### The Committeemen Make Signs.

During the reading of the reply, when the During the reading of the reply, when the portion referring to the Chairman of the sub-committee receiving license plates free was reached. Chairman Gilliford pointed his index finger questioningly at Mr. Hen-ricks. The latter raised two fingers in reply. When the reading was finished Mr. Hen-dricks said that in reply to the portion re-ferring to him he would say that he did re-ceive two licenses last year, but he would like to see the books with his name on. That would confirm the whole matter. That would confirm the whole matter.

Previous to the receiving of the commu-nications from Wyman and Murphy the committee meeting was as lively as a Cove-nanter convention. Even Webster with his dictionary was brought in to settle a dispute, and very conveniently old Noah had given two definitions on the word in dispute and thereby was saved the horrors of an endless war of words. The dispute arose over the use of the word "vicious" by the auditors in reporting on the "vicious, not to say careless, manner in which the Mayor's books were kept." committee meeting was as lively as a Cove-

Mr. Wertheimer thought vicious was not Mr. Wertheimer thought victous was not the proper word to use. He said the ex-pression carried with it the appearance of unalice in the report, and he wanted it struck out. "It is the absolute truth supported by the facts in the case," broke in Mr. Gilliford.

"We are after facts without coloring." answered Mr. Wertheimer. "We didn't hire auditors to decide this

case for us and they have no right to inimate that the auditor is a thief. That is for a court of justice."

"They didn't call him a thief," said Mr. Gilliford with triumphant air as he plumped a full-grown dictionary on the table and read, "Vicious-characterized by vice or defect."

"Defect," he repeated.

"Vice," said Wurtheimer. "Well, Webster straddled the question and guess we can," broke in a voice and with that the turmoil subsided.

#### Fought Over Another Word.

The reading of the report continued until another objection was made, this time by Mr. Bothwell. He did not like the term "supposed witnesses" as used by the audi-tors. The books showed there were no witnesses and the auditors had no right to sup-

pose. Chairman Gilliford reported that the books showed that fees were collected for so many witnesses, while they did not show that that number of witnesses testified. The auditors, he added, were charitable,

"Nice kind of charity," returned Mr. Bothwell.

The report was then concluded and Mr. Gilliford submitted the following from himself:

#### ALLEGHENT, PA., Nov. 9, 1891. To the Auditing Committee:

To the Auditing Committee: GENTLEMEX—The auditors are about to resume their examination of the street car accounts, and in the final report on that subject, it seems to me they should be in-structed to charge the street car companies with the tax on all stock dividends or other division of profits accruing on franchises or property, or in the operation of the roads, which can justly be claimed as dividends. The ordinances state that the dividend tax shall be paid on all dividends. The questions as to what is a dividend indust to whether the word dividends in-cludes stock dividends, and as to whether a division of profits need to be formally de-chard as a dividend are. If it was, it must be conceded that this increase was the subject of the tax. A stock divi-dend is a thing well understood and has been passed upon by this court in several instances."

#### Call it All One Big Div dend.

The gentleman also cited a number of other cases to prove his point and then proceeds:

It seems very clear that the basis on which the P., A. & M. Traction Company issued its \$3,500,000 of stock to the stockholders of the old company was the value of the lease of the property and franchises

But, somehow, the bibulous Sharpsburger prefers, as a rule, to procure his liquid refreshments from other sources. As a result, there is to-day, in that village of less than 5,000 inhabitants, more illegal liquor selling done than in Pittsburg and

Allegheny. This statement is made, taking it for granted that the police officials of the two cities are correct in their estimates of the number of speake-asies in their bailiwicks. But everybody in Sharpsburg knows of the illegal business going on there. Any business man you meet will, if requested, give you the name and location of the most thriving of these dram shops. Almost any man in the habit of taking a drink, occasionally or otherwise, will admit to you that he oftener drinks in the speak-easies than in the saloons, as more convenient, there being more of them.

The Wall of Saloon Keepers.

