN

News About the Sprinters and General Go About Sporting Matters.

Doubtless the sport loving public of Patisburg and vicinity will enjoy a change from baseball. Certainly we have had lots of interesting games for many months, games in which some of the best players in the world have taken part, but a change from basefull to general athletic sports at this stage of the year is a very entertaining one

Well, the fall field day of the Allegheny Athletic Association takes place to-day and it is safe to say that if good weather revalls there will be some excellent sport. Already some of the most prominent amateur athletics in the country have arrived to take part in the competitions, more will arrive this morning. Altogether ever been here. There is some grambling out the handicaps and not without cause, on the mistakes are simply the result of illowing the landicapping to be done by a stranger to the city and an entire stranger o many of the competitors. Local events uld have tocal handicappers all the time nd it is not fair to lay any charges at the loos of Mr. Rosop. He was asked to deal with men of whom he had scarcely any nowledge certainly not sufficient to enhim to compare them with others, but pute the handicaps there will be some

with the sports. If everything goes along all right there will be an offer under to have the National Amateur Championships contested for here next year. The local club will have a first class track fixed up by that time, and doubtless we'll have many local performers of prominence.

WILL MEET TO-NIGHT.

Directors of the Local Club Will Probably

Discuss the Manager Question. As stated in yesterday's Disparen the di-rectors of the local club will meet this evening to figure on the club's transactions of the year. There may also be some talk about engaging a manager for next year, and if there is, it is to be hoped that Manager McGunnigle will be engaged for next year

The directors of the club have one or two grave matters before them, which must be settled before next year; but before discussing them they should free themselves from all the influences of assertions made by those whose only object is and always has been to cause disruption in the club no matter who was in power. A President for next year will not be elected for weeks and works yet, but the question of a change by design or otherwise has been sprung at a time when the evil effects of personalities will have the worst effect on the club; that is, a time when all attention should be devoied toward getting some good men for next year. The directors are surely less, actine was a constant of the club; that is, a time when all attention should be devoied toward getting some good men for next year. The directors are surely less, actine was a club that to sell you, and people know it. without any trouble. is, a time when all attention should be de-cored toward getting some good men for next year. The directors are surely busi-are men enough to know this, and they also know that there is not the least cause or cround for the mentioning of W. W. Kerr's name in connection with the Presidency for jext year. Mr. Kerr emphatically states his himself. Like the sound business man fast he is be states that There is something more important to do at present than talk portant to do at present than talk

The local baseball public can rest assured The local baseball public can rest assured that when the time comes to elect a President for the local club for next year a very good man will be forthcoming. A club President nowadays is required to devote almost his entire time to the team and is almost compelled to have an influence in national discussions and coaventions. If a President has not these qualities he is no use at all as a President, These are facts.

THE CALF DRESSERS.

Doernberger Defeats Born in Their Novel

Contest Amid Much Betting. here was a large and enthusiastic crowd at Exposition Park yesterday afternoon to see the calf dressing contest between Herman Boemberger and John A. Born. The two men named undertook to each dress two calves in the best manner and onickest time for \$500 a side. It is safe to say that all the butchers in Allegheny county and a few out siders were present. There was considerable betting on the result and the odds went es aigh as \$100 to \$75 on Doernberger. At this rate fully \$3.500 were invested on the con-

J. T. Beilstein was referee. Judges and timers—For Doernberger, Ed C. Peter; for Born, William Baeder. Mr. E. E. Shaner keeper for Doernberger, and J. Tip

pert for Born.

As soon as the contest commenced it was seen that Doernberger was the winner. Each man operated on two calves at once, and Isoemberger, winning the toss started first. Its work was so clean and quick that he was at once looked upon as the winner. He made the following score: First calf-Legged, 34 seconds: petied, or skinned, 3 minutes 35 seconds. Second calf-Legged, 5 minutes 10 seconds: petied. 3 minutes 50 seconds: dressed, 6 ninuites 25 seconds. Doernberger thus dressed its two calves in 6 minutes and hus dressed his two calves in 6 minutes and

. A. Born's score was: First calf-Legged, seconds: petrod, 3 minutes 25 seconds; seed 7 minutes 48 seconds. Second culf-ged 1 minute 21 seconds: petrod, 5 min-25 seconds; dressed, 8 minutes 215 secmes 2 seconds; dressed, 8 minutes 215 seconds. Thus it required Born to work 8 min-ites 211 seconds to dress his two calves, while Decraberger drossed his two in 6 min-ntes 25 seconds. It is likely that Docraberger will be matched against the champion of Philadelphia or any man in the world.

