SAVING THE COUNTY OUT OF THEIR CLASS

Rapid License Court Proceedings Prove to Be Very Economical.

STARTING UPON THE SOUTHSIDE.

The Entire City to Be Completed by Monday Evening Next.

INTERESTING HEARINGS YESTERDAY

The toboggan slide administration of icense Court under Judges Collier and lagle will save the county \$2,000 this year. The whole city proper was finished yesteray and one ward of the Southside. It took weeks to do this much last year. Tomy the list will be finished to the Twentyminth ward. It costs just \$106 a day to run License Court. Over \$600 have been saved lready, and, as the entire list is to be comleted in three weeks, the cost this year

Fill be \$2,000 less than last.

By Monday noon the entire city will be empleted, and Monday night the Judges cill decide on the applications so that the st will probably be handed down on Tuesay morning. Judge Collier could not tell esterday whether there would be any re-

earings or hold-over cases.

The witness nuisance still kept up yestersy, and many of the cases were lost by aply worrying the Court with an overandance of witnesses. B. C. Christy has many instances knocked out in one minwhat it took 15 or 20 for the witnesses to tablish. Even Judge Collier said yesterby he was weary of opinions from witanted to say they ought to keep quiet. he Court, however, was more particular sterday about finding out whether applints were persons of temperate habits.

George Beech was the first man in the Twenty-first ward. His house is on the Pennsylvania Railroad, opposite the East Liberty Stock Yards. He has only been a resident of this city since last October. B. C. Christy objected, because the house was not particularly located in the application.

Too Close to a Church.

Nicholas Brodenstein, Lincoln and Rowand avenues, was backed up by six witnesses, who took up a great deal of valuable time. A remonstrance signed by 118 citizens, and saying the place was within 300 feet of a church, was filed.

Joseph Cohen, a little man, applies for a license at 7239 Tioga street. Christy put the screws on, and said he had a wholesale license in 1890. He was refused last year. Since then he has been acting as agent for Walnwright's brewery. He said he sometimes got orders direct from the people, and delivered the goods.

Adam Fubs, of the Homewood Driving Park clubhouse, came next. As the drivers, crooms and trainers have to live there, a licensed hotel is necessary. There were three remonstrances filed, but B. C. Christy said he only represented one. Patrick Haggerty had a license there last year. Mr. Fubs is a well-known butcher and owner of fast horses. His chances for success are good.

Jacob Schulz came next. His place is at 234 Frankstown avenue. W. T. Treadway appeared for the remonstrance and tried to show the place was not necessary.

Inspector Whitehouse, Detective Fitzgerald and a number of other witnesses said a saloon was necessary at 321 Larimer avenue, and that Anthony Siebel was the proper person to have it. The house was refused last year to John Ward. J. McF. Carpenter said no saloon was necessary on that avenue.

The lucky prize holders of last year in the Twenty-first ward who had no trouble in court were Jerry Beacom, 261 and 235 Frankstown avenue; Victor Miller, 221 Frankstown avenue; Hichael J. Reiber, Pennsylvania Railroad, opposite stockyards, and Albert H. Wilson, of the East End Hotel.

Edward Moran was the only applicant from the Twenty-second ward. There never has been a license in that ward under the Brooks law. He is a new man and the place is at 33 and 35 Forward avenue. Christy said Michael Joyce owned the place and was refused for two years, and is now on Moran's bond. He admitted this,

Mitcheil, the oldest attorney at the bar, he having been admitted in 1837. Bobinger has been refused for four consecutive years on Fourth avenue, but a good petition was filed in his favor in the new place.

Michael End held license for 21 years up to 1830. He was refused last year on account of asking for a wholesale license. His house is at 2802 Carson street, near Jones & Laughlin's mills.

