TRADE OF THE WEEK

Seasonable Movement, With No Depressing Influences at Work.

ADVANCED GROUND FIRMLY HELD. Number of Important Deals in Realty Brought to a Conclusion.

THE NIMICK PROPERTY CHANGES HANDS

With the exception of the attempt upon the life of the banker and broker, Russell Sage, the week in the business world was characterized by no unusual event. Business transactions were of the usual volume -a little larger in spots-but averaging about the same as the previous week. No bad influences were set in motion to impair confidence or cause timidity. Said a prominent business man: "While the financial distrust which pervaded the country at the beginning of the year, and for some time after, has almost entirely disappeared, it has developed a strong conservative sentiment which makes complete restoration of activity slow work. But it is encouraging to know that all of the lost ground recovered is securely held, and that the curative process is still in operation. By the turn of the year it is hoped and believed the last

cloud will have disappeared."

Locally, there was no important change from the previous week in the volume of business or conditions. In one respect, at least, Pittsburg is peculiar. Her industries and activities, being of a substantial character, are not easily affected. They are of the year-in-and-year-out sort, that can always be depended upon. Hence she is the last to yield to depression and the first to respond to a bulge.

Realty on the Jump.

While there were no notable transactions in real estate during the week, there were in real estate during the week, there were several of more than ordinary importance. Yesterday was productive of an unusual number of interesting events.

J. H. Coleman & Co. closed the sale of the Nimick property, at Wilkinsburg, to a land syndicate at \$70,000. It consists of 30 acres. The only building is a small frame house of little value. It will be plotted and put on the market in the spring.

Baxter, Thompson & Co. practically closed a deal for a large tract of land on the Monongahela, with a view to locating a large manufacturing plant thereon. The consideration is in the neighborhood of \$40,000.

Black & Baird sold a business property on the lower end of Third avenue for \$38,000. There was a report of another sale in the same locality at \$22,000.

M. F. Hipple & Co. disposed of a new 10-room Queen Anne house and lot 40x100, on the cast side of South Negley avenue, Twentieth ward, to E. M. Noble, at a figure very close to \$10,000.

close to \$10,000.

The Hubley property, at Wilkinsburg, was resold during the week to Murphy & Diebold, East End lumber dealers, at a slight advance on the price paid by Mr. Dick.

The Hipwell Manufacturing Company, an Eastern concern, yesterday leased through Black & Baird one of the Boors in the Eagle Cotton Mill building, Allegheny, with power, for the manufacture of brass goods.

Buildings for the Week. Twenty-six building permits were issued during the week for 26 improvements, aggregating, as estimated, \$129,585, against 13 permits, 25 improvements and \$32,270 esti-mated value the previous week. Yesterday's list follow.e

James McKay, stone three-story dwelling on Anderson avenue, Twentieth ward, to cost \$35,266; Charles W. Houston, four to cost \$33,200; Charles W. Houston, four stone and brick three-story dwellings, on Liberty avenue, Twentieth ward, to cost \$18,000; Mrs. C. Vandevort, brick three-story dwelling, on Penn avenue, Twenty-first ward, to cost \$9,500; John Nilzarak, brick two-story and mansard dwelling, on Brereton avenue, Thirteenth ward, to cost \$2,800; Miss Maloney, brick two-story and mansard dwelling on Oakland avenue, Fourteenth ward, to cost \$3,500; H. K. Porter, frame one-story power house, near De Soto street. story power house, near De Soto street Fourteenth ward, to cost \$700; John Mollan plty, frame one-story stable, on Liberty avenue, Sixteenth ward, to cost \$300; John Eaton, frame two-story addition to dwelling, on Bidwell street, Twentieth ward, to cost

Some surprise has been expressed that the regular weekly sales promised at the Real Estate Exchange have not been kept up.

Particularly is this felt because the one set of sales which was held proved upon short notice a decided success. The room was crowded by parties having an interest in the market, and three properties were sold. A fourth, which was advertised, would have been bought if the agent in charge had not airendy disposed of it by private sale.