THE GYMS IN LINE.

The East Enders Telegraph Application to

Enter the A. A. U.

and was not unexpected, as the organization is always in the line of progress. It would have been in the A. A. U. several be way, which have been removed. The club is tapidly growing and is becoming one of the most active in the State. Some of its member- are doing excellent work and by the time it has had another seasons work, it sh some of the best amateurs in

JEROME PARK, Oct. 5.-Following were the results of the races here to-day:

First roc. six furlongs—Lonawell first, Wrest-ier second, Siepner third. Time, 1:18%. Second race, are nate-Peter first, Livonia sec-one. Cracksman third. Time, 1:36%. Third race, one mile-Kittle T first, Lizzie secone, Believe third, Time, 1:35%.
Fourth race, seven furlongs—Arra first, Dago-net second, Actor shird, Time, 1:30%.
Fifth race, five furlongs—Airplant first, Temple cond, Finite third, Time, 1795, Sixth race, five furious—Holmdel Colt first, and Prix second, 1950 third, Time 1934. Grand Prix second, Pago third. Time 1635a.
Following are the merrow's nutries:

GOOD SHOW WEATHER.

The Sudden Change in Temperature Aids the Exposition-The Battle of Gettysburg Once More for To-Day-Some of the Prominent Exhibits.

The cool weather of vesterday seemed t do wonders in the way of enticing people to as far as quality is concerned the present the Exposition. It is, as all patrons know, sports have the best entry list there has extremely pleasant on hot days, with the delightful breezes from the river continually sweeping through the building. Mechanical Hall is always the center of attraction to the majority of the visitors, but they find it far more so in cool weather. Thousands of far more so in cool weather. Thousands of people inspected the many interesting sights in the big glass building yesterday. The roaring furnaces and steam-spitting machines seemed to give a cord all invitation to all to enter and make themselves at home. This evening the "Battle of Gettysburg" will be the attraction. It will be given with the same accompaniments as it was some weeks ago, when the soldier boys of Pittsburg took an active part in it at the Exposi-

weeks ago, when the soldier boys of Pitts-burg took an active part in it at the Exposi-tion. This will no doubt be the last time the wonderful musical narrative will be given this year under the directon of Band-master Cappa, so everything has been done to make it a grand success. An excellent programme of German music will be rendered this afternoon.

Stirring Them Up.

This is what Mellor & Hoene are doing to the musicians and the public generally at 77 Fifth avenue, with the magnificent musical instruments which they now have in stock. People do not attempt to resist the charms of the Hardman pinnos. These Hardmans have a very satisfying quality about them—powerful, sympathetic tone and glorious action, combined with great durability; the numbers of these pinnos soil run away up in the thousands, and they are selling faster each year. In addition there are the fine Krakauer, A. B. Chase and Harringtons, each with its own especial advan-

KEYSTONE PICKLING AND PRESERV-ING WORKS.

Don't Miss This Exhibit.

If you are devoid of appetite just go and taste the delicious commodities presented to visitors at the Exposition by the H. J. Heinz Co. at the stand in south gallery. If you are afflicted with too great an appetite, you are afflicted with too great an appetite, make it your business to keep away from this place, for you will not be able to resist the pickles, fruit, butters, etc., which have one unfortunate peculiarity about them, and that is, the more you eat of them the more you want: a natural result, for all the more you want; a natural result, for all the things are made from fresh grown truits and vegetables, produced from their own farms. There is always a host of tasters around this interesting stand, who only leave it when they are ashamed to ask for more, and then go, determining to return at the earliest opportunity.

Pretty and Practical

Are the wares displayed by Cavitt & Pollock at their stand and they have the effect of making one appreciate the fact that it is in order to go, and at once, to the store, 935 Penn avenue, to inspect and purchase everything needed in any of these lines carried in thing needed in any of these lines carried in such large quantities by this firm. This store has never contained a finer lot of goods than those now offered by Cavitt & Pollock, and it would be a grave mistake not to be early on the ground to make your selections of lamps, table commaware, table glassware, chamber and toilet sets and those exquisite pieces of bisque, Worcester, Danish or Hannover for pariors and for presents.