Chancellor Holland Appeals to the Past Graduates of the Western University-A Reorganization Effected and New Of

ficers Elected. The Alumni of the Western University held a meeting in the parlors of the Y. M. C. A. building yesterday afternoon for the purpose of reorganizing and electing officers to serve until the annual meeting in June. The meeting was called to order with J. R. Whitman in the chair, who shortly resigned in favor of Mr. J. C. Osborne.

Chancellor Holland made the opening ad-

dress, in which he stated that the alumni of the University did not take proper interest in the welfare of the University. He said : "Last night I attended the alumni banquet "Last night I attended the alumni banquet of the Princeton University, and there saw a body of 75 or 100 young men, all eager to promote the welfare of their alma mater. It is the alumni of the college that keeps it great. While others are working we have been doing nothing. If the graduates of the Western University would put their shoulders together—one cannot do everything—we could raise the \$500,000 needed by the University easily, I know of no finer class of men than the graduates of the Western University. There should be a Western University. There should be a memorial built to the late Chancellor Goff and several memorial windows placed in the chapel. We must reorganize, elect officers and do something toward making our college known.

Here, upon a motion, the classes of '89, '90 and '91 were admitted as members of the

alumni.
C. W. Scovel made the motion that the Chair appoint a committee of three to select officers to serve until the annual meeting in June. Messrs. Whitman, Scully and Wilson were appointed a committee. They nominated the following officers who were unanimously elected: President, Hon. Jas. H. Reed; First Vice President, Rev. J. M. Duff; Second Vice President, R. C. Mc-Duff; Second Vice President, R. C. Mc-Cormack; Treasurer, Benjamin Thaw; Cor-responding Secretary, Reid T. Stewart; Re-cording Secretary, C. W. Scovel; Executive Committee, John D. Scott, Fred W. Mc-Kee, G. W. Fundenberg, F. C. Osborne and George A. Gilfillan. C. W. Scovel made a motion that the

Chair appoint a committee of three to attend to the publishing of an alumni catalogue. The Chair deferred appointing this committee and the meeting adjourned.

THE BEST CURE FOR DRUNKENNESS Silver Ash Remedies Sure, Safe and Scie

That there are now three or four wellestablished cures for alcoholism and the
morphine habit is unquestioned, and the
most popular one in the future will naturally
be that one which does the work most
effectually, together with the least suffering and injury to the patient. After the
most careful observation, and by comparing
notes with hundreds of people who have
taken treatment and been cured by one or
another of the various methods now recognized, we are thoroughly convinced that the nized, we are thoroughly convinced that the Silver Ash Remedies as administered at the Silver Ash Remedies as administered at the institutes at Greensburg, Pa., and Alliance, O., are the best, and give the most satisfactory results. They were originated by Dr. O. J. Gronendyke, of New Castle, Ind., and are prepared and administered according to scientific principles, hence the most desirable results are obtained and the treatment in ballutation of ment is absolutely safe.
Injurious drugs are not used at haphan

zard, and no remedies are administered in anything like poisonous doses, hence the Silver Ash treatment causes no loss of appetite for food, no derangement of the bow-els, no impairment of the eyesight, no diz-ziness, no heart failure and no mental derangement such as are reported to follow other popular methods of treatment. On the other hand, every case treated either for alco-holism or the morphine habit has speedily found the relief sought, and not only have the patients been cured of the diseases induced by these poisons, but their nervous systems have been restored to their normal systems have been restored to their normal condition, and the physical man has been built up and benefited in every way. It requires a course of treatment covering three weeks, in some cases four, to effect a cure. The object of the treatment is to destroy the appetite for drink, drive out the alcohol and build up the system and tottlift the man seainst the annual which tortify the man against the enemy which has been working his destruction. The hundreds of cures effected border so closely upon the miraculous that it is not surprising that the mass of people, and physicians even, are somewhat skeptical. It is simply marvelous to see men come into the office of the institute who have been drinking for years, and who are physical wrecks, and who are possibly under the influence of liquor when they begin treatment, and then within a few hours are so revolutionized under the magic influence of Silver Ash that they have not only lost their appetite for drink but actually abhor it. But such wonderful scenes can be witnessed daily at the Silver Ash Institutes at Alliance, O., or Greensburg, Pa. We could fill a volume with the voluntary and enthusiastic testimony of men who have gone to these Insti-tutes as "the court of last resort," and have there found a joyful freedom from the tyrannical appetite for strong drink. This result is accomplished by the Silver Ash remedies without putting the patient under special restraint. There are no locks and bars and padded ceils, but every patient is put upon his honor, treated as a man and given perfect liberty to go and come at his

