Manager McGunuigie will probably leave five or six new players. He has about nine or ten on the list, including three or four old League players of reputation, and the balance are young men of the most promising

During his recent trip East the manager had conversations with all the players referred to, but he was not in a position to sign them definitely; but he is certain of signing the best of them. He will go East with plenty of money behind him, as the directors, at their meeting Friday night, raised \$8,000 without any trouble whatever. Just as soon as they came to understand each other and saw the necessity of pulling together checks were forthcoming, and the players wanting salary from the club will he paid off to-day and all of them will be entirely free from the club until next

Regarding the players Manager McGun-nigle expects to sign, he has little to say. He declines to give any names, but he speaks highly of a young pitcher whom he expects to land. Last evening the manager said: "I watched this young fellow pitch several games while I was away recently, and I came to the conclusion that he is a good one. I have not the least idea as to hat new players will be here next season. I mean to make some experiments, and, therefore, I will sign more players than will

The directors may have another meeting this week to transact business of a routine kind, but they say that they have definitely agreed on all leading questions regarding the club.

HAVING A HARD TIME

Lots of Difficulties in Getting a Team for th Chicago Association Club.

CHICAGO, Nov. 1.—Special.]-The Chicago a winning team. Sam Morton is back in the city after a fruitless search in the East for first-class material. He brings the contract of Gunson, the Kansas City catcher, as the sole result of his trip. He saw Beckley at Pittsburg, but was unable to land him, as the hard-hitting first-baseman had signed with the Smoky City team. He also saw Ad Gumbert, but he refused to talk business un til spring. The club cannot afford to wait to spring and Gumbert's name has been crossed from the slate. So has Pete Browning's. The "Gladiator's" famous "lamps" will will probably not burn in this city next season. Pfeffer, who was delegated to trap him, is back in the city open-handed. He saw the "Gladiator" and tried to sign him, but Pete was the and his but Pete was shy and his name will also be

Hutchison left last night for Cedar Rapids, where he will work in a railroad office the coming winter. He had a long talk with President Hart before he left and denied that he had any intention of jumping to the Association. He told Hart that when the time came that he was not needed by the Association. He told that take when the time chine that he was not needed by the Chicago league team he would get out of the business. He asked for a small raise in salary and it would not be out of place to grant it. He of all others certainly deserves

Cooney will leave Monday for his home in Vermont. He and Luby have signed for next season, as have Vickery and Schriver Anson yesterday received a letter from Outfielder Hoy, asking for a place on the Chicago team. He may be signed if he and the old man can come to terms. As Wilmot is slated for the new club Anson will need another fielder and he could not secure a better man than Hoy.

Football Players Into Trouble.

New Haven, Nov. 1.—[Special]—The fresh-men won a boat race last Saturday in Lake Whitney and proceeded to celebrate it early Sunday morning with a bonfire on the campus. Among other things they mounted the fence in front of Durfee and defled anyone to cust them. Two tutors attempted the work. The students, supposing them to be sophomores, inndied them roughly. At a faculty meeting held Thursday the matter was discussed and it was suggested that members of the freshmen class be prohib-ited from engaging in athletic sports for the remainder of the year. No final decision has been taken in the matter and it is to be settled at a faculty meeting to be held this

Already active work is being done to have the Faculty punish individual culprits and not submit the entire class to disgrace. Waiter Camp, Howard Kampo, Billy Bull and probably Captain McClung will all appear and plead with the Faculty in this matter. None of the prominent athletic menwere engaged in the rumpus and probably no notice would have been taken of it had not the insulted tutors appeated to the police for help. At the police headquarters assistance was denied on the ground that President Dwight has given orders that the police shall not interfere with rows occurring on the campus.

Plimmer and Kelly Matched.