Brass and Iron Grill Work. Too much stress cannot be laid upon the ndsome and useful grill work manu-tured by Taylor & Denu, 201, 203, 205 Mar-t street; a number of the most prominent ildings in the cit, are having it put in, as applicable for any place, where a par-on or barrier is needed, such as for banks, icket offices, residences, railway stations, etc. The strong claims of the fire escapes, taircases and other devices for the protec tion of life and property must not be over-looked. Some of this work or models of it can be seen at the Taylor & Dean exhibit or

The best invention of the age for thorough comfort is the adjustable reclining clair sold by this house; i is available not only for private houses, but is a necessary appendage of the surgeon's office. This company makes a specialty of rolling chairs for invalids in addition to numberless convenient appliances which will add materially to their comfort. Another specialty is found in office desks, of which there is every variety of style. Visitors are invited to gall at No.3 Sixth street to examine this large stock of indispensable articles.

The East End Gymnastic Club met last night and telegraphed an application for membership in the Amateur Athletic Union. This was expected by all, as such a move was anticipated by The Disparch yesterday morning.

It was the proper thing for the boys to do and was not mexpected, as the organization of the community.

Some Very Handsome Mantels

Are shown by Wm. H. Anderson & Co., of East End, office cor. Fifth avenue and Pennsylvania Railroad. The mantels deserve mention for the appearance and also on account of moderate price. The prices range from \$10 upward; and the firm will soon place on exhibition a special hard wood mantel, with French beveled mirror, which sells for \$16—it merits examination.

Eat, Drink and Be Merry. The candy, popourn and lemonade stands pertaining to Mr. Baker still hold the crowds. Every day is high festival at these stands, and if there is one exhibitor assured

every time of success it is the people riend, Mr. Baker.	2.5

BIG BREEZE COMING.

Record of Bardsley's Loans to Be Shown at Friday's Session of

THE INVESTIGATING COMMITTEE.

Correspondence Between Governor Pattison and Mr. Van Osten.

(SPECIAL TELEGRAM TO THE DISPATCH.) PHILADELPHIA, Oct. 5.-The investigation of the offices of State Treasurer and Auditor General and John Bardsley's administration of the office of City Treasurer still goes on. Senator George Handy Smith, Chairman of the Joint Legislative Committee, was busily engaged to-day in arranging for Monday's meeting of his committee at the Continental Hotel. Sergeant at Arms Hunt was kept busy serving subpoenas on the proprietors and business man-

appraiser's list. The names on the list vere furnished by Attorney General Hensel The sub-committee of councils will resume its sittings next Friday, when the final reports of the experts will be made. Mayor Stuart to-day forwarded to Chairman Van Osten the final report of Messrs. Faunce, Brown and Barlow, with the ledger they have prepared, containing a record of all Bardsley's loans. Experts Heins and Whelan, who were employed by the committee, will also present their report. Chairman Van Osten to-day made public the correspondence which passed between Governor Pattison and himself in regard to

igers who have published the mercantile

Bardsley's books, letters and papers. GOVERNOR PATTISON'S REQUESTS. Governor Pattison's letter to Chairman Van Osten is under date of September 29

and is as follows: "I will feel obliged if you will send to me copies of all records, books, papers, letters, telegrams and other evidence of a documenteigrams and other evidence of a documentary character in your possession or under your control which will furnish any information or throw any light upon the management of the affairs of the offices of Anditor General and State Trensurer. I shall be glad to have, in addition thereto, any other evidence or explanation which may be in your possession or under your control, or to which you can refer me in connection with the subject." with the subject."
To this letter Chairman Van Osten replied

under date of October 3:

"I beg to state that the books, papers, etc., which were taken possession of by Mayor Staart when Mr. Bardsiey vacated the office of City Treasurer were handed over to the District Attorney, Mr. Graham, and they have never been in the custody of the committee, but the District Attorney has allowed the committee free access to them at all times. inder date of October 3:

CORRESPONDENCE NOT MADE PUBLIC. "I understand you have received copies of the Auditor General's, State Treasurer's and Mr. Livsey's correspondence. We have not seen the Yard correspondence up to this time, the District Attorney not deeming it wise to make it public until the trial of Yard takes place, which we are given to understand will be in a short time. The only docustand will be in a short time. The only docu-mentary evidence the committee have in their possession is the stenographic reports of the evidence taken at the public hearings by the committee, which were published in full in the papers at the time. If they are of any service to you the committee are ready and willing to deliver them to you at any time, you may desire." them to you at any time you may desire."
Senator Quay and family said farewell to Atlantic City for the season to-day, and coming up to the city took rooms at the Continental Hotel. Mrs. M. Ward, of Stamford, Conn., accompanies Mrs. and Miss ford, Conn., accompanies Mrs. and Miss Quay, and they expect to leave for Beaver after a brief visit,