own free will, the only requirement being that he be prompt at the office at the hours designated for treatment and also observe the rules and sanitary regulations.

No man or woman need longer remain in boudage to the liquor or morphine habits for the Silver Ash Cure will destroy the appetite for intoxicating liquors and give them liberty. The managers have such absolute confidence in the efficacy of these remedies that they guarantee a cure or refund the money. The grand work already accom-plished by the Silver Ash Institutes at Alli-The grand work already accomance, O., and Greensburg, Pa., ought to attract the attention and enlist the sympathy and co-operation of every friend of human-ity. Scores of men have been cured of this terrible disease, restored to their friends and families, with renovated systems, clear brains and steady nerves, ready to take hold of life's duties with a renewed purpose and with a brighter outlook than ever before. Thousands more need the treatment, and the best friends such men have in the world are those who induce or help them to secure the treatment.

at a late hour last evening.

Some of the big wells declined, and con sequently the production of the field dropped from 25,500 to 25,000 barrels. The stocks in the field declined from 57,000 to 54,000 barrels, and the runs were 29,105. The Jolly Oil Company's well at Nobles-

town was the one which attracted the most attention. It is practically a test well as there are no wells in the fifth, south or directly east of it, while the nearest to the southwest, north and northeast are over 600 feet away. Since J. M. Guffey, Russell, McMullen & Co.'s No. 6, on the Wettengel, came in big

there were many who believed that the Jolly well would be big as it was located southwest of the Wettengel and the Robi-son, Brown & Co.'s venture on the Mc-Murray property.

The bit entered the fifth sand in the Jolly well early yesterday morning, and soon afterward it made a flow. It then filled up to within 25 feet of the top, and when they were three or four bits in the sand it made another small flow. The impression seemed to prevail last evening that it would be a

The same parties' No. 1, on the No. 2 Marshall lease, is in the top of the Gordon, from which it made a small flow yesterday and stood almost full of oil. It was shut down yesterday while connections were being made. Their No. 2 on the No. 1 Marshall lease is also in the top of the Gordon sand and filled up with oil. WHAT IT REALLY IS. The Most Dangerous of Modern Disorder Clearly Defined-Pneumonia and What

Causes It. There has been a great mistake as to what There has been a great mistage as to what pneumonia really is. People, and even some physicians, have called it a dangerous disease. Pneumonia is always an after effect. If the system is run down, weakened, debilitated, if the life is at a low ebb, the lungs may fill up and the person die suddenly, and it is called pneumonia. No man or woman ever died of pneumonia when the body was strong, vigorous and healthy. It comes upon one when weakened by grip, by a severe one when weakened by grip, by a severe cold or overwork and a generally weakened condition. Such being the case, how can this dreadful trouble known as pneumonia be prevented or warded off? Manifestly, by strengthening and fortifying the body by having the health and strength so secure that pneumonia will not attack, or if it should, can easily be warded off. This can be done by careful living, careful diet and a moderate use of a pure stimulant. To gently assist nature a stimulant is required, something that adds to the life and vigor. Nothing for this purpose can equal pure whiskey, and it should be borne in mind that the only pure and medicinal whiskey which has reand it should be borne in mind that the only pure and medicinal whiskey which has received the unqualified indorsement of physicians and scientists is Duffy's Pure Mait. It is no ordinary whiskey, but possesses properties known to no other article. It will effectually ward off pneumonia and has saved the lives of thousands of people. It should be remembered, however, that it is the only whiskey which can accomplish this, and any drugglest or grocer who seeks to convince you to the contrary is deceiving. Insist upon having Duffy's Pure Mait.