Any saloon keeper you meet will bewail to you the loss of trade he suffers on account of the speak-easies, which pay noth-ing for their privileges as against his \$500 incense, and yet do as large or a larger bus-iness, as several of the illegal dealers un-doubtedly do. Fathers and mothers complain to the bor-

ough officials that their minor sons get drink in these places, the licensed houses being strict on the matter of age and refusing to sell to them. But the boys positively re-fuse to tell where the liquor is procured.

fuse to tell where the liquor is procured. Even the ministers of the town know of the prevalence of the illegal traffic and receive frequent complaints from the parents in their congregations. But they have no power to bring to bear to put a stop to it. Last Sunday afternoon Rev. Father Schwab, Last Sunday atternoon Rev. Father Schwab, pastor of St. Mary's German Catholic Church, at a meeting of about 900 male members of his church, took occasion to admonish them severely for aiding and patronizing the illegal houses. Father Schwab is a firm believer in the Brooks bigh licence law. Ha declared to bis conhigh license law. He declared to his con gregation that it was an excellent regula tion and should be obeyed to the letter by every good citizen.

Many of Them Church Members.

He realized that the largest speak-easy proprietors of the town were members of the German Catholic Church, and it pained and grieved him that his wishes were so flagrantly disregarded on this matter. He object is to make an equitable assessment on a common basis. The party will be in charge of W. A. McKay, one of the engi-neers of the road. The Buckeye people are not as lienent with railroads as they are in some of the Eastern States, and the lines are compelled to whack up liberally to sup-port the counties and State Government. This work is managed by a railroad com-missioner to whom final appeals are made. The Pennsylvania Company has been com-plaining of high assessments, and this method is taken to get at a fair value of the told of parents coming to him and beseech-ing him to take some action looking toward closing up these places, but he had not the power. He had listened to tales of sorrow from mothers whose sons had come home drunk night after night, young men, yet in their teens, who could get no liquor from a licensed dealer, but who could not be induced to tell the name of the party who had served them. The minister depre-cated the patronage of these places by members of his congregation, and appealed

A Question Often Asked.

The question will naturally suggest itself,

The question will naturally suggest itself, why do not the proper officers stop this illegal business? The same question has frequently been asked by the law-abiding element of Sharpsburg. Under the law the proper officer is the borongh constable. Since the Brooks law went into effect not more than a half dozen illegal dealers, all told, have been returned to the county court, although several have been running since 1886. In that time there have been three constables. The present one is Fred Seiferths, an ex-policeman of the borough. He knows that the business is going on, it is alleged, but there are rea-sons given by him why he does not make proper returns. One is that he is afraid to do so for fear of personal injury, and the

do so for fear of personal injury, and the other that he cannot get sufficient evidence to convict. While there is no doubt that he has some foundation for the former rea-

son, few people of the town will take any stock in the latter. They believe he does not make an earnest effort to secure evi-dence, and even stronger suggestions are

and he might set a license next year. In-stead of following this advice, he returned home and was doing business at the old stand that evening. What has been said of these two houses applies, so far as the open front door, easy access, and delivery of the liquor by brew-ers and wholesaic dealers are concerned, to probably a dozen others. Small kitchen speak-easies are conducted besides and they are numerous. Many of them are con-ducted by men formerly employed in Moor-head Bros.' rolling mill. Since the recent strike, being out of work, they buy a half barrel of beer and deal it out on the quiet, making enough, money to keep their roofs over their heads. This class is not expected to be a permanent factor in the business, but they are violat-ing the law just the same. The business of the town before the strike was good, and the place seemed prosperous. But now the bulk of the mill employes are non-residents who take their wages to spend where they reside. The legitimate dealers in all branches of business are suffering in conse-quence, and the successful speak-easy man seems to be the only one making any money. GLORIES OF AUTUMN