SENATOR QUAY'S HEALTH IMPROVED. The Senator has been in a cottage retreat on Pacific avenue, Atlantic City, during the past four weeks, and the stay by the shore has greatly improved his general health. To-morrow will be devoted to receiving a number of Republican county chairmen from over the State. It was stated this evening by a prominent

Republican not quite in sympathy with this year's campaign, that Senator Quay's plan to counteract the force of the extra session of the Senate would not be made known until the day the Senate met.

"Mr. Quay's plan is to have a committee appointed by the Senate to inquire into the legality of the Governor's action in calling that body together," said the gentleman.

"The object is to delay the Senate investigation at all hazards until after the election. Mr. Quay believes he can still hambug the people, but the plan is anticipated and is very obnoxious to many Republicans. I know personally that Chairman Watres will cut across the grain from the start and there are other Senators, like Mylin, who believe in a vigorous policy as the only possible salvation." until the day the Senate met.

THE CUMBERLAND SYNOD.

Several Matters of Interest Disposed of at

The Tarentum Meeting. TABENTUM, Oct. 5.-[Special.]-After some interesting action the Pennsylvania Synod of the Cumberland Presbyterian Churen finally closed its session last evening. The synod was composed of four presbyteries-Allegheny, Pittsburg, Pennsylvania and Union. The formation of one new presbytery and four congregations were reported for the past year. There are 40 ministers in the synod, three of them being at present missionaries in Japan. There are 45 congregations in ali. Rev. G. W. Montgomery, Paster of the McKeesport congregation, was

ele ted Moderator of the Synod. Rev. A. W. White, who had been appointed at the last meeting of the Synod to act as general superintendent in ruising funds to liquidate the debt against Waynesburg College, offered a report, which was referred to the Standing Committee on Education. The private houses, but is a necessary appendage of the surgeon's office. This company makes a specialty of rolling chairs for invalids in addition to numberless convenient appliances which will add materially to their office desks, of which there is every variety of style. Visitors are invited to call at No.3 Sixth street to examine this large stock of indispensable articles.

Dabbs' Portraits.

Visitors to the art gallery will do well to examine critically the faces of our prominent men which are collected there. The fact is his portraits have always been fine and the likenesses perfect. We doubt if he are the last meeting of the Synod to act as general superintendent in ruising funds to lequence are report, which was referred to the Standing Committee on Education. The report was very favorable and mentioned several large amounts which had been raised for the purpose. A special committee apport, which was adopted and mentioned several large amounts which had been raised for the purpose. The report was very favorable and mentioned several large amounts which had been raised for the standing Committee on Education. The re at the last meeting of the Synod to act as burg College. After selecting Brownsville as the next place of meeting, and listening to an address by Rev. J. B. Koehne, of Pittsburg, the Synod passed a resolution against Sunday opening of the World's Fair and adjourned.

TRAINMEN IN SESSION

A Tilt Between Grand Secretary Sheehan

and Editor Rogers. GALESBURG, ILL., Oct. 5 .- The National onvention of the Brotherhood of Railway Trainmen opened at 9 o'clock this morning with an attendance of nearly 400 delegates, the largest convention in the history of the Brotherhood. Every part of this country and Canada is represented. E. E. Clark, Grand Chief Conductor of the Order of Railway Conductors, extended to the convention the greeting of his fraternity, spoke an enthusiastic word for federation and hoped that the time would soon come when there that the time would soon come when there would be such a federation of which the two organizations would be a part. Hon, L. Scoffin spoke at length of the necessity of the introduction of automatic couplers and other safety devices. He made a strong appeal to the convention to admit no drinker to the Brotherhood. Hon, D. G. Ramsay, Assistant Grand Chief of the Order of Railroad Telegraphers, extended a greeting from his order, and was followed by A. B. Garretson, Senior Vice Grand Master of the Conductors.

