

STEEL FOR THE NAVY.

Secretary Tracy Delighted With the Carnegie Heavy Metal.

THE BEST ARMOR IN THE WORLD.

Serious Delay Prevented by Contracting With the Local Firm.

COMMENTS ON THE CHILEAN AFFAIR.

WASHINGTON, Dec. 6.—Secretary of the Navy Tracy has his report ready for the President. It embraces a number of important topics, the Chilean matter covering a number of pages, and the armor tests not being at all slighted. Besides, the information relating to the Chilean matter is presented in a very interesting manner. Secretary Tracy prescribes his report with no introduction. He merely says, "To the President," and at once goes into the details of the construction of the new armor and other vessels.

During the past year four new vessels have been ordered, making a total number of 13 since March 4, 1899, as follows: Chicago, New York, Petrel, Gloucester, San Francisco, Newark, Concord, Bennington, and Massachusetts. These vessels remaining under construction, and satisfactory progress is reported on all.

The delay in the delivery of armor may cause the dates of final completion of the 12 armored vessels in the list to be somewhat later than was contemplated when the contracts were drawn up. The increased sources of supply of armor plate now available it is probable that this delay will be short, and it will be much more than compensated for by the superior quality of the armor which has been developed during the past year.

The Momentous Question of Armor. By far the most momentous question which the Department has had to consider in connection with the construction of the new navy is that of armor. First, to secure a supply of American manufacture, and secondly, to determine what kind of armor should be adopted, having reference both to its composition and mode of treatment. The new subject is studied the more carefully inasmuch as the first contract of 1897 was effected, and the creation of armor plate manufacturing plants now in the last stages of completion at South Bethlehem.

The difficulty which should attend the work of such magnitude is unavoidable, and the establishment of armor manufacture in the United States, and the effort that has been made by the Department to hasten it.

In view of the delay incident to the work under the Bethlehem contract, the Department in the latter part of 1900, endeavored to secure a second source of supply, and on November 20 of that year entered into a contract with Messrs. Carnegie, Phlips & Co. for 2,500 tons of armor plate of the same grade as that stipulated in the Bethlehem contract. The contract was for deliveries to begin July 1, 1901, and to continue for a period of 18 months, was to start to enable the company to complete the necessary extension of its plant.

Advantages of the Carnegie Contract. The work has been pushed, and 130 tons of nickel-steel armor for the Monterey have been turned out, and are now only awaiting the required ballistic tests prior to acceptance. If this contract had been made at the time of the completion of many of the armored ships now under construction would have been postponed for an indefinite period.

The contract with Messrs. Carnegie, Phlips & Co. provided for utilizing nickel in connection with steel armor. The use of nickel armor, which has also been entered into with a view of substituting nickel-steel armor for the steel armor now in use, is a subject which has been under consideration for some time.

The supply of armor of domestic manufacture having been provided for, it remained for the Department to determine finally the material and the method of treatment that should be adopted.

Results of Competitive Tests. The experiments made last year at Annapolis, described in the annual report for 1900, consisted of a test of the two principal foreign types of armor, the English compound plate and the French all-steel plate, and an entirely new plate, also made in France upon the special order of the department, of nickel-steel. The result of the trial showed that the compound plate was decidedly inferior, and that as between nickel-steel and all-steel the latter had distinct and positive advantages. The all-steel plate, broken into four pieces, while the nickel-steel remained absolutely unbroken.

A series of tests made during the following spring and summer confirmed the conclusions formed at the Annapolis trial as to the superiority of nickel-steel, and the Department accordingly decided to adopt it, and made arrangements with the contractors looking to that end. It remained, however, to give a thorough trial to the armor of domestic manufacture before deciding to place it upon the vessels, and for this purpose it was decided to order typical plates, which should be made the subject of a general trial. This trial was to ascertain, first, whether our domestic manufacturers could produce an armor that would stand competitively with the material manufactured abroad; and, second, which of the various modes of treatment proposed would give the best results.

In reference to the latter point of the question, it was considered whether the relative merits of rolling and forging in the manufacture of armor should be determined. The process, designed to harden the surface of the plate while retaining the toughness of its body.

