TRADE OF THE WEEK

Seasonable Activity Reported, With No Calamity Rumors.

LIVELY MOVEMENTS IN REALTY.

AN ACREAGE DEAL ON THE NORTHSIDE

Four Handsome East End Residences Change Hands at Good Prices.

General trade during the week was on a satisfactory basis. There was no radical improvement in any direction, excepting speculation, but there were no unfavorable developments and no lost ground. It is worthy of note that business men generally have very little fault to find with the situation. There are grumblers, but they are so from habit. Taking the country through business is as active as is usually witnessed at this season. In Pittsburg it is better. The early part of February is always dull in mercantile circles. The winter trade is nearly over and it is too early for the spring movement. A change will come in due time. The signs are favorable.

Residence Property in Demand. Quite a demand has sprung up for high-class East End residence property, which was dull at the beginning of the year. Con-McCrea to A. C. Beeson a fine brick house and lot 60x140, on Rebecca street, at a figure said to be close to \$12,000. Black & Baird disposed of two of the Stewart dwellings in Negley Place, fronting on Hay street, lots 40x156, for \$10,000 each. It was reported that a Wood street merchant had purchased a place on South Highland avenue for about \$25,000, but it could not be verified.

Rapid Transit Materializing, Insiders say that about all the stock of the Grandview Avenue Traction Company, on the Southside, has been disposed of, and that work will begin on the road as soon as the season opens. It is expected that the cars will be running inside of a year. Property in the district which the road will tra-verse, the Thirty-second and Thirty-fifth wards, is looking up in view of improved transit. There is very little acreage on the market, the most of it having been plotted.

The Popular Will Respected. Citizens along Perrysville avenue have been for some time agitating for through, cars and a 5-cent rate. They held a meeting a day or two ago and formulated resolutions making this request of the Pleasant Valley Traction Company. Rumor has it that the company conceded both points, and that unbroken transit will soon begin at 5 cents for the entire distance. The gaining of this point will encourage the leaders of the movement to widen and otherwise improve the avenue.

Sale of the Hawkins Property Of several deals in Allegheny realty during the week, the most important, perhaps, was the purchase by Major A. J. Pentecost of three acres belonging to Hon. William G. Hawkins, on Marshall avenue, Tenth ward, adjoining the residence property of Thomas M. Marshall, Sr., for \$6,500, or nearly \$2,200 an acre. This slightly raises the standard of value in that quarter. This ground will be plotted and put on the mar-

Perrysville Avenue Improvements. Among other improvements to be made in the Watson Circle, Perrysville avenue, in the spring are two high-class dwellings by Mra. James E. Crow, widow of the late chief of the Allegheny Fire Department, and A. D. Armstrong, Chief Clerk to the Department of Public Works, Allegheny. The residence of David Hunter, a prominent Northsider, in the same place, is about finished. He will occupy it March 1. Altogether, according to present plans, 50 houses or more will be erected on this ave-

nue north of Charles street, this season. Another Record Breaker. A Fifth avenue merchant closed a deal vesterday through the agency of Baxter, Thompson & Co. for a lot on the southeast for which he paid \$10,000. The Tractions were leaders in local specu-lation last week. There is pienty of the stock to go round.
A \$30,000 dicker in Eighteenth ward, East End, acreage was broken off during the week by the refusal of a tenant, who has a one-year lease on a small part of it, to give immediate possession.

The Norfolk and Western Railroad has just secured \$2,00,000 in New York for pushing the work on its Ohio extension more rapidly.

B. J. Williams, of Baltensperger & Will-

iams, will soon begin the erection of three houses on Southern avenue, Mt. Washing-ton. He is finishing four on Stanton avenue, East End. ton. He is finishing four on Stanton avenue, East End.

The Journal of Finance says: "In Boston there is some talk of the Westinghouse company entering the Thomson-Houston-Edison consolidation. There is excellent authority, however, for stating that nothing whatever looking in that direction has as yet been done, but it is impossible to say whether it will come into the big consolidation one of these days or not."

