Some Symptoms of a Partial Corner of the Supply of Cheese.

HOGS AND THE PORK PRODUCTS.

The Brazilian Troubles Bave an Effect on the Coffee Market.

EXTENT OF CALIFORNIA'S FRUIT CROP

It will be seen by reference to the home market column that cheese is on the upward move. One of our leading dealers has been taking in the Western reserve the past few days with a view to securing supplies of Ohio cheese. He reports an unusual scarcity of stock in the hands of cheese makers in that section. It seems that representatives of Chicago firms have covered the ground through Ohio cheesedom to an extent beyond any previous senson, and That nearly all the products in this line have been bought far shead.

Advices from Utien also show an unusual shortage of New York cheese and all signs point to an advance. At our quotations there is room for no profit to the Pittsburg jobber, as prices at Utica are about the

Hogs and Hog Products.

Receipts of hogs at Chicago last week were 45,000 head more than for the cor-responding week last year. This week pr takes to show an increase as great as pr tailes to show an increase as great as last week. The increase is not difficult to understand. The immense corn crop and low prices as compared with last year's prices. prices explain the situation. Corn is so low in the West that it pays to put it into pork and lard. It is evident that multi-tudes have acted in this faith and the result is seen in the immense receipts of hogs at live stock centers. There has been no time in the history of the trade when receipts were so large at East Liberty yards as they were one or two-days last week, and this week shows no decline in receipts. Hog products are very naturally on the decline under the influence of these heavy receipts

Tricks of Trade.

The great searcity and high price of fresh eggs has called out the ingenuity of dealers, whose conscientious scruples are not per-mitted to stand in the way of profits. Among the tricks of trade is the purchase of cold storage stock and shipment of same to some point down the Ohio river, to be returned as fresh laid eggs. The freight bills can be pain and \$1 00 profit on a case of eggs will ensue to the dealer who is prepared to resort to this practice. Alas! for the weakness of human nature that the love of money should bring men to resort to

Fresh eggs are scarcely to be had at this date for love or money, and yet large quantities of cold storage stock are selling as fresh. Fresh laid eggs are worth 28 to 30c per dozen in job lots. The cold storage stock going out as fresh is not worth above 22 to 25c per dozen.

The Coffee Situation.

New York coffee markets have been excited the past week, and tendency of prices has been upward. At Rio, however, mar-kets have been quiet, a fact due to the heavy crop, and the desire of the producers to turn their product into money. The average daily receipts of coffee at Rio

last week were 9,500 bags; shipments to Europe, 40,000 bags; to the United States, 60,000 bags. The total visible supply of coffee in this

country and afloat is now set down at 490,-779 bags; same time last year, 343,946 bags; same time in 1889, 435,962 bags. The total receipts on the erop, to November 19, were 1,783,000 bags; same time a year ago, 1,137,-000 bags; same time in 1889, 832,000 bags.

The Oleo Outloo'L. It is within bounds to say that fully two

daily. A carload is equivalent to 20,000 lbs, and hence close to 250,000 lbs of oleo are sold in this market every week. A single firm handles three carloads per week. The large receipts and sales of oleo will acter. Butter that is not first-class is not wanted. The average consumer apparently prefers the imitation. Very little first-class country butter comes to our market of late, and butterine of high grade has the

The Overland Monthly of San Francisco bas this to say of the canned fruit industry: 'The wheat crop of California in 1890 was valued at \$19,587,826, the fruit crop at \$19,-327,186, which sufficiently shows the extent of the fruit raisin; industry. Since 1860 there have grown up about San Francisco 30 or more tromendous canning establishments, one of which alone can put 20,000 cans a day, and has a storing capacity of 20,000,000." The increased tariff ou tin plate, says the writer, has been offset by the reduction in the price of sugar, so that the fruit canning industry is no better and no worse off under the operations of the Mc-Kinley tariff.

BUINED CITIES IN ARIZONA.

Prospectors Alight Upon Rare Archeologi-

PRESCOTT, ARL, Nov. 24.-Parties from down the Gila Valley who have been prospecting bring back sensational reports of the finding of an immense ruin, once a city of the Aztecs, or whatever people inhabited this country. The city, as shown by the ruins, is miles in circumference, and many of the walls are still standing to the height of 12 and 15 feet. The city lay in the valley where the land was perfectly level, and could be irrigated, but in the center is their fort or stronghold overlooking the vailey and about 600 feet in height. The mound on which the fort is built was first built of dirt 200 feet in height and covering about five acres of land. The edge is walled up with boulders from the river, laid in a kind of cement, now hard as the stones them-selves. On the top of this is another wall located in the center and covering about

two acres.

