New YORK, Jan. 2.—The stock market opened the new year to-day with an active and buoyant speculation, the volume of business being something unusual for the season of the year, as well as for a half-boli-day coming between two full ones. The Indus-trials were especially conspicuous in the upward movement, and as Lead took the lead among the unlisted shares so Chicago Gas led the listed stocks. Among the latter, the demand in Union Pacific, Wabash. New Phyland and C., C., C. & Si. L was sufficient to raise those shares to the highest prices for some time. sequestered nook in Butler county would be about the right place to locate the guard. If the people of Pittsburg propose to continue in their idiotic sentiment in re-gard to the National Guard, a most elegant move on the part of the Adjutant General's office would be to disband the organiza-tions in this vicinity altogether, and proba-bly at some time in the future their absence might be felt in a forcible and impressive mannor. Bullish Situation.

Watson & Gibson wired the following to John M. Oakley & Co.: "The stock market never disappoints the bulls any more. It sold off one to two points early in the week, but the decline brought in buyers and specu-lators, who were conservative and played for a reaction of twice as much, lost their stocks. It did not take them long to get around on the bull side, however, and the street is now almost uniformly bullish. This unanimity of opinion is necessary to make high prices and a bull market, but it usually leads to sharp reactions. It is not difficult to carry stocks now, for money is in full supply. One element of the strength that the market will have is the investment by money lenders in bonds and high class stocks of the funds which they would ordi-narily prefer to lend on good securities at fair rates, which cannot now be done. Later in the winter we believe commercial busi-ness will improve and a better demand will spring un for money, but we shall have at least 60 days of comparative ease. "The hunk statement showed a gain of nearly \$11,609,000 in denosits, and an actual gain in cash of about \$500,0%, but the in-creased reserves by nearly \$2,250,000. The banks now hold \$17,213,300. The preferred rose a little, but lost most of its gain, for thore seemed to be but few or-ders in it. The stock is a 7 per cent pre-ferred one and is very cheap at 84.
