#### THEY ARE AFTER GOMPERS

#### Editor Martin Says the Labor Leader Will No Longer Lead the Van.

The labor element of this city, it is generally understood, has become thoroughly dissatisfied with Samuel Gompers as President of the American Federation of Labor. The delegates that have been elected by the national organizations that have headquarters in this city have all expressed themselves as opposed to Mr. Gompers. Yesterday a DISPATCH reporter learned of a project that it is considered would surely defeat Gompers, even if there were no opposition from any other part of the country. It is to have the various locals in this vicinity combine to send delegates to the convention. Local unions have the NOW privilege of sending delegates to the Fed-eration. It is not likely many of them will take advantage of this privilege, but the locals of one trade may unite to send tenresentatives

John J. Martin, editor of the Commone and Glassrorker said in regard to the commons-convention. "You may be sure that Gomp-ers will be defeated. I do not know that the plan you speak of will be carried out, but it is not necessary. The Ohio Valley, Pittsburg and all unions in this vicinity are opposed to Mr. Gompers. The delegates from Pittsburg will unite with the Chicago and New York delegates who opposed Gompers last year, and will knock him out. The trades assemblies of the Ohio Valley have united to elect J. H. Burt as Mr. Gompers' successor. This gentleman is a member of the Executive Board of the American Flint Glass Workers' Union. He would be the right man in the right place as President of the American Federation of Labor. He has a broad kuowledge of labor affairs. He has good judgment, and was employed on the statistical department of the late Census Bureau. The workingmen are dissatisfied with Mr. Gompers' whole administration. In this city be is disliked especially because of his attitude during the carpenters' strike. The United Mine Workers have been very sore since the Connellsville strike."

sore since the Connellsville strike." In regard to the carpenters, it is said the whole national brotherhood will oppose the re-election of Gompers. This, it is said, is also true of the International Typographi-cal Union. A gentleman well posted in na-tional labor affairs said yesterday that if either President Kliver, of the Carpenters' Brotherhood, Secretary Dillon, of the Flint Glass. Workers, or one or two other leaders Which Will Sur-THREE LEADERS Glass-Workers, or one or two other leaders had held out last year, Gompers would have been defeated.

Looking for a Site in Pittsburg.

The United Window Glass Company is looking for a site for a new plant. It is the intention to build works extensive enough to employ from 600 to 1,000 men. The United Company has no members in Pittsburg. It is composed of New York and Western firms, and is incorporated under the laws of Illinois.

#### Shut Down for Want of Gas.

The California Glass Company has been compelled to indefinitely suspend operations at its works at California, Pa., owing to the poor supply of natural gas. The company is now investigating the Rose pro-cess of gas making, with a view of adopting it in the works.

Shut-Down of the Edgar Thomson Works, The Eugar Thomson Steel Works will close down December 12 for the annual repairs. The shut-down will be as brief as possible, owing to the large orders now on hand. The plant will resume operations between Christmas and New Years.

"Son of Heaven" is enjoying a train of min-inture railroad cars, presented to him by the French syndicate of capitalists who wish to get contracts for building railways. In China, they will wonder at its steam engine; and the six thousand electric lights, which are now being introduced into the holiest of Chinese sanctuaries, cannot but turn their eyes to our civilization. It will not be long ere a material advancement will be made in the science of medicine, which has for so many centuries remained a blot upon their civilization. The missionaries are doing much to dispel the mysticism and reverent awe which the Chinaman holds for the concoctions of snakes, toads, lizards, etc., prepared by the native doctors. They recommend standard remedies which have long been favorably known in America and Europe, such as Dr. Pierce's Golden Medical Discovery, a remedy for all cases of blood-taints or humors, which has had years of uninterrupted success in the United States, and numbers its cures by the fere future welfare of the Drogomen Empire.
