DR. RERR'S CLAIM.

The late Dr. Herr, of Kentucky, claimed that horses would eventually trot as fast as ever they could in their 3 and 4 year old form, just as runners can run as fast as they ens run in their 3 and 4 year old form. From the great development that has been made in increasing speed of young colts, it would appear that Dr. Herr was measurably correct in his theory. Governor Stanford has accomplished more

than new other man in the country in this direction. The idea originated with him of beginning to develop colts when only 6 menths old. He has been ably assisted in carrying out this theory by Charles Marvin, one of the most competent and faithful grainers in the country. But I do not ex-pect, having some faith in Dr. Herr's theory, has di theory will the out in hat all these young things will turn out to to world heaters. I have great confidence a Charles Marvin's ability to carry out Covernor Stanford's theory of developing coung colts. He has been very industri-to his book on "Training the Trotting lorse" he incidentally mentions one secret of his great storess. He says:

New Castle Furnacemen Granted Incre Wages for This Month Only.

NEW CASTLE, Oct. 26 .- [Special.]-The furnacemen of this city have made a demand for highe : wages, asking an advance of 10 cents a day for labor and 15 cents for turn men. This meant a restoration of the old rate of wages before the reduction early in 1890. Committees were appointed to wait upon the managers of the furnaces. The managers held a conference with the men's committee and tried to explain how with iron at present prices they could not pay any higher wages than they are at pres-ent. The committee reported to the men, and the latter decided to give the managers until this morning to come to their terms. Early this morning the furnace managers

decided rather than pay the advance they would close down the furnaces. Orders were given to coke the furnaces, but the men of the Rosina refused to do the work, and, rather than permit the furnaces to chill with a great loss, the owners decided to grant the advance. To-day the men wen-back to work and the other furnaces decided to also grant the advance. All furnaces are now running, but the owners say they will blow them out at the end of the month rather than allow them to run while paying losing wages.

As to the future development of the trotter i think Governor Stanford is working in the right direction by getting a greater infusion of thoroughbred blood to increase the action and endurance of the cold-blooded trotting horse. How Each Winner Will Sharo After Struggling Six Busy Days.

NEW YORK, Oct. 26.-[Special.]-The great six day bievele race was a great success. The exact result of the race financially had not been determined last night, although the Garden Company's accountant, James D. Young, the representative of the men. Mr. Lafferty, and Manager Tom Eck had all been at work counting tickets, checking off biils, etc., during the day. They had just finished a tabulated record of the daily attendance when a reporter of the *Recorder* called at the Garden. Manager Eck gave the figures for publication. They are as follows:

Paid Date admission	
Sunday night, October 18 Monday, October 19. Tuesday, October 20. Wednesday, October 20. Thursday, October 22. Friday, October 32. Saturday, October 33.	2,830 2,648 4,030 5,700 5,192 10,505
Total	39,293

At an average price of 50 cents these adaissions would represent \$19,646 50. The missions would represent \$10,000 50. The admission Saturday was one dollar each, so that that amount is swelled \$4,400, and the total is \$24,046 50. There is also in the Treasury about \$1,000, which was paid for icke's not presented at the door, so that the aggregate receipts were a triffe more than \$25,000.

The expense account had not been fully mad : up last night, but it will be about \$2.030, so that the act proceeds will be about Si6,000. Of that sum the Garden Company takes half, so that there will be \$8,000 divided among the riders and Manager Eck, the latter's share being 25 per cent. Thus the riders divide \$6,000 net. The amounts they will probably receive follows:

Martin		\$2,100
Ashinger		1,500
Lambdura		/ 750