The remainder of the surface of the lower mound has been used as a garden, and soil has been carried up from the valley. On the second tier has been built another, covering about one acre, and on this was the ering about one acre, and on this was the fort of stone containing the houses of the warriors and the tools for cultivating the lower messa. On the edge of each of the messas the walls came up more than three feet above the surface, and inside of these defenses are thousands of boulders weighing from one to ten pounds, which were doubt-less for the purpose of hurling down on an attacking foe. Thousands of flint arrow heads are lying on and around the base of this tortification, showing that it must have been besieged a long time before it was captured. In the upper fort are a high number of skulls and other bones, belonging to the human body, and that part was undoubtedly the one in which the final struggle took place. Pottery of all kinds, some broken and some entire, is lying within its limits, and water was doubtless taken up in these

Another Case of No Jurisdiction

Adjutant Reese recently requested that a court of inquiry be appointed to inquire into charges of unsoldierly conduct made against him while he was on duty at Camp Kensington. A lengthy opinion from the Judge Advocate General of the State, was vesterday transmitted from the Adjutant General's office in which it is advised that the case be referred to General Snowden, the Division Commander. The Adjutant General, it is alleged, had no jurisdiction.

ALL INTEREST IN CORN.

Frantic Shorts Endeavor With But Little Success to Buy the November Future-Other Months Dull and Lower-Small Business in Wheat and Oats.

CHICAGO-Wheat was dull and lower The light trade was attributed to the de-mornlized condition of the wires to the East, which cut off both news and orders. Cables were lower. There was an increase of 2,000,000 hushels on ocean passage, and the local sentiment was bearish. December which closed yesterday at 94%c, opened this morning at 30% @98%c and sold steadily off without material reaction to 92%c. May at the same time receded to 92%c. There was a slight reaction, but the close was dull and

a slight reaction, but the close was dull and weak at close to the bottom figures.

The corn pit was the center of interest during the day, as it was yesterday, and to the 4½c advance scored by the November future then a further appreciation of 7½c was added to-day. It all grew out of the anxiety of the shorts in that month, with settling day approaching. There are very small available stocks in store here, and very little liberal receipts of contract grade. The shorts made frantic efforts to buy, but the actual grain was in strong hands, and the holders were disinclined to sell. The result was inevitable. November, which closed yosterday at 62½c, was steadily bid up until it touched 70c, without any business to speak of passing. Then there was a reaction to four cent, but another to 6 per cent at the close. The other futures sympathized with November to a minor degree during the early trading, but later, when the market became so wild, broke away, reacted and closed somewhat lower than yesterday.

Outs sympathized with the deferred futures in corn and closed lower.

Provisions were stronger and advanced early because the receipts of hogs were below the estimates. Later, however, there was a reaction, and the close was at immaterial changes from yesterday's last figures. The leading futures ranged as follows, as corrected by John M. Ozkiev & Co., & Sixth street, members of the Chicago Board of Trade: eak at close to the bottom figures.

Outlines of One of the Transit Echemes Devised for the West End.

SALE OF A STERRETT TOWNSHIP FARM

vicinity. The West End Happy. Of the various rapid transit projects on foot in the West End, the one of which Mr. Friend is the chief promotor seems to be in most favor, and the probabilities are that it will eventually go through. The route is as follows: It will connect with the West End Passecger Railway at Steuben street, thence over the hill through the Woods' property to the ridge above Ingram, thence along Ingram avenue to Prospect avenue, thence along the township road to Crafton. This is as far as the route has been surveyed, but it is proposed to extend the road considerably further. Mr. Von Bonnhorst, who is identified with the enterprise, went over the route a few days ago, and after-ward spoke of it as the best that could have

Local architects have considerable new work on hand, but it is not urgent, as very little of it will be utilized before next spring. Among the plans in preparation are for three apartment houses, two in Pitts-burg and one in Allegheny, two parochial schools, two public schools, several churches and a number of high-class stone dwellings. These structures will be commenced as early in the new year as possible. Architects take a favorable view of the outlook for building next season. Considerable work that was put off this year by reason of the strike will be put through, and they expect the usual amount of new business. The only drawback is the possibility of a re-newal of the labor trouble.

