OFFICE OF THE DISPATCH, P. PITTSBURG, WEIDNESDAY, February 10.

The market at East Liberty stock yards showed a decided improvement over last the market week at the start this morning. Prices, however, were very ragged at the week all along the line. Hogs were particularly active at an advance of 25c per cwt. on prices of last week. The top of the market last week was \$5 00 per cwt., while this morning a deck of Philadelphias was this morning a deck of Philadelphias was anything like a panic at the start, bid well up the market week at the start this morning. Prices, however, were very ragged at the day before made low offers, while many of the cool heads who did not much fear a passage of the bill, and who wanted to lorestall anything like a panic at the start, bid well sold at \$5 30. This is an advance of fully \$1 50 per cwt. since the season opened. Cattle also reached a higher price this week than for a month or two past, a load being sold to an East End butcher for \$5 30. With this exception the top of the cattle market was \$4 90. Good butcher beeves and good shipping cattle were sold at fully 10c per cwt. above last week's price for the same

There were no extra fresh cows on sale, and the run of veal calves was light. The best cows on sale brought \$35 00 per head, and the best vealers \$6 50. Sheep and lambs were not in as heavy supply this week as last. The total number on sale was about 35 carloads. Markets were active and a shade higher.

a snade ligher.

Good sheep and lambs were particularly strong. Top price at which sheep were sold was \$5 75, and top price of lambs \$6 80. A Live Stock Firm's Review.

Following is the report of the week's work at Liberty by William C. Holmes &

The supply of cattle on Monday was 60 The supply of cattle on Monday was so cars against 70 inst week. The attendance of buyers was fair, and all good butcher cattle sold 10g15c higher than last week, while good heavy fat cattle sold a little higher. There were about 30 cars from Chicago and 30 cars from the country, principally from Ohio and Indiana. Fresh cows and sprinners not very plenty. Veal calves were in light supply, and brought better prices this week

than inst.

Receipts of hogs on Monday were light.

Market opened brisk at from 10@15c higher than last week. Since Monday our market receipts have been light and prices have re-

receipts have been light and prices have remained firm.

The supply of sheep and lambs was about 35 cars this week; market opened strong on Monday, and has remained firm on all good grades. The Eastern market has been good, which has helped to hold our market firm and we think that the prices will remain so on good grades. Prospects look good for next week's live stock trade.

ALL LOOK TO WASHINGTON.

The Uncertain Fate of the Anti-Option Bill the Only Factor in the Flighty Grain Markets-Latest Rumor Says No, and Up Jump Prices.

CHICAGO-The anti-option bill now pend. ing in Congress had more to do with the course of prices on the Board of Trade to-day than all other influences combined. With the fluctuation of opinion and the cir culating of rumors tending to show that it would or it would not become a law, prices went up or down. The markets, especially wheat, were nervous and "spotty," subject to periods of great activity and excitement

followed by decided dullness.
On the curb yesterday afternoon, May wheat, which had closed at 89%c, sold off to 87%c, and this, together with a reduction of 1/20% penny in values at Liverpool, made the market weak at the start this morning.

up.
The result was that quotations from different parts of the pits ranged from 88 to 89/4c.
The buyers, however, were in a majority, and in a short time there was an advance to The buyers, however, were in a majority, and in a short time there was an advance to 89%, many scalpers tailing on in the buying movement at the price mentioned. They undertook to realize their profits by unloading, but the demand having in the meantime been about satisfied, there was nobody to sell to, and prices plunged down in two minutes to 88%, 30%. Then ensued a period of inactivity, followed by an advance to 88% then a break te 88%c. During the last hour the market continued nervous, but with light trading, and fluctuations ranged at 88% 39%c. Late in the day, on fresh Washington rumors, there was a rush to buy, and the price went up to 99%c. Near the close it eased off some and closed at 89%c, an advance of %c compared with yesterday's fluctuations.

Corn opened quiet and weak at 41/46411/c for May, against 413/c at the close yesterday; advanced quickly to 423/c, but broke again to 413/c. There was but rittle business and nothing in the way of influential news, the market being dominated wholly by the unservice of the state of the state

market being dominated wholly by the uncertain feeling which has grown out of the proposed legislation in Washington. Near the close there was a rally with wheat to 42½c, and the close was at 45½c.

Oats were dull and comparatively steady, closing with a gain of ½6½c.