New York, Nov. 1.—[Special.]—After three hours of squabbling a match was arranged between Tommy Kelly, bantam champion of the world, and Billy Plimmer, of England, at the Police Gazette office yesterday afternoon. Every point which might give afternoon. Every point which might give either man the slightest advantage was disputed. The backers of the pugilists wasted time, words and energy. The result of the meeting was that the men signed articles under these conditions: To fight with skin rioves for \$500 a side and a purse of \$700, \$200 to the loser, on December 21, within 100 miles of this city, and to weigh in at 110 pounds three hours and a half before entering the ring.

The true story of the disagreeable encounter between Anson and Pfeffer over the Brotherhood in the Cheveland Hotel, is as follows: O'Connor, the noted contract jumper and catcher, was booked to play in the game with Cleveland that day. Pfeffer observed the amouncement in the paper at the table that morning, and, turning to Auson, entered an objection against playing on the same field with the man because the was a dishonorable fellow. "Your League is supposed to be a high-toned organization," said Pfeffer to the Captain, "and it it is such, why doesn't it expel or blacklist such men as this? He is not desirable." Amon replied that the League certainly would like to expel O'Connor and all other countract breakers, but that it was the force of public opinion that restrained it. To this Pfeffer made answer that that was no answer, and again demanded the reason why. His persistence and Insistence nettled the Captain, who effectually ended the controversy by saying that the League refrained from expelling O'Connor and others of his like for the same causes that withheld it from expelling and pursuing the leaders of the Brotherhood. This remark struck Pfeffer evidently as an attempt to put him in the O'Connor category, and he arose from the table without further comment and walken away, leaving his breakfast untouched.

The McKinley Bill Compels Them to Build Plants in America.

HE IS A GREAT ADMIRER OF HARRISON

LONDON, Nov. 1 .- The Herald correspond dent cables as follows: I stood on the deck of the City of Paris at Liverpool with Andrew Carnegie just before he sailed on Wednesday. John Morley had come from Manchester to see the iron king off. "The McKinley bill is working magnificently abroad," said Mr. Carnegie, "and will work better and be ter as time goes on. I can say this impartially, because the bill has really lowered duties in my line of work. Already a prominent British firm has begun to send over the materials for locomotives. One important effect of the law is that it is driving British manufacturers into the United States. Several have sent over representatives to establish plants. The great woolen manufacturers of Leeds, Bradford and other important centers will be forced

"And what do you think, Mr. Carnegie, of the unchecked flood of undesirable immigration into America which the govern-

ment is now trying to stem?"

'I say don't touch immigration; let it flow on. We are getting the cream of Europe. I want to see America great, really great. We need all the population really great. We need all the population we can get. We have only seventeen persons to the square mile, and there are hundreds of millions of acres of land where the sod has never been turned. I say, hands off immigration. The class of immigrants we are getting is so good that European statesmen have complained to me we were not getting the due proportion of indolent, victious and weak elements of the population. This is a glorious hour for our Republic. She has the ball at her feet and she will kick it high this time and it will stay up.

"My hopes are so high that I expect when I land in New York to find a great Republican victory in Ohio and New York. The air is full of promise. I am glad to welcome Mr. Curtis back into the Republican fold. That is where he belongs. I go back to America more firmly impressed than ever with the fact that President Harrison is a greater man than people give him credit for with the fact that President Harrison is a greater man than people give him credit for being. He is an honor to the Republic, and I told my British friends who complain that the President has acted in hot blood over the Chilean matter to wait for official news and they would find President Harrison dignified and magnanimous."

ROYALTY BURNED OUT.

THE RESIDENCE OF THE PRINCE OF WALES DESTROYED.

The Upper Stories Devastated and the Ground Floor Deluged in the Absence of the Family-The Prince Advised of the Progress of the Flames.

LONDON, Nov. 1 .- At 7 o'clock this morning some passers-by observed that the top floor of the Prince of Wales' residence was on fire. An alarm bell was promptly rung and soon people were hastening to the scene from all parts of the neighborhood, and the greatest excitement prevailed.