Grand Secretary Sheehan referred to the attitude on the Northwestern trouble. The editor, L. W. Rogers, subsequently pronounced the statements of Mr. Sheelan false, and demanded the floor for an explanation. He was ruled out of order, with the understanding that he would be given a chance bereafter to be heard. This matter settled, the officers made their annual reports, that of the Grand Secretary showing 424 lodges, with a membership of 21,000, a gain of about 6,000 for the year.

THE ELLIOTT OIL WELL.

IT IS BELIEVED TO BE VERY SMALL IN THE FIFTH SAND.

Wildcat Ventures Which Are Now Drilling Southwest of McDonald-No Change in the Production Yesterday-A Hoodoo at Mansfield on Top of the Last Sand,

The feature of the McDonald oil field yesterday was Guffey, Murphy & Co.'s No. 2 on the Elliott farm. It is located just north 400 feet from Greenlee & Forst's big well on the Mevey farm. At a late hour SENATOR QUAY HAS A MOVE TO MAKE last evening it was reported to be 18 feet in the sand and making only 15 barrels an hour. This is at the rate of 300 barrels a day, and as it was making 200 barrels a day from the Gordon sand, it would leave only 100 barrels a day from the fifth sand It was thought that a mistake might possibly have been made in measuring up. possibly have been made in measuring up. No. 1 on the same farm, which has been pro-ducing for several weeks, is still doing 75 barrels an hour and has made as high as 150 barrels in the same length of time. No. 2 makes the result at a number of wells which are now drilling just south and southwest of it look rather doubtful.

The Great Mevey Well. The big well of Greenlee & Forst on the Mevey farm, was doing 450 barrels an hour yesterday afternoon. They have ten tanks of 800 barrels capacity each, and one of 1,200 barrels capacity at the well. It was making nine feet an hour in an 800-barre tank, or at 50 barrels to the foot, 450 barrels tauk, or at 50 barrels to the foot, 450 barrels an hour. There are 25 or 30 barrels an hour going down Robinson's ran. Guffey, Murphy and the Oakdale Oil Company's No. 1, on the Sturgeon farm, is down 2,100 feet and may get the fifth sand this week. Guffey, Murphy, Jennings & Co.'s No. 1, on the Herron, their No. 2 Bell, and their Connell farm well did not reach the fifth sand as expected, but should be in the pay to-day.

Some Important Field Notes. McDonald-The Chartiers Oil Company's No. 2 on the Chartier property is two bits in the sand and making 20 barrels an hour. It is located 300 feet due south of the Royal Gas Company's big well on the Mary Robb Gas Company's big well on the Mary Robo farm. Pew & Emerson are in the fifth sand in the Davidson lot, without showing for a well. The well is located about 150 feet west of the Royal Company's Saniers No. 3. W. P. Rend was in the spray above the Gordon in his well on his own property at the Laurel Hill coal mines last evening. He had a light showing of gas in this forma-tion.

In Wildcat Territory. There is a good deal of activity to the onthwest ahead of the McDonald field, and within a short time a number of wells will be completed which may show an outlet toward West Virginia. The Royal Gas Com-pany's well on the McGoogin farm, nine miles southwest of McDonald on a 45- line, is almost completed. There was a report yesterday that it was shut down on top of the Gordon sand. A party interested in it stated that on account of the formations being irregular they did not know just where they were drilling. He denied that the well was shut down. Guckert & Learn have started to drill on the Reed farm, four and one-half miles due south of McDonald. The Wheeling Gas Company is drilling two wells at Venice, three miles south of McDonald. Each of them is down 1,200 feet. One is on the Mcore farm and the other on the Patterson. They are only three-fourths of a mile apart. Mercer & Go. are down 1,000 feet on the Reed farm, which is located four and one-half miles southwest of McDonald on a 45 degree line. Mellon & Co. have started to drill a well one mile east of Middlesex. It is 22 miles ahead of McDonald on a 45 degree line and is on the line between Pennsylvania and West Virginia.

Will Be Finished at Last. niles southwest of McDonald on a 450 line.

Will Be Finished at Last. Mansfield - Calhoun, Patterson & Jen nings' wildcat well on the Holmes farm was on top of the fifth sand last night and will be drilled in to-day. It is located or Campbell's run, one mile west of Mans field. This has been an unlucky well from the time it was commenced, last February. There have been 12 fishing jobs, and five times the well was declared plugged, but Contractor Crever has in every instance decided to go ahead and finish the well or blow up the bull wheels.

