IMPROVEMENT. THE PROMISE OF CURE.—No array of words can give a dyspectic one-half the hope that comes from the relief which always follows the use of Burdock Blood Bitters, and the promise of ourse is never becker. ure is never broken.

"Having suffered from dyspepsia for two or three years, I decided to try R. B. and after taking one bottle I found myself so much better I got another bottle, and after taking that I had no more need of medicine. "MRS. G. C. WHITE, Taberg, N. Y."

Don't pay for daily bread and then groan with dyspepsia when a bottle of B. B. R. will give you relief. Repeated tests with uniform success prove that dyspepsia cannot with-stand B, B, B,

"I have taken the second bottle of Bur-dock Blood Bitters, and it has cured me of dyspepsia with which I uffered for aiz years. "W. HAMILTON, oct-TISSU Lock Haven, Pa."

EXCHANGE STOCK.

A Hint to Owners. It is no secret that the only obstacle to greater activity in the real estate market comes from the owners. They ask more than buyers are able or willing to pay. Of course, good reason for this is found in the rapid growth of the city. But there is an-other side to the matter. A great deal of the property that is practically out of the market on account of high prices is unde-veloped, and its enhancement must neces-sarily be slow. Bare ground is of little value. If sold and built up, it would yield a handsome income. One acre improved is heeling Gas.

customers for all the property they have to

The schoolhouse at Edgewood is about

### W. S. Guffey Claims the Business Is Too

Hazerdous to Stand More Burdens.

The proposition of Commissioner Mercer proval of oil men, as was to be expected. W. S. Guffey stated the position of the pro-W. S. Guffey stated the position of the pro-ducers yesterday when he said: "To lay a tax on the oil would drive one of the largest industries out of the State. The business is too hazardous and uncertain. It is all right to tax cost \$50 an acre, for the owner knows that it is there. He sees it cropping out of the hill-sides, and figures out to a nicety what he sides, and figures out to a nicety what he can expect. Au oil man gets a stake to-day and loses it to-morrow. I know lots of men now making money in the McDonald field and loses it to-morrow. I know lots of men now making money in the McDonald field who dropped as high as \$75,000 drilling dry holes in other places. The new field concess a Godsend to them and gives them a chance to retrieve their fortunes. Take the his-tory of oil men. How many of them have made millions and spent every dollar of it in exploring new territory to continue their business. People never stop to take into account this feature of the business. "Oil men pay plenty of taxes. The farm er puts up the tax on the land, the oil pro-ducer is taxed for all the machinery used in drilling a well. We pay tribute to the boomty on our engines, casing, etc. To begin with, the manufactur er of these articles has paid a business tax on them to the county. In addition we have to stand for excessive tur-iff duties on nearly everything we buy. It

clos-ing bid. addition we have to stand for excessive fur-iff duties on nearly everything we buy. It costs from \$4,000 to \$5,000 to put down a well, and the oil man must get back this money or go under. I say frankly that a tax on the oil would kill the business. The Standard, of course, pays a tax on the pipe lines, tanks, etc. I think the oil man is taxed to the limit." 24%
