### TRADE OF THE WEEK

Business Toning Up, With No Disturbing Influences in Sight.

GENERAL CONDITIONS INVITING.

Contributions From the City and Three of

the Bustling Suburbs.

FEATURES OF MONEY, STOCKS AND OIL

Business improved somewhat in Pittsburg during the week and held its own at other places. There were no new disturbances and some of the old ones were removed. C. V. White & Co. compromised with their creditors at 50 cents on the dollar. This will expedite the resumption of business by Rea Bros. & Co. Gold exports fell off, but a halt in the movement of grain, due to a scarcity of cars and bursting warehouses, maintained the money market in an ensy position.

Taking the country through, the volume of trade was as large as ever known at the same season, while the outlook was full of terests of the country confidence will be further strengthened and expansion aug-

engines. The same company is building a handsome stone and brick station at North Mansfield.

The necessity for these improvements shows that Mansfield borough and its suburb are keeping in line with other progressive communities around Pittsburg.

The Week's Building Record. Building operations were slow last week so far as new work was concerned. This is accounted for by the lateness of the season. Thirty-one permits were issued for 39 im-provements of a total estimated value of \$74,. 175. The previous week 44 permits were issued for 52 improvements, at an estimated cost of \$114,490. The total number of houses for which permits have been issued this year, to date, is 2,510. This is about equal to last year.

A Prosperous Community. Sharpsburg is, perhaps, the best equipped borough in the county. Nearly all the streets are graded and paved. It has complete water and sewerage systems, and a well organized fire department. Two railroads afford transportation facilities, which will be augmented by an electric street car line rapidly approaching completion. A number of important manufacturing concerns are situated here. But, best of all, it is practically out of debt. The income from the waterworks not only pays interest on the bonds issued for their construction, but the principles it follows: principal as it falls due.

Valuable Option Secured. A prominent real estate firm on Fourth aveme yesterday secured an option on a piece of down-town business property for \$100,090. They had been working on it for several months. This deal consummated, will give the city another large warehouse.

A Lively Town, The growth of McDonald, the new ofl town, is without a parallel since the bustling times in the early history N. Y. & C. Gas Coal Co..... of the oil trade. To meet the large increas in the local traffic of the place, the Panhandie Railroad Company has decided to put on two additional passenger trains, making 24
each way daily. A few days ago four trains
a day were sufficient.

Before oil was "struck" real estate was at
a discount. Building lots went a begging at

from \$150 to \$200. A few have lately changed hands at from \$300 to \$500. The place has received an impetus which will remain after Yet with all these benefits and advantages, property is proportionately cheaper, both o buy and rent, than in any other suburb diacent to the city.

A Big Sale Consummated. During the week Kelly & Rogers East End eal estate dealers, consummated the sale for Mrs. Elizabeth Sargent to H. P. Slotterbeck, of 32 building lots, each 25x110, front-ing on St. Clair, Jackson and Mellon streets, Nineteenth ward, at a price approximating \$30,000 cash. The purchaser will erect a number of houses on this property. This transaction was referred to some time ago, but details were lacking.

MOVEMENTS OF MONEY. A Better Call for Loans and a Gain in Ex

changes. Bonkers reported a satisfactory business during the week. There was an improve ment in the call for money, while routine lines were more active. All good paper was readily accepted, showing that people who control the money supply are neither hard up nor apprehensive of a stringency.

That local business is broadening is proved by the report of operations at the Clearing House. Exchanges were upward of \$1,000,000 in excess of those of the previous week. They lead 1889 and every other year in the history of the city, except 1890, when the pace was too rapid, and disaster followed. pace was too rapid, and disaster followed.
Conditions are favorable to a continuance
of the forward movement. Confidence underlies every substantial interest. Weak
concerns are about weeded out. Money is
well distributed. There is a feeling of repose, which reflects a healthy sentiment and
gives assurance of a prosperous era in store
for Pittsburg and the country.

Curing of Disease.

The Scientific Use of Electricity—Below we give a few examples of the beneficial effects of electricity when skillfully and selectifically applied aided by the rational administration of the proper medicines.

In Pulscoart Consumption—Pulmonary consumption affords a fine example of a battle for life—between the blood corpuscles from within and the disease germs from within—with tissues sodden with catarrhal secretions as the battlefield. It is a fact well demonstrated that the most effective enemy to the germ of this disease is the electric current acting upon the nervous tissue, stimulating the vaso motor system which controls the organs of digestion, assimilation and absorption. Pure rich blood is always the result of healthy nervous power.