It is said that the reason why the programme of the Exchange has been allowed to lag is because the agents are so busy with private negotiations upon the properties in their hands. Nevertheless, the possibility of a market where people can realize quickly a market where people can realize quickly when they have to sell, and the attractions when they have to sell, and the attractions of bargains to investors, are worth something. As the agents would have their commissions all the same, the Exchange wouldn't work to their pecuniary disadvantage. For a certain class of property these periodical sales would seem to be a first-class thing. They will doubtless be resumed after the holidays, if not before.

Business News and Gosslp. The sale of the Nimick property at Wilkinsburg, will probably soon be followed

by that of the Singer place in the same neighborhood. sales published in this column during the week, and especially to-day, the claim made in some quarters that the market is stagnant will scarcely hold water. Facts always

outweigh theory.

Mr. George H. Westinghouse, Jr., who has Mr. George H. Westinghouse, Jr., who has returned from the East, says, with reference to the business of the Airbrake Company, that he is in receipt of information from railway officers to the effect that they will require brakes for about 15,000 cars which have been or will shortly be ordered. He says the Airbrake Company has very little to fear from competition from any other concern until the question of infringement of the company's patents has been determined in the courts. The capacity of the works of the Westinghouse Company at Wilmerding is sufficient to meet the demands of the whole country; in fact, they can turn out a complete brake every working minute, and this rate can be greatly increased if necessary. On call yesterday 17½ was bid for Duquesne Traction, offered at 17½; Manchester was offered at 38; 18½ was bid for Birmingham, 92 for Birmingham bonds, 89 for Electric scrip. Birmingham bonds were offered at 14½.

There were sales of Westinghouse Electric in Boston at 18 and 18½. A local broker booked an order for a good-sized block of it yesterday afternoon.

The West Bought Freely of Its Favorit Shares-The Grangers and the Vander bilts Show Up the Strongest in the Lie of Securities.

NEW YORK, Dec. 5.-The stock market today was quite active after the first half hour and displayed a stronger tone than it has for some time, the result being material advances in some of the leading stocks and smaller gains in almost everything traded in. The opening was very dull, but generally higher than last night's prices and fur-ther improvement was made from the first ther improvement was made from the first sales, and when it became evident that the West was buying freely of its favorites there was again an endeavor to cover some of the outstanding shorts which materially increased the business done and kept the upward movement going when it might otherwise have been arrested by realizations, or the issue of the bank statement, which showed a small loss in surplus reserve.

This, however, was due to a heavy expansion of loans even in the face of the heavy increase in deposits. Among the usually active list the Grangers and Vanderbilts increase in deposits. Among the usually active list the Grangers and Vanderbilts were most prominent for strength, and New York Central, after touching 117, reacted a fraction, and still closed I per cent higher than last evening. The only other material advance was in sugar, but all the leading stocks rose large fractions. The feature of the day, however, was the spurt in the Milwaukee, Lake Shore and Western stocks, the common rising 5 per cent to 87, and the preferred, after selling up to 120% closed 5% per cent higher at 119%. An old story that negotiations had been concluded by which the road was to become a part of the Northwesterm system was current, and to some minds accounted for the advance.

The market closed active and strong at or about the highest prices of the day.

At New York the total sales of stocks were 124,309 shares, including: Atchison, 5,330: Chicago Gas, 8,313; Delaware, Lackawanna and Western, 683; Frie, 6,900; Lonisville and Nashville, 2,980; Missouri Pacific, 1,900; Northwestern, 5,633; New York Central, 6,355; Northern Pacific preferred, 6,579; Reading, 2,700; St. Paul, 22,30.

Railroad bonds were quiet and without feature, but still maintained a firm tone, with no important dealings among active stocks. The sales were 850,000. The highest and closing quotations were:

Silver, 1888, \$36.297,132: 1889, \$37,337,814; 1591, \$57,331,323. Gold, 1888, \$10.821: 1889, \$110.328. From these figures one can rendily see how deeply Anglo-Indian interests are involved in the silver question, and the Eastern possessions of the Queen may yet be heard of in the halls of Westminster.

The coinage of India in 1890 was 20,000.000 greater than in 1888 or 1889, and the extra Indian demand this year for silver, together with the increasing demand for coinage and speculative purposes in this country just before and after the passage of the act of January 14, 1880, accounted for the maintained rise in its price during the latter half of 1800, notwithstanding dear money and distrailed financial position in all the world's markets. This year the demand from India is more nearly a normal and average one, and its failure to keep up its exceptional imports of 1880 is one of the chief causes of the present low price of silver. The exports of silver from London to India during the first nine months of the present calendar year from January 1 to October 8, 1891, as given by Mr. Leech, were £3,036.65, against £6,591,156 in the same period of 1890.