Not a Profitable Investment.

The Builders and Traders' Exchange, of Chicago, has declared against skyscrapers. It says: "If the building of skyscrapers becomes general the congestion of travel would be terrible to contemplate. What are the conditions to-day of some of the streets? It is impossible to walk without justling some one are you travel along and jostling some one as you travel along, and the street cars are inadequate to properly accommodate the people; with twice or three times their number even the practice of the prison lockstep would be useless in properly dispersing the crowd. Think of massing 700 to 1,000 people at the morning, noon and quitting hours on a sidewalk 50x 14 already overcrowded by passing pedestrians, and fancy an alarm of fire, a runway team or any available insident: away team or any exciting incident; the sufferings of that surging mass of human bodies would be terrible to endure, and the city's death rate would soon be increased to city's death rate would soon be increased to her general disadvantage. When the effects of the congested condition of streets, the weakness of foundations, danger of fire, and a greatly-increasing death rate are considered, which will be inevitable when high buildings become general, it is very doubtful if they are a profitable investment; history will be but repeating itself in its Tower of Babel."

An Old Subject Revived.

Whether the railroad station at Wilkins burg will be removed to Penn avenue or allowed to remain where it is, is an open question. This subject has been discussed for several years and is still unsettled. The latest came from a prominent railroad man yesterday. He said: "From what I have seen and heard I believe the station will be removed. A larger station is needed, and also a more capacious freighthouse. The railroad owns plenty of ground below Penn avenue for both on the same side of the track. This would be a great convenience. A bridge could be easily thrown across the road at this point. Crossing on grade has become dangerous. The location is central. Besides, these improvements would be a benefit to a part of the borough which needs beautifying and building up more than any other." than any other."

The Building Record.

Four permits were taken out yesterday for 16 improvements, all being estimated to cost \$17,600. The list follows: R. & W. Vogelson, two frame two-story dwellings, on Conklin street, Thirteenth ward. Cost, \$2,600. E. Cornelius, five frame two-story dwellings, on Butler street, Eighteenth ward. Cost, \$4,500. Henry A. Davis, five frame two-story dwellings, on Butler street, Eighteenth ward. Change yesterday. This was rather unexected, as outside markets were dull. The first call was a fisfit. Before call 20 shares of Luster were sold at 11½. After call 100 Luster changed hands at 11½, 90 Philadelphia Gas at 11½, and 300 Allegheny Valley Railroad at 9c. The only sale at the second call was that of 100 shares of Wheeling at 22. At the third call 100 shares of Du-quesne Traction went at 16½, and 5 Central Traction at 20. Allegheny Valley, after selling at 9c, was

boomed at the last call to 18, on the impression that it was worth that much, if any thing, but the bids were for small lots, and, as there were no sales, they possessed no special significance. Some asserted there were orders for the stock and that the ad-

were orders for the stock and that the advance was legitimate.

Philadelphia Gas found sufficient support to advance it a fraction. The tractions about held their ground. Luster moved up a peg at the second call, but fell back to the opening. Switch and Signal placed a big fraction to its credit and held the improvement. Manufacturers' Gas was bid up to 25%, without bringing any of it out. Bids and offers follow: | FIRST | SECOND | THIRD

ONLY COALERS ACTIVE.

OTHERWISE THE SHARE MARKET IS WELL FLATTENED OUT

By the Interruption of Telegraphic Com munication - The Grangers Especially Inactive-The Closing Prices the Best of a Very Dull Day-Bonds Quiet.

New York, Nov. 24.—There was a contin-uation of the lack of telegraphic communi-cation with the outsids world to-day, espe-cially with the West, and the stock market showed the effect of this in diminished dealings and practical stagnation. Had it not been for the coa. shares the trading would have been utterly devoid of feature.

The tone of the market, however, was generally firm within narrow limits. There was erally firm within narrow limits. There was throughout the day a very urgent demand for all the Coalers in the loan crowd, and Lackawanna felt flat all day long, with a few transactions at 1-61 premium for use. When the announcement was made that the sales agents had agreed to restrict the output for next month there was an increased demand for all the Coalers and on large transactions. By Telegraph.