HOW THE AUDITORIUM IS TRANSFORMED

HOUSANDS of chrysanthemums to-day transform the Auditorium on Penn avenue from a place looking like a barracks into a garden, whose queen blossom it is. As a utilitarian, the chrysan-100 themum, assisted by tropical plants, the withering branches of trees and masses of pine, has done noble work. The huge rafters no longer are seen; the unplaned boards though still unplaned, are concealed, and the pational flag relieves the dark corners. The scent

of flowers replaces a former big odor of emptiness. Those that believe in the gossiping powers of inanimate nature possibly could hear scraps of flower conversation floating in the air. Overhead is a roof skillfully formed of autumn leaves and pine, strengthening the deception of a veritable garden. The light can be seen in snatches through it, which makes you quite sure that you are in an arbor. The Japanese suggestion is not forgotten. there is much specification among the better class of. Sharpsburg people as to what can be done to stop the speak-easy business among them. Loyd, who bears the same relation to the borough corporation that the Mayor, Controller, City Clerk, Superin-tendent of Police and Chief of Public Works, combined, do to a city, has gravely considered the advisability of proceeding against the speak-easies. But he is hamp-ered by the lack of proper laws and public support. Several times he has been consulted by Father Schwab as to the best method of procedure. But the burgess is a Democrat elected in a Republican town, and, while he is endeavoring to give the people the best government they have ever people the best government they have ever had, and up to date has succeeded, he can-not without damaging seriously his politi-cal friendship, take an active part against the illegal dealers, though he promised the priest to co-operate if the former would take the initiative.

#### Surrounded With Speak-Easies.

Within a radius of four or five blocks of Father Schwab's church there are five of the most prominent law violators of the town, all members of that church. The frequenters have supplied names for each of these places for the two-fold purpose of giving vent to their humor and of averting suspicion of the uninitiated in a casual conversation where it might be dangerous to use the proprietor's name, though it looks use the proprietor's name, though it looks as though everybody knows all about it. "The Yellow Dog" is the name applied to one of these places, so-called because of a big yellow canine belonging there. The "Gray Goose" is the name of another, alleged to do a large business, the title be-

alleged to do a large business, the tille be-ing suggestive of peculiarities of the proprietor. "Shove in or Shove' Out," is the peculiar title of probably the most suc-cessful place in the borough. Two fat men one day met in the doorway, one going in and the other going out. They filled the space so tightly that they stuck between the doors and neither could move. They stood glaring at each other in despair for a moment until the proprietor seeing their moment until the proprietor seeing their predicament yelled "Tommy, you shove in, and Jake, you

shone out They did so and were released, and the house has borne its singular title ever since. The "Rose Bush" is applied to a house back of the town and takes its name from a

flower garden in front. Many More Peculiar Titles.

Old-Time Saloon Men.

The "Top House," the "Rolling Rock," the "Last Chance," the "Now or Never," the "Floater," and the "Pole Iun," are all church everywhere. The annual appropri-ation has been \$1,200,000, but this sum may be increased, as the work is growing. All the bishops will be represented, and 40 delegates will be present. The meeting names given to certain speak easies by their frequenters, each having some peculiar origin, as indicated in those first mentioned. moved to a convenient place up the river on Sundays, or on other occasions, as re-quired. The "Rolling Rock" is on the hillside near the St. Mary's Cemetery, and has caused considerable indignation among the more devout members of the church. The proprietor has been informed against recently, and, it is said, is now under bail recently, and, it is said, is now under bail for a hearing. Two speak easy proprietors who do the largest business make no special secret of it. They have the regulation saloon front, with frosted windows, and the front door is open to whoever may desire to enter. The difference from a licensed saloon in their exterior appearance is that no gilded sign proclaims their business and no collection of bottles of liquor fill the show windows.

The proprietors deserve some credit at least for this observance of the liquor regula-tions. One of these men is supplied daily at the front door with four barrels of beer and the other with two from regular brew ery wagons.

Both formerly enjoyed license privileges, but for three years have been deprived. Last April, in the license court, they both acknowledged they had been selling ille-gally. They were not presecuted, even on this admission, and the court advised one of them, it is said, to observe the law this year Is one of the chief blessings of every home.
