TWO TRADE THEORIES

Advanced to Explain the Disappointment of Expectations.

A REACTION OF EUROPEAN ORIGIN

And an Expectancy Which Was Fitched on a Key All Too High.

WHAT BRADSTREET'S AND R. G. DUN SAY

SPECIAL TELEGRAM TO THE DISPATCH. NEW YORK, April 8 .- Special telegram to Bradstreet's do not indicate any material improvement in the condition of general trade, taking the country as a whole. On the Pacific coast and at the South dullness is conspicuous in almost all lines. The only exceptions are in slight advances for channed fruit and grain bags at San Francisco and rather more strength in raw cotton, improvement in collections at Savannah and a moderate increase in distribution

New Orleans. At the West, Chicago, Duluth and St. Joseph send the most glowing reports, the last named claiming sales of drygoods, shoes and hardware were never better, notwithstanding very inclement weather within the week. Duluth has extended the field of its wholesale trade, and a newly or- | the corresponding week last year: ganized Stock Exchange there is stimulating interest in new iron properties.

In the Central and Farther West, St. Louis also reports a satisfactory volume of trade, with noteworthy gains in sales at the extreme Northwest of boots and shoes and hardware. At Cincinnati general trade, on the whole, is disappointing, and at Kansas City the weather has checked the move-

In the East the situation, except for wheat, is not improved. Leather and hides are only fairly active in New England. Worsted spinners at Philadelphia are not active. Sales of print cloths at Providence about equal the output, and some makes of linen and bleached cottons are scarce and wanted. Exports of cotton goods are not

wanted. Exports of cotton goods are not equal to expectations. Southern coarse yarn goods are in heavy supply.

Raw cotton stiffened 1-16c temporarily during the week on better Liverpool advices and small domestic receipts. Raw wool, as influenced by London wool sales, was inclined upward, but as yet has not advented to the coal in California wool is held vanced. New clip California wool is held above Eastern market prices.

Our calculation of the proportion of New York City's bank clearings, due to "trans-actions in Wall street" for the first quarter of this and of two preceding calendar years, indicates that New York's volume of distributive transactions declined from \$6,400,-600,000 in 1890, a year of activity in trade, to \$5,300,000,000 in the first quarter of 1891, and that it was less than \$1,00,000,000 for three mentis ended March 31 last.

Twisting Up Barley in California Barley is being manipulated on the Pacific

onst, and is higher in consequence. Copper is dull and barely steady. Anthracite coal is bringing about 10c more per ton on most grades. Petroleum is weak, and live cattle d hogs are 10c and 5c lower respectively per hundred weight at Western markets. Pig iron is in somewhat better demand, but prices do not record the fact. Produc-tion has declined only about 7,500 tons weekly of authracite and coke irons.

While the total net decrease of available stocks of wheat, United States and Canada, uring March was 5,668,000 bushels, stocks in store at prominent European centers and affoat for Europe increased 3,548,000 bushels during that month, which explains why the total of American, European and affoat stocks of wheat decreased net only 2,000,000 bushels during March, against a decrease of 10,000,000 bushels in February. In 1891, March brought an increase of about 300,000 bushels, but in 1890 it recorded a decrease of 5,000,000 bushels, and in 1889 a talling away of more than 10,000,000 bushels.

Movements of Wheat and Flour Abroad. Exports of wheat, and flour as wheat from 11 United States ports, both coasts, this week equal 2,939,000 bushels, about the same quantity as the like week one year ago, and as contrasted with 2.597,000 bushels last week. Exports of Indian corn from seven United States ports, both coasts, this week equal 2,425,000 bushels. Last week the total was 2,734,000 bushels; one year ago the week's total was 474,000 bushels, and two years ago it was 3,102,000 bushels. While stock speculation at New York is still very parrow and professional, the tendencies governing the market have taken a rather bullish direction. European influences are mainly responsible for this. A reduction in the Bank of England rate to 234 per cent, with the prospect of easy financia conditions in London, produces a certain eient to depress exchanges and render gold exports from this side impossible for the moment. This has forced the local short interest to cover, and though public buying of stocks does not develop, the tone of specuation exhibits a more encouraging prospect. The General Pinancial Situation.