An hour later the whole upper part of the building was in flames, and in a few minutes the roof collapsed with a tremend.
ous crash. The reflection of the flames
was visible several miles around. Several
fire brigades were on the scene and were
assisted by hundreds of volunteers, including an engine company sent by the Great Eastern Railway Company by special train. The fire was got under control by 11 o'clock. In the meantime all the valuable furniture in the lower rooms had been re-moved to the lawn. The second and third floors of the building were gutted and their contents destroyed. The lower rooms were greatly damaged by water. The total amount of damage is estimated at £15,000. The Prince of Wales and his family were absent at the time, but were kept constant ly advised as to the progress of the fire. The Prince will come home to-morrow. The servants were preparing the house for the arrival of the family, and it is supposed the fire was caused by a spark from a flue which smoldered during the night.

Consequently there will be little cotton raising, and a light demand for plows.

Features Which Are Likely to Give New York to the Democracy.

TAMMANY'S MACHINE IS PERFECT.

Dissensions From Plower Offset by the Distrust of Platt.

THE CAMPAIGN WAS A PECULIAR ONE

FROM A STAFF CORRESPONDENT.1 NEW YORK, Nov. 1.—The most remarkable State campaign New York ever ex-perienced has been brought to a close. When the votes shall have been counted on Tuesday a good many people who consider themselves very clear at political figuring will be surprised to the verge of astonish-If we take the declaration of the respec-

tive political leaders there is a margin for this surprise of about 150,000 votes. Messrs. Husted, Hiscock, Platt and Fassett predict victory for the latter, ranging from twenty to forty thousand. They may not believe their own statements on this important matter, but this is what they say. Should they succeed in carrying the State by as nany hundreds they would not only be well satisfied but they would hail it as a great triumph. On the other hand, Boss Croker said to me to-day that New York City would meet the Republicans at Harlem Bridge with 110,000 majority. This would give the State to Flower, the Republicans olding their own up the State, by a Demoeratic majority of about 50,000.

Boss Croker and His Machine. Perhaps the great Tammany chief's estimate is somewhat extravagant. But as between Boss Croker and Boss Platt you can safely take the Tammany leader as a political guide. Compared to the magnificent organization which holds New York City in the hollow of its hand-which exercises a degree and thoroughness of discipline over its membership and a most minute and in-dividual care of the atoms that make up the local Democratic party as a whole unknown to any other political organization on the face of the globe—the Republican canvass has amounted to an uncertain, desultory warfare, carried on by irregular troops and bushwheelers.

bushwhackers.

The universal rule of success in effective political work lies with the best organized forces, the issues being fairly divided in the public mind. There is no secret in the strength of Tammany Hall. It is plainly emblazoned in the permanent existence of an influential body of citizens who make olitics a business. From the Grand Sachem down to the lowest ward heeler in the slums the discipline of the camp is maintained from year to year practically unimpaired. The district leaders are as autocratic in their respective spheres as are the various bureau chiefs of a government department. Beneath them are their captains, lieutenants and sub-lieutenants and non-commissioned staff by the score. Each of these carries a resposibility of his own, and this responsibility is to absorb voters, see that ocratic voters register and vote, and

to harass the enemy. An Immense Political Power.

The immerse revenues of the great metropolis are disbursed through its membership and every public official from the Mayor down to the driver of a scavenger cart pays tribute to it. Against such a political machine the opposition must harmonize the most discordant elements ever gathered together under one banner. It must organize from the bottom—a bottom full of factional mud and rock and quicksand. It must bring into play the quicksand. It must bring into play the combined forces of the State at large. With such disadvantages it enters upon a losing battle at the beginning. The only chance of winning is through the issues of a national canvass that rise in the public wind parameters to party feeling a through mind paramount to party fealty, or through the dissensions in the ranks of Tammany

In the campaign just closed the Republican-County-Democracy-rag-tag-and-bobtail combination has not been assisted by either of these contingencies. This combi-nation of incongruous political elements has and no organization worthy of the name Respectable and wealthy Republicans, disgruntled Democrats, thieves, professional reformers, plug-uglies, mugwumps, disappointed spoilsmen, repeaters—every grade of political thought and purpose and every degree of moral and immoral personality—have been banded together for the time being by the cohesive power of public plunder against the compact ranks of the regular Democracy.

