## THE TRADE OUTLOOK

Alleghenv Harness Leather of Choice Grade in Demand, and

MARKETS STRONG AT QUOTATIONS.

The Present Season Is a Trying One to Jobbers of Breadstuffs.

PROSPECTS AS TO FUTURE PRICES

OFFICE OF THE DISPATCH, PITTSBURG, TUESDAY, April 26. Said one of our foremost harness manufacturers, in a recent interview: "The principal objection to the harness leather produced by the tanners of Allegheny is that it is too lasting. Within a few days I saw a set of harness still in use which I made more than 25 years ago. The average life of the harness I make from the products of the Allegheny tanners is little less than 15 years. My trade calls for first-class stock, and in the end it is best both for the buyer and myself to work up the best." The harnessmaker, who gave expression to these sentiments, paid to an Allegheny tanner for leather furnished in the month of March, \$5,000, and his average mouthly payments are close to \$3,000. There has been an effort of late to depreciate the value of the products of Allegheny harness leather tanneries, because the product is wheel-stuffed. Hand-stuffed leather, it is claimed, is of superior quality and greater durability. There are above 10,000 sides of harness leather turned out weekly by the seven tanneries in operation in Allegheny, and of this amount not over 500 sides are hand-stuffed. All No. I stock is moving out freely, and most of the tanners report orders ahead on this grade of goods. B grades are less active and some accumulation is reported in this line, and, as a result, there has been a slight concession in prices of late.

Breadstuffs Heavy.

Flour jobbers have not had a smooth time since the last abundant crops were garnered. The general drift of markets since last fall placed the dealer who handles large stocks placed the dealer who handles large stocks in a very difficult position. One of our foremost jobbers of flour had this to say of trade in this line: "Our business requires us to keep on hand a large quantity of stock, and, with markets weak and declining, as they have been for the past six months, we have found it difficult to save ourselves from losses, and have not always succeeded in so doing.

losses, and have not always succeeded in so doing.

"The jobber of flour, who comes out more than even in the transactions of the past few months, has reason for congratulation. The producer and the dealer find few crumbs of comfort in the present situation of trade. But this is a royal time for the consumer, as he has his breadstuffs at lower prices than for many a year." What is true of breadstuffs is also true of all articles that enter into household expenses. The average price of the articles that enter into the daily life of the people is more than 33 per cent less than what it was a year ago.

Crop Estimates.

A journal has this to say of the situation and outlook in cereal lines:
"The opening of navigation on the lakes, which is soon to take place, will be the sigwhich is soon to take place, will be the sig-nal for a greatly increased movement in the export of breadstuffs, a diminishing volume of which has been going forward during the last three or four weeks. Fortunately, specu-lation in both corn and wheat has been, and is, at a low ebb, which prevents any sudden advances in prices, which always serve as a check to a steady movement. There is no question about the extraordinary surplus of both of these cereals in this country, and if it does not seek a consumer's market now, it will result in a precipitate movement later on when the new crop, especially of winter wheat, ripens. The Government report of crop estimates was necessarily very uncerwheat, ripens. The Government report of crop estimates was necessarily very uncertain; generally the average condition was below that of a year ago, as we are later in our season this year than last; but there is good reason to believe that the April, or at latest the May, report will show up much better. The new planting is very heavy, including the increased acreage in the South, where, it is reported, a much diminished cotton crop is going in. This is as it should be; the South cannot afford to plant its usual acreage of cotton; by so doing it would help to utterly orippie its own home resources, after the enormous cotton crops of 1850 and 1801."

### ANOTHER STRONG DAY.

Wheat in the Bulls' Favor, but Rather Dull -Bad Weather Reports From the West -Corn Weak and Unsettled-Hog Products Somewhat Irregular.

CHICAGO-The strength in wheat co inued to-day, though there was little animation in the market. The other cereals were rather easier early, but gathered strength toward the close. Pork acted in sympathy with the grain markets to a considerable extent.

