Competition So Sharp That Surprisingly

Low Figures Rule. CINCINNATI, Feb. 25.-[Special.] - Rogers, Brown & Co., say: The only exciting fea-tures of the past week have been the placing of a few large orders for the lower grades of Southern coke irons. Competition was very sharp, and some surprisingly low figures are mentioned. It would seem that the mpid mentioned. It would seem that the mpid decline must soon make prices reach the bottom, and the earlier bedrock is touched the better it will probably be for all con-cerned. Poorly located furnaces must then stop, and thus help decrease production. The total tonnage sold since our last report is large in the aggregate, unde up of small orders, widely scattered. This is regarded as a favorable sign, proving that foundries are not carrying large stocks, but are melt-ing quite treely. Many are only waiting for a slight advance and show of strength in the market to place hberal orders. No changes worthy of note are recorded in pay kind of charcoatifron or Onio soften-ors. A steady consumptive demand exists at previous prices. There is a better outlook for the pipe works, so far as an increased inquiry goes. Large orders are to be placed soon, and higher prices are expected. The

, and higher prices are expected. The ace is now running on selected lot of low phosphorous ore, and in-tends to furnish a special iron to those need-ing a quality not usually made in the South.

STILL DULLER AT CHICAGO.

The Present Condition Not Expected to Continue Long.

Cittosgo Feb. 26-(Special.)-Rogers, Brown & Meacham say: As the month advances the Chicaro market shows additional dullness. Comparatively few sales of size have been made during the past week and the general demand has been light. Not only so, but additional cuts in price have been made on coke prands. This is brought about by the increasing accumulation of stock "eld by furnaces, both Northern and South-

during the dull period, are only prevented from making vigoronsiy raids by the un-certainty of the situation and the very stubborn way in which securities are held. The stagnation to-day surpassed that of any day since last summer. The few stocks in which there was speci-lative trading, such as Chicago Gas, Bead-ing, New England, St. Paul, Louisville and Nashville, Atchison and Cordage, could scarcely be called active. Liquidation in these stocks has caused, and the weakness apparent at times must be attributed to bearish operations on the part of the traders, while the general list is almost entirely neg-lected.