Silver has declined to 86%c per ounce on the decrease of the Indian demand. For-eign exchange is 14@34c on the pound lower on offerings of bills against purchases of securities in this market.

Total bank clearings at cities reporting the same throughout the country for the week ending April 7, equal \$1.241,890,285, an increase of 18 per cent as compared with the week before, and 17.8 per cent more than in a like week of 1891.

There were 165 business failures in the United States this week, against 164 the week before and 178 in the first week of April, 1891, of which 83 per cent had \$5,000 capital or less, and 11 per cent capital between \$5,000 and \$20,000. R. G. Dun & Co.'s weekly review of trade

Another week brings additional proof of actual improvement in business at many points while slackness at a few is explained by causes obviously local and temporary. The mency markets continue abundantly smalled and one supplied and easy.

Why Expectations Are Disappointed. Two theories existing regarding the state of business find frequent expression. That trade has disappointed expectations to some extent is obvious, and there are some who claim that a reaction has begun of unknown duration, which appeared in Europe last year and was only in part deferred here because of extraordinary crops. These have to support them unusually low prices, and in some departments a shrinkage in sales. Others argue that disappointment is due to

others argue that disappointment is due to excessive expectations, and especially to the universe to take into account the great volume of indebtedness left from real estate speculation at the West and South, and the influence produced by poor crops and financial depression abroad. These have to support them much evidence that the actual business transacted, all branches considered, is greater than ever before at this season, in spite of the obstacles and complaints.

scason, in spite of the obstacles and complaints.

The reports from other cities are on the whole favorable. At Boston there is further improvement. Drygoods jobbers are netive and mills very well supplied. Western reports are favorable and Southern better. At Philadelphia the failure of an iron house, oflowing that of the Lehigh Iron Company, depresses that trade.

At Pittsburg iron stocks increase and there is no improvement in products, shipments of cose being the lowest of the year thus far: but the glass trade is steady and trade in hardware brighter. At Cincinnati trade exceeds last year's. Building prospects are clouded by a threatened strike. At Cleveland all lines improve except pig iron and ore, and money is in more demand. At Detroit trade equals last year's, but freights are less firm.

Trade at the West and South.

Trade at the West and South.

Chicago reports largely increased sales of merchandise, with collections easy in all branches. Receipts of corn and barley are increased three-fold; of wheat, oats and rye, two-fold, compared with last year; of dress beel, one-half, and of flour, one-third, and some increase is seen in hogs, cattle and wool, with decrease in lard, butter and

cheese, and especially cured meats. At St. Paul the jobbing trade is brisk, and at Minneapolis there is a marked increase, with unusual prospects for the lumber trade, but flour is dull und low.

At St. Louis trade is reasonably strong, with especial improvement in all building masterials, in spite of had country roads and a railroad washout. Trade at Kansas City is quiet, though receipts of grain and cattle are light because of bad weather. At Omaha business in drygoods and shoes is very active and other trade fair.

At Louisville business is quite satisfactory but dull; at Memphis, slackening: at Savannah prospects are bright, and only fair at New Orleans, though in cotton there is some improvement and sugar is strong and active.

Some Favorable Signs of the Times.

Some Favorable Signs of the Times, Payments through Clearing Houses outside New York are larger than ever at this season. Railroad earnings show substantial increase over last year's. Receipts of breadstuffs still exceed all past experience, and receipts of cattle at Western cities are 1,316,. 615 head for the first quarter, a gain of 12 per cent over last year. Sales of wool at all principal markets for the year thus far ex-

principal markets for the year thus far exceed last year's, indicating a larger manufacture. Coat is dull but firm, sellers "gradually retting up to schedule prices,"

A better tone with larger sales is seen in iron. The output is reduced?,500 tons weekly, and improved demand is seen for plate, structural and sheet iron. Copper is dull, with indications that the combination has failed. Some concessions are seen in coke and tin plates. Lead is dull, but tin rises a a little. of staples since the first of the month from

Speculation has been stronger, wheat advancing 3½ cents; corn, 3 cents, and cotton 1-16, with smaller receipts. Oil is 1 cent higher, but coffee lower.

The following table, compiled by Brad-street's, gives the Clearing House returns for the week ending April 7, and the percentage of increase or decrease as compared with