Satisfactory Trials at Indian Head. Of the six plates tried three were furnished by the Bethlehem Iron Company and three by Carnegie, Phlips & Co. In these trials the latter took place at Indian Head on November 14 the plates were subjected to tests more severe than had ever been applied to any foreign government armor. Four shots were fired at each plate from a 24-inch gun with an impact velocity of 2,673 feet per second and an energy of 22,000 foot-pounds, using the Holtz projectile of 100 pounds. One shot was then fired at the center of each plate from an eight-inch gun with an impact velocity of 1,900 feet per second and an energy of 7,000 foot-pounds. The results of the trial were in the highest degree satisfactory. Each of the six plates manufactured in this country was superior to the English compound plate, while the nickel-steel was superior to all the foreign plates of the Annapolis trial. They may therefore be pronounced in advance of the best armor hitherto manufactured in Europe.

Further light was thrown upon the question of the relative merits of all-steel and nickel-steel armor, and any doubt which may have remained upon that subject was completely set at rest. Of the three plates made by Bethlehem two were of all-steel, one created by the Harvey process, the other by the nickel-steel process. The all-steel plates proved to be far inferior to the nickel-steel Harvey plate, notwithstanding the advantages which it may have derived from the special treatment to which it was subjected. The nickel-steel plate proved to be superior to the all-steel plate tried at Annapolis.

Nickel-Steel Superior to All Steel. A third nickel plate, manufactured by Carnegie, under the rolling process, also showed a marked superiority over the all-steel plate of this year, and both it and the corresponding Bethlehem plate manufactured under the hammer showed a capacity of resistance to perforation fully 50 per cent greater than that of the French all-steel plate. In this respect the results furnished by the two American plates manufactured under the rolling process (forging and rolling) proved to be remarkably uniform, the all-steel plates being fired in them differently in penetration than an inappreciable amount.

The trial thus definitely establishes the fact that armor of excellent quality may be produced by the rolling process, and that forging by means of the hammer, the greatest source hitherto of expense in manufacturing, is no longer to be regarded as an absolute necessity. The importance of this fact can hardly be over-estimated, for it raises a possibility that within a year or two the armor-producing capacity of the United States may be quadrupled in case of necessity, and that if we had 10,000 tons to let and could give 18 months from date of contract to commence delivery, the cost of manufacture would be reduced from 25 to 20 per cent, while the work hitherto confined to two firms would be thrown open to a large number of competitors.

Finally, the trial shows that the high-carbon nickel Harvey plate is undoubtedly the best armor plate ever subjected to ballistic test. It may be assumed that the principle of super-carburizing steel to a considerable depth has passed beyond the experimental stage. The question of tempering of building the carburized armor plate needs, however, further experimental development, and the lack of uniformity in results, indicated in the Indian Head armor trials, may probably be ascribed to this want of experience. The assistance of success however, is so great as to warrant the department in making further experiment in this direction, with every reason for anticipating a completely satisfactory result.

The Itala and Valparaiso Affairs. The portion of the report devoted to ordnance is not extensive, and that part given up to powder and high explosives has been covered in the report of Commodore Folger already published. In armor-piercing projectiles no progress is reported. More advance is reported in torpedoes.

The correspondence of the Itala affair and the attack on American sailors at Valparaiso has been given to the press. Secretary Tracy's comments thereon are as follows: "I therefore appear that neither in the affair of the Itala, whose surrender was voluntarily determined on by the provisional Government at Valparaiso, nor in the presence of the Baltimore when the agents of an American cable company applied their cables on the open sea, nor in the visit of Admiral Brown to Quintero Bay was there shown any lack of respect for the navy of the United States to any person, party, or Government then existing in Chile, nor was any assistance or encouragement of any kind rendered to what was at that time recognized by all the world as in fact the Government of the country. Yet it is impossible to account for the series of outrages perpetrated on the crew of the Baltimore on any other supposition than that those who committed them were influenced by the animosities which had been actively circulated, and that they were all and abetted by a police guard which should have surprised them. No charge or even suspicion of misconduct attaches to the men who, on the night of the 21st of October, endeavored without weapons to defend themselves against an armed attack, were driven by the police to a Chilean prison because they wore the uniform of American sailors."

Needs and Cost of the Navy. Recommendations are made as to promotion in the navy, and an increase of apprentices from 750 to 1,500, also the importance of a trained militia for the navy. The general estimates for the support of the navy, including public works and the marine corps, which were sent in last year, of that year, of over \$10,000,000 below the estimates of the previous year. The estimate for the current year, as submitted, shows a further reduction of \$94,000,000 below that of the year, and a reduction of \$5,300,000 below the appropriations for the current year.

THE DOINGS OF A DAY. WHAT THE WORLD WAS UP TO ON A SUNNY SATURDAY.

The Sunday Dispatch Tells All the News of the Two Cities, of the Three States, of the Whole Country and of Lands Beyond the Sea.