The market for good, high-class dividend bayers was very strong, and this is the very best sign one could desire in a stock market. The buyers of the New York Central, Lake Shore, Northwest, St. Paul preferred and Omaha preferred are not mere scalpers on shoestring marxins trving to make a Christmas present for their children; they are men of means who are attesting their faith in the earning power of these great properties. This kind of buying will almost surely lead to a burst of general speculative strength that will carry up the second and third class of stocks and excite active and buoyancy of opinion among the rank and file of operators.

"The market was active as well as strong, and this, too, despited the fact that telegraphic service was generally interrupted. We look for a higher market Monday."

A Waiting Period.

a time for initiating a speculative campaign; and, therefore, whatever may be thought of the legitimacy of a rise in stock values corresponding to the many-sided stimulus that now bears upon the stock market, it is not to be supposed that any important movement of that character is likely to appear until near the close of the year or at the beginning of 1892. During that interval we may possibly witness some irregularity in the market. The lears will need to exert all their skill and power to extricate themselves from their large short commitments; and such temporary successes as they may have will afford opportunities for buying. On the other hand, it seems quite probable that outside happenings may preponderate on the favorable side. The improving tendency of affairs in the interior and in Europe, the effect of the crops upon railroad earnings, the growth of ease in money, and the return of gold from Europe are influences that are likely to continue to further develop throughout December; which may be expected to steadily prepare the way for a later movement toward higher prices, which it seems to be very generally conceded would then be legitimately due and likely to occur.

GOSSIP OF THE GUARD.

ADJUTANT JOHN HUBBARD, of the Fourteenth Regiment, left for an extended West-ern trip last week. ASSISTANT SURGEON W. F. ROBESON, of the Eighteenth Regiment, returned yesterday from a brief trip to Philadelphia. CAPTAIN WILLIAM A. WITHERUP, of the

States Fencibles, has been promoted to the majority in that organization. THE members of the Gray Invincibles, the only colored company in the National Guard, claim to have received assurances from Harrisburg that in case any opening occurs in the First Brigade by reason of the disbandment of other organizations, the Invincibles will be recruited to a regiment. In other words the claim is that should the Third Regiment suffer disbandment by rea-son of present troubles, Captain Hailstock, of the colored company, will be allowed to recruit a regiment.

THE Washington Infantry held its regular annual election of civil officers last Tuesday evening with the following result: President, Captain A. P. Shannon; Recording Secretary, A. M. Fording; Financial Secretary, S. F. Walborn; Treasurer, W. R. Gellfass; Board of Directors, Captain Shannon, Lieu-tenant Gellfuss and Lieutenant Neibaum. The officers of the Washington Infantry report the organization in excellent condition, eight new recruits being received during November, four of whom are in the drill squad. New applications are received almost every drill night.

THE members of Company B, Fourteenth Regiment, still pine for their camp pay due from the tour of duty at Arnold Station last summer. All the other organizations in the

summer. All the other organizations in the brigade have been long since paid off, but this company seems fated to watch and wait in vain. The reason assigned originally for holding back the money was that Lieutenant Hull, of the company, had never received his commission, and consequently the rolls were incorrect. This was three or four months ago, and Lieutenant Hull has long since received his necessary plece of parchment, but the money falls to make its appearance just the same. Numerous letters forwarded by Colonel Perchment and Adjutant Hubbard fail to bring the proper responses.