"It is over three years since I contracted cold," says Mr. Apel, the well-known plasterer, who resides at No. 32 North avenue, Allegheny. "This seemed at first to amount to nothing, but finally led to bronchitis, and after a time to asthma. This was accompanied with evening fevers, sharp stitching pains in the sides and chest and most distressing suffocating sensation at night. I often had to get up at night and go out of doors for air, and even then falled to get relief. What little sleep I obtained at night I got while lying on my stomach—this is the only way I could keep from coughing.

"I doctored and doctered, tried everything I heard of. I fried every 'sure cure,' and made the round of all the doctors, but without benefit until I consulted Drs. Copeland, Hall and Byers. After carefully examining my chest they said my trouble was bronchial asthma, the result of neglected catarrh, and that they believed they could cure me. The first week the suffocative feeling disappeared and has never returned, and all the other symptoms have gradually yielded, excepting a slight cough in the morning. I have no heart trouble, no shortness of breath, and sleep the whole night through without being disturbed."

Mr. Jerry Garvey, Sharpsburg.

"The rapidity with which the catarrhal process extended to ears, throat, broughin and stomach," said Mr. Jerry Garvey, "was in my case not only remarkable, but extremely alarming." Mr. Garvey is a steel worker in the large plant of Spang, Chalfant & Co., and resides at No. 9 Fifth street, Sharpsburg. His description of his trouble and its cure is extremely interesting.
"In the morning," he continued, "I arose, weary and fatigued, overcome with lassitude, and disinclined to work.
"I seemed always to have a cold, nose stopped up, and constant formation of mucus, dropping into my throat and causing continual hawking and spitting to expel it. I suffered continually from a dull, heavy headache over the eyes, and often had a feeling of tightness or pressure across the

I Had Consumption.

I Had Consumption.

"I had a constant cough, raising large quantities of phlegm, weakening and exhausting me greatly and unfitting me for manual labor. The pains in my chest were very severe, and they cut through to my back and shoulders very sharply.

"The published evidence of the skill of Drs. Capeland, Hall and Byers was so convincing that I determined to go to them. I hesitated considerably before starting, because I had Tried So Many Patent Medicines

without ever deriving the slightest benefit that I was badly discouraged, but I was agreeably disappointed. Their treatment of my case was intelligent and scientific from the start, and I was satisfied from the thoroughness of the examination they gave me that they understood their business. I can only say that I am vastly improved in every respect. The dropping of mucus is practically stopped; my headaches have almost entirely ceased; my stomach is now in excellent condition, taking all proper food without pain or inconvenience. without pain or inconvenience.

In fact, I feel as well as I evel did in my life, have regained all my wonted strength, energy and vigor, pursue my labors with zest and enthusiasm, and I feel that I am discharging an obligation when I say publicly that I owe all this wonderful change in my condition to the skillful and intelligent treatment of Drs. Copeland, Hall and Byers. I heartily and earnestly recommend them."

ASTRIMA A CURABLE DISEASE. Statement of Mr. Conrad Apel, Proving the Curability of This Distressing Affliction by Drs. Copeland, Hall and Byers'

Method of Treatment. Asthma is rarely a disease of itself. It arises from numerous causes—diseases of the kidneys, stomach, heart, nerves, lungs, blood and nose. If these several causes were well understood and treated accordingly, there would be fewer irascible asthmatics. Catarrh of the nose, moist, dry, atrophic, hypertrophic, is now regarded the most frequent cause of asthma—reflected asthma it is called. The cause, of course, indicates the treatment—cure the catarrh, correct the deformity in the nostrils, if there be rect the deformity in the nostrils, if there be any, and the asthma will disappear.