New York—Beeves—Receipts, 631 head, all for export and slaughterers; not rade: feeling dull; dressed beef steady at 63/29% per pound. Shipments to-day, 475 beeves; to-morrow, 3,589 quarters of beeves. Calves—Receipts, 316 head: market steady; vcals, 35 00/27 50 per 100 pounds; grassers, \$2 00/2 25; Western calves, \$2 50/27 0. Sheep—Receipts, 809 head; market steady; sheep, \$3 50/2 4 67% per 100 pounds; lambs, \$3 00/25 50; dressed mutton steady at 76/8% per pound; dressed lambs slow at 71/2/89. Hogs—Receipts, 9,748 head, including 6 cars for sale; market steady at \$3 70/24 20 per 100 pounds. Chicago—Cattle—Receipts, 9,000 head; they all advanced steadily and rapidly. Lacknessans rose to 183%, a net gain of 2½, per cent since last evening, closing at the best figures, while Delaware and Hudson arose 3/4 to 125, but yielded 3/6. Jersey Central sold at 114, against 112 at the last sale, and Reading fell in line with a gain of nearly

tral sold at 114, against 112 at the last sale, and Reading fell in line with a gain of nearly 2 per cent,

Among the other stocks which displayed some strength were Erie, Burlington, Wheeling and Lake Erie preferred, Omaha and Minneapolis and St. Louis preferred. The Grangers, as a rule, were unusually dull, owing to the interruption of communication with Chicago, the shrinkage on business being especially notable in St. Paul, as a rule, and slight fluctuations in those shares occurred. New York, Susquehanna and Western were especially strong, rising 1½ per cent in late trading.

The market closed dull but firm, generally at the best prices, which, however, were in but few cases more than slight fractions better than last night's prices, Lackawanna shows a gain of 2½: Delaware and Hudson, ½: Jersey Central, 2, and Reading, 13.

Railroad bonds were still quiet, but the events in the coal trade stimulated great activity in the Reading first incomes, and those bonds were the only active issue of the day. Total sales, \$1,278,000. The market gathered strength as the day wore along, and some material gains were made in the late trading.

The total sale of stocks to-day were 195,223 shares, including Atchison, 4.465; Chicago Gas, 5,525; Delaware, Lackawanna and Western, 48, 190; Delaware, Lackawanna and Western, 48, 190; Delaware and Hudson, 3,976; Erie, 15,370; Reading, 25,170; St. Paul, 5,680; St. Paul and Omaha, 4,580.

Choice Creamery Butter Firm and Cheese Tending Higher.

FRESH EGGS ARE VERY SCARCE.

Light Receipts of Grain and Hay and Markets Are Strong.

SUGAR AND COFFEE SURE TO RISE

OFFICE OF PITTSBURG DISPATCH, 1 TUESDAY, Nov. 24. COUNTRY PRODUCE (Jobbing Prices)-

At the Monday meeting of the Elgin Butter Board last week's prices were reaffirmed. Here markets are quiet at 32c per pound as top. Country butter is very slow, the average consumer preferring oleo to any-thing under choice in butter lines. Cheese is very firm, and all signs point to another advance at an early day. Fresh laid eggs are practically out of the market, but large quantities of storage eggs are made to do duty as fresh laid. Where ignorance is bliss it were folly to be wise. Poultry supply is not excessive, but there is little apprehension of a scarcity of Thanksgiving. turkey. On the other hand, there are no fear of a glut, and present prices are likely to be well maintained. Florida oranges are dull and weak at prices quoted. Choice bananas are in good request and readily bring outside prices. Receipts of the latter have fallen off of late, the total for the week past being not above ten carloads.

The expected rise in sugar fails to materialize. The lay down price of granulated sugar is \$4 35 per cwt., and as it is sold in a wholesale way at \$4 37% per cwt., it is plain that there is very little profit to be gotten. J. A. Hall, commercial agent of the Chicago, Rock Island and Pacific road, is about the only freight man in town who doesn't complain about dull business. He says he sends west from 10 to 12 cars of freight per day. It consists of glass, oil, iron and other products. An agent who visited some of the Penn avenue mills yesterday said the owners talked of shutting down for awhile until the trade revived.
