Approaching Holidays.

NO PROSPECT OF A HARD COAL WAR

An Airy Boom Strike the Tractions Which May Prove Enduring.

OFFICE AND STREET NEWS AND GOSSIP

Business is moving along so quietly and smoothly that some think it is dull. This is a mistake. The Clearing House exchanges throughout the country are only slightly behind those of the same period last year, and are ahead of 1889. The effects of the Maverick Bank failure seem to have reached their widest limits and but one obscure institution has been driven to the scure institution has been driven to the wall. All existing troubles-and none of them are serious-are of a temporary nature. The outlook is undimmed by a single cloud. An improvement in nearly all lines of trade is confidently expected from this time until

No Coal War in Sight.

Report of an impending hard coal war appear to be without foundation. The trade is said to be in better condition than for several years past. The only trouble is that the demand is greater than the supply. It is reported that the Reading Company will meet this difficulty by increasing its output. This company owns 102,000 acres of hard coal lands, with 2,450,000,000 tons of marketable coal still in the bowels of the earth. The approaching completion of the Port Reading extension of the Reading Kailroad and of the new line which it is building to enable it to carry out its contract with Coxe Brothers & Co., both of which will add largely to its facilities for transporting and handling coal, is likely to be followed by important changes in the anthracite coal trade.

A Scramble for Commission

Real estate brokers in Chicago must be "hard up" for business, to judge from the following statement of a business man of that city. They had better come to Pittsburg where realty is an active commodity: "In cases where a single firm has a piece of property for sale it would be satisfactory to property for sale it would be satisfactory to all parties to have a single sign giving information as to the control of the lot. The wholesale covering of lots along prominent drives is a mistake, both from the standpoint of expense and from an esthetic standpoint. It is ridiculous to see a single 25-foot lot with five or six signs on it directing the attention of the public to its sale by as many real estate firms. This is conby as many real estate firms. This is con-fusing to buyers, besides leading outsiders to the belief that a desperate effort is being made to sell the property indicated. Signs undoubtedly attract attention to property offered for sale, but do not seem to attract the class of people who buy. As the sys-tem of placing signs is now carried on I think it is detrimental rather than beneficial to the real estate business."

Business News and Gossin.

The sale of a fine residence propert, the other day was brought about by a moderate concession by the owner. This works

well every time.

There is good prospect that a first-class stone residence will be erected near the railroad, on Penn avenue, Wilkinsburg. Lake transportation companies have noti-fied shippers that they will not receive freight after the 15th inst.

There is not a brown stone front on Fifth avenue beyond the "hump." It is said the prevalence of sulphur in the air discouraged its use. Pittsburg's Four Hundred dwell within gray walls.

Mr. Samson's residence in Delmar Terrace, the old Moorhead property, will soon be under roof. It will be one of the finest

in the city.
Five real estate firms-Messrs. A. Leggate & Son, Samuel W. Black & Co., Lig-gett Bros., Black & Baird and Baxter, hompson & Co.-will offer some choice

properties in the real estate auction room ext Thursday at 2 P. M. Home seekers and investors should bear Then Prices of Shares Begin to Stiffen-The next Monday, November 16, under the auspices of J. B. Larkin & Co.

A membership in the New York Cotton Exchange was sold at auction recently for FiThe oil wells of the United States number

46,000, and their daily output is 130,000 bar-rels. Nearly half of this amount comes from the McDonald field. The Secret Service has just sent to Washington 50 pounds of counterfeit money, the result of its search among the banks and

Peo. C. & The general opinion that all of the cable and electric roads are doing a paying business is attracting attention to these stocks, and they promise soon to become the lead-ing features of the market.

There was quite a boom in them yester-

day, although it was not reflected in the sales, for the reason that holders did not want to sell. The entire list was bid up, but the most strength was displayed by Duthe most strength was displayed by Duqueene and Manchester. After the last call 15 was offered for 100 shares of the former; 300 Manchester was offered at 38, but later 39 and 40 were talked of.