Hog products fluctuated several times within a narrow range, largely in sympathy with grains, though increased receipts of and lower prices for logs had a weakening effect. The close was at slightly higher figures.

The leading futures ranged as follows, as corrected by John M. Oakley & Co., 45 Sixth street, members of the Chicago Board of Trade:

Pittsburg's Rapid Growth as a Distributing Center for Lumber.

FEATURES OF MONEY AND SPECULATION.

Property on Fourth avenue, opposite the postoffice, is rated considerably higher than shown by recently published figures. Two of the owners, and perhaps others, would scarcely consider anything under \$5,000 a foot front. One of them said so very plainly yesterday. Another has put that price on his holding. They are not anxious to sell even at these figures. The new postoffice and other improvements, completed and projected, in this quarter of Fourth avenue and Smithfield street, are making it the center of business, and owners appear to center of business, and owners appear to have reached the conclusion that there is no other part of the city in which investments will yield a larger return in the course of a many section of the city in which investments and section of the city in which investments are section of the city

Assuming Large Dimensions.

The lumber trade of Pittsburg amounts to \$6,000,000 or more annually. It has increased 50 per cent in the last few years. Up to 1880, or later, the trade was strictly Up to 1880, or later, the trade was strictly local. Now it embraces a wide scope of country, reaching into Ohio, West Virginia and Maryland. Western Pennsylvania is largely supplied from this point. In regard to the condition of trade, a prominent local dealer said vesterday: "Movement flere is only fair to middling, but the future is quite promising. Already there is an upward tendency. At a few places in the North there is quite a stir, notably at Philadelphia. Buffalo also reports an active market. The country is full of building schemes, the consummation of even ing schemes, the consummation of even one-quarter of which will make brisk times. Hard woods are rather scarce, but otherwise stocks are full enough for the season. Fair values are maintained. Any change is likely to be to a higher level."

Building and Drilling. Industrial progress is very pronounced at Blair station. The Campbell Glass Com-pany plant, W. B. Scaife & Sons builders, pany plant, W. B. Scaife & Sons builders, is about under roof. It comprises two iron buildings, each 80x120. They will be finished by July. O'Leary Bros. are nearly ready to let contracts for their big plant. The Campbell Company gas well has been cased below the second vein of salt water, and drilling is progressing. Experts say there is no doubt of a good supply of gas. If this expectation be realized, it will open up a large field, and give the drill a fresh up a large field and give the drill a fresh

A Whirl in the Coalers,

Wall street has been wild this week over the coalers. Large blocks have been ab-sorbed at a rate almost beyond precedent. The movement took in every property in-terested in any important degree in the mining or carrying of anthracite. Despite the rapid advances there was a pretty general concurrence of opinion that the buying was for keeps, and did not belong to the usual turn basis. A leading operator said: "The buying foreshadows a complete resolution for the same transfer of the complete revolution from the present meth-ods of conducting the great anthracite in-dustry, and a vast and sustained improvement in the prices of securities of the lead-ing companies based upon harmonious relations and large economies to be effected. The Vanderbilts, Drexels and insiders in many of the more prominent coal roads have agreed upon a plan which involves a close combination between the Reading, Lackawanna, Jersey Central and Lehigh Valley companies. The combination will be strong enough to take coal off the hands of outside companies. companies if necessary and resell it at a

Philadelphia Gas, Electric, Switch and Signal were marked down. Stocks finishing better than the opening were Central Traction, Airbrake and Underground Cable. Excepting Central, the regular tractions underwent scarcely any change.

Although Central Traction finished well, it was below high water mark of last week Sales were at 23%, and considerable was offered at that figure without takers. The statement did not seem to make a good impression. A surplus and no dividend was a puzzle to some.

In the unlisted department, at the last call, 23 was bid for Birmingham Traction, offered at 23%, 33% was bid for Manchester. There were no offers of Duquesne. Talk of dividends is sufficient to keep these interests prominently before the public.

Sales at first call were 160 shares of Manchester Traction at 23%, 10 Switch and Signal at 26%, 30 at 20, 2 at 20%, 25 Central Traction at 28%, 50 Second call, 25 Birmingham at 23%, 10 Switch and Signal at 23%, 10 Switch and Signal at 23%, 50 Pitesburg Traction at 5%. BOUND UP IN READING

IS THE ENTIRE STOCK AND RAILROAD BOND MARKET.

The Coal Deal the Only Thing Talked About in Wall Street-A Big Spurt at the Close in the Leader and Other Coal Securities.