If yesterday's DISPATCH contained nothing but Mark Twain's second letter from Europe it would be worth many times its price. Besides this letter, the other literary and news departments were up to the usual high standard. The following is a brief resume of the leading news features:

Local. Dr. Winslow has analyzed Allegheny's water supply and found it to be pure. Campaign clerks used the straight-out organization for compensation due them. Mayor Wyman will not be a candidate for delegate to the National Democratic Convention. Theodore Doeringer, the alleged embezzler, has been made librarian of the county jail. Allegheny is still searching for a poor farm site. The holiday trade season opens with a boom. Dr. C. C. Wiley, the insanity expert, received an anonymous letter of warning. Senator Rutledge denies that he has a running mate in the legislative race. An ordinance to regulate the Mayor's actions will be introduced into Allegheny Councils.

General. Democratic Congressmen took 17 futile ballots for Speaker. The Republican renominated Tom Reed. Russell Sage has nearly recovered from his wounds. Governor Beaver's iron and nail mill at Bellefonte has temporarily closed down. A poll demonstrates that a free coinage bill cannot become a law during this Congressional session. Philadelphia surgeons are endeavoring to reclaim a 3-year-old idiot by splitting his skull and enlarging his cranium. The work of the coming Catholic Congress is outlined. The Mayor of Columbus has called all his attention to his city to close. Timothy E. Byrne, a prominent politician of Minneapolis, has been indicted for forgery. The South Carolina Legislature passed a prohibition law. Secretary Froster has left the War Department. Carnegie's workmen at Bradstock object to working 10 hours for eight hours pay. The health of Mrs. Cleveland's health may prevent the ex-President from accepting a renomination. Chicago is making active preparations for the funeral of back-Ed Taylor, the originator of the green-back party. A New York girl asked a policeman the way to the river, where she could drown herself. Collector Warmack's friends at Washington are feeling apprehensive. Governor-elect Flower's pluriarity is officially ascertained to be 47,958.

Foreign. Emperor William's despatch speech to the Reichstag is still exciting Germany. The Evangelistic Synod at Berlin protested against the Kaiser's receipt on immortality. The new treaties of commerce will be submitted to the German Reichstag today. The czar has appointed a Central Faunistic Committee. The state of gladness' health is disturbing the English liberals. Working tinplate workers are incensed against the proposed shut-down. Mrs. Langtry is too ill to appear on the stage. Italian brewers threaten to close down. British manufacturers are complaining because the Royal Commission charges for space at the British section of the World's Fair. The English Mohammedan community at Liverpool is growing. The next English divorce scandal will involve theatrical personages. All is quiet in Rio Grande do Sul.

WHERE there are children, there should Dr. Bull's Cough Syrup be always handy. 25 cents.

JUST IN TIME FOR CHRISTMAS BUYERS.

A Shipment of Our Celebrated Dantermine Table Linens.

PEPI ZAMPA,

Cloth and napkins to match, put up in handsome boxes. These popular goods look better after each washing. Choice new patterns and at popular prices in linen department. JOS. HORNE & CO.

FUR COATS, ROBES AND GLOVES.

SMILEY & CO., 28 FIFTH AVENUE.

DEED.

HELEPP—On Sunday, December 6, 1891, at 443 P. M., GEORGE L. BULLIFF, of pneumonia, died at his residence, 1202 Josephine street, Southside, aged 30 years, 8 months and 24 days.

Funeral Tuesday, December 8, at 2 P. M. Friends of the family are respectfully invited.

BLACK—On Sunday, December 6, 1891, at 6 P. M., JANE BLACK, mother of William Black, aged 75 years.

Funeral from the residence of her son, William Black, No. 1000 Chestnut street, Pittsburgh, on TUESDAY, at 10 A. M.

BOYLE—In this city, JAMES BOYLE, on December 5, at 11 A. M., Brownsville avenue, aged 80 years.

BROOK—On Sunday, December 6, 1891, at 2:30 P. M., JANE WOOLEY, wife of Mark Brook, in her 43d year.

Funeral services at the late residence, No. 10 Tecumseh street, Hazelwood, on TUESDAY, the 8th inst., at 1:30 P. M. Friends of the family are respectfully invited to attend.

DECKER—At San Jose, Cal., on Saturday morning, December 5, 1891, at 10:30, HAMILTON C. DECKER, eldest child of George E. and Margaret Craig Decker, aged 7 years and 7 months.

DUGAN—On Sunday, December 6, 1891, at 7:30 P. M., MARGIE, wife of Peter Dugan, in her 23d year.