Allegheny Valley dropped out of sight. It was offered at \$1, with 25c bid. A \$5 assessment to come has given it a very black eye. Complaint was made by some of those interested in Pittsburg and Birmingham Traction stock that no statement was read at the meeting on the 10th. It was authoritatively stated that the Hand street bridge company will declare a dividend in January. Westinghouse scrip was offered at par, and \$5,000 Exposition bonds were on the market at the same terms.

Sales were \$3,000 Duquesne bonds at \$0,3 hitzens' Traction at 68%, 15 Luster at 12%, and 25 Pleasant Valley a 2%. Bids and offers follow:

GROWING MORE ACTIVE. WALL STREET VERGES ON DULLNESS

TILL NEAR THE CLOSE,

Coalers and Industrials Continue to B. the Strong Features-News Favorable and No Selling Pressure.

New York, Nov. 13 .- The stock market today was quiet and even dull the greater por tion of the session, but became more active in the late trading, while stiffening up under an increased demand for both sides of the good demand for stocks, while the offerings were very light, and notwithstanding the dullness a firm to strong tone prevailed, and before the close of business prices among the tew active shares had been forced up materially.

materially.

The news of the day was all favorable. There was not in any part of the day any important pressure to sell, although considerable selling by the foreigners and traders gave the opening a weak appearance, and the suspicion was uttered that the bears were up to the old trick of employing arbitrage brokers to sell stocks in order to buy in under cover.

The rumors of trouble in the anthracite coal trade were still circulated, but a short interest of some magnitude was developed in the Coal shares and further selling was frightened off, resulting in the development of a considerable demand for those shares at advancing prices, and as their losses have been very material in the last few days their gains to-day were proportionate. Following them in strength came the Industrials, especially Sugar, Cotton Off and Distillera. In the general railroad list, however, considerable strength was seen in the Vanderbilts, Wheeling and Lake Erie and Union Pacific, the actual carnings of the last-named for September having exceeded the estimate.

As a rule, however, the great majority of the list were dull and held within narrow limits, though sharing in the advance, which extended to all portions of the list. Northern Pacific preferred, also, displayed marked strongth after its early weakness.

The market opened lower but rullied immediately, and prices rose slowly but steadily throughout the session, no set-back of any kind occurring, and the upward movement became more pronounced in the last hour when the smaller shorts came in to cover in carnest. The close was active and strong at the top figures. The final gains of note include: Jersey Central, 2, Suzar, 15. Reading and Cotton Off, each 18. Leckawanna, 18. Rock Island and Distillers, each 18. Wheeling and Lake Erie preferred, 18. Delaware and Hudson, 19. and Western Union and Canada Southern, each 1 per cent.

CHINESE goasips spread reports that foreigners make medicine of Mongolian babics, and Carpenter will tell in THE DIS-

THE KITCHEN MARKET.

Domestic Fruits Nearly Over-Ga

Oysters to the Front. At the Diamond Market fruit and vegetable stalls, the uniform testimony is that markets have been unusually quiet for the week past. Prices are practically as they were a week ago.

With the exceptions of grapes and apples domestic fruits are things of the past, and the grapes coming in of late suffer from the effects of November frosts, and are in small demand. Bananas are mostly in the condition of grapes, a large propor-tion of the late arrivals being frosted. tion of the late arrivals being frosted.

Fall vegetables are a shade lower than last week in a jobbing way, but the reduction has not been sufficient to make any impression on rotail markets. Potatoes have not been so low for years as at the present time. The difference in price between now and a year ago is equivalent to \$1 a bushel. Poultry and dairy products are the same in price as last Saturday. Fresh eggs are a shade higher, the supply this line being very short of late. Eastern fish are not in supply equal to demand owing to heavy storms on the Atlantic the past few days. Select cysters are also in limited supply. Demand for cysters shows improvement, but prices are unchanged. Florists report a better trade this week than last. The chrysanthemum exhibition, together with numerous society events, has brought heavy demands on flowers.

Following are latest retail prices of market basket filling as furnished by leading dealers:

THE PITTSBURG DISPATCH, SATURDAY NOVEMBER 14, 1891.

A CLERK'S BLUNDER.

It Causes a Temporary Panic on the Chicago Grain Exchange, Demoralizing Prices - A Correction Restores the Figures, but Quotations Are Lower.

