But There Is the Customary Falling Of in the Jobbing Trade.

IRON TRADE GOOD AT MOST POINTS

PEPECIAL TELEGRAM TO THE DISPATOR. NEW YORK, Dec. 11.-Tpecial telegram to Bradstreet's report the customary falling off in jobbing and other wholesale lines during this season in practically all directions, though it is a little intensified by unexpectedly mild weather, which tends to check sales of seasonable staples. Country merchants are quite generally buying stocks as they need them, and there is a widely manifested disposition to go ahead slowly. Dealers have begun stock-taking in many instances, and the only note worthy animation aside from the grain trade is in Christmas holiday specialties.

The mercantile failures continue to increase from week to week, aggregating 380 in the United States for this week against 306 last week and 341 in the like week last year. The total number of failures in the United States from Japuary 1 to date is 11 .-620 as compared with 9,842 in a like portion

Wearing Apparel and Its Materials.

The distribution of woolens and cottons is checked. Wool is very dull, and cotton as low and unsatisfactory in price as ever. Boots and shoes are in little better demand or spring delivery, and leather is more active, with the price tending upward. Petroleum is of slow movement and prices are

Live cattle and hogs are in free receipt at Western packing centers, and prices are lower. Logging preparations are being pushed in the Northwest, and in Louisiana the rice crop promises to be large, fully 1,000,000 bags of rough. At Philapelphia a much better feeling

exists in the iron and steel industries, due to recent large orders for steel rails and car iron. At Pittsburg a four-months' delivery contract has been accepted for pig iron at the lowest prices made, and pig and billets drag a little. Iron is quite dull at Cincin-nati, but merchant and pig iron are in better request at St. Louis. Gross earnings of 130 railroads in Novem-

ber aggregated fully 9 per cent more than in November, 1890, last month's total exceeding somewhat \$46,500,000.

Entiroads Coining Money From Grain. The significance of the exceptional November gain, caused by the unprecedented grain movement, is shown when it is re-called that in October last the increase was only 8.7 per cent over the total gross in Oc-tober, 1899. Granger, trunk line and Southwestern railways enjoyed the heavier ratio of gain. For 11 months the total gross earn-ings exceeded \$456,000,000, which is 5.7 per cent more than in the 11 months of 1880. Grangers, Eastern roads, Pacifics and trunk nes make relatively the better returns. Bank clearings at 57 cities in the United States this week equal \$1,213,070,872, a de-crease of 8.8 per cent from last week, and an increase of 1.8 per cent over the week

Without any decided speculative activ-, the New York share market has dislayed a marked tendency to improve, the the Vanderbilt trunk lines, the Granger shares and some of the dividend-paying specialties. The heavy demand and advancing prices for bonds encourages the market, although bearish manipulation and weakness of the Gould group and of thern Pacific has at times obstructed

European Gold Still Coming.

Foreign interests have been made the pur rates for money in London, with the reduction of the Bank of England rate to 3½ per cent, has a favorable effect. Foreign ex-change has advanced ½c on increased in-guiry, but some small shipments of gold from Europe have, nevertheless, been an-

Wheat has sagged off during the week, after an advance due to decreased supplies reported afloat, sharper demand by cable and news of the increased export movement made public by Bradstreet's last Saturday Indian corn has been higher for December clivery on short supplies at leading points of accumulation, and inability of the rail-ands to handle the cereal any more rapidly. The decrease of the available stocks of wheat last week of something less than 700,000 oushels is only nominal, as there were about 2,000,000 bushels of uncounted wheat

A Big Increase of Wheat Exports, Exports of wheat from 12 United States ports this week equal 6,033,000 bushels, against 5,799,742 bushels, flour included as wheat, the week before, and as compared with 2,641,079 bushels in the second week

There is no lack of money in any to of the country, except at some Southern nrs, and the mere fact that cotton now inmulated at a few ports and interior cus represents fully \$60,000,000 in value d to planters at once explains the diffi-ty and suggests that it is not permanent. Is a good sign, also, that collections are the whole improving.