Thirty-three permits for the erection of 45 unidings and additions were issued last week, the cost of all being estimated at \$75.376. None were of special magnitude.

A. Z. Byers & Co. report an unusual demand for houses in Allegheny. They have just had all of the 38 built by Herbert De Puy placed in their hands. There will be 30 of these houses. They are in the Sixth ward.

of these houses. They are in the Sixth ward.

Brokers say the reaction in Reading and other coal stocks was only natural and the only surprising thing about it is that it did not come sooner.

A \$1,000,000 company has been incorporated in Louisville, Ky., to deal in timber lands, and a \$1,000,000 company to purchase and develop oil and mineral lands.

Street railway bonds improved in both demand and price during the week. Sales on and off 'Change, so far as reported, reached \$150,000.

Movements in Realty.

Movements in Realty. W. C. Stewart sold for Josiah Cohen to James J. Flannery, the undertaker, a lot 60x175 feet, on the west side of Dithridge street, for \$5,900 cash. The purchases is having plans prepared for a dwelling that will equal anything on the street. The adjoining lot, 50x175 feet, was sold to William E. Howley for \$6.250 cash. This lot will also be handsomely improved. ley for \$6.230 cash. This for will also be handsomely improved.

J. H. Coleman & Co. sold ten lots in Glenmar park, at Haysville station, to J. C. Dick for \$2,000. J. C. Dick has just closed three large deals on East End property, which will be reported later, one of these is for a business house; the other will be improved for excellence murnages.

quehanna's Boom. NEW YORK, Feb. III .- The stock market to day was nothing more than the final even-ing-up of a very active and eventful week, and while the local stocks still furnished and the preponderance of Reading was even greater than for the last few days, the mar-

but Reading was down 1 per cent, at 5814; Lackawanna, 1% at 1595, and Jersey Central, 31/4 at 13314. The last two railied sharply, but Reading was further forced off to 57%. his ended the decline, however, and it ral

This ended the decline, however, and it ralled to 59, and after very large transactions, closed steady. Jersey Central recovered its loss and closed unchanged, but Lackawanna, after a fall recovery, sagged away again and closed with a loss.

Among the rest of the list, New England and Union Pacific developed marked strength, the latter under the influence of forcian buying: but New England finally lost all of its improvement. In the inactive shares Iowa Central continued its rapid rise on rumors of a dividend, but closed at a material concession from its best figures. The Susquehanna and Western stocks had a little boom, and the preferred rose 4 per cent; but outside of these stocks the rest of the market displayed no feature and fluctuated within narrow times throughout the session.

unted within narrow times throughout the session.

The market finally closed active and firm generally at slight and irregular changes from last night's figures. Union Pacific, however, is up 1%; lows Central preferred, 1%, and Susquenauna and Western preferred, 3% per cent. The loss include Lackawanna and Reading export, 1% per cent.

The total sales of stocks to-day were 431,-237 shares, including: Atchison, 2,100; Chicago Gas, 6,652. Delaware and Hudson, 2,744; Eric, 29,155; Louisville and Nashville, 3,525; New Jersey Central, 3,530; Northern Pacific preferred, 8,050; New England, 23,689; Reading, 237,240; Richmond and West Point, 4,470; St. Paul, 5,100; Union Pacific, 12,752.

In the railrood bond market the Reading issues still farmished about one-haif the business, and, while they fluctuated with less force than usual of late, and finally closed at insignificant changes, the rest of the market failed to develop any feature of note, and prices at the close are about last night's figures. The total transactions were \$2,350.

Production of Wells is Falling Of Rapidly at McDonald.

LIGHT WELL IN THE M'CURDY POOL

production of their wells.

One company, the Oakdale, was reported by one of its members to have lost 500 barrels in the M hours ending at noon yesterday simply through a decline in the output of their wells. Others claimed to have suffered a corresponding decrease, notably Jennings, Guffey & Co. Their No. 6 on the Herron farm which started off at 65 barrels an hour last week, is not flowing a barrel, and has not been for several days. Wells are dropping off all over the field.

