FOUR GOOD WELLS REACH THE PAY.

Many New Wells Located on the East and

West Sides of the Pool. ANOTHER SISTERSVILLE PRODUCER

The McDonald field was full of surprises resterday, and several wells were drilled into the sand which are showing for big producers. The field is contantly assuming greater proportions in length and breadth. The well of Guffer & Queen and J. M. Guffey, on the Mark Robb, which came in yesterday at 35 barrels an hour, takes the boundary line several hundred feet nearer the setting sun.

When the drillers saw the gas increasing from the fifth sand they shut down, and in a few minutes the well drilled itself into the sand and began flowing at the rate men-

tioned. On the Western horizon, as well as on the East around Brown & Robinson's well at Noblestown, preparations are being made to put down immediately a score of new wells, which represents an outlay of at least \$120,000 as it is seldom a well is drilled south of the Ohio for less than \$6,000.

The field has taken on some of its old-time

activity and notwithstanding the roads are knee deep with mud everybody is hustling. Teamsters are again in demand as it takes from three to eight teams to haul a load at present which one could have handled easily four months ago. Noblestown is booming and its residents

are looking forward with feverish expectancy to the time when they hope to live in the next oil metropolis on the Panhanule.

They are all positive that a great fifth sand pool lies just east of their village, and the guileless straager is regaled with marvalous experies at the immens wealth which velous stories of the immense wealth which hidden beneath those barren looking

hills toward the Orient.

The lethargy into which they had fallen when operations were necessarily cut short by bad weather has entirely left them, and now they are a united people full of life, energy and hope.

The Cause of the Change. This change has been brought about by Brown & Robinson's venture on the Mc Murray property. This remarkable well, which started off by putting 90 barrels in the bottom of a 250-barrel tank in 30 minutes was agitated yesterday afternoon about 3 o'clock and last evening was making 30 barrels an hour. It was not drilled any deeper into the sand, but the tools were kept going. Before the tools were started it was flowing by heads. There was a rumor in circulation late last evening that it had increased to 90 barrels an hour, but was without confirmation.

Greenlee & Forst have a rig up for their No. 2 on the Marshall farm, at Noblestown, and are building a rig on the McGrady lot, south of the railroad. They have secured the lease of the balance of the Marshall farm, consisting of nearly 100 acres, also located south of the railroad, at Noblestown and have located for well, when town, and have located four wells upon it. They have also made a location on the Mo-

Murray property, about 800 feet northeast of Brown & Robison's well.

Mercer & McClurg have made a location on a 12-acre lease off the McMurray property, about 1,000 feet southwest from the

Brown & Robison well.

Dure & Story have a rig up for their No.

2, on the brickyard lot at Noblestown.

Their No. 1 is making from 25 to 30 barrels a day from the Gordon sand, but is being dril'ed to the fifth.

The Willow Grove Oil Company expects to get the Gordon to-day on the Maukediek farm, located 2,500 feet east of Willow Grove station. Learn & Burson's No. 1, on the Postoffice lot, at Willow Grove, will get the Gordon by Tuesday. Stafford, Clarke & Phillips, who have

been shut down on top of 'the sand on the Faraday lot, will drill the well into the Gordon to-day. Wells Which Were Completed. Hoffman & Co. drilled their No. 3, on the Moore farm, in Southwest McCurdy, into the sand vesterday and it started off at 15

barrels an hour. Their No. 4 is due Satur day. Hirsh & Co.'s well, on the Fife farm, wa making 15 barrels an hour yesterday, and the Oakdale Oil Company's No. 1 Gormley, which was reported Tuesday to be no good,

is making from ten to twelve barrels an F. M. Aiken & Co.'s No. 2, on the Pat-F. M. Aiken & Co.'s No. 2, on the Fat-terson property, located just across the rail-road from the Willow Grove station, struck a second pay yesterday, and flowed like a geyser for some time. The wind was blowing strong at the time and the station and the houses in the vicinity were covered

with petroleum.

Not a minute after the well ceased flowing a passenger train went thundering by.
A minute sooner and the passengers would, doubtless, have witnessed the rare spectacle

of an oil well on fire, and, possibly, the train would have been consumed. Guckert & Steele are down 600 feet in their Burchinal No. 2 at Willow Grove. Guckert & Learn have the second string of casing in their well on the Cunningham lot, and Learn & Burson are drilling at 600 feet on the Venescett property.

on the Vanescott property.

Kemp & Co.'s No. 2, on the Wade farm, at McDonaid, was reported last evening to be in the fitth sand and dry. It was good for a couple of hundred barrels from the

Gordon.

The Venture Oil Company's No. 1, on the John George farm, near Midway, is through the Gordon and dry in that formation. It is being drilled to the fifth sand. They are still fishing at their No. 2 Moorhead, and have drilled the bailer out of their No. 3 Moorhead. Their No. 1 Kelso is due to get the Gordon Friday.

The Wheeling Gas Company's No. 38, on the McClay farm, near Washington, is a big

W. P. Rend's No. 5 on his own property. at Laurel Hill, is due to get the fifth early next week. His No. 1 Wade is down 400 feet. Rend & Robbins are drilling two wells on the Robbins property at Willow Grove. They are each down about 900

Work on the Western Horizon. The Benner Oil Company's No. 1 on the Morgan Elliott farm, located west of developments, was drilling on top of the fifth sand last night and should be in to-day. It flows occasionally from the Gordon sand, and since the big wells came in to the northeast of it, the Benner Oil Company people are sanguine of getting a good fifth-

The Oakdale Oil Company's No. 4 on the John Wetmore farm should be in the fifth sand Saturday. This company has made locations for Nos. 3 and 4 on the Gormley farm, and for No. 2 on the Nancy Bell, all on the western horizon. J. M. Guffey & Co. yesterday paid \$11,000

for the C. K. Potter jarm which joins the Mark Robb on the west, and will proceed immediately to develop it. There are 88 The Kyle Oil Company's No. 2, on the Wettengel, was on top of the fifth sand last night. It has been making from 25 to 30 barrels a day from the Gordon. They are starting No. 3 on this farm.