Gauges of the Wells. The following is an hourly gauge of the big wells, taken yesterday: Forst & Greenlee's Meyey No.1, 450 barrels: Mathews, 225 barrels; Miller No. 1, 160 barrels; No. 2, 10 barrels; Baldwin, 125 barrels; Bell, 100 barrels; M. Robb, 110 barrels; Gamble, 45 barrels; Guck-Robb, 110 barrels; Gamble, 45 barrels; Guck-ort & Steele's Mevey No. 1, 45 barrels; Santers & Co., 35 barrels; Cook lot, 20 barrels; Elliott No. 1, 80 barrels; Elliott No. 2, 15 barrels; Short lot, 75 barrels. The estimated daily production is about 37,000 barrels.

Yesterday's Local Features. Between 15,000 and 20,000 barrels change hands and the close was 1/2c better than the opening, notwithstanding two or three well opening, notwithstanding two or three wells were expected to come in at McDonald during the night. The opening and lowest for cash was 50½c; highest and closing 60c. November opened at 60c; highest, 60½c; lowest, 50½c; close, 60½c. Refined at New York, 6.5%6.40; London, 5½65-916; Antwerp, 15½, an advance of halfa point. Dally average runs, 98.162; dally average shipments, 134.734. OIL CITY, Oct. 5.—National Transit certificates opened at 50½c; highest, 61c; lowest, 50½c; closed, 61c; salics, 78,000 barrels; clearances, 184,000 barrels; clearances, 194,000 barrels; clearances, 195,000 barre were expected to come in at McDonald dur

BLAINE'S EUROPEAN ILLNESS. His Italian Physician Submits to an Inter

view Upon the Subject. MILAN, ITALY, Oct. 5 .- The Herald corre ondent has interviewed Dr. Fornoni Blaine's former physician, who says: my opinion Mr. Blaine had himself to blame for the greater part of his sickness. On reaching here from the North he evidently ignored the difference of temperature inside of St. Gothard, where it is most always warm, and on emerging from it, with some one and a half metres of snow all around and the difference of temperature of some twenty degrees Fabrenheit, Mr. Blaine neglected adding a warm overcoat to his usual apparel, and in consequence arrived here with a heavy cold, which culminated in with a heavy cold, which calminated in rheumatic paralysis of one side. While in this condition Mr. Blaine gave himself up to gloomy reflections, learing chiefly that he should never more be able to render any service to his country.

"Mr. Blaine suffered from what is known as the render any service to the country."

"Mr. Blaine suffered from what is known as rheumatic paralysis, which is not so fatal as when accompanied by hemorrhage of the brain. Still, at his time of life, with not too great staying powers and little recuperative resources, it is surprising the progress he made. Even at that time he would have done better yet had he acted ou my advice and stayed here a little longer. But he became nervous and fancied that the air in his rooms was poisoned, etc. Yet his quarters were the very best in the hotel, with a hish ceiling and well ventilated.

"Mr. Blaine is chiefly a hypochondriac. It worried him to think that he should no longer be able to play a part in public affairs, and his pride could not well reconcile itself to the inevitable. Thus it happened that after four weeks' stay here and contrary to my advice he left Florence, where, as you know, he became worse and had to employ Dr. Baldwin, and where he finally became convinced of his physical condition and wrote that now famous letter which surprised us here almost as much as his comwrote that now limited letter which sur-prised us here almost as much as his com-parions at home. In my opinion Mr. Biaine, at his time of life, will do well to abstain from any excitement, as only absolute peace and quietness and rest can secure him a ripe old age."

INVESTIGATING SEALS' HABITS.

British Commissioners Think They Have Scored a Valuable Point. OTTAWA, Oct. 5 .- Word has been received here by the Department of Marine and Fisheries from Victoria, B. C., that H. M. S. Grand Secretary Sheenan referred to the abuses to which he said he had been subjected through the Trainmen's Journal, in its attitude on the Northwestern trouble. The Bosons, Subsequently pro-

what truth there is in the theory that in seasons when seals are plentiful on St. George's, St. Paul's and other islands in the eastern side of Bering Sea they are scarce

George's, St. Faul's and other islands in the castern side of Bering Sea they are scarce on the Commander Islands, and vice versa. This season the seals are plentiful. At the breeding islands there are millions of them. At St. Faul's Island fully 200,000 seals were in sight. At St. George's Island, however, the number was not so great.

