

WIGGINS ON THE MOON.

He Scatters the Theories of Modern Astronomers to the Winds.

PECULIAR IDEAS OF THE ECLIPSE.

A Diagnosis From the Canadian Expert That Is Characteristic.

WHY HE'S PREDICTING NO MORE STORMS

OTTAWA, Nov. 21.—Prof. E. Stone Wiggins, the Canadian astronomer, was interviewed regarding the recent eclipse of the moon.

"If he possessed no atmosphere, it would have been as invisible as a black cat in a dark cellar."

"What is our moon's distance from the earth?" asked the reporter.

"Our books say, in round numbers, 240,000 miles, but it is probably nearer 300,000 miles."

"You have not predicted any storms for some time, Prof. Wiggins?"

"No, for all the dangerous storms this autumn are in the eastern hemisphere, which accounts for my silence."

"Have you made your views on this subject public?"

"Yes, hundreds of times. In 1864 I published a book of 300 pages entitled 'The Architecture of the Heavens' to prove that the sun is not a body of heat which imparts light and heat to space, but is a dark body of electricity which creates, by electric force, light and heat in the atmosphere of the planets."

"The Fire Theory Long Ago Abandoned."

"It was many years before the old dog school of astronomers would recognize the 'fire theory' and adopt mine."

"Yes, that it is double. I am very doubtful of this. If the hemispheres were a few thousand miles apart, one might maintain its position by revolving about the other, but to remain stationary—the thing is impossible."

"Some of the stars are double, are they not?"

"Yes, but the parts revolve round each other. The Lick observers probably have the idea of Dr. Olbers, an astronomer of the last century, in their mind, without knowing it."

moment. The halves gradually receded from each other, and now they are two distinct comets with different periods of revolution. The division was to fall by the parts becoming so highly electrified, and this it was which caused them to recede afterward.

A Strong Electric Repellent Force.

"If such a calamity could happen a planet could not one planet fall upon another, and it is not believed even by astronomers that the earth will fall into the sun."

"If the moon were to stop suddenly in her orbit and rush toward the earth she would never reach her. It would require some weeks to fall to our planet, and then we would have traveled so far that the satellite would fall into another orbit in trying to reach us."

"Even were the earth and moon stationary in space, I very much doubt that they could come together, for their mutual electric force would repel them."

"Of course, were such a trial to take place, our earth would be stripped of all animal life, for the moon's proximity would submerge all our continents. Then the idea of the earth falling into the sun is humbug, and is only originated to scare religious lunatics."

MORE MINERS STRIKE.

The Forces of the Dissatisfied in Indiana More Than Four Thousand.

INDIANAPOLIS, Nov. 21.—As a result of the miners' meeting held at Washington, Daviess county, last night, 600 more miners struck this morning. This brings the number of miners now on strike in Indiana up to about 4,000.

There is great rejoicing among the Brazil miners, as the Washington county men held out against all overtures up to the present time. While the Indiana miners are not idle, this last accession to the strikers' ranks will make the supply of Indiana coal practically nothing.

HAIR ON THE FACE, NECK, ARMS OR ANY PART OF THE PERSON QUICKLY DISSOLVED AND REMOVED WITH THE NEW SOLUTION

MOPENS. AND THE GROWTH FOREVER DESTROYED WITHOUT THE SLIGHTEST INJURY OR IRRITATION OF THE SKIN. DISCOVERED BY ACCIDENT.

In consequence, an incomplete mixture was accidentally spilled on the back of the hand, and on waiting afterward it was discovered that the hair was completely removed. We purchased the new discovery and named it MOPENS. It is perfectly pure, free from all injurious substances, and so simple any one can use it. It acts mildly but surely, and you will be surprised and delighted with the results. Apply for a few minutes and the hair disappears as if by magic. It has no resemblance whatever to any other preparation ever used for a like purpose, and no scientific discovery ever attained such wonderful results. IT CANNOT FAIL. If the growth be light, one application will remove it permanently; the heavy growth such as the beard or hair on moles may require two or three applications before all the roots are destroyed, without all hair will be removed at each application, and without the slightest injury or unpleasant feeling when applied or ever afterward.

Recommended by all who have tested its merits—Used by people of refinement—Gentlemen who do not appreciate nature's gift of a beard will find a priceless boon in Mopens, which does away with shaving. It dissolves and destroys the life principle of the hair, rendering the growth of hair impossible. It is guaranteed to be as harmless as water to the skin. Young persons who find an embarrassing growth of hair on their faces should use Mopens to destroy its growth. Mopens sent by mail, in safe mailing cases, postage paid, (securely sealed from observation) on receipt of price, \$1.00 per bottle. Send money by letter, with full address written plainly. Correspondence strictly private. Postage stamps received the same as cash. ALWAYS MENTION THIS COUNTY AND THIS PAPER. LOCAL AND WHOLESALE MANUFACTURING CO. PITTSBURGH, PA.