Platt's Kind of Republicanism The next election sees a new combination very likely with elements now bitterly op-posed. With Tammany or against Tam-many—with the County Democracy or against it—the Platt style of Republicans

against it—the Platt style of Republicans are for any deal that promises success. Now on this side, now on that, with what public respect can such leadership be regarded? The surprise is not that New York City rolls up from 75,000 to 100,000 Democratic majority in such a contest, but that such a combination can cast as many yotes as it does. votes as it does.

Apart from the differences of organization and inherent purpose, the respective methods of operation and the character of the respective candidates have contributed most effectively to the results of next Tucsday. The Republican candidate for Governor is not only a weak one from the general point of view, but he has shown himself utterly blind to the commonest rules of successful political warfare and private decency. He has conducted his canvass on the hypothesis that the people are ignorant fools incapable of personal judgment. He has never made speech that does not betray this-that es not insult every intelligent and honor able citizen. He invariably lost his temper, and the man who loses his temper on the stump is certain to damage his own cause. I don't believe Fassett made a vote for himself anywhere in New York City during the

Handicapped by Bad Leadership.
Next to and behind Candidate Fassett stalked the unmasked skeleton of T. C. Platt. Fassett the product—Platt the sower, the tiller, the harvester. No amount of smoke and dust and splashing of mud could conceal the relationship of T. C. Platt to this campaign. With such a leader a Platt, the Republicans are heavily handi capped in any campaign. Wielding auto-cratic power in his own party, he grasps for the dictatorship in the affairs of the Empire

State. Plattism makes Tammanyism not only possible but respectable.

The sullen attitude of the men of brains whom Platt has bolted and humiliated, has whom Flatt has botted and numinated, has been sought to be concealed from public view for the time, but not even the hasty return of Warner Miller and the forced speeches of Hiscock can disguise the half-smothered hatred of the ring-master. It is an unknown quantity that will be fully explained in the near hareafter. ploited in the near hereafter.

The longer the campaign ran the stronger

became Mr. Flower, chiefly by contrast with his opponent. A Watertown man told me last night that in Mr. Flow-er's home no Democratic demonstrations had been held. Beyond the spontaneous ovation tendered the Democratic candidate when he returned there during the canvass, an ovation in which Republicans joined, an ovation in which Republicans joined, nothing exciting had occurred to draw political lines. The Republicans had canvassed Jefferson county thoroughly, but Flower's personality would be strengthened by any attacks upon him there. The Republican majority of 2,600 will melt away, so my informant thinks, under the genial influences of the local philanthropist.

Democrats Want a Full Vote. White both parties have held from 300 to 500 meetings each a day and these meetings have been well attended, there has been lacking that excitable feature which characterises the campaign of national issues. It

is the individual feeling. It is necessary to stir this in order to get out a full vote. The registration shows a considerable falling off, significantly in Republican districts. On getting the full vote, the Democrats chiefly depend for their predicted success. Speaking of meetings, that held Tuesday as the Madison Square Garden was the greatest gathering I ever saw under a roof.

The place was packed with "business men," whatever that implies, and there were thousands turned away. Inside were Cleveland and Hill—outside stood burly Boss Croker, smoking a big cigar and taking with a policeman and smiling at the tremendous crowd turned away. And at this meeting of from 15,000 to 16,000 business men of New York the yells and cheers for the ex-President were more marked than at the first gathering where he appeared. Cleveland is growing. Is it the baby?

Another remarkable thing. The betting has been confined to large sums and is nowhere near what is usually seen here. Ten thousand to seven thousand in favor of Flower are the ruling odds, with few takers. Democratic money is plenty, but Republican confidence is not backed by the cash. "I can get all the Democratic money wanted at these odds and even greater ones," said Billy Edwards, stakeholder, "but nobody wants to take it. The betting is duller than I ever saw it before, but," hopefully added the sporting man, "it may pick up by election night."