CHICAGO-The wheat market was un-usually settled to-day, due, however, not so usually settled to-day, due, however, not so much to external influences and reports as to blunders of one of the posting clerks. After the various bull and bear reports and been coming in for some time and exerting their contradictory influences, some Russian crop figures, purporting to come from an English journal, were posted. To the surprise of all these figures showed the Russian crop of whest with subspaces to the surprise of which were posted. prise of all these figures showed the Russian crop of wheat, with other cereals, to be largely in excess of last year's crops.

For a few minutes everybody seemed to want to sell at once, and, of course, a sharp break in prices followed, the market declining 15%01%c, or to the lowest point in the day. A second calculation showed that the figures at first presented were wrong, making the yields smaller all around than last year, and a partial recovery of the early naking the yields smaller all around than last year, and a partial recovery of the early decline followed. English cables were stronger, Liverpool being quoted 1/6/4d higher and London unchanged. Continental markets were weaker, Berlin being 11/6/15/2 per bushel lower and Antwerp 15/6 per bushel lower and Antwerp 15/6 per bushel lower Nothing definite was heard regarding the Russian ukase, some advices stating that it might go into effect Monday and others stated to-night.

The opening was 3/6/1c higher than the closing figures of yesterday, but immediately weakened and declined 2/6; then rallied slightly about 5/6, but again declined, this time 15/6/12/6c then rallied, 11/2 weaker, and closed about 5/6 lower for May than yesterday's closing.

this time 13,2013c: then rallied, 114c weaker, and closed about 5c lower for May than yesterday's closing.

November cora, which opened at 524c, or 13c lower than on the previous day. Year, which closed yesterday at 45c, rested to-day at 445c, and sold as low as 504c, closed at 514c, or 13c lower than on the previous day. Year, which closed yesterday at 45c, rested to-day at 445c, cand May closed at 425c, compared with 43c yesterday.

Oats opened firm and 1425c higher, through sympathy with wheat and corn, but made a decline of 1425c cents on Secretary Stone's mistake in reducing the Russian crop. The market struck bottom at 354c for December, and 3134c for May. The opening prices were 355c and 333c respectively. There was a reaction from the low point to 304c for December and 314252c for May. The opening prices were 355c and 333c respectively. There was a reaction from the low point to 304c for December and 314252c for May. Trading was without particular feature in the provision pit, and prices were without much change. The market was easier in sympathy with the decline in wheat and corn, but recovered some toward the end and left off at a slight improvement in yesterday's final quotations. December pork declined to \$8 45 and closed at \$8 59. January opened at \$11 357ak Lard closed 22c above the prices at the correocclined to \$8 45 and closed at \$8 50; January opened at \$11 35 and closed at \$11 37%. Lard closed 2½c above the prices at the corresponding time yesterday, and ribs are without change.

The leading futures ranged as follows, as corrected by John M. Oakley & Co., 45 Sixth street, members of the Chicago Board of Trade:

The Drygoods Market. NEW YORK, Nov. 13.-There was some fairsized transactions in plain cotton to-day for future delivery, and the demand seems to be widening out. There was a little firmer feeling. The production is already curtailed. The great carpet sale closed to-day, having been in progress four days. The quantity of goods sold in that time was 60,000 pieces of carpet and 1,600 bales of rugs, the total realized being about \$2,500,000. It was a remarkable sale in that three times the goods advertised were sold without breaking prices, which average well throughout. sized transactions in plain cotton to-day for

PATTERNED AFTER PITTSBURG.

Two Large Cities Have Already Adopte

Our Fire Alarm Method. The superiority of Pittsburg's new fire alarm system is being shown every day. The claim of Superintendent Morris Mead that it is the best equipment in the country has been borne out by statements of competent electricians who have come here to inspect it. Brooklyn has already followed Superintendent Mead's plan in constructing a new system there. Boston now comes simi-

larly to the front.

