ANOTHER DOMINION SCANDAL New Brunswick Logislature After Some Big Boodlers.

Sr. JOHN, N. B., April 4.—[Special.]—Encouraged by the success of the late opposition to the Quebec Government in having a royal commission appointed to investigate royal commission appointed to investigate charges against the administration, the opposition in the New Brunswick Legislature have taken similar steps. When the Government obtained power rumors were started by the defeated party that they had been ousted through bribery of some of their supporters. The opposition, which numbers 13 in a House of 41, has now made formal accusations against the Blair administration. Among the charges is one to the effect that Mr. Blair was a stockholder in the Central Railway Company, getting his stock as a present or for a triffing sum and thereby participating in the subsidy; also, that the Central Company, or persons connected therewith, were compelied to pay Messrs. Blair and Pagsley money for election purposes before they could get their subsidies.

purposes before they could get their subsidies.

It is also charged that an officer and contractor of the Northern and Western Company was made to pay \$2,000 toward an election fund in St. John, in 1886, before the subsidy bonds to the company could be issued. The Government is accused of receiving a large sum from J. D. Leary, in the campaign a year ago, in consideration for which they were to give him a subsidy of many thousanus toward harbor improvements in St. John. In some of the charges Messrs. Blair, Pagsley and Tweedie are implicated.

Then there is an allegation that money was paid by a person to get an appointment as Legislative Counselor, and another to the effect that \$500 was paid to Mr. Labillers to get him to vote against the Hannington Government in 1863; that Mr. R. G. Ryan had cognizance of this, and also that money has since been paid Labillers to get him to continue his support of the administration. The Governor is asked to name a royal commission to investigate, but has not yet anonemed his decision.

## THE RETRACTION.

What the Editor of the Typograph Journal Savs of Percy F. Smith.

In its issue of April 1 the Typographics Journal, published at Indianapolis, Ind., ha

Journal, published at Indianapolis, Ind., has this editorial comment:

"After due investigation as to the truthfulness of the statement published in the issue of March I, wherein it was said that four judgments have been issued against P. F. Smith, of Pittsburg, the Journal is convinced of the groundlessness of the assertion, and takes this method of correcting the error, regretting exceedingly its original publication.—Ed."

This retraction was made by the editor and publisher, W. S. McClevey, against whom Mr. Percy F. Smith, while at Indianapolis last week, was about to begin proceedings for criminal and civil libel. Mr. McClevey stated that he would not permit the columns of the paper to be used to libel anyone, and was only too glad to make rethe columns of the paper to be used to libel anyone, and was only too glad to make re-traction. He made it just as diotated by Mr. Smith and his counsel, and admitted the utter falsity of the statement.

How Thousands Have Restored Shattered Health.

Nature's Own Remedy Discovered by Prof. Phelps, of Dartmouth.

WASHINGTON, April 4.-In an official confer ncerning startling fatality in the department and elsewhere, a prominent army surgeon to-day

"The Annals of Hygiene seems to have solved the " 'How many cases of incurable organic disease have had their origin in the grippe, of course it is impossible to ascertain statistically, but that many persons are invalided or dead whose departure from health dates from an attack of the grippe, the experience of our readers will, we are sur

""Autopsies held on subjects known to have had la grippe and supposed to have fully recovered, who died suddenly, show structural changes in the medulia and spinal cord. " Our State and private insane asylums are rap-

idly filling up from this source. The country is strewed with mental 'grip wrecks,' which will rehas taken its final departure." " Continuing, the surgeon said: "Much experi-

enting has been done to remedy this peculiar con dition of the system, and carefulty prepared statistics from reports made by physicians in different parts of the country show that the discovery of Prof. Phelps, of Dartmouth College, known as Paine's Celery Compound, is the most successfi treating these shattered wrecks. "Dr. W. E. Anthony, of Providence, reports:

'The patients where I used Paine's Celery Comoound expressed themselves much pleased with the general tonic effect experienced from its use. As a tonic and restorative it seems to meet the indications in cases of debility, which as a rule are the sequel of la grippe.'
'C. E. Wells, M. D., of Sag Harbor, N. Y., re-

ports that he used Paine's Celery Compo cases of nervous prostration following la grippe with most satisfactory results. "The famous Boston surgeon, Dr. A. W. K. Newton, states very emphatically that this com-

pound is the most reliable tonic and strength-giver e has found for this peculiar and dangerous condition of the system." In conclusion, the surgeon said: "Paine's Celery empound is not a patent medicine. It is a scientific discovery whose formula is known to most physicians. It must not be confounded with the rdinary nervines, bitters and sarsaparillas, for it

is as much superior to them in formula and results as the diamond is superior to cheap glass. It purifies the blood, strengthens the nerves, and is nature's food for the brain-such a medicine is an lute necessity in cases of grip-wreck." A physician, whose practice is next to the largest in Washington, saids

"I find this tale a very common one among my patients: 'Oh! doctor, the grip left me in a ter-rible state. I have a continual buzzing in my ears and they seem to be stopped up; my head aches nearly all the time; if I take a little cold my throat and chest are choked up; at times it seems as though my heart would jump into my throat I can't sleep; I am so nervous that I tremble nearly all the time; I feel tired and have no ambition to work.""

The physician further said: "I tell such people pound, which seems to be nature's remedy for this serious trouble. I know of nothing else that will help them, and that amount is generally enough to drive from the system the poison germ left by la grippe."
