LIBERALS EXPECT A VICTORY TO-DAY

[COPYRIGHT, 1892, BY THE NEW YORK ASSOCIATED LONDON, Jan. 22.-Lord Salisbury, having suddenly taken an extraordinary step in cancelling Sir R. D. Morier as Ambassador to Rome and deciding to retain him at St. Petersburg, a Foreign Office authority

is instructed to state that Sir R. D. Morier's health is improving and he had expressed his willingness to remain in Russia. This explanation was offered to-night as all that could be officially given out. Sir R. D. Morier some time ago obtained leave of absence on account of weak health. He was in London and left as vigorous as

ever. The transference when arranged was

not associated with reasons of health. On inquiring into the genuine causes of Lord Salisbury's action points were elicited which indicate that the retention of Sir R. D. Morier at St. Petersburg, is due to the fact that the Government is co-operating with the German and Italian Governments in trying to persuade the Czar to abandon the French alliance and join the European pact, leaving France unsupported.

Appealing to the Czar's Personal Likes. Sir R. D. Morier, who is persona grata at the Russian court, being much liked by the Cray, is using his influence to arrange a conference between the Emperors of Russia and Germany, at which it is hoped the old harmony of relations may be re-established.

It is now reported that the German Emperor will send either a new Ambassador to . Petersburg or a special envoy. The intriency of the questions requiring solution before a permanent agreement can be obtained, must involve prolonged negotiations. Baron Vivian, who was nominated for St. Petersburg, has in the meantime had his appointment to Rome approved by the

who at a recent meeting tried to have the delegates adopt a resolution of condolence with the Prince of Wales, got his own local association in Manchester to pass the sired resolution. This, however, fails to affect the significance of the delegates' re-fusal to vote condolence. The leading union paper, the Workmen's Times, while expressing the tenderest sympathy for Princess May, declines to magnify this single instance of blighted hopes into a national calamity, and protests that men ought not allow it to shift their mental balonce or seduce them to snivelling and effusive declarations of loyalty to the throne.

The result of to-morrow's polling in the Rossendale division is awaited with strained anxiety. No bye-election was ever before fought with such vigor on each side. The Unionists ceased operations on the day of the funeral of the Duke of Clarence, but the Laberals did not, and this fact will alienate

Another Ocean Steamship Sights the Burn-ing Ship, Which was Oil Laden. LONDON, Jan. 22 .- The British steamer Egyptian Monarch, at this port from New York, reports that at 1 o'clock on th morning of January 16, the steamer then being in latitude 480 north, longitude 190 west, she sighted a wooden vessel, apparently of American build, burning furiously. Judging from the dense black smoke and the odor, Captain Irwin thinks the burning vessel was laden with oil. As the steamer approached the burning craft, it was seen that her masts were gone. Her bowsprit was standing, and to it could be seen clinging two men. A lifeboat on the steamer was hastily cleared away to rescue these two men, but before it could hardly be lowered the bowsprit fell and the two men were precipitated into the sea. Efforts were made to find them, but they were not

afterward seen.

Captain Irwin thought it probable that the boats from the burning vessel were somewhere in the vicinity, and he, there-fore, remained near the spot until day broke in the hope of picking them up. A tremendous sea was running at the time, and it is more than likely that if the crew had managed to get away from their vessel they were drowned by the capsizing of the small boats. The burning vessel was undoubtedly the same one reported yesterday as having been seen on the same day in the same posi-tion by the British steamer Imperial Prince.

Houses and Their Inmates. PARIS, Jan. 22.-A most peculiar and fatal accident is reported from Dieppedalle, in the Department of the Seine, Inferienre. Near that town is a high precipice, at the foot of which are a number of houses, This morning, without a moment's warning, the rock at the top of the precipice for a distance of 150 yards, crashed down with a thundering noise upon two buildings used as laundries and another house, completely burying them. It was thought that every person in the crushed and buried buildings would be found dead, and there were many volunteers who offered their services to extricate the supposed corpses. They had not worked long before they heard moans and cries and appeals for help, which told them that all were not dead. It was not long before the rescuers had removed a man, who, though badly injured, was still alive. This gave heart to the workers and their labors were continued until they had taken 20 persons, men, women and children, from the ruins, all of whom were more or less injured. Two women were taken out dead, their bodies being frightfully mangied. It

EXHAUSTED BY STANDARD WELLS.

NEWSY NOTES FROM NEARBY TOWNS ISPECIAL TELEGRAM TO THE DISPATCH. Tolepo, Jan. 22 .- An executive session of the City Council Ways and Means Com-

mittee held to-night is considering a request made by the natural gas trustees for the issuance of \$350,000 more bonds. The request created a profound sensation. The trustees state that the money is necessary to purchase pumps and drill wildcat gas wells in order to get pressure enough to force the city's gas from the field. With-out this they say the \$1,000,000 already ex-Rendville. John Nugent and John Faley out this they say the \$1,000,000 already expended is lost.

