A VIRULENT TYPE OF TYPHUS That May Speedily Spread and Pecome a

Plague Is Now ANNOYING NEW YORK HEALTH OFFICERS

INTECIAL TELEGRAN TO THE DISPATCH. NEW YORK, Feb. 11 .- On January 30 the steamship Mossilia, of the Fabre line, landed at this port 717 immigrants, Italians and Russian Hebrews. The 450 Italians were taken aboard at Naples. The 267 Russian Hebrews had gathered at Odessa from all parts of Southern Russia, and had arrived here after a long voyage of unusual

These Russian Hebrews were divided immediately among the 17 lodging houses provided by the United Hebrew Charities Association. To-day the Board of Health found that an epidemic of typhus fever, known under a dozen names as one of the most terrible tevers that can visit the human body, and communicating itself by contagion as well as by infection, was raging among them. Fifty-seven of them, already down with typhus in its marked symptoms, have been taken to the hospital on North Brother Island, and the Board of Health is doing all in its power to stay the further spread of the disease. It is proable that preventive measures are already too late, and that it is now a question how far those infected for at least ten days have spread the tever among their friends, whom they have been visiting in the crowded tenements of the lower East Side.

The Plague Has a Foothold. For several weeks now typhus fever, under the name of famine or hunger fever, has been spreading in Odessa and in the faminestricken provinces from which the Hebrews have been fleeing to Odessa. Stories of aufferings and the deaths it has caused have that part of the city most exposed to danger, and for ten days it has been emanating from at least 14 centers discovered and at-tacked by the Board of Health to-night.

Dr. Cyrus Edson, Chief Inspector of the Health Department, was notified at 10:30 o'clock this morning by Dr. Dann that typhus had made its appearance at 42 East Twelfth street, and from that hour until midnight the entire force of the Health Department was needed to make examinations and transport the patients from the lodging

looses to North Brothers Island. Dr. Edson and Dr. Dillingham had considerable experience with typhus fever the when it broke out in this city in 1880, and ered they made a personal examination of the sick people at 42 East Twelfth street. There was no doubt about its being typhus fever. Fortunately for the Health Department, all these Russian He-brews have since their arrival here been the charges of the United Hebrew Charities Association. None of them has been sent west, and they have lived in these lodging houses to which they were assigned.

Frompt Measures Rightly Taken. There were 15 cases of genuine typhus at 42 East Twelfth street. Dr. Edson sent orders to North Brothers Island to prepare the pavilious there for a large number of patients and then with the aid of his staff he inspected different lodging houses where the Hebrews of this particular ship load

were living.
In eight of them were found cases of typhus. In almost every case the inspector found the patients with their heads tied up in wet towels and suffering from violent eadache. Their temperatures ranged from 104 to 106, and some were delirious. Before 9 o'clock to-night every one of the

Hebrew immigrants who came on the Massilla had been examined and either sent to the hospital or quarantined.

President Henry Rice, of the United Hebrew Charittes Association, was in structed by Dr. Edson not to discharge any of these Russian Hebrews who arrived of the Massilia, and are now under his charge, until be shall receive permission from th Health Department. Dr. Edson thinks that probably very few people have been in-fected with typhus by these Russian

The Disease Is Hard to Handle, Dr. Edson did not know to-night what had become of the Italians who came to this port with the Hebrews on the Massilia. They have scattered. They lived aboard-ship apart from the Hebrews, and as typhus has developed so long after the immigrants were landed, he thinks that perhaps the

Italians escaped the infection.

Dr. Edson said to-night: 'This is the worst outbreak of a contagious disease that we have had in New York for many years. would rather handle four times as many cases of smallpox. Typhus is malignant and very contagious. The mortality is high, and probably a large percentage of typhus sufferers who are now on the island will die. They all had strongly developed symptoms of typhus. I think that we now have the disease well guarded, but, of course, I cannot tell how many others have been exposed to it."

