TERRIBLY SCARED! AND BADLY DEFEATED.

Every indication proves that they are COMPLETELY KNOCKED OUT.

A few rounds of truthful exposure did it. This is how it was accomplished: At the commencement of this season Messrs. Eisner & Phillips announced the adoption of their small profit system. Every newspaper last week made a mention of their phenomenal success caused by the announcement. This, combined with the reputation of the pioneers of the Pittsburg Clothing trade, was sufficient assurance for veracity, and that is what knocked competition silly, judging from the actions of a few competitors, especially on last Saturday.

Well-Lighted City Streets.

To complete the electric light plant, bonds were issued for \$100,000, bearing a 4 per cent interest. This secures to the city its own electric light plant, wholly within its control, and does away with the expense of gas. The extension of this system can be made from year to year without any further increase in indebtedness, as appropriation is made to cover the cost of the extension and extension when and where needed. The change from gas to electricity is well worth the cost. It is a step in the direction of progress, and is fully abreast with commendatory praise from all citizens.

Helped Out by Pittsburg Decisions.

The late decisions of the Supreme Court in relation to our neighboring city may help solve this problem, which has not yet been cleared. However this may be, the city will make an effort to collect a fair proportion of the above work, but in any event the operation of the plant, thoroughfare will ultimately vastly improve the west end of the city, leaving as it does direct to Bellevue, a street of the same stretch of property for improvement, which other cities have had to pay for. It has remained its only for agricultural purposes. Rapid transit over this new thoroughfare is building it up into a business street, and largely improved, thus adding to the tax base of the city.

RENEWALS BECOMING A THING OF THE PAST.

We will soon reach the last issue of bonds for which no provision is made for final payment, and therefore the sinking fund will apply provide for each maturing bond issue, and renewals will become a thing of the past. The Sinking Fund Commission during the past year has invested surplus cash in hands of the city in the form of municipal bonds, and \$1,000,000 per cent California avenue bonds. The commission has also during the year since its organization, October, 1920, through the investment of the fund, made a total of \$1,000,000. They have also paid off and cancelled during the same period, bonds of the city to the amount of \$2,000,000.