NEW YORK, Feb. 10.-In view of the facts in the "coal deal" given out to-day, the stock market was little more than Reading, both in the stock department and bond list. Cer-tainly the transactions in the Reading stock and bonds were more than one-half the en-tire business in both departments. Of the other coal stocks, only Jersey Central made other coal stocks, only Jersey Central made any response to the stimulation, and the general list was comparatively quiet and remained feverish and irregular throughout the entire day. The general tendency was upward, however, under the influence of the immense rise in the Reading securities, and while the professionals and traders are still bearish on the general list their efforts toget prices down were entirely neutralized, and most stocks show slight gains as the and most stocks show slight gains as the

and most stocks show slight gains as the result of the day's operations.

By far the largest portion of the business was done in the last hour, after the announcement of the true nature of the deal which has mystifled the street for so long, and Erica this time became more prominent in the trading, rising fractionally. The opening of the market was made on a moderate volume of business, comparatively speaking, with prices generally lower than those of last evening, and a rumor that St. Paul contemplated an issue of \$10,000,000 new stock opened that stock off \$\frac{1}{2}\$ per cent. The rest of the list were irregular within marrow limits, but marked strength was soon developed in Reading, Lackswanns and Jersey Central. Industrials followed at a distance, but the changes in quotations were insignificant, as a rule, except in the few stocks mentioned. Prices rose or tell according to the prevailing temper of the Coalers, and the general tendency was upward.

tioned. Prices rose or rell according to the prevailing temper of the Coalers, and the general tendency was upward.

In the last hour Reading went up with a rush, but without bringing the general list with it to any marked extent, and Lackawanna was especially sluggish. In fact, the Industrials and those stocks which have any connection with the coal trade, direct or indirect, were the only ones displaying any real strength throughout the day. The close was active and firm, with most of the list at close to first prices. The net gain in Reading was 6 per cent, though it sold 1 per cent higher than its last price, and Jersey Central rose 2: Distillers, 13; New England, 14, and Delaware and Hudson and Chicago Gas each 1 per cent, while St. Paul lost 19; and C. C., C. & St. L. each 1 per cent.

The total sales of stocks to-day were 772,740 shares, including Atchison, 20,900; Chicago Gas, 35,100; Chicago and East Hilnois pfd, 3.557; Delaware, Lackawanna and Western, 25,200; Erie, 49,255; Louisville and Nashville, 14,000; Missouri Pacific, 16,500; New Jersey Central, 8,000; New York Central, 3,400; Northern Pacific, pfd, 16,500; Reading, 430,379; Richmond and West Point, 3,600; St. Paul, 22,635; Texas and Pacific, 3 598; Union Pacific and Iran without material change of note outside of railroad issues, but the importance of the latter in the market may be seen in the fact that out of a total of \$6,672,000 the five Reading bonds contributed \$1,406,000. Their advances were on a strict parity with their

that out of a total of \$6,672,000 the five Reading bonds contributed \$4,406,000. Their advances were on a strict parity with their activity, and the firsts are up 2½, the seconds, 4; the thirds, 4½, and the deferred incomes, 4. There was also some animation in the Atchison incomes and the Texas Pacifics, the latter being firmer than usual of late.

GET rid of one cold before you contract another on top of it, or you may securely establish the seeds of a serious lung com-plaint before you are conscious of danger. Better prudently resort to Dr. D. Jayne's Expectorant, an effective cure for coughs and colds, and helpful also for its healing influence on the lungs and bronchial tubes.

The Grippe Raging in Alabama.

"La grippe is raging here, and I find Chamberlain's Cough Remedy to be a cer-tain cure for it," says W. G. Johns, of Trimble, Culiman county, Ala. Mr. Johns ordered a supply of the Remedy to be shipped by express as quickly as possible. There is no question but this Remedy is of great value in the treatment of the grip, especially on account of its counteracting any tendency of the disease toward pneumonia. It is also a prompt and certain cure for the cough which usually follows an attack of the grip. 50-cent bottles for sale by druggists. by druggists.

His Fame Is Widespread.

Kennedy's restaurant at No. 2 Sixth street is popular among shoppers and ladies generally who wish to get a nice lunch while downtown. Kennedy's fame as a caterer is widespread, and there are no weddings of note or social gatherings that he is not called upon to serve. His name adds so much to affairs of this kind that it is the proper thing to secure his services.