Life and Absolute Dictator. NEW YORK, Feb. 11 .- The managers and general agents of the New York Life Insurance Company met at the office of the company to-day. A meeting of the managers and agents was held subsequent to the meeting of the directors Wednesday evening, at which time a committee was appointed to recommend what steps, if any, they ought to take. The report of the committee, it was learned, was favorable to John A. McCall. It was said that Mr. McCall had notified the directors that he could not accept the Presidency unless ex-President Beers ceases to have any connec-tion with the management, and he also makes a condition that he be presented with the resignation of all the present directors of the company. This is said to mean that Mr. McCall is determined to be boss of the

It was learned later that a subsequent and second session was held, at which it soon became manifest that all opposition to Mr.
McCall had disappeared, and that his election to-morrow is practically a foregone conclusion. This being the feeling of the meeting, William H. Phase of the Queen's Speech. LONDON, Feb. 11.-In the House of Commons to-day Joseph Chamberlain, leader of the Liberal Unionists, in resuming the debate on the address in reply to the Queen's speech, twitted the opposition with still not knowing what home rule scheme Mr. Gladstone intended to submit. Mr. Morley replied that the Liberals knew that whatever Mr. Balfour's proposals were, they were only a stepping stone to a larger and safer measure. The time would soon come to pass upon the conduct of certain members calling themselves Liberal while denouncing Liberal princi-ples. [Cheers.] John E. The Marquis of Londonderry reminded the House that "these persons" only recently went about posing as idols of the Irish people. They had violent language for having them shadowed. but now they were extremely glad to avail themselves of shadowing for their own protection. The Marquis further said that pro-tection had been conceded to them because two raging factions existed in Ireland who were breaking each other's heads. It was been coming here ever the cables. # BARON HIRSCH AN IMMIGRANI.

The baron learned that the commissioner he had appointed gave no help to immi-grants, but pocketed most of the money set aside for this benevolent pur-pose. The baron decided to look up the truth of charges by proceeding to New York himself. The betproceeding to New York himself. The better to get at the bottom facts he disguised himself as a poor Hebrew and took steerage passage across the atlantic. I was on the same steamer with him, but realizing that he must have had some important object to achieve, I did not recognize him by word or look. When New York was reached he went into the ding, pens of Castle Garden along with he remainder of the poor Hebrew exiles. Pretty soon the Commissioners came down and the Baron begged of one of them a little assistance. Assistance was brusquely rerused, and he was thrown aside by the very men who were handling his money. After observing their haughtry, unscrupulous behavior for a few days, the Baron quietly and secretly had them removed from their positions, and others appointed. He told me he intended to have them prosecuted before returning to Europe. He has made the necessary preliminary arrangements to this end with the lawyers.

Employes Object to the Sweating Sys tem in a Cloak Manufactory. NEW YORK, Feb. 11.-[Special.]-The trouble between the Cloakmakers' Union and Meyer, Jonasson & Co.'s shop, in Grand and Elm streets, culminated to-day in a strike of nearly 1,000 men and women. Though the sweating system continues on the East Side, and prices have been continually falling, Meyer, Jonasson & Co. did away with the contractors and installed their hands after the big lockout in a new factory.

At first all went well, but it is asserted

there has been trouble since over reductions in the scale of wages, and that the strike was precipitated by the head of the firm practically suggesting a return to the sweating system. This offer simplified matters considerably. and then there was some discussion as to the amount that would be re-quired to furnish and maintain the establishment. Nothing like exact figures could be given. So it was resolved that a committee of three be appointed to make in-quiries as to the expenses of similar clubs in the East. The committee will be appointed to-day and they may visit the lead-

ing clubs in New York and Boston. The property on Seventh street is shaped like an L. On Seventh street it is 71x120 feet and the L is 40x100. As at present intended, the clubhouse will be five stories high, divided off as follows: The entire cellar to be given up to a swimming pool; first floor, cate diping and reading rooms: cellar to be given up to a swimming pool; first floor, cafe, dining and reading rooms; second floor, officers' rooms, private dining rooms and a large room for meeting purposes; third floor, sleeping rooms and private dining rooms; fourth floor, tenpin alleys, shooting galleries and shower baths, and a big gymnasium on the fifth floor. COLLEGE BASEBALL CLUBS. Meeting To-Day to Organize Them in Sev

eral Western Citles. CHICAGO, Feb. II.—[Special.]—An important meeting of the Western College Baseball League will be held at Milwaukee to-morrow. The results of last year's league wer unsatisfactory, affairs remaining at the end of the season in an unsettled condition The provisions against the playing of pro fessionals are lamentably weak, and in the majority of cases have been willfully mis construed. The University of Minnesota is anxious for admission to the league and will probably send delegates to the meeting. The probabilities are that one of the clubs will give place to the men from the Gopher State. A circuit consisting of Minneapolis, Madison and Evanston, provided it were boomed and given economical management, would be productive of the best results.

The meeting of the Western College Football League will be held at Milwankee on Saturday. What colleges will be represented in the league the coming season can only be a source of speculation, but the probabilities are that a change will be made, as Grinnell and Minneapolis are both anxious for admission. construed.