The influences most potent in the wheat

siderable extent.

The influences most potent in the wheat market were the weather reports for the West and Northwest. In some parts of the Northwest the mercury is said to be down to the freezing point, with rain in some localities, while sleet storms were said to be quite extensive through Kansas and Nebraska. May started at 81½c, adont noon. July opened at 81½c, advanced to 81½c and back to 81½c, with 81½c the ruling price at noon. There was little for sale except by Pardridge. Outside domestic markets were inclined to firmness, and the late Liverpool cables were a trifle higher on the futures. With little wheat on sale and good covering by the short interest, the firmness became decided, though without very marked advance. May closed at 81½681½c and July at 81½c.

Corn was unsettled and weak early, making a sharp decline, but with nearly all the loss subsequently recovered. May started at 41½c, or ½c below the closing price of yesterday, but there was a sharp break to 41c. There was a sharp upturn, May selling back to 41½c, and closed at 41½c.

Oats were steady all day, closing at about yesterday's last figures.

Hog products were in better demand and higher. Pork made a sharp advance of about 15c in the forenoon over yesterday's last prices, then receded slightly but recovered and closed at the outside figures of the day. Lard and ribs were steady and firm.

The leading futures ranged as follows, as cor-

Condition of the Market as Presented by People on the Inside.

BERGER PROPERTY CHANGES OWNERS

It is a peculiarity of property owners that as soon as they discover a sale in their immediate neighborhood they at once see greater attractions in their holdings and roceed at once to mark up values. Sometimes the visit of a prominent capitalist or broker to a district will have the same effect upon owners. They have sudden visions of golden wealth, which in many cases are not realized; for buyers, as a rule, have at least an average amount of common sense, and see at once that values estimated on the basis of what somebody else has realized are purely fictitious. Owners desiring to sell should put a fair price on their property. By claiming everything in sight and exhausting the future they drive buyers from the field. A great many deals are tied up in this manner.

As showing the condition of the real estate market, Messrs. Larkin & Kennedy said that they had had more straight inquiries and offers for property in the last two weeks than in two months previously. They are now conducting negotiations involving upward of \$100,000, some of which are ex-pected to be closed in a short time. Mr. Larkin added: "The reasons for this activity are the abundance of money and the difficulty of finding any other investment so safe and so sure of yielding a good return, purchasers reasoning that they not only get full value for their money, but put themselves in a position to secure the benefit of early and inevitable enhancement." Several other brokers talked in a simular vein. C. L. Straub & Sons said business had picked up materially in the last few days.

Ingram Forging Ahead, As an evidence of progress in the sub-urban districts Mr. Walter Morris, of Morris & Aisbitt, said yesterday that 41 houses by actual count are in process of conhouses by actual count are in process of con-struction at Ingram. All of these structures are of a good class, some of them costing as much as \$8,000. It follows that the lot mar-ket is active. Mr. Morris added: "Ingram lacks but one thing to make its attractions to home-seekers complete—rapid transit— and there is a reasonable assurance that this and there is a reasonable assurance that this want will soon be supplied, surveys for the extension of the West Endroad having been completed and the route staked off. Improved locomotion accomplished, the Ingram district will be in a position to give the East End a tussle. It has the advantage of lower prices and a wider scope of territory to select from. The fact that people of high position and means are turning their faces toward this district is a good augury for the future."

Philadelphia Company Statement Fulfills Peg-Tractions Receive More Attention

A fair amount of business was transacted on 'Ghange yesterday, but, with two or three exceptions, changes in quotations were unimportant. Philadelphia Gas sold up to 1914. The statement of the Company's affairs apimportant. Philadelphia Gas sold up to 1914. The statement of the Company's affairs appeared in time for the afternoon call, and it was not disappointing, showing that a large part of the debt has been wiped out and greatly increased business.

