

the front on seco gence, alacrity and harmony, it will be difficult to accomplish very much in the way of "downing the machine," except to elect occasionally a Democrat or a dark horse to high office.

The convention of Wednesday will certainly be "Quay's convention," to repeat an expression often used of late years. The appearance in the field against him of a elever and plucky antagonist, the organization of anti-Quay clubs, the direct issue made between Dalzell and Quay in nearly every county which has up to this time held its primaries for the nomination of mem hers of the Legislature, have had the effect to arouse the triends of the Senator as they have not been aroused for long years.

The First Fight for Ten Years.

For ten years no fight has been made against the Senatorial candidate of what 15 called "the machine," and this one comes under circumstances which has injected new life into all the dormant energies of "the machine," as will be manifest from the at. tendance of Senator Quay's friends at the convention, and the complete control of that body by him through his ever-loyal friends.

Naturally the chief interest here, generally speaking, is in the treatment of the Presidental question by the convention. No one expects the convention will declare itself in favor of the renomination of Harrison. Even if all the reports of a renewal of cordiality between the President and the Senator were true, no instruction of the to commit suicide. That both seriously in national delegates for Harrison would be tended to carry out the compact, needs no given. The delegation from Pennsylvania further proof than the fact that Casel's dead will go to Minneapolis uninstructed, it is body now lies in the morgue and Spania thought, even in the matter of voting as a may not recover from the wounds inflicted unit. This, however, is yet a mooted quesby his own hands. tion. The trouble is, such instructions are not binding. National conventions have decided that a member of a delegation who refuses to submit to instructions in regard to the unit rule shall have the right to vote his convictions.

Possibility of the Unit Rule

It was learned that Casel had recently re-ceived a letter from Germany informing him of the death of his father, who, accord-ing to the statement of the deceased, was a man of some prominence and wealth. The news was a great shock to the son, whose grief seemed to increase daily. Five hours after Casel's body was found in the soloon with several deep gashes in his neck, har-ing tried to cut his throat with a pocket knite. When taken to the station he begged the officers to shoot him. After his wounds were dressed he was pre valled upon to explain his attempt to kill himself. He said he and his wire had not lived happily together, and a week ago they had separated for good. He became despondent and resolved to kill himself. Since that time he has been drinking heav-ity. Possibly, however, the unit rule may be adopted, merely to show the unanimity of the desire of the convention to please Senator Quay, if the Senator signifies his liking for such a declaration. Meantime, it may be said, the Senator asserts emphatically that he has no particular concern about the matter, and will in no way attempt to induce the convention to take any action on his account. Probably without instructions the delegates to the National Convention, who will elect Quay their Chairman and recognize him as their leader, will be quite as unanimous in following his guidance as though their instructions to do so were absolute.

Since that time he has been drinking heav-ily. He met Casel by chance and they became fast friends on the strength of both having been born in Luxemburg. They confided to each other their troubles, and Saturday evening they made a solemn agreement to getner and bought a revolver, the arrange-ment being that Casel should shoot Spania through the head and then kill himself. This plan was afterward changed, and it was decided that each should take his own life. Casel went to his room with the revolver and carifed on this part of the contract. Spania's wounds are scrions, but there is a probability that he will recover. The fact is no one expects any other nomination than that of Mr. Harrison, and instructions upon any matter are not considered highly important. I have said that Mr. Harrison does not expect instructions for him. He does expect, however, that, as a matter of form, his name and administration will be mentioned in the resolutions. Here at the Capital curiosity is centered upon this one point, and that passage of the resolutions will be scanned eagerly and read between the lines to discover, if that may be, the real relations of Harrison and A Brother and Sister Are Arrested for Sys Quay.

Harrison Sure to Be Indorsed.

I am assured that the resolutions will contain a hearty indorsement of the administration of President Harrison. Since the withdrawal of Blaine the Senator has recognized the almost inevitable occurrence of the renomination of Harrison, and has taken no practical steps in opposition. The truth is, the Senator has never felt

The wagon trains through the Cherokee strip to Oklahoma parallel the Rock Island Rail-road, and looking out of the car window one is sure of seeing at almost any stage of the journey, a moving prairie town. The southbound wagons can be seen for many miles crawling along the bald prairie. There are all sorts of them—prairie schoon-ers, buckboards, buggies, spring wagons and there are pilgrims on horseback and afoot, some of with no more goods than the olothes they wear, others driving bunches of fat cattle before them.