Gordnier, Kennedy & Co.'s No. 5, on the Mertz farm, will also be in the fifth sand The Real Estate Oil Company's well on the Real Estate property in McCurdy is in the fourth sand, and the fifth is expected Saturday.

Opinions Regarding the Field. With so many wells within a few feet of the fifth sand, and several of them located in what seems excellent territory, the pro-duction is likely to go up with a bound that characterized it in November. There were

some old operators who predicted vesterday that the output will be over 45,000 within the next two weeks. It also appears as though there were three rich streaks running through the field. They would be the one through the center, which was first developed, and the two which have recently been discovered, one on the west and the other to the east, which has been struck by Brown & Robisons well.

The drill, however, is the only smeller which will prove this theory to be correct.

The drill, however, is the only smeller which will prove this theory to be correct, and judging from the activity of the last three days it will be but a short time until its truth or falsity is established. Another Well at Sistersville.

Another Well at Sistersville.

SISTERSVILLE—The Kanawha Oil Company's well on the Whitney farm is making 40 barrels a day from the gas streak which lies some distance above the first pay. This feature was entirely unexpected, as no oil has ever been found in this stratum before in the Sistersville field.

The Miller's Run Oil Company's well on the Colvin farm, northeast of Captain Grace's venture, has increased to more than 100 barrels a day. J. C. Tennant's well on the Russell farm is also making over 100 a day. Lew Brenneman is rigging a well about 600 feet northeast of Grace's well, on the Roseberry Colvin farm.

UNVEILING A MURDER MYSTERY. The Man Who Dreamed His Brother-in-

Law Was Dead, Now on Trial, WILMINGTON, DEL., Feb. 3.—The trial of Walter Blackburn, a young married man, on the charge of murdering his brother-

in-law, Edward N. Gardiner, aged 8 years, began this morning. On October 14, the boy Gardiner was missed when night came, and it was supposed he had followed a parade. The next day Blackburn told several persons an alleged dream he had had during an afternoon nap. He said he dreamed his little brother-in-law was lying dead in a freight car which stood on a siding at the

freight car which stood on a siding at the foot of Fifth street.

Blackburn told this story to his wife, among others, and then headed a searching party. They went to some empty box cars on the siding, and in one of them was found the boy, dead, with his neck broken. The family was not satisfied and Blackburn's arrest followed. rest followed. were lost.

-Harry and Willie Wilcox, 12 and 13 years old, sons of Henry Wilcox, of Kinkora, N. J., were drowned yesterday and the father nearly lost his life. While on their way to school the boys stopped to try the ice on a pond and Harry broke in. His brother attempted to save him and both went down, locked in each other's embrace. Several lads who witnessed the double drowning informed the father, who jumped into the pond and came near drowning himself. —At the annual meeting of the stockholders of the Pledmont and Cumberland Railroad Company yesterday, the report of President Davis showed that the road did fairly well last year, and that the West Virginis Central continues to operate it. The following directors were re-elected: Henry G. Davis, Stephen B. Elkins, Arthur P. Gorman, W. H. Gorman, William J. Read, R. D. Barclay and George C. Wilkins, the last two representing the stock owned by the Pennsylvania Railroad Company. Buy a House of His Own.

CLEVELAND, O., Feb. 2. - [Special.]-Until recently L. E. Knapp has been a clerk at the Hawley House in this city. He acted in that capacity four years. This summer he purchased a half interest in a hotel at Findlay, O. The fact that he kept an account at three banks in this city, and always deposited the full amount of his salary, made the proprietors of the Hawley House suspicious. They investigated their books and discovered that by clever work Knapp had manipulated the accounts so as to absorb something like \$8,000. A constable brought him to this city, and

he returned over \$4,000 in cash, giving security for the remainder of the money. No prosecution will follow. Knapp was one of the best-known hotel clerks in the busi-

A VENDETTA AMONG FARMERS.

It Has Already Cost Several Lives and Terrorized the Neighborhood, MILAN, TENN., Feb. 3.-The Cedar Grove community, 20 miles east of here, is being terrorized by two families fighting over the possession of land. For a long time the feud has existed, and as a result John Parteet shot and killed Frank Landon. Sheriff Fussett and two deputies who went in search of John Parteet met with a stubborn resistance, in which Fussett was killed and Thomas Parteet fatally wounded, dying

soon afterward. Caleb Parteet, the father of the boys, gave a deed of trust on his land to an attorney to defend the boys. The lawyer allowed him to use the land until his death a short tim since. The lawyer attempted to take possession, when the remaining son, Henry, barri-caded the house and guards the property day and night.

The Bottom Appears to Be Falling Out. Alderman Robe's constable yesterda notified the parties against whom suits for Sunday work had been entered three weeks ago, and of which nothing has been heard since, that the hearings had been set for Friday. He also said that the Alderman was becoming weary of the methods of the Law and Order Society's agents, and that it they did not come to time on Friday he would dismiss the cases.