"Boston's proposed new system will be almost exactly a pattern of ours," said Superintendent Mead vesterday. "The only material difference will be in having several central offices in different parts of the city. In a place so large as Beston this the city. In a place so large as Boston this is necessary so as to simplify matters. It would be necessary here also if Allegheny and other places about us were a part of the

city." SICK HEADACHE_Carter's Little Liver Pills. SICK HEADACHE_Carter's Little Liver Pills. SICK HEADACHE_Carter's Little Liver Pills. Central Trust Co.,

terest on the outstanding Debentures, pro-vide the 8 per cent dividend on the Freferred Stock, and pay a dividend of 19½ per cent-on the Common Shares. During this period, the lowest annual net profit made in any one year was \$172,742.74, while the profits of the last two years prior to the capitalization of the busi-ness were the largest in its history, with the exception of those for one year. The total net profits for the seven years exceeded THREE MILLIONS OF DOLLARS.

The 10,000 shares of Common Stock offered for subscription are fully paid and nonassessible. During the past two years dividends of 17½ per cent per annum have been paid upon the stock, and for the last fleeal year, ending July 31, 1891, over 35 per cent could have been paid had the directors not called in and canceled \$506,000 worth of the debentures of the Company.

The Common Stock is entitled to the entire profits of the business each year after the debenture interest and 8 per cent dividend on the preferred stock have been paid the average yearly profit for the past nine years has never been less than four times this amount, and for the last two years has been nearly five.

The following facts may be mentioned among the many favorable features connected with the business of H. H. Warner & Co., Limited.

It is the largest house of its kind in the world, its preparations being sold by nearly 1,000,000 druggists, chemists, grocers, and general store dealers in almost every civilized country on the globe. The widespread popularity of these preparations is the best evidence of their merits.

The business of the Company is virtually a monopoly, consisting as it does of the manufacture of specialties, the arade names and marks of which are secured and registered in all the principal countries of the world, and are the property of the Company forever.

ever.

The Company has no Hability beyord its
Debentures, originally amounting to \$727,000,
but reduced during the past year to \$421,500,
and the current debt incident to all large

concerns.

The enterprise is not a "one-man business." Although still under the management of the man who started and made it such a wonderful success, there is plenty of material in the employ of the Company to continue the business successfully should any unforseen accident change that man-

As the business is "a going concern," pay-ing enormous dividends, shareholders will receive an almost immediate return from receive an almost immediate restaurant their investments.

The Company has returned to its common shareholders during the last two years 35 per cent. of their invested capital, that is to say, for every \$100 invested they have received \$35 in dividends, besides having the value of their shares increased by the cancellation of nearly one-half the Company's Debentures, and the accumulation of a reserve.

The Statement of profits, both before and The Statement of profits, both before and since capitalization, as given elsewhere in this prospectus, shows that the business is a progressive one; and it is believed that the future will show even largely increased profits from the fact that the European business is growing rapidly.

The future earning power of the business is assured by the fact that the majority of the Common Stock is held by the men who originated it, and under whose careful management it has been so successful in the past.

NATURE OF THE BUSINESS. The business of H. H. Warner & Co., Limited, consists of the manufacture of proprietary medicines and preparations, known as Warner's "Safe" Remedies and Warner's "Safe" Remedies and Warner's "Safe" Remedies and Warner's "Safe" Remedies and Warner's "Safe" Yeast, and was started by the Hon. H. H. Warner at Rochester, N. Y., in 1879. Offices and Laboratories are established in Rochester, N. Y., Toronto, Canada, London, England, Frankfort-on-the-Main, Germany, Kreuzlingen. Switzerland, Melbourne, Australia, and Dunedin, New Zealand. The establishment of the offices and laboratories outside of Rochester, N. Y., was rendered necessary owing to the enormous increase of the business and the widespread demand for the preparations.

PROPERTY CONVEYED.

The price paid by the Company for the entire business as on July 31, 1889, including the good will, trade marks in all principal countries and which are perpetual, prescriptions and recipes, real estate and leasehold properties and buildings in America and elsewhere, fixed and movable plant and machinery at Rochesterand the different branch houses, cash in hands and at banks, the stocks in trade (consisting of wholly and partly manufactured stock), raw material and advertising matter, furniture and all property used in connection with the business in all parts of the world, together with the benefits of all current contracts entered into by Mr. Warner in relation thereto, was \$3,35,000. Since that time the increase of business and enlarged earning capacity of the concern have added largely to the value of the property. EARNINGS BEFORE CAPITALIZATION.

