An Important Liquor Question Settled.

WELLSVILLE, O., Oct. 20 .- [Special.]-

A telegram has been received here from

Columbus that the Ohio Supreme Court had

reversed the decision of Judge Nichols in

the now famous Salem saloon case. In

September, 1890, the Salem Exposition So-

ciety held a fair and race meeting in that

city. Under the laws of Ohio no salcons

shall remain open day or night where an

agricultural fair is being beld. One Salem

saloonkeeper denied that a fair given by a

stock company came under the Ohio laws, and refused to close his establishment dur-

ing fair week. He was arrested, and when his case came up before Judge Nichols, of

nowever, taken to the Supreme Court on

appeal, and to-day the decision of Judge Nichols was reversed. The saloonkeepers here, believing that the case would be set-

tled in their favor, did not close their es-tablishments when the Fair Association

held their fair here last August. The an-

nouncement of the Supreme Court's deci-

sion has caused great excitement among the local liquor dealers, as they will all be ar-

rested and fined heavily and imprisoned.

TRYING TO HIDE HIS BLOODY WORK

Cov to-day confessed the murder of John Whalen, whose body was found buried on the mountain side at Washington, Mass., last Tuesday. He says that he learned Saturday, August 29, that Whalen had planned an elopement with Mrs. Coy. When he reached home late Saturday night Whalen was absent. He went into the

He could find no trace of him, and returned to the house and found Whalen's trunk standing in his room. He broke it 8 PMopen, and found his wife's clothing packed in it. While examining the trunk Whalen came in. This was between 2 and 3 o'clock in the morning. Whalen asked Coy what he was doing at his trunk, and a quarrel followed. Whalen stepped out and returned with an ax and club, and struck Cov with his fist, knocking him into a corner.

Coy says he killed Whalen in self-defense, and exonerates Joe Kelly and Mrs. Coy, saving they knew nothing about the crime. When asked about how he came to have so much money immediately after Whalen's disappearance, he became reticent, but finally said Whalen gave it to him in con-

FRIGHTENED TO DEATH.

OMAHA, Oct. 20.-George Smith, the colored fiend who is generally supposed to have been strangled to death by a mob of infuriated lynchers, died from fright. At least that is what the assistant coroner, Dr. Allison, declored under oath to-day, and on the strength of it County Attorney Mahoney asked for a continuance of the preliminary examination of the alleged lynchers, so that he could amend the information to suit this phase of the situation. The Court granted the request and continued the case

Much interest has already been shown in the engagement of the Minnie Hauk Grand Opera Company, which begins next Monday night at the Duquesne. The advance sale of seats and boxes begins to-morrow morning, and as some change has been decided upon in the order of performances the correct repertoire is appended: Monday? "Car-men;" Tuesday, "Lohengrin;" Wednesday and Friday evenings, "Cavalleria Rusti-cana;" Thursday, "Il Trovatore;" Saturday matinee, a popular opera and Saturday evening "Faust."

NEW YORK, Oct 20.—The Board of Rapid Transit Railroad Commissioners, which has been devising a scheme of rapid transit for this city, to-day recommended an under-ground system, the motive power to be electricity or some other power not requiring combustion within the tunnel and motors to be capable of a uniform speed for long distances of not less than 40 miles an hour, exclusive of stops.

The pocketbook was found in her posses-sion, but there was only \$36 remaining. JAMES DEVANEY, his wife, Kate Devaney and Andrew Devaney were lodged in the

Twenty-eighth ward police station last evening, on charges of disorderly conduct. When taken to the police station, Devaney was searched, and \$400 in \$20 gold pieces found on him. He gave his occupation as that of a laborer. All three live at 310 Manor street, and were arrested on information made by a neighbor.

Getting New Machinery. The demand for Marvin's fine bread has become so great that Mr. Marvin has been compelled to enlarge his already immense plant. A new engine and boiler and a complete set of bread-making machinery are now being placed in the factory on Liberty street, and its capacity will soon be largely increased. It is estimated that not more than half as many families are baking bread now as were doing so ten years ago. Housewives are finding out that Marvin's not only is as good and sweet and pure as they enn make themselves, but that it actually is cheaper. All first-class grocers sell Mar-vin's bread.

Afraid of Her Breath. A bad breath spoils the beauty of a

Don't want your lover to kiss.you, for fear he may become disgusted.

There is a way to cure this afflicion. It arises from a disordered stomach. Read what the celebrated Doctor Hofmeister said before the Medical Society of London:

"The unnatural motions of the stomach causing pressure and belchings, the irritation of the intestines resulting in catarrh of the bowels. and the inflamed mucous membranes, are the most fruitful of all known causes of diseases.

