

THE MONEY QUESTION

Discussed at Length in an Address by the Silver Committee of

THE NATIONAL BI-METALLISTS.

Why They Think the Present Policy is Unsound and Unsafe.

THE KIND OF REFORM THEY ADVOCATE

WASHINGTON, D. C., Jan. 8.—The National Executive Silver Committee tonight issued the following address:

The National Executive Silver Committee in session at Washington declares that continued experience demonstrates that there can be no adequate or final solution of the money question but by re-empowering silver with the money function and making silver coins standard money equal with gold for all moneys.

The present policy of making subsidiary money of silver to be redeemed in gold, and of piling continually higher the fabric of credit and credit money on a constantly diminishing basis of gold is unsound and unsafe, and must come to an end.

More Standard Money Wanted. What is wanted is not more credit currency relatively to standard money, but more standard money relative to credit and credit currency—a broader basis of primary money, and not a higher superstructure of credit devices.

What is wanted is not more credit currency relatively to standard money, but more standard money relative to credit and credit currency—a broader basis of primary money, and not a higher superstructure of credit devices.

What is wanted is not more credit currency relatively to standard money, but more standard money relative to credit and credit currency—a broader basis of primary money, and not a higher superstructure of credit devices.

HANDS OFF THE TARIFF.

A SIGNIFICANT UTTERANCE BY THE NATIONAL WOOL WORKERS.

They Oppose the Abolition of the Tax on Raw Wool—Why the Act Should Not Be Tinkered—It Should Be Given a Fair Test All Round First.

BOSTON, Jan. 8.—[Special.]—An important phase of the wool tariff agitation was developed in Boston to-day at the annual meeting of the National Association of Wool Manufacturers.

The National Association of Wool Manufacturers came from all parts of the country and represented a large majority of the capital invested in the manufacture of woolen goods.

The subject was carefully considered in secret session to-day, and, as a result of the deliberations, the following strong remonstrance against any tinkering with the present tariff law was presented and adopted.

The tariff act of 1890 has been in force for 15 months. It is a matter of general agreement that from three to five per cent more woolen goods are produced in this country than in any other schedule (necessitated by the tariff) in the world.

What the woolen manufacturer of the United States desires is not a repeal of the tariff, but a fair test of the tariff for a period of one year.

What the woolen manufacturer of the United States desires is not a repeal of the tariff, but a fair test of the tariff for a period of one year.

What the woolen manufacturer of the United States desires is not a repeal of the tariff, but a fair test of the tariff for a period of one year.