They allege that the Standard, with whom Toledo has long struggled, has surrounded the city's territory with wells draining its gas away while the pipe line was building. The pressure has been reduced recently to 92 pounds, so that 4,000 consumers have received an inadequate supply. The refusal to grant the issue means the practical abandonment of the line and great distress among the consumers, as there is not wood or coal enough in town to supply them three days.

alar feeling runs high. The Standard is giving a good supply to 8,000 con-sumers, and one faction declares it is an octopus scheme to crush the city plant. Others allege gross mismanagement and are opposed to sinking more money in the venture. The latter seemed to be in the majority. No official decision is expected before Monday.

The increase in the num ber of sick has compelled the doubling of the hospital capacity. A determined effort. made by the inmates, who are opposed to paying 80 per cent of their pensions to the commission for the benefit of their families, to get a revision of the rule, failed, and, on the other hand, those who leave the home at their own request will have to stand out six months before they can get back again.

The dark blue regular army pantaloon was adopted. The Building Committee was authorized to secure plans for a new laundry and boiler house. Colonel Beath, the Chairman of the Committee on Help, was irected to secure a female assistant to the Commandant and a female nurse for the diet patients. grounds this year.
There are 500 inmates in the Home. The water that had percolated into the many rifts and crevices at the top of the precidiscipline is excellent, and the soldiers and sailors are very humanely and kindly treated by Major Tyson. The timely discovery of a broken truss in the dining room prevented what would have resulted in perrible accident had the damaged roof been undetected until the heavy snowfall came. An unscrupulous contractor had put in infor woodwork in the building, and the condition of the roof daily menaced the lives of hundreds of the inmates. The tim-bers have been temporarily shoved up.

From this farm the United States is represenied in the shape of speedy horses in Geemany, France, Russia, Australia, New Zealand, Italy and South America. At present there are 300 highly bred representatives of the equine race, headed by that Adonis of stallions, Fayette Wilkes, considered the handsomest horse in the world, and one of George Wilkes' greatest sons.

An Interesting Talk.

Speaking of the last season's slate break-ing by the California horses and their comparative standing with Kentucky bred trotters he made this interesting talk: "As between the Electioneer and the Wilkes get we must weigh the matter down in this manner. For a winning ability there is no comparison between the Wilkes and the Electioneer get. The latter has been made famous in exhibition miles, the former got its name in races for blood. The showing against time and the number of tin cup records made by the California trotters is phenomenal. But the crucial test in all speed contests is put to the limit when a horse goes out in a big field of fast company, and forges to the front under the whip, and amid excitement which tends to unnerve any animal with a heart. There is where the Wilkes family excell I don't wish to speak disparagingly of the slope trotter, but the records, performances and surrounding circumstances will bear me out in what I say.

California Advantages. "The climatic resources of California afford advantages for an early development of the trotter which Kentucky has not got The youngster records out there cannot and will not be beaten by any Eastern horse of the present day. But here's a point to consider. Is the physical constitution of the animal good? Compare the vegetation of Florida and Pittsburg. The vegetable which matures early and quickly in the South is not in quality as good and sound as that raised slowly and carefully in Pittsburg's suburbs. But the best test of all is to go down the line in the big circuit, and you don't find any of the frail but fleet ones there. It is a case of early maturity early decay with the California trotter."
"What do you think of the Wilkes-Mambrino Patchen combination?" asked the re

"As an element to race and win money no other breed in the world approaches it.

"As to the two-minute trotter we will never see it in our age. To get this 'wind-

beater' we will have to do away with Wal-lace and the standard bred horses and cross re-cross the thoroughbred runner with the trotter. The former for finish and gameness, and the latter for action. When this is successfully done we will have the twominute trotter."

About Tincup Records. "Do you think the tineup records should

be recognized?" "Emphatically no. It is a farce. If you say where he got it, you think you are making a great acquisition when your horse friend asks \$2,000 for him. You ask me how much I will take for a trotter with a mark of '27 made in company. I say \$3,000. Then you go off mad and buy the '22 tincup horse thinking that it is the biggest bargain on earth.

50 per cent of the Electioneer family has got records by 'fireside trotting,' while the Wilkes progeny comes to the front with 85 per cent of its records made in races for

English Pike Killing the Fish. Henry L. White, a St. Louis Fish Comoner, passed through the city last even-

ing, bound for New York. He says some years ago English pike were introduced into the Missouri and Mississippi rivers. They are very vortacious, and are rapidly killing off the other fish. Mr. White says the problem now is how to get rid of them. He hopes to get some information on this subject in the East. He will visit Washington and take back with him a number of the common fish found in Eastern streams. He thinks salmon and trout would be able to defend themselves against the pike. An Open Switch Causes a Wreck.

About 11 o'clock last night two cars on the Allegheny and Manchester traction line collided on Federal street at Rebecca street. The switch at Rebecca street was street. The switch at Rebecca street was left open, and the ear going west ran over onto the opposite tract, striking the car coming east at full speed. Both cars were badly damaged, and Motorman John Bradley was badly cut about the face with glass. The passengers in both cars escaped uninjured, but were badly shaken up. There was no switchman at the corner at the time of the accident.