"Out of them grow most kidney and liver troubles, diabetes, all rheumatic affections and gout. I have found that the unnatural motions of the stomach cease, the intestinal troubles become soothed, and health results from the use of Carlsbad Waters or Sprudel Salts. The diuretic effect of these remedies, its quiet action upon the lining of the stomach, and its healing power upon the inflamed intestines are beyond all praise."

IT IS ELECTRICITY

That Appears as a Powerful Agent for

Curing of Disease.

The Scientific Uses of Electricity—Belo. we give a few examples of the beneficial effects of electricity when skillfully and scientifically applied, aided by the rational administration of the proper medicines.

In Pulmonary Consumption—Pulmonary consumption affords a fine example of a battle for life—between the blood corpuseles from within and the disease germs from within and the disease germs from without—with tissues sodden with exturrhal secretions as the battlefield. It is a fact well demoustrated that the most effective enemy to the germ of this disease is the electric current acting upon the nervous tissue, stimulating the vaso motor system which controls the organs of digestion, assimilation and absorption. Pure rich blood is always the result of healthy nervons power.

The Fallacy of Tonics—It may now be taken as definitely settled that iron, potash, manganese and other so-called tonics have a direct deleterious effect in this disease. Instead of these drugs the organic system meeds rest and regenerative force by means of gently stimulating the depressed nervous system by electrical treatments. All other treatment ultimately fails. This, followed faithfully and perseveringly, slowly but surely succeeds. By treating the consumptive patient and building up his vitality it enables him to overcome the disease.

NEBVOUS DISEASES AND GENERAL DEBILITY.—In the treatment of nervous diseases and

Nervous Diseases and General Debility.

—In the treatment of nervous diseases and general debility electricity demonstrates again its restorative powers. Here it is not the stimulating action of the remedies usually classed as tonics that is needed. The organic powers of the system are already taxed to their atmost ability to carry on the physiological processes of life. Electricity gives the much needed effect in these conditions—not that of a stimulant by irritation, to be followed by a depressing reaction—but that of a true nutriment to the starving tissues. Its tonic effects are permanent as they are the effects of a richer blood supply, bringing healthy food and oxygen to the tissues. Thus the patient is gradually brought up to his normal condition.

In Convalescence, Wasting Diseases, Etc.

—In convalescence from acute diseases electricity should be used to insure rapid convalescence and to escape the liability to the establishment of chronic diseased conditions. As a ready oxygenator of the blood, and as a tonic and pure reconstructive of ill-nourished tissues, many other indications for its use will suggest themselves to the physician, following out the idea of its physiological action. Thus one can readily see the reasons for its efficacy in rickets, marasmus, wasting discharges, debility and many mus, wasting discharges, debility and many other diseases characterized by mainutrition or lowered vitality.

In NEURALGIA, sciatica, rheumatism, congestions and conditions of nervous excitement, of sensitiveness of any description, electricity gives relief and permanent benefit with a magical promptitude and directness, and all the time causing little or no sensation beyond a gentle stimulation and warmth.

It is generally supposed by the uninformed that the amount of sensation produced by an electric battery is the measure of the good done by the current.

This is a great mistake, as electricity should never be applied in sufficient force to "shock" any one. A galvanic battery will, in the usual method of applying, produce comparatively little sensation, and yet, under the intelligent direction of a physician, the galvanic current will work cures in cases and forms of disease which the more stirring and nerve exciting faradic current is totally unfit for. The galvanic current is a steady and uniform flow of electricity in one direction, mild, soothing and tonic in its effects.

"I had as severe an attack of sciatic rheumatism as ever anyone had. I was taken down about June I, and suffered tortures," says Mr. David W. Spenser, of Sunnyaide, Westmoreland county, Pa. I heard of the

Mr. Spenser. skill of Dr. Davis and the other physicians in charge of the Electropathic Institute, of 507 Penn avenue, and as soon as I could pos-sibly be moved was taken there for treat-ment. I was under treatment but a short time, but I am entirely cured."

TWO PRISONERS BREAK JAIL.

A Gallant Watchman Suspected of Aiding

the Woman Out, and Arrested. READING, PA., Oct. 20.—Beatrice Collins, aged 23 years, the mysterious New York beauty who was undergoing a sentence of two years for passing counterfeit money, and John Bush, alias John Miller, aged 65 years, a well-known burglar, escaped from jail during a severe rainstorm last night. The woman's cell door was un-

locked from the outside, and it is believed that she had help.