The Pheasant brings the report that several feunale seals were killed during the suckling season by the Commissioners, and their stomachs were found to contain nothing but a little seaweed and some pebbles. This is an important point, and one on which the Commissioners have received special instructions. During the last conferences at Washington, Secretary Blaine held that the most serious reason for stringent restrictions on the taking of seals in Bering Sea was that the mother seals, which, during the suckling season, swam 50 miles every day to the feeding grounds, would be taken in great numbers and the young seals which they left on the shores would perish unless the mother seals were protected. Sir Charles Tupper argued that the mother seals never left their young in the suckling season, which only lasted 12 days, during which time the mothers took no food at all. Secretary Blaine ridiculed this idea as unheard of in natural history. The report that the stomachs of the mother seals were found empty bears out Sir Charles Tupper's statement.

THREE CORPORATE DICTATORS.

Sensational Answer to a Suit Filed Against a Stockholder.

WASHINGTON, PA, Oct. 5 .- [Special.]-Dr. W. McCleary, against whom the Tyler Tube and Pipe Company, of which he is a local director, recently brought suit on \$1,000 at director, recently brought suit on \$1,000 al leged to be due on his capital stock subscription, filed an interesting answer this afternoon, which has caused a great sensation. Mr. McCleary avers that it is not true, as set forth, that the entire capital stock was called by the directors on January 21, 1891. On the contrary, he claims that the plaintiff had no legal existence provious to February 3, 1891, and that no meeting of the directors at which the question of demanding the payment of the capital stock was discussed, was ever held.

"From the beginning until the present time." Mr. McCleary says, "William P. Tyler, the President of the company, has assumed and exercised dictatorial powers, and in connection with Charles E. Stone, who is said to be the representative of Walter Woodman, the Treasurer, has conducted the business in all its departments without consulting with the other directors and without at any time convening the board to

out consulting with the other directors and without at any time convening the board to take any official action moon any of the business of the company." The most sensational feature in the answer, is that McCleary states that he and the other directors have repeatedly asked for certain financial statements, and that their demands have been atterly ignored by the three gentlemen managing the works.

The Highest Building Site on Earth. BEME, Oct. 5 .- The Alpine Club is building a hut for signal purposes on the peak of Monte Rosa, at an altitude of nearly 15,000 feet. The but has the highest site of any building in the world. The Queen of Italy has subscribed a large sum toward its erec-

FIRE RECORD.

THE Greenwood 120-stamp quartz mill at the Greenwood mine, 11 miles from Dead wood, S. D., was consumed Saturday night. Origin of the fre unknown. The mill, which was completed in November, 1884, at a cost of \$150,000, was insured for only \$10,000. At London the fire which broke out at an early hour yesterday morning on Mark Brown's wharf, and which brought 20 fire engines to the scene, has been subdued.

The flames entirely gutted an enormous four-story warehouse filled with colonia products, such as tea, tailow and cinnamon The glare of the conflagration was so great that it illuminated half of London. THE WEATHER.

TEMPERATURE AND BAINFALL,

RIVER NEWS AND NOTES.

Louisville Items-The Stage of Water and the Movements of Boats. (SPECIAL TELEGRAMS TO THE DISPATCH.)

ISPECIAL TELEGRAMS TO THE DISPATCH.]

LOUISVILLE, KY., Oct. 5.— Business duff.
Weather clear and cold, The river is at a stand,
with I foot 3 inches on the falls, 3 feet 7. Inches in
the canal and 5 feet 3 inches below. The towboat
Transit, which sunk here several months ago, was
raisen to-day.

A novel and interesting ceremony took place today on board the elegant new steamer Mabel
Coincaux, now anchored at Howard's shipyard,
just across the river in Jeffersonville. When she
was blessed by a priest, a custom not prevalent in this country, at 1 o'clock, the soclety people of Jeffersonville assembled on
board the boat. Pather Andrau, of the St. Augustine Church, offered a fervent prayer for the
success of the boat, during which the entire
crew and company stood about with oncovered
heads. Then he went about sprinking hely water
from stem to stern. When he had finished the
lines were cast off, and and tumultuous cheers
from the carpenters and the crew the prow was
turned up the river on the trial trip. Everything
worked as smoothly as could have been wished for,
and the Mabel Comeaux is, as fast as she is beautiful.