The report of Major Samuel Hazlet, Brigade Ordanace Officer for the season of rifle practice, just closed, is interesting. The total number of sharpshooters and marksmen for 1891 is 2,053, showing an increase of 230 over last year. Every organization in the brigade shows an increased number of qualified men, Company A, of the Tenth Regiment, being the only company not reporting promptly. The Fifth Regiment leads in the number of men qualified, with the Eighteenth Regiment in second place. The totals by regiment are: Fifth Regiment, 134, sharpshooters, 312 marksmen; total, 46, sharpshooters, 312 marksmen; total, 52 sharpshooters, 257 marksmen; total, 55 sharpshooter iment, being the only company not reporting promptly. The Fifth Regiment leads in the number of men qualified, with the Eighteenth Regiment in second place. The totals by regiment are: Fifth Regiment, 134 sharpshooters, 312 marksmen; total, 446. Tenth Regiment, 46 sharpshooters, 240 marksmen; total, 286. Fourteenth Regiment, 52 sharpshooters, 257 marksmen; total, 309. Fifteenth Regiment, 30 sharnshooters, 274 marksmen; total, 304. Sixteenth Regiment, 112 sharpshooters, 189 marksmen; total, 301. Eighteenth Regiment, 46 sharpshooters, 271 marksmen; total, 317. Sheridan Troop, 32 sharpshooters, 28 marksmen; total, 38. The increased number of sharpshooters in the brigade over last year was 61.

After over four months' delay Adjutant Charles Reese, of the Eighteenth Regiment, has been notified by the Adjutant General's office in Harrisburg that it has no jurisdiction in the matter of his application for a court of inquiry, and that his papers have

court of inquiry, and that his papers have been turned over to General Snowden, at division headquarters, for official action. It will be remembered that the cause of Lieutenant Reese's application for a court of inquiry was due to a reprimand given him by Colonel Krumboar on the field at Camp Kensington last summer, in the presence of a number of officers and enlisted men. for an alleged discourtesy to an aid de camp on the Governor's staff. Immediately after the censure was given to Mr. Reese, a demand was made for a court of inquiry to investigate his conduct, and then it was that an attempt was made to kush up the matter. It was claimed at the time that the Governor's aid was new in military life the Governor's aid was new life to the life the unitary and court of inquiry, and that his papers have that trouble.

Cood Bank Statements Issued Here and in New York.

The past week was a good one in local banking circles. There was a fair and well sustained call for accommodations from the best business sources, and most of the financial institutions materially broadened the field of their operations. Depositing and checking were strong features, denoting a better condition in general trade lines. Iron and glass were more active. Holiday goods moved quite freely. There was no change in the interest rate, which was 6 per cent as the rule. The only section reporting scarcity of funds was the South. This company has acquired by purchase, and is the sole owner of letters patent taken out in the United States, and in all the pr cipal foreign countries, for an IMPROVED AUTOMATIC COMPRESSED AIRBRAKE (which is interchangeable with the Westingnouse) for use on engines, passenger and freight cars. These patents, after a thorough examination, have been pro-nounced by the ablest attorneys and patent experts as entirely free from all infringe-ment of any existing patents, and are at present in use on 30 different railroads, including the Chicago, Rock Island and Pacific, Chicago and Eastern Illinois, Cleveland, Cincinnati, Chicago and St. Louis, Chicago, Burlington and Quincy, Burling-ton, Cedar Rapids and Northern, Illinois Central, Cincinnati, New Orleans and Texas Pacific, Louisville and Nashville, Lehigh Valley, New York and New England, New

York, Providence and Boston. The company is now turning out 30,000 car brakes and 2,000 locomotive equipments per annum, the extent of its capacity, which at present prices show a net profit of \$750,-

lered the most excru-ciating pains in my loins, hips, knees and fleshy portion of my legs, while my left knee was badly swol-len and painful. I passed many sleepless nights from nervous depression and was so tired in the morning I could hardly get up.

"Finally I realized that something must be done and that quickly, and as I had read of the good work being done by the physicians of the Electropathic Institute, at 507 Penn avenue, I concluded I would try a course of electricity. The relief afforded was almost instantaneous, and under the stimulating effects of the electric current, aided by such medicine as was prescribed for me, I improved rapidly, until now I can work all day, can walk as fast as anyone and haven't an ache nor pain about me.

"I am certainly a convert to the treatment of such diseases as mine by electricity, as 000 per annum.

The stock now being offered is a part of 16,000 shares held in the treasury of the company; the remaining 10,000 shares to be used only for the future needs of the company, and at a price not below par. As all the prominent railroads are now equipping their engines, passenger and freight cars with power brakes, in addition to applying them to their old equipment, and as the total manufacturing capacity of all the air brake plants in this country is only about 100,000 equipments per annum, it will readily be seen that the immense de-