Prior to its capitalization and organiza-tion as an English Company in November, 1869, the business was thoroughly exam-ined by English accountants. The real es-rate and plant were valued by competent appraisers, and the past history of the busi-ness, especially in the way of profits, was subjected to the most rigid scrutiny. Ac-cording to the certified s attement made by these accountants, the average yearly profit

these accountants, the average yearly profit of the UNITED STATES BUSINESS ALONE.

PROFITS SINCE CAPITALIZATION.

PROFITS SINCE CAPITALIZATION.

The success of the business since its capfe talization has been enormous. The first year's trading of the English Company, after providing for the 6 per cent interest on the Debentures, resulted in a return to the shareholders of a dividend of 8 per cent on the Preferred Stock and 17½ per cent on the Common Stock, besides placing to reserve \$218,250 and carrying forward to next year's account \$61,419.

For the second fiscal year (ending July 31, 1891.) 6 per cent interest was paid on the Debentures and dividends of 8 per cent on the Preferred Stock and 17½ per cent on the Common Stock, besides the cancellation of \$366,000 of Debentures and the carrying forward to next year of \$190,000 as undivided profit. Had the Directors not thought it wise to cancel this large number of Debentures, a dividend of 33½ per cent could have been path on the Common Stock, besides carrying forward the \$100,000 as undivided profits.

The summarization of the foregoing shows that the profits of the business, during the past two years, have been sufficient to enable the Directors to pay back to the shareholders \$749,325, pay the interest on its Debentures (amounting to \$68,327), retire and carry to the reserve fund over \$100,000—a showing without parallel in the history of industrial enterprises.

The business of the Company at present is in a most prosperous condition, and is steadily improving. This is especially so in Great Butain and the Continent. During the past year a branch was opened in Switzerland, which has already given a satisfactory return for the money invested. The German and English branches show a large increase in profit and a reduction in working expenses over previous years, and as an evidence of the prosperity of all branches it may be stated that the average yearly profits of the Australian house alone, since the capitalization of the business, has been sufficient to pay the whole of the Debenture interest, as well as Sper cent, per annum on the Preferred Stock. The profits of the other branches, including the United States, consequently, can be applied to paying dividends on the Common Stock. Arrangements are now being perfected to introduce these preparations into France, Belgium, and other Continental countries, where the field is equally as promising; and while the business in Europe is slower in developing than in this country, it is at the same time far more profitable and permanent when established. The reduced cost of production and cheap advertising rates make the profits of the consequence of the same time far more profitable the consequence while the consequence and the profits of the consequence and the profits of the consequenc tabushed. The reduced cost of production and cheap advertising rates make the profits greater, while the conservatism of the people, although difficult to overcome at the outset, soon develops into a confidence which makes their patronage constant and directly.

PREFERRED STOCK.

The 8 per cent Cumulative, Preferred. Stock of this Company, of which 2,000 shares only are offered for subscription, is a safe, high-class security, affording an assured rate of interest, worthy the attention of the most conservative investor. SUBSCRIPTIONS,

The right is reserved to reject any sub-scription or to accept it in part. If any sub-scription is wholly rejected, the amount de-posited on application will be returned. If the whole amount applied for be not allotted, the amount paid on application will be applied on the sums to become due on allotment.

will be applied on the sums to become due on allotment.

Receipts will be given for all payments made, and engraved Trust Company Cerstificates issued by the Central Trust Company will be delivered at once after final payment is made.

Any installment may be paid in advance under discount at the rate of 6 per cent per annum, and Stock issued at once.

Failure to make a payment of any installment may operate as a forfeiture of all previous payments.

Dividends are declared and paid every six months by the English Board of Directors in London, after thorough examination of the books and business by chartered English accountants. In this country the semi-annual dividends are paid by the Central Trust Company, as soon as they are received from London, such dividends usually being paid in April and October of each year.

TRANSPER AGENTS: CENTRAL TRUST CO., NEW YORK.

Application will be made to the New York Stock Exchange for dealings in the stock. DR. WILLIAMS' INDIAN PILE OINTMENT
will cure Blind, Bleeding and Itching Piles. It absorbs the
tumors, allays the itching at once, acts as a poultice, gives