Late this afternoon Reuben Rhodes, one of the night watchmen, was arrested and placed in jail on the charge of assisting Beatrice Collins and John Bush to escape. The fugitives were still at large at a late hour to-night,

MINOR NEWS FROM THE THREE STATES

SPECIAL TELEGRAN TO THE DISPATCH. BRADFORD, Oct. 20 .- It was 10 o'clock this morning when the last session of the State W. C. T. U. was called to order. There was a large amount of business vet to be done, and the President hurried matters as much as possible. Mrs. W. S. Robinson, of this city, who was yesterday elected delegate to the National Convention, withdrew and asked that the convention send Mrs. William B. Rhodes, superintendent of young women's work, in her stead. Her request was granted, and Mrs. M. E. Richmond, of Smethport, was elected alternate.

of the President not yet heard be spread upon the annual minutes, in order to facili-tate business. The following by-laws were then adopted:
"The railroad fares of State Superintendents to and from the State Convention shall be paid out of the State treasury." "After their national dues are paid, one-half of the remaining dues received from Young Women's Unions shall be appropriated an-nually from the State treasury for young

The lady has had postal cards with her address on one side and the pledge on the other freely distrib-uted in railroad cars. When one of these cards is signed she takes it to the superin-tendent of the road and endeavors to have that man promoted.

Mrs. A. M. B. McCleary, of Lawrence

county, superintendent of work among soldiers and sailors, also read an interesting

report. The department worked vigorously to have a law passed to close dramshops on

Decoration Day. She has a neat folding tract printed, called the "Soldiers' Shield and Buckler," which she desires to have distributed among all soldiers in the State. Dr. Caroline M. Dodson, of Butler, su-perintendent of the department on health and heredity, made her annual report. Mrs. F. D. B. Chase, superintendent of Sunday school work, reported increased interest in her line throughout the State.

A VILLAGE UP IN ARMS.

Trying to Prevent the Laying of Natural

Gas Mains Through the Streets. FINDLAY, Oct. 20 .- [Special.]-Last night force of 25 men under the control of Lincoln Littleman took charge of the streets of Vanburg, a village in this county, and proceeded to lay the gas mains of the Toledo pipe line to connect two wells they had drilled in. The Mayor and Marshal of the village endeavored to prevent the tearing up of the streets, but were powerless against the large force of men engaged in the work, although considerable fighting was done.

The citizens were very indignant at this action, and to-day the village, through its attorneys, applied for an injunction to restrain any further work and to compel the Toledo people to remove its main and re-store the streets to their previous condition. A temporary restraining order was issued, but the war has but just begun, as both sides will make a bitter fight. He Chased the Man Who Saved Him. FINDLAY, Oct. 20 .- [Special.]-Charles Humby, living near this city, attempted suicide last night by hanging himself to the door of his barn. He had just jumped from Constable Charles E. Porter has gone to a stool on which he was standing while adjusting the noose, when DeWitt Cogney,

> ard Oil Company, came along and promptly cut the young farmer down. Humby was not at all grateful for this humane act. On the contrary, he looked upon it as a mali-cious interference with his vested rights. He accordingly jerked out his penknife and started for Mr. Cogney. He chased the philanthropist all around the place, but the pursued finally escaped. Humby, who is a prosperous farmer, is supposed to be tem-

The Pastor's Political Duties. CANTON, Oct. 20.-[Special.]-There is a large attendance and great interest in the Ohio Baptist Convention now being held in this city. The session to-night was devoted to the reading of a paper by Prof. D. R. Caldwell, of Dennison University, on the relation pastors should bear to the live questions of the day. He held that a pastor's duties should not withhold him from a dis-charge of the broader duties of manhood, and that he should make himself master of all those subjects which were of general interest, such as legislation, the tariff and municipal government, Sabbath day observance and temperance. He should enforce upon his bearers the duty of performing

Henry Edwards, ex-member of the Legislature, who lives at Moravia, this county, so the story goes, has received a severe shock from fright. C. H. Weekly and L. P. Little were building a fence near Mr. Edwards' home when they suddenly beheld the ex-member run down the road sans hat, coat or vest, and loudly calling for help. He was pursued, so the spectators say, by a mammoth hoop-snake, which was running, or rather rolling, after him. The reptile had its tail in its mouth and was rolling

along hoop fashion. Little and Weekly succeeded in killing it. The snake measured 5 feet 9 inches in length.

A Woman President of a Railroad. CLARKSBURG, Oct. 20.-[Special.]-At meeting of the Directors of the Painsboro and Harnsville Railroad Company, held today, Mrs. Hattie M.
