BRIDGEVILLE ALSO RESIGNS.

Mr. Mayer Takes Ris Club From the Count League and States His Reasons. Just when all the patrons of the County League are thinking that everything has been nicely fixed and arranged for next season, troubles one by one begin to come Yesterday it was stated in this paper that the Climax team were going to drop out, and now Bridgeville will also disappear. The reason for the action of the Bridgeville team is fully explained in the following letter from C. P. Mayer, manager of the Bridge ville tenm. He says: To the Sporting Editor of the Dispatch:

To the Sporting Editor of the Dispatch:

"DEAR Sus—I deem myself in duty bound to let you know that I have decided to withdraw the Bridgeville team from the Allegheny County League. You have always treated me fairly.

"My reason for withdrawing is because the adortion of the percentage system was defeated, and also because its defeat was accomplished by very questionable methods. The Climax club had decided to withdraw from the league and had notified Mr. Barbour to that effect. But Mr. Barbour, knowing that the percentage system would be adonted and only the Gyms and Wilkins. g that the percentage system would be lopted and only the Gyms and Wilkins burg were against it, requested Mr. Mine-hart, a player of the Climax team, to attend the meeting and say retains about the ng and say nothing about the Cli nay club's withdrawal until after voting on

at cents withdrawal and after voting on the percentage system.

This was done, and, even with Mr. Mine-rt's vote, the voting was a fie. But the rentum representatives were promised a renter on the Schedule Committee, and by changed and voted against the adop-

tion of the system.

"Mr. Minchart is very outspoken on the matter, and makes no secret of the above facts. I hope the County League may always fare well, but I, for one, will not be hoodwinked in the way above indicated."

Mr. Mayer's statement is a very important
one, as he is ex-President of the League and has been one of the most carnest workers that have been connected with it.

#### WORK ON THE SCHEDULE.

Mr. Ebbitts Waiting for Raplies From the

Various Clubs on the Question. New YORK, Jan. 9 .- [Special.]-The base ball schedule for 1892 will be a difficult thing to construct, but it is in able hands, Charles H. Ebbitts, Secretary of the Brooklyn Baseball Club, will do the work. The Schedule Committee, of which C. H. Byrne is a member, was instructed to draw up two schedules-one for 132 games and the other for 154 games, and both on the basis of C. W.

early in the spring, keep at it till late in the fall and not lose any time during the interval. It can be depended upon that should the 154-game schedule be selected, should the 154-game schedule be selected, the majority of the players would earn their salaries. Up to date nothing has been done but to roughly man out the dates. Before any real work is done the Schedule Committee will wait for answers to a circular recently sent out to the various clubs. This circular invites the club officials to designate their preferences regarding the number of games, holiday dates and all matters in reference to the construction of the schedule. After learning the wants of the various clubs, the committee will then come to a decision and set Mr. Ebbitts to work.

There is a hope in the metropolis that the There is a hope in the metropolis that the chedule Committee will endeavor to treat the New York club with more fairness than did the Committee on Players.

the case, and entitles Pittsburg's claim for Lyons to the consideration of the League, at Lyons to the consideration of the League, at least. It does not, however, excuse the brutal attacks of the Pittsburg papers upon the League's Players' Committee—attacks which were calculated to place those gentlemen undeservedly in a bad light and to reflect unpleasantly upon the League and the game. It is also singular that the club officials with such a case should have permitted these newspaper, attacks, as they mitted these newspaper attacks, as they could have been obviated by explanation

William H. Guy presided and Councilman Joseph McAdams was Secretary. There was what was supposed to be an ominous hush for some minutes after Mr. Guy stated the business on hand, until finally Mr. Smiley broke it by a motion to indorse a loan by the Council.

money was to be expended and refused to agree to indorse until he got an answer. A. J. Ferguson said it wasn't necessary to issue bonds, that Council could borrow money enough temporarily to bridge over

Rev. Joseph Dillon advised caution and insinuated that there was good ground for belief that some \$8,000 of the \$13,000 already expended had been almost thrown away. He asked why streets were not improved in summer and why new ones should be opened through swamps, when old ones were not navigable, save at great risk of wreck. In conclusion Mr. Dillon hazarded the opinion that some people would open their eyes next summer, when they got their tax statements under the new assessment. Alfred McCabe said they would soon be obliged to increase the school indebtedness, and that is all they can stand. He also said manufacturers were afraid to come into the

You Cannot Advertise a Man Into a Specialist-Let the History of the Medical Practice of Pittsburg Demonstrate That-Low and Uniform Charges, Skillful, Faithful Work and Genuine Knowledge

of Diseases and How to Cure Them-These Form the Foundation of Success. Until the innovation made by Drs. Copeland, Hall and Byers in placing medical skill and thorough and scientific treatment for all diseases within the reach of all, by a ystem of low and uniform prices, it was alnost impossible for people in modérate circonstances to obtain the aid of skillful and conscientious specialists. The fact that in spite of their well established and fairly carned reputation for honest work, skillful treatment and successful results, they still maintain their low and uniform charges shows that they aim not alone at financial success as practitioners, but as well at the accomplishment of the reatest possible amount of good in the community.