It is pretty generally conceded that the backbone is gone, and only the opening of an entirely new pool will prevent the field from sinking into oblivion.

There are a great many wells fishing in There are a great many wells fishing in the sand at the present time. These delays, it is asserted, are caused by a lack of suf-ficient gas to throw out the sand. Instead of being forced to the surface it caves Before the gas was exhausted fishing jobs in the sand were comparatively few, and no difficulty was experienced in getting to the bottom of it. The Oakdale Oil Company is bottom of it. The Oakdale Oil Company is fishing in Nos. 6 and 8 Wallace and No. 8

THE WEEK IN OIL Many Slumps and Railles Make Calcula

tions Extremely Difficult. The market was erratic all through, a fmes selling down, and then unexpectedly turning the other way. Yesterday, in spiting, it reacted to the highest point of the week, but subsequently fell back. Out-siders talked oil and kept posted, but refused to act. This attitude, in view of activity in other speculative commodities, is the strangest feature of the situation. Oil at present prices involves very little hazard. Fluctuations are shown in the following table:

Small increases were noted in daily averages of runs and shipments. Refined declined at London and was marked up at Antwerp. Final quotations were: New York, 6.40c; London, 53dd; Antwerp, 153df. The outlook for this week is involved in uncertainty, owing to the attitude of the Mo-Donald field. The prospects for much better prices is not encouraging.

A STRONG DAY ON 'CHANGE.

The Anti-Option Bill Bugaboo Ceases to Frighten Grain Speculators to Any Large Extent-Wheat Bullish Most of the Day, With One Spell of Weakness.

CHICAGO-The wheat market was rather strong most of the day; then was mostly bullish, and the buying was at times quite sharp, though largely professional. The anti-option bill was less of a factor in the trading than it has been for several days past. For a time the market maintained it-self stubbornly. May selling from 93% @315/c, and held for a considerable time at 90%c and

the price began to yield. This was the sig-nal for some of the early buyers to begin nal for some of the early buyers to begin unloading, and the weakness increased. Then the crowd began to suspect that New York had been bulling the market to get a hard spot to sell on, and the trade began to show nervousness, and on the free offerings gradually sold off to 90%c. During the last hour, however, there was a reaction and May closed strong at 91%c.

Corn was quiet and weak. The demand was rather sluggish, and as some large lots were thrown on the market, prices yielded some. May opened %c higher at 42%c in sympathy with the strength in wheat and because of an advance of ½d at Liverpool, and worked slowly down to 41%c, assisted by large estimated receipts for Monday, but millied in the last hour with wheat and closed stendy at 42%c.

TAKING CARE OF CORNS.

Cores of the Little Figure and the Safes Ways to Get Rid of Them. [WRITTEN FOR THE DISPATCH.] If a portion of the skin either on the ices or soles of the feet become greatly thickened and then penetrates into the true skin beneath, causing great pain and annovance on walking, it is called a corn. Corns

are commonly known and spoken of as hard and soft; hard corns are those situated on the most exposed surface of the foot, where early next week.

Forst & Greenlee have completed a rig on the Beall Knot farm and will commence soft corns come where the skin is always in the toes. These annoying growths are brought on by wearing badly fitting shoes. Stockings and socks, when too large, will wrinkle after the shoe is on, causing pressure upon the skin, the result of which in a few days may be a corn. What are the best remedies for their relief?

when the acid is applied, to prevent injury of the surrounding skin from cauterization. When the use of a knife is brought into play for the removal of much thickened skin or corns, let me here warn you: Never use the knife before it has been placed in a dish of boiling water for five minutes, in order thoroughly to disinfect it from any poisonous substance there may be on it from previous use. Another point: Never cut the corns unless the feet previously have been thoroughly washed with soap and hot water. Many a man has lost his life from blood poisoning, due to the neglect of