The Fallacy of Toxics—It may now be

IN CONVALESCENCE, WASTING DISEASES, ETC.—In convalescence from neute diseases electricity should be used to insure rapid convalescence and to escape the linbility to the establishment of chronic diseased conditions. As a ready oxygemator of the blood, and as a tonic and pure reconstructive of ill-nourished tissues, many other indications for its use will suggest themselves to the physician, following out the idea of its physician following out the idea of its physician for its efficacy in rickets, marasmus, wasting discharges, debility and many other diseases characterized by mainutration or lowered vitality.

IN NEURALGIA, sciatica, rheumatism, con-

In NEURALGIA, scintica, rheumatism, congestions and conditions of nervous excitement, of sensitiveness of any description, electricity gives relief and permanent benefit with a magical promptitude and directness, and all the time causing little or no sensation beyond a gentle stimulation and warmth.

It is generally supposed by the uninformed that the amount of sensation produced by an electric battery is the measure of the good done by the current.

This is a great mistake, as electricity should never be applied in sufficient force to "shock" any one. A galvanic battery will, in the usual method of applying, produce comparatively little sensation, and yet, under the intelligent direction of a physician, the galvanic current will work cures in cases and forms of disease which the more stirring and nerve exciting faradic current is totally unfit for. The galvanic current is a steady and uniform flow of electricity in one direcand uniform flow of electricity in one direc-tion, mild, soothing and tonic in its effects.

Promptly Goes to Sleep. re a way of putting myself to ale that has never failed, says Robert E. Toole. of Boston, in the St. Louis Globs-Denocrat. I close my eyes lightly, and then gently and gradually direct them upward and finally inward, as if I wanted to look into the interior of my own skull. The movement must be gentle and gradual or the sudden strain on the nerves will give you a headache, and sometimes there may be some slight discomfort on the first two or three trials, but it wears off

rapidly. After you have retained your eyes in this position for a few moments you feel yourself losing consciousness of time and place and slowly slipping, with delightful smoothness and a kind of a dreamy softness, out of the present. I invariably have the one sensation, that of floating in a boat on gently rocking bil-lows that are moving easily away. The process is really a kind of self-hypnotism, and while you are performing it your mind is unable to take up any thread of thought or memory, or present to it-self any picture other than the one that the

process itself supplies. It is a very singular thing, and I find that nearly all my acquaintances can repeat after me the self-hypnotic movement. SICK HEADACHE\_Carter's Little Liver Pills. IMPROVEMENT. THE PROMISE OF CURE.—No array of words can give a dyspeptic one-half the hope that comes from the refief which always follows the use of Burdock Blood Bitters, and the promise of cure is never broken. "Having suffered from dyspepsia for two or three years, I decided to try B. B., and after taking one bottle I found myself so much better I got another bottle, and after taking that I had no more need of medicine. "MRS. G. C. WHITE, Taberg, N. Y."

"I have taken the second bottle of Burdock Blood Bitters, and it has cured me of dyspepsia with which I uffered for six years, "W. W. HAMILTON, oct-rrssu Lock Haven, Pa."

That Appears as a Powerful Agent for the Curing of Disease.

IT IS ELECTRICITY

THE FALLACY OF TONICS—It may now be taken as definitely settled timt iron, potash, manganese and other so-called tonics have a direct delergious effect in this disease. Instead of these drugs the organic system needs real and resource time force by means. needs rest and regenerative force by means of gently stimulating the depressed nervous system by electrical treatments. All other treatment ultimately fails. This, followed faithfully and persaveringly, slowly but surely succeeds. By treating the consumptive patient and building up his vitality it enables him to overcome the disease.

Nervous Diseases and General Desility.

—In the treatment of nervous diseases and general debility electricity demonstrates again its restorative powers. Here it is not the stimulating action of the remedies usually classed as tonics that is needed. The organic powers of the system are already taxed to their utmost ability to carry on the physiological processes of life. Electricity gives the much needed effect in these conditions—not that of a stimulant by irritation, to be followed by a depressing reaction—but that of a true nutriment to the starving tissues. Its tonic effects are permanent as they are the effects of a richer blood supply, bringing healthy food and oxygen to the tissues. Thus the patient is gradually brought up to his normal condition.