We have heard in the past, and still hear for that matter, many complaints over the exorbitant fees courged by persons claim-ing to be specialists in threat and lung troubles. It is not only true that Drs. Cone-land, Hall and Byers charge the low and uniform fee of

\$5 00 a Month for Medicines and Treatment.

but that a core under their system of treatment is more certain and more rapidly ob-tained than any other known method, and, what is botter still their results are per manent, as shown by continual reference to cases printed years ago and reaffirmed by the patients speaking to-day.

Skill and success in the practice of medicine can be no longer estimated by the size of the ices, when specialists having the largest practice and the highest and best reputation for honest, skillful and successful work, place their fees so low as to be within the reach of all classes of people. Under these conditions it is plainly the skillful and faithful work of these specialists in the first place that cause their pronounced prosperity and success. Others may in some measure try to follow their lines of work, but nement as shown by continual reference to

the superior education, training and experience which has given them their acknowledged mastery over the diseases in their specialities, and makes it possible for them to carry on their practice permanently and speciations, and makes it possible to carry on their practice permanently and successfully at such rates.

You cannot advertise a man into a specialist. Training, experience and skill must come first, and then your advertising will have the merit of genuineness and truthfulness, and will succeed. This is the secret of the failure of so many. They are advertisers first; specialists afterward. The order must be reversed; specialists first, qualified by a regular medical education and by special study, training and experience; then advertisers. There is no other way to secure permanence, public confidence and success, and those who try any other way will fail. Poorly or partially trained men may, by specious and untruthful advertising or representations and by charging large fees for a short time, deceive the public and make money, but it is only a question of time when the offense is discovered, and universal contecapt is their reward. Genuine skill, granting a stretteney accument location. sal contempt is their reward. Genuine skill genuine experience, permanent location, skillful and successful treatment, low and uniform fees; this to-day is the only path way by which the specialist may obtain suc-cess and public confidence.

THE REWARD OF PERSEVERANCE. Mr. Fred Hinkel Relates How He Was

Cured of a Bad Case of Catarrh by Persistent Systematic Treatment. "It took time and perseverance, but Drs. Copeland, Hall and Byers cured my catarrh. For the first two months I did not improve. and the third month was better, but after that I began to improve rapidly until now I am cured, and I can't give them too much praise for the relief they have given me from pain and misery." The speaker was Mr. Fred Hinkel, a son of Mr. Charles Hinkel, a prominent gardener of West View, a little hamlet on the Perrysville avenue

Treasurer A. F. Shapleigh Hardware Company, 519 N. Main Street, St. Louis, Mo.,

Fred Hinkel, West View. and in my chest. The chest pains extended around under my shoulder blades and were around under my shoulder blades and were very severe, at times like the sharp stab of a knife. My nose was always stooped up and at times would discharge a thin watery substance. There was an internal discharge of mueus from the back of the palate into my throat. I was constantly hawking and spitting in vain endeavors to clear my throat. I had a backing cough that was very troublesome. The trouble extended to my stomach and my health rapidly broke down. I doctored with various physicians, but obtained no relief until I tried Drs. Copeland, Hall and Byers. As I said, I did not improve as fast as I thought I should, but I persevered and now I have the reward of my perseverance.

I Am Cured. "My catarrh is a thing of the past. They have not only cured my catarrh, but have built up my system until I am a different person again, well and hearty. I am very grateful to Drs. Copeland, Hall and Byers, and can recommend them to all who suffer as I did."

The above instance is only one of many that could be quoted by Drs. Copeland, if all and Byers where persistent treatment has cured the most aggravated cases of catarrheven after other specialists had pronounced them incurable. They do not claim to work miracles, but they do claim that where they can get the entire congression of the rations. miracles, but they do claim that where they can get the entire co-operation of the patient they can get the entire co-operation of the patient they can cure any ordinary case of catarrh and many cases of the most malignant character heretofore considered incurable.

Drs. Copeland, Hall and Byers try to impress upon the minds of their patients at the time of beginning the necessity for a thorough course of continuous, systematic and persistent treatment of at least three or four months. They find, by experience, that it is is the only way patients can hope to obtain flasting, benefit. Some feel so well at the end of the first or second month they think they require no more treatment; while others, if they should mappen to feel a little worse soon after beginning, by reason of a cold or other cause, imagine the treatment does not agree with them and discontinue without consulting them. This, is very wrong, both to the patient and the doctors, as they can adapt their method of treatment to suit the most exacting case. Those who stay with them through the prescribed course always find benefit.

Permanently Located.

Let it be clearly and distinctly stated that Dr. Copeland and his associates never closed an office; their location here is permanent, their leases and contracts are for a term of years, they are here to stay and less successful physicians need not delude themselves with the hope that they are going to leave the city; they are permanently located in Pittsourg and will permanently give skillful, thorough and scientific treatment to all at low and uniform rates. Let there be no misunderstanding about this.

Pittsburg. The evidence of the superior skill of Dr. Copeland and his associates, and of the remarkable and successful results which their system of treatment brings, is not, by any means, confined to this city; it comes from all parts of the country. Never in the history of advertising has there been such an array of testimony. The evidence is not from obscure or unknown sources. It comes from people, many of whom are not only well known in their own cities, but throughout the country, from clergymen, lawyers, professional men of every class, from business men of national reputation; from artists, and even from physicians, the most skeptical, and one would think the least willing to len! their testimony. The following short statements represent some of the evidence of the class shove referred to. These statements, in their original publication, are, in every case, accompanied by the portrait of the person speaking, or by a fac simile of their signature.