Notice of funeral hereafter.

FENDERICH—On Sunday, December 6, 1891, at 11:25 A. M., FANNIE M., daughter of Charles and Mary Fenderich, aged 14 years.

Funeral services at the family residence, 198 Irwin avenue, Allegheny, on TUESDAY, December 8, 1891, at 2 P. M. Interment private.

FITZGERALD—At the family residence, No. 622 Bond street, East End, on Sunday, December 6, 1891, at 12:30 P. M., Mrs. MARGARET FITZGERALD, widow of the late Thomas Fitzgerald, in her 73d year.

Notice of funeral later.

FRAZIER—On Saturday, December 5, 1891, at 2 A. M., HANCO FRAZIER, decedent, 411 E. W. son of A. B. Goewey.

Funeral from the residence of his father, Frankstone avenue, East End, on MONDAY, at 4 P. M. Friends of the family are respectfully invited to attend.

KAUFFELD—On Sunday, December 6, 1891, at 6:55 A. M., OLIVETTE ELIDA, daughter of Alex. C. and Christina Kauffeld, aged 2 years, 1 month and 6 days.

Funeral from parents' residence, No. 23 Miltenberg street, city, on TUESDAY, December 8, at 2 P. M. Interment private.

LAUGHLIN—In New York, at 2:50 o'clock, on Saturday morning, December 5, 1891, of pneumonia, ISABEL BOWMAN LAUGHLIN, wife of Walter George M. Laughlin and daughter of Hon. William McKenna, of Washington, D. C.

Funeral services at the family residence, Murray Hill avenue, this city, MONDAY AFTERNOON at 2:30 o'clock. Interment private.

LENZ—On Saturday, December 5, 1891, at 3:30 A. M., ALBERT, son of Peter and Anna B. Lenz, aged 7 years 5 months and 10 days.

Funeral from his parents' residence, No. 29 Main street, Allegheny City, on MONDAY, December 7, at 2 P. M. Friends of the family are respectfully invited to attend.

MCNEE—On Sunday, at 6:30 A. M., at the residence of Mr. Park, No. 10 North avenue, ALLEGHENY, MARY MARGARET MCNEE, in the 20th year of her age.

Funeral from the residence of her brother, William James McCane, corner of Southend and Virginia avenue, Tenth ward, Allegheny, at 2 P. M., TUESDAY, December 8, 1891. Friends of the family are respectfully invited to attend.

NIETH—On Sunday, December 6, 1891, at 11:45 A. M., ANNA M., wife of J. H. Nieth, in the 40th year of her age.

Funeral from her late residence, near Freedom, Pa., on MONDAY, December 7, 1891, at 2 P. M. Train leaving Union station, Pittsburgh, at 1:20 P. M. central time, will stop at Freedom.

SINCLAIR—At the family residence, McKeesport, on Friday, December 4, 1891, at 12:30 P. M., SARAH A., widow of the late Captain H. B. Sinclair, in her 72d year.

Funeral on MONDAY, December 7, 1891, at 2 P. M.

O. McClintock & Co.'s CHRISTMAS SUGGESTIONS! OUR entire first floor is devoted to our Tenth Annual Holiday Bazaar of articles suitable for home utility and decoration, representing the Carpet, Furniture and Curtain Departments. We have done our best by careful selection, convenience of arrangement and large variety, to make Christmas buying easy and satisfactory.

BULLETIN NO. 2. FOR A GENTLEMAN: This all-leather, spring edge, easy chair is \$18, or with platform rocker is \$19. It represents a large stock of easy chairs and library furniture.

Our Office Desk, Department offers roll-top desks and rotary chairs as the daily necessity of every business man, either for home or office use. One like the cut, full 54 inches long, of excellent construction and finish, is only \$25. It certainly combines greater intrinsic value, more ingenious contrivances and more practical every-day helpfulness for the money than anything else in the whole range of furniture.

To a busy man shaving is a test of patience and a waste of time. "What can't be cured must be endured." But with the combined conveniences of any one of our shaving stands we may mitigate the evil. The one of our cut is a combination of shaving stand and chifoniere, with hat closet and drawers for underclothing and carved "claw" feet. Our price for it in antique oak is \$20.

PRICES POINT POSITIVE. Any lady desiring to wear a Kid Button Boot—stylish—flexible—perfect-fitting—should invest at

HIMMELRICH'S. \$2 00! It's as prime a shoe that ordinarily sells at \$3 00. Believing in seeing, and you want to see them at

430-436 MARKET ST.