There was some movement in the street railways, showing that investors have not forgotten their existence, but no material departure in prices. Stocks closing up for the day were Philadelphia Gas and Citizens' Traction. Those closing down were Pipeage and Switch and Signal. There was no pronounced expression to indicate changes either way, but a steady undertone favored a higher range of prices when the market escapes from its moorings.

Bids at first call were 310 Pleasant Valley at 25, 3 Ohio Valley Gas at 20, 12 Chartiers Gas at 194, 100 at 194, 11 Switch at 175, 4 Wheeling Gas at 22. Third call, 10 Airbrake at 11, 220 Electric scrip at 36, 310 Pleasant Valley at 25, 20 Citizens'. Traction at 6134, 50 Philadelphia Gas at 194, 50 Duquesne I metion at 27. At the close or the afternoon call the unlisted tractions were quoted: Birmingham, 267, 51d, offered at 275, if Manchester, 324, 51d, offered at 40: Duquesne, 37 bid, offered at

### IRREGULAR AND DULL

DESCRIBES THE BUSINESS IN STOCKS ON WALL STREET,

Hocking Valley and Reading Score Advances-A Raid on Grangers Is the Weakening Feature-New York Central, Sugar-and Rock Island Down. New York, April 26.-The stock market

showed a diminishing volume of business, while the interest in the transactions and the width of the fluctuations were reduced to a minimum by the approaching half holfday and the waiting attitude of operators present. There were few outside orders in the market and London did nothing, while the room traders who monopolized the trading displayed no disposition to enter into new engagements. There was no news

the room traders who monopolized the trading displayed no disposition to enter into new engagements. There was no news of importance.

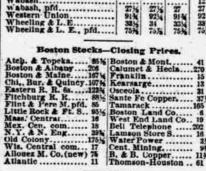

The opening was made with very moderate transactions and at only slight changes from last night's figures, while the list, as a whole, showed an advancing tendency immediately. The execution of stop orders in mediately. The execution of stop orders in Sugar resulted in a decline of 1½, but Hocking Valley rose I per cent and Reading later in the day showed an equal gain. All other changes were confined to fractions until the last hour, when there was a vigorous raid made upon the Grangers, which affected the rest of the list to such an extent that the small gains which had been scored during the day were generally wiped out, and Rock Island dropped I per cent from its best figures, Burlington following closely.

Sugar, however, railied a little, and the strong stocks of the forenoon had gone back a little, which left the entire list only fractionally changed from last night. The close was quiet but heavy at the reaction. The final changes are irregular, but for fractions only, though declines of ½ in New York Central and ¾ each in Sugar and Rock Island have some significance.

The total sales of stocks to-day were 17,466 shares, including Atchison, 6,916; Chicago Gas, 3,68; Pelaware, Lackawanna and Western, 3,300; Hooking Valley, 6,200; Northern Pacific preferred, 7,527; New England, 9,635; Reading, 35,900; St. Paul, 5,020; Western Union, 5,105.

Railroad bonds were more active than for several days, and the demand extended to a large number of issues. While the changes, as a rule, were without special interest, a firm temper prevailed and most issues are slightly higher this evening. The only feature was the animation and weakness in the Azchison incomes, which furnished \$204,000 out of a total of \$1,727,000 for the day. They closed only a small fraction lower, however. The following table shows the prices of active stocks on the New York Stock Exchange yesterday. Corrected dail

Propical Fruits Not Active—Cereal Markets

OFFICE OF THE DISPATCH, PITTSBURG, TUESDAY, April 26.

were reported yesterday at 141/2c, but jobof markets. Apples are in active demand at better prices than have been obtained any time this season. Potatoes are still reany time this season. Potatoes are still re-ported slow. In tropical fruit lines are steadily increasing receipts of bananas and pineapples, with weakening markets. Deal-ers hope for warmer weather, which will undoubtedly boost prices all along tropical fruit lines. The recent cool wave has served somewhat to check trade all along produce lines.
