Night at Carnegie Hall.

The Historical Society of Western Penn sylvania met last evening in the lecture room at Carnegie Hall, Allegheny. There was a large attendance. The meeting was probably the most interesting that has occurred for many months. The cheerful surroundings, the presence of so many spec-tators and the desire of the members to give the society a fresh impetus infused consider-

ent time, including short biographical sketches of prominent characters who have formed history in this State, and especially n the western part, and drew from these sketches the conclusion that it is an excep tiff's. tionally fertile field for historical gleaning Both papers were adopted. Two new members were elected. They were Walter Callery and James Bergstresser.

It was liberally discussed in police circles yesterday, and all agree that the site is suitable, but thefe is a question as to the authority of the city to take it for the purpose. They believe, bowever, that they can use the plot for po-lice purposes just as they are now using it for park purposes, and that the city has been in possession of it long enough to do with it as they please. Will Baild on Second Avenue Park. After a conference yesterday an official of the Department of Public Safety said: "We have hit upon the Second Avenue Park as a site for a Central station, after locking over the entire city. It is centrally located. It is far enough away from the municipal busines: part of the city to avoid confusion and it is near enough for all practical purposes. There has nothing definite been determined on yet, but if we and specifications, or by instruction from

Mr. Knox suggested that the bureaus of fire. Mr. Knox suggested that the bureaus of fire, police, water, streets and sewers and health be named. He said the clerks in them didn't work any more than the clerk to the Bureau of Fire. The trouble was too many members of Councils had relations in posi-tions. As long as there were clerkships they would be appointed and the members endeavor to retain them. They should wipe out the positions. The pair were found on Eleventh street by Officer Costello, the woman being hardly able to walk, and the child crying from hunger and expasure. The woman was placed in a cell, while Matron Finney made the child comfortable in the matron's room.

Mr. Gerwig then said he would discuss the ordinance on its merits. He said that the clerk of the bureau had no work be-cause his work was taken from him. It ap-peared to be a spite against the individual. There was work for the clerk of the bureau, but he was deliberately prevented from doing it. Councils only had one side of the story. There were a lot more clerks not doing a bit more work and not a thing was said. He moved to amend the ordinance by making it cover the clerks of all the bureaus.

There has nothing definite been determined on yet, but if we can take the park, and the proper authorican take the park, and the proper authori-ties determine to select it, then we will be able to get out of our present embarrass-ment in good shape. My idea is to con-struct a building that will cover all the park save that portion required for a yard. In the building we could have the main prison, a police court, the health department, patrol station and stables, sleeping rooms for the reserve force of po-lice and any other rooms or any timents that lice and any other rooms or apartments that we may need. It could be built large enough to stand the growth of Pittsburg for 50 years, and after all that is what we most ticed

Need a Place to Spread Out.

"We are growing so rapidly now that we are forced to spread out and we have no other place where we can spread so easily. To lease a building we would have great difficulty in getting one large enough to answer the present demand on it and if we ould secure one large enough we would be compelled to pay an enormous sum for it. We would not be safe in leasing a building, because it would be too small probably before the lease expired, and to take a short lease on such a building and to fit it up to suit our purposes and to improve it annually, as is our custom, would cost our city too much money for the return received

If we can get around the will giving the plat to the city with certain restric-tions, then we will act promptly in the matter of a building. The Postmaster Powerless to Act.

Business men and others who are compelled to visit the new postoffice building are complaining about the poor manner in which the corridors are lighted. At times it is almost impossible to find the lock boxes, and on Wednesday night it was so bad that many were compelled to light matches in order to see to open the boxes. The Postmaster has been appealed to, but he says that he is powerless in the matter, and that the authorities at Washington alone can remedy the evil.
