When Mr. David B. Oliver was seen he

said he did not know whether Carnegie's new process refers to a new application of the direct process or a further application of machinery in the manipulation of steel. He said further: "The direct process, so called, has engaged the attention of various metallurgists for years, but as yet with no particular success from a practical standpoint. Perhaps the Homestead people have discovered means of overcoming the diffioulties heretofore found to be in the way, and, if so, it will prove to be a great boon, for the cheaper the production of steel the greater its use will be."

"Granting this process to be a success will it give Carnegie a monopoly of the steel business?

The Result Depends Upon Details.

"That depends on just what Mr. Carnegie's discovery is, and whether it can all be covered by patents. The discoveries of others may overlap the point which makes his process a success.

The solitary subject of discussion in Homestead yesterday was that of the new direct process. From time to time the thing has been leaking out, but it always leaked in a confidential way and only a few of the people knew of it yesterday. THE DISPATCH's outline of the process was the first intimation that the citizens in general of Homestead had of it. Yesterday an effort was made to secure a statement from General Manager Patton at his home in Homestead, but the gentleman could not be interviewed.

All over the lively town groups of employes of the different departments of the nill could be seen discussing the subject. There were but few of them, however, who knew more than they had read in THE DIS-FATCH. One or two men were found who were acquainted with some of the details. One of them said:

Guarding the Secret Closely.

"I know that the company has inaugurated a new system in the steel works, and it is of the Basic order. What little the men in general know about the process is gathered up here and there. None of the cutside men were allowed to go into the department where this system is in vogue.

The receipt of a New York engineering ournal containing what purported to be the modified plans for the Carnegie Library caused quite a stir in library circles yesterday. Chief Bigelow, who received the plan reproduced in THE DISPATCH, was informed that it was the new one to be submitted to the Commission by Longfellow, Alden & Harlowe. architects through the journal in which it originally appeared, and which was for-warded to Chief Bigelow from Boston. Mr. Scott, of the Library Commission, expressed surprise yesterday over the state-ment that the plan was the rearrangement of Longfellow, Alden & Harlowe's prize winner. He said he had no knowledge of and could not believe that the republished cut was what it purported to be. He thought Chief Bigelow had been led astray by someone for some purpose. He also stated that the design bore a striking re-semblance to one that was on exhibition in the competition and was not accepted on acount of its cost.

A big policeman stands at the entrance, and that is as close as one can get. The metal is now melted in such a way that a great number of men are no longer needed to handle the iron. In fact, there are only one or two men working in the new department. The thing is too young yet to tell how much it will affect us. I have been told the men in the converting, blooming, beam and the 23-inch structural mill and the open-hearth department will be cut down to one-half their present number by July 1. The system cannot make much change until July, for the Amalgamated scale holds good until then. At present all the non-union men and inborers the can be dispensed with are being dis charged. I do not suppose the new process will affect the skilled men to any extent, at least not until it has been in use for a long

A DECK HAND STABBED.

Two Men on the Packet Courier Quarrel Over a Game of Cards.

Edward Wilson, a deck hand on the nacket boat Courier, was taken to Mercy Hospital yesterday with five ugly knife wounds in his back and side, the result of a fight on the boat while en route to this city Saturday night. Wilson's home is at Sardus, O., and he has been on the boat a short time.

The deck hands were playing cards, and trouble arose over a winning. Another deck hand, named Stewart, accused Wilson of calling him a vile name and, whipping out a knile, attacked him. The captain of the boat, Mack Gamble, was called, but before he could separate the men Wilson had been cut. Gamble placed Stewart under arrest, and when the boat got to Rochester he put him ashore and brought Wilson here for medical attention. The doctors say his, injuries were made with a penkuife and are not docused.

MURPHY'S HEARING ON TO-DAY.

The Chief and the Other Defendants Do Not Seem to Be Worrying.

City Hall, Allegheny, was extremely quiet last night, the police being the only persons around. No arrests had been made during the day, and there was nothing to engage the attention of the officers but to speculate on the outcome of the suits to be heard to-day before Alderman Schellman avainst the Chief and his detective force There was but one end reached in this speculation, and that was that the charges

could be dismissed. Chief Murphy and the other defendants expressed themselves as satisfied that they would establish their innocence. None of them appeared to be worried in anticipa ing the result, and said that they would go into a hearing and fight the battle out, if possible, in the Alderman's office.

Standard Men Not Cast Down.

Charles J. Lockhart, D. P. Reighard and W. S. McKelvy went to New York last evening to attend an important meeting o the Standard Oil Company. The caucus is called to determine how the business will be conducted in the future. The plan has practically been worked out now, and Mr. Lockhari said he was sorry that he couldn't tell THE DISPATCH about it. D. P. Beighard remarked that the company would be stronger than ever when they got through. He said it was ridiculous to tak that the property could be divided on the stockholders. Officer Garrett Crossan found a 13-year-old boy named West Jones drunk and staggering about the street vesterday at Fourth avenue and Decatur street. The little fellow was sent to Central station, and after

being allowed to sleep a couple of hours sobered up sufficiently to tell that a man had given him the liquor. A companion,

also a boy, had been made drunk, but had been able to get home. In the meantime Officer McAvoy found a man very drunk in the same vicinity and man very drunk in the same vicinity and sent him to the same station. He was too drunk to speak, and immediately fell asleep when placed in a cell, so that no in-formation could be gotten out of him. This man the boy Jones identified as the one who had given him the liquor and made

him drunk. Jones was given to a relative to take home, with a promise to have him at the station this morning to testify against the man, and Assistant Superintendent Silvus promises to see that he is deservedly punished.
